

Year 12, 2021

Semester Two Report

Aiden Bergheim

Year Patron Comment:

Aiden is a conscientious student who has achieved excellent results this year. He has performed particularly well in Business Studies, Mathematics Advanced and Mathematics Extension 1 and 2, reflecting his unwavering focus and effort. Aiden has also been an integral member of the Prefect Team and has noted that what he will miss most after graduation is playing soccer with his friends at lunchtime. His positive attitude and strong results augur well for the Higher School Certificate Examinations. With continued diligence, Aiden should reach his goal of studying engineering at university.

Mrs Carly Easterbrook

College Principal

Mrs Mira Hasofer

Head of Senior School

Mr Ryan Gill

Year 12 Higher School Certificate Course

Masada College reports on your child's progress with written reports twice a year and through interviews and meetings. You may contact the School to discuss this report and your child's progress with the Teacher, Head of Learning Area, Year Patron or Head of Learning and Teaching.

Key to Grades

A - Advanced Achievement: The student demonstrates extensive knowledge of content and understanding of course concepts, and applies highly developed skills and processes in a wide variety of contexts. In addition, the student demonstrates creative and critical thinking skills using perceptive analysis and evaluation. The student effectively communicates complex ideas and information.

B - High Achievement: The student demonstrates thorough knowledge of content and understanding of course concepts, and applies well-developed skills and processes in a variety of contexts. In addition, the student demonstrates creative and critical thinking skills using analysis and evaluation. The student clearly communicates complex ideas and information.

C - Satisfactory Achievement: The student demonstrates sound knowledge of content and understanding of course concepts, and applies skills and processes in a range of familiar contexts. In addition, the student demonstrates skills in selecting and integrating information and communicates relevant ideas in an appropriate manner.

D - Developing Achievement: The student demonstrates a basic knowledge of content and understanding of course concepts, and applies skills and processes in some familiar contexts. In addition, the student demonstrates skills in selecting and using information and communicates ideas in a descriptive manner.

E - Elementary Achievement: The student demonstrates an elementary knowledge of content and understanding of course concepts, and applies some skills and processes with guidance. In addition, the student demonstrates elementary skills in recounting information and communicating ideas.

Assessment is based on formal assessment tasks. Grades are awarded for each listed course outcome and the course grade is a summary of student achievement in that course to date.

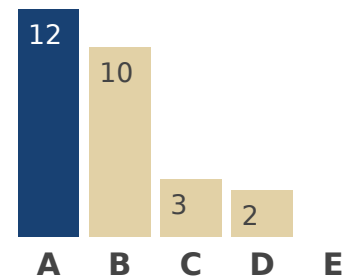

Business Studies

Course Description

This semester students have studied the topic of Marketing where they have been involved in the development and implementation of successful marketing strategies in business. Their final topic was Human Resource Management where students learnt the contribution of human resources to business performance. Assessment of the Marketing and Human Resources topics was through a research assignment with an oral component which concentrated on applying the content and concepts of the topics to a case study.

Grade: A

Total students in cohort: 27

Learning Dispositions	Always	Usually	Sometimes	Seldom
Uses learning time productively	☐	☐	☐	☐
Respects others in the classroom	☐	☐	☐	☐
Collaborates well with others	☐	☐	☐	☐
Completes tasks to the best of their ability	☐	☐	☐	☐
Is well organised	☐	☐	☐	☐
Learns well independently	☐	☐	☐	☐
Responds effectively to feedback	☐	☐	☐	☐

Comment

Aiden has made excellent progress in Business Studies this semester as indicated by his outstanding Trial Examination result. He is to be congratulated on his rank of first in the recent examination and overall in the course as it is a reflection of his hard work and his ability in the subject. Aiden must take his time to write legibly in the final examination, as his script was very difficult to read especially in the report and extended response sections of the paper. His effort in the major business assignment was also particularly pleasing and indicated thorough research and application to the case study. Aiden a quiet, diligent and conscientious student who has a very good in-depth knowledge of the Business Studies course. To further consolidate his results he must ensure he completes practice papers from past and current trial papers on google classroom as this is important in his final preparations. Aiden is also encouraged to continue to revise the syllabus content as this will help to ensure his success in the final examination.

