

Year 12, 2019
Semester Two Report
Jayse Bergheim

Year Patron Comment:

These pleasing reports are testimony to the level of commitment that Jayse has invested in his studies this semester. He is commended for this diligence as well as his achievements, earning impressive results in all subjects. His aptitude for Mathematics and Economics has been rewarded with the Stan and Zelda Marks Prize for Economics and the Fred Joseph Memorial Prize for Mathematics and his overall achievements have seen Jayse named Dux of Year 12. Consistent application for the remaining weeks prior to the final examinations should enable him to achieve outstanding Higher School Certificate results. I wish Jayse success in the examinations and in his future endeavours.

Ms Lyn Rutherford

College Principal

Mr Martin Tait

Head of Senior School

Ms Megan Laing

Year 12 Higher School Certificate Course

Masada College reports on your child's progress with written reports twice a year and through interviews and meetings. You may contact the School to discuss this report and your child's progress with the Teacher, Head of Learning Area, Year Patron or Head of Learning and Teaching.

Key to Grades

A - Advanced Achievement: The student demonstrates extensive knowledge of content and understanding of course concepts, and applies highly developed skills and processes in a wide variety of contexts. In addition, the student demonstrates creative and critical thinking skills using perceptive analysis and evaluation. The student effectively communicates complex ideas and information.

B - High Achievement: The student demonstrates thorough knowledge of content and understanding of course concepts, and applies well-developed skills and processes in a variety of contexts. In addition, the student demonstrates creative and critical thinking skills using analysis and evaluation. The student clearly communicates complex ideas and information.

C - Satisfactory Achievement: The student demonstrates sound knowledge of content and understanding of course concepts, and applies skills and processes in a range of familiar contexts. In addition, the student demonstrates skills in selecting and integrating information and communicates relevant ideas in an appropriate manner.

D - Developing Achievement: The student demonstrates a basic knowledge of content and understanding of course concepts, and applies skills and processes in some familiar contexts. In addition, the student demonstrates skills in selecting and using information and communicates ideas in a descriptive manner.

E - Elementary Achievement: The student demonstrates an elementary knowledge of content and understanding of course concepts, and applies some skills and processes with guidance. In addition, the student demonstrates elementary skills in recounting information and communicating ideas.

Assessment is based on formal assessment tasks. Grades are awarded for each listed course outcome and the course grade is a summary of student achievement in that course to date.

Business Studies

Grade: A

Course Description

In Semester 2, students have studied the topic of Marketing where they have been involved in the development and implementation of successful marketing strategies in business. Their final topic was Human Resource Management where students learnt the contribution of human resources to business performance. Assessment of the Marketing and Human Resources topics was through a research assignment with an oral component which concentrated on applying the content and concepts of the topics to a case study.

Total students in cohort: 22

Learning Dispositions	Always	Usually	Sometimes	Seldom
Uses learning time productively	☐			
Respects others in the classroom	☐			
Collaborates well with others	☐			
Completes tasks to the best of their ability	☐			
Is well organised	☐			
Learns well independently	☐			
Responds effectively to feedback	☐			

Comment

Jayse has made excellent progress in Business Studies this semester, as indicated by his outstanding Trial Examination result. He is to be congratulated on his rank of second in the this examination as it is a reflection of his hard work and his ability in the subject. His effort in the major business assignment was also particularly pleasing and indicated thorough research and application to the case study. Jayse is a quiet, diligent and conscientious student who has a very good in-depth knowledge of the Business Studies course. To further consolidate his results he must ensure he completes practice papers as this is important in his final preparations. Jayse is also encouraged to continue to revise the syllabus content as this will help to ensure his success in the final examination.

Mrs Robyn Grana

Economics

Course Description

In Semester 2, students have been studying the key economic issues facing Australia, including economic growth, inflation and unemployment. Students have also examined the economic policies used by governments to address events in the Australian and global economies. The Term Two and Three assessment tasks focused on applying economic theory to contemporary events in the Australian economy, with a focus on how recent global developments, such as the trade war between the US and China which could affect consumers, firms and the government.