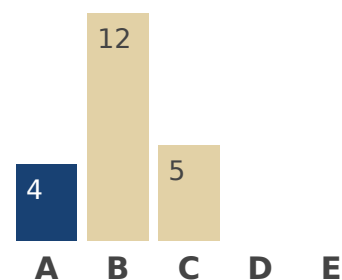

Robyn Grana

Economics

Grade: A

Course Description

This semester students examined the economic policies used by governments to address events in the Australian and global economies alongside The Global Economy topic. The Term Three assessment task focused on applying economic theory to contemporary events in the Australian economy, with a judgement on how the government could achieve economic objectives effectively. Students studied the role and developments of the global economy and engaged in a case study.

Total students in cohort: 21

Learning Dispositions	Always	Usually	Sometimes	Seldom

Responds effectively to feedback	☐	☐	☐	☐

Comment

Aiden has consistently performed at a high standard throughout the Higher School Certificate Economics course. His third assessment task demonstrated outstanding economic theory embedded within consistent analysis. Aiden's responses are well-considered and structured reflecting his conscientious approach to taking on feedback. He is encouraged to work on his time management and to ensure his responses are concise. In the Trial Examination, Aiden showed a thorough understanding of economics, however, he is encouraged to ensure that his writing is legible as illegible writing cannot be marked. Overall, Aiden is to be congratulated for his positive and hard-working attitude to his studies and is best placed to utilise the skills and experiences gained for tertiary study.

Joanna Hung

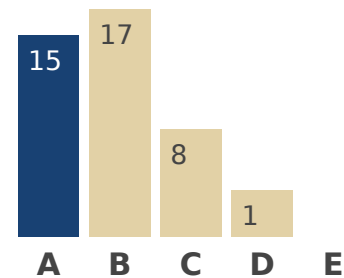

English Advanced

Course Description

This semester Advanced English students studied Module B: Critical Study of Literature in the context of the prescribed text T.S Eliot poetry. Students composed a multi-modal assessment task. Module C: Craft of Writing developed skills in the composition of discursive, imaginative, reflective, persuasive and informative tasks. Skills in analysis and reflection of writing were developed in the context of various short prescribed texts including Colum McCann's What Time Is It Now, Where You Are? and Margaret Atwood's Spotty-Handed Villainesses.

Comment

Aiden is an outstanding student who has sustained an unwavering determination to enhance the sophistication and complexity of his written responses. In order to achieve this, he has submitted, resubmitted and sought classification on all modules and elements of the course. Aiden brings a logic and critical disposition to the learning context and his responses are reflections of considered, deep and nuanced consideration of texts and ideas. As a priority, Aiden needs to work on ensuring his handwriting is legible so as to facilitate rather than impede reading. Aiden's intrinsic motivation, work ethic and determination to always achieve his personal best augur well for success in his future studies.

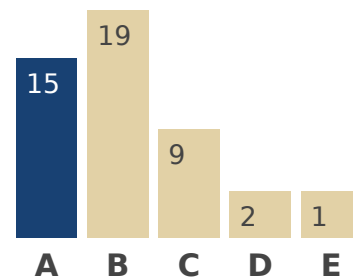

Karen McEwen

Mathematics Advanced

Course Description

In Semester Two, students have worked on exploring logarithmic, exponential and trigonometric functions using calculus and applications of mathematics to motion and rates, display and interpretation of continuous probability distributions. Emphasis has been placed on developing a deep understanding of content and being able to apply learning and understanding to solve problems across several topics. This course has provided students an understanding of and competence in aspects of Mathematics applicable to the real world and supports concurrent studies such as Science and Commerce.

Grade: A

Comment

Aiden is an extremely capable mathematician, who has demonstrated a very high level of understanding in all aspects and content of Mathematics Advanced. He is currently studying Mathematics Extension 2 which has extended his skills well beyond the scope of this course.

Pauline Wong

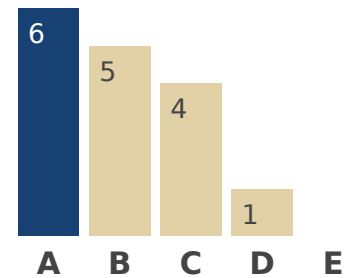

Mathematics Extension 1

Grade: A

Course Description

In Semester Two, students focused on applications of calculus to determine volumes of revolution, vectors and projectiles, forces and motion and differential equations. The Binomial theorem was further applied to sample population distributions and approximating probabilities with the normal distribution. Emphasis has been placed on developing a deep understanding of content and being able to apply learning and understanding to solve complex problems across several topics. This course is designed for students with mastery of the Mathematics Advanced course and provides greater depth in several of the advanced topics and a higher competence in proof and physical applications of calculus including modelling patterns.

Total students in cohort: 16

Comment

Aiden has excelled at this level of mathematics and uses his talents to assist his peers in their understanding of difficult problems and applications. Aiden's investigation assessment on the centre of mass demonstrated his ability to delve into unknown complex thought and structures in applications of mathematics. His quality responses in the Trial Examination indicate a clear understanding of calculus and trigonometry and all of its applications in motion, complicated problems in rates of change, differential equations and integration. Some areas that have shown improvement include logarithm and exponential functions with applications into rates of change and differential equations. Aiden needs to relearn sample population distributions in detail to ensure correct understanding.

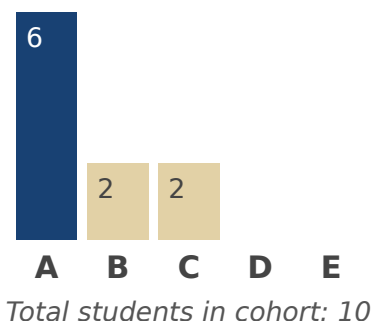

Pauline Wong

Mathematics Extension 2

Grade: A

Course Description

In Semester Two, students have studied an extension into mathematical induction, vectors including proving geometrical relationships and have studied simple harmonic motion and the motion of objects undergoing resistive forces such as projectiles. Emphasis has been placed on developing a deeper understanding of all topics and building experience in handling complex and difficult problems. Students learn mathematics through interaction, technology and investigation and they are encouraged to communicate and explore their ideas in a number of ways. Mathematics Extension 2 is a special interest subject and is designed to challenge students with the highest mathematical ability.

Comment

Aiden is an exceptional mathematician who has worked with enthusiasm and thoroughness in all topics of the course. He has demonstrated clarity in understanding and developed outstanding problem solving skills to successfully deal with complexity. His responses in the Trial Examination were a reflection of his critical thinking and determination. Some topics that require further review include difficult integration, integration of recurrence relations, using vectors in proving geometric properties and proofs using contradiction and negation. To explore deeper and enhance his results, Aiden needs to continue to apply himself to more examination questions, both structured and unstructured within time constraints. He needs to build his experience in handling large mark questions to ensure that he has sufficient strategies and experience to maintain efficiency. His Trial Examination also indicated a need to take the time to write clearly to avoid unnecessary errors and loss of marks.

Pauline Wong

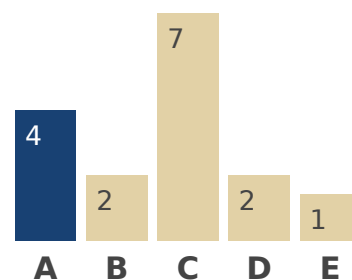

Physics

Grade: A

Course Description

This semester students have learned to describe and analyse circular motion, motion in a gravitational field and projectile motion. They have explained and analysed the electric and magnetic interactions due to charged particles and currents and evaluated their effect both qualitatively and quantitatively. Students conducted investigations to collect valid and reliable data and then analysed and evaluated results.

Comment

Aiden is a diligent student who exhibits a very focused and mature approach to learning. He willingly engages in class discussions offering insightful contributions. Aiden is to be commended for his result of 85% in the Module 7 assessment which demonstrated his ability to consolidate and analyse information gained from research. Continuing to practise past papers should further improve his results.

Susan Virgona