Comment

Jayse achieved an excellent result in the Trial Examination in Economics. He demonstrated strong content knowledge, a very good grasp of current economic developments and a clear and consistent writing style. Jayse should focus his efforts on essay writing. He should regularly complete past Higher School Certificate-style essay questions and submit them to his teacher for feedback. Jayse should also continue to collect articles about current economic developments, especially about the Australian and Chinese economies. He is congratulated on his efforts in Economics this year.

Mr Alexander Symonds

English Advanced

Course Description

This semester Advanced English students studied Module B: Critical Study of Literature in the context of the prescribed text T.S. Eliot poetry. Students composed an analytical essay assessment task. Module C: Craft of Writing developed skills in the composition of discursive, imaginative, reflective, persuasive and informative tasks. Skills in analysis and reflection of writing were developed in the context of various short prescribed texts. Students were assessed through the composition of a narrative and reflection statement.

Grade: A

Total students in cohort: 24

Learning Dispositions	Always	Usually	Sometimes	Seldom
Uses learning time productively	☐			
Respects others in the classroom	☐			
Collaborates well with others	☐			
Completes tasks to the best of their ability	☐			
Is well organised	☐

Comment

Jayse has continued to apply himself conscientiously to English completing additional practice responses and seeking further clarification on his approaches to respective questions. In the Trial Examinations, Jayse performed creditably in the Common Module and Modules A and B. A disappointing result in Module C suggests the need for further practice at all types of creative writing, notably imaginative, discursive and persuasive responses. Investigation and practice at composing reflection tasks would also be advantageous. Even though preparation for this Module is difficult due to the variety of responses which could be asked, and its nature as a broad ranging creative task, Jayse would be advised to prepare in advance possible scenarios or ideas which could be implemented. Jayse has been outstanding in its diligence and commitment this year.

Mrs Karen McEwen

Mathematics

Course Description

In Semester 2, students have worked on exploring logarithmic, exponential and trigonometric functions using calculus, applications of calculus to the physical world and probability. Emphasis has been placed on developing a deep understanding of content and being able to apply learning and understanding to solve problems across several topics. This course has provided students an understanding of and competence in aspects of Mathematics applicable to the real world and supports concurrent studies such as Science and Commerce.

Grade: A

Comment

Jayse is to be commended on his thorough preparation for the Trial Examination. His efforts were rewarded with an excellent result of 96%. He has a very sound understanding of all topics of the course and can fluently apply his skills and knowledge. His mistakes in the paper were minor in nature and can be easily fixed and used as a learning opportunity. In the lead-up to the Higher School Certificate Examination, Jayse should practise as many past papers as possible. He should do them under timed conditions so that he can work out exactly how to pace himself, as well as practise concentrating for the duration of a 3-hour examination. He should ensure that he tackles the very challenging questions that are found towards the end of every paper and focus on getting ideas about approach and method of solution from them. If Jayse maintains his current efforts, he should achieve his goals in the Higher School Certificate examination.

Mrs Janet Krawitz

Physics

Course Description

In Semester 2, students have described and analysed evidence for the properties of light and evaluated the implications of this evidence for modern theories of physics. They have explained and analysed the evidence supporting the relationship between astronomical events and the formation of atoms and related these to the development of the current model of the atom. They have further developed their scientific, critical thinking and communication skills. They were assessed in a test based on their research on various aspects of the properties of light. The Trial Higher School Certificate Examination assessed their Physics knowledge and skills.

Grade: A

Total students in cohort: 14

Learning Dispositions	Always	Usually	Sometimes	Seldom

Comment

Jayse is a conscientious, capable Physics student who is focused on his work in class and completes all set tasks with care. He has been working consistently and clarifying his understanding of concepts by asking questions. His Trial Examination result of 73% was pleasing, indicating a thorough knowledge of the key concepts and an ability to interpret questions and formulate appropriate, detailed written responses. He should, however, read questions more carefully and check his calculations. Jayse has a thorough knowledge of the content of the Physics syllabus and should continue to practise answering past examination questions in order to refine his skills in formulating well structured, concise responses.

Ms Deborah Joffe
