Pastoral Comments

Mentor Comment

It has been lovely getting to know Tom over the past 5 years. He is an intelligent and mature young man who has enjoyed pursuing all that the school has offered. In terms of his academics, Physics and Mathematics Extension 1 subjects have pushed Tom this year, but he has seen academic improvements across his other subjects. His move to the Boarding House last year took courage and commitment but he managed it with aplomb and it has allowed him to be settled and focus on his school work. His subject comments speak of a student who is usually focused and diligent when it comes to work, but has fallen behind in key areas. He will need to spend the next few months focusing and finding that extra bit of fuel to get him where he wants to go. It has been a pleasure knowing and mentoring Tom over these past five years and I wish him all the best in the upcoming exams and whatever he decides to do after school. I look forward to seeing what this impressive young man is capable of achieving in life.

Mr Joe Glover

Comment:

Tom's report is pleasing in some respects with significant improvements in some subjects. Others will require some attention as the final examinations approach. That said, Tom has grown and matured into a young person of good character, and I trust he will look back on his time here proud of all he has achieved and with a bright future ahead. I wish Tom every success.

Mr Andrew Quinane
Deputy Headmaster

Co-Curricular Involvement

Term Three 2023

Thomas Chanter

2022/23 Summer Sport

Rowing Senior - 1st Eight

Tom is a naturally quiet and reserved individual who is very well respected by his peers. It was terrific to see his own self-confidence grow this season and his increased willingness to voice his thoughts to the crew. This confidence was tied in many ways to his improving testing performances and his greater sense of belonging in the crew. Finishing the season with the 3rd top erg, I think Tom even surprised himself with what he could achieve. The racing highlights that he was a crucial part of include the wins in Tasmania after a challenging camp and the podium finish at the State Championships. We thank Tom for his determination and maturity that he always displayed and look forward to following his progress in the future.

Mr Blair Jenkins

2023 Outdoor Education

Cadets

Tom has enjoyed the past four years as a cadet in the NCACU, serving as Cadet Under Officer of the C18 Platoon which was recognised as the leading C Coy Platoon for 2023. His experience in outdoor education has helped develop important skills in survival and decision making within a challenging environment. Tom has taken part in camping, treks, parades and training sessions that have helped him to grow in decision making skills within an outdoor setting. He will take these invaluable experiences with him as he learns to navigate through whatever future circumstances Tom will be faced with in life. I commend him for his commitment throughout the senior years of the Cadet program.

Rev Geordie Barham

2023 Winter Sport

Rugby 2nd XV

Unfortunately, injury interrupted Tom's 2023 rugby season just as performance and confidence were improving. However, it was extremely pleasing to see this did not affect Tom's positive involvement within the team. Tom showed a mature and selfless commitment to the senior rugby squad that was highly appreciated. Tom was able to re-join the 2nd XV for the final games of the season, where he displayed his passion for the team, his teammates, and the College with his best game of the season against Scots at Back to Newington Day.

Mr Joel Wilson

Course Description

Boarding at Newington College provides a unique opportunity to develop lifelong skills and friendships in a boarding community that is based on our six key traits of trust, forgiveness, integrity, positivity, compassion and resilience.

Newington Boarding aims to:

- Provide a safe environment that motivates boys to achieve their personal best in their academic, co-curricular and spiritual pursuits
- Provide a strong sense of community that boys feel proud to be a part of
- Provide a complimentary addition to the boarders' home life, to add value to boarders' schooling experiences
- Develop self-discipline and a positive, proactive attitude to daily life

This report outlines how your son is developing in relation to his social skills, self-management, homework, health and well-being within the Boarding House.

Student Reflection

Joining the boarding house halfway through Year 11, has had a huge impact on many aspects of my life. My main goal in joining the boarding house was to improve my grades; however, it has done much more than that. In the short time that I have been here, I have not only enhanced my organizational discipline and academic performance but also forged some of my strongest friendships and had experiences that I am sure I will remember for the rest of my life.

The structure of boarding has significantly aided the development of my study habits and allowed me to pursue my athletic goals alongside my academics. It has taught me to maintain discipline in completing work, training, and maintaining my health, all while allowing me to be independent in choosing how and when I would like to complete tasks. The opportunity to board at Newington has been one of the greatest privileges I have ever received. It has allowed me to truly cherish my final year at this school where I have spent my entire life and share every moment with my closest friends.

Tom Chanter.

Boarding Profile	Rarely	Sometimes	Usually	Always
Boarding Citizen/Social Awareness				
Willingness to assist others				✓
Contributes positively, and with initiative, to the life of the boarding house				✓
Respects the views and actions of other boarders				✓
Interacts with staff and peers with both respect and courtesy				✓
Respects the privacy of other boarders and their possessions				✓
Involvement in Boarding House Activities				✓
Self-Management				
Organised, self-disciplined and punctual				✓
Respects the facilities of the house				✓
Room tidiness				✓
Undertakes duties with commitment and a sense of service				✓
Takes advantage of the school facilities				✓
Submits leave requests in a timely manner and is responsible when signing in and signing out of Boarding House				✓
Effective use of Prep Time				
Engages positively in Prep time				✓
Works collaboratively with others during Prep time				✓
Effective use of Boarding Staff to assist with study				✓
Health and Wellbeing				
Maintains Personal Hygiene (showering before bed, dirty laundry taken out)				✓
Proactive in consulting with Health Centre Staff if unwell or injured				✓
Demonstrates a commitment to physical activity and hobbies outside of school commitments				✓
Prioritises sleep and maintains a good sleeping routine				✓
Demonstrates appropriate nutritional choices outside of Boarding Meals				✓
Use of technology (smart phone/computer) for recreational and social purposes is appropriate				✓

**Course Description**

The HSC English (Advanced) course promotes an understanding and appreciation of language, literature, culture and values. In Term 2, students were assessed on their creative writing, and on their ability to evaluate their own choices as a writer. This was important for their development of skills for Module C: Craft of Writing. Students went on to study Module B: Critical Study of Literature, exploring the poetry of T.S. Eliot. The recent Trial Examinations covered all texts and topics for the HSC, including Paper 1 on the Common Module: Texts and Human Experiences, and Paper 2 on the Modules A, B and C.

Teacher Comment

Tom has proven himself to be a dedicated and focused student of English. In part, this is because he is a profoundly process-driven student – he has a capacity to identify a skill set and continue honing it until he gets it right. Tom also has a pragmatic and problem-oriented approach to his work which is very effective when it comes to the craft of constructing English paragraphs and essays. As a result, the area for Tom to focus on in preparation for the HSC Examinations is translating this methodical approach into the spontaneity and unpredictability of time-based tasks. I encourage Tom to do as many timed tasks as possible in preparation for the two English papers, and to address as many practice questions as possible. In some cases, it will be useful to write whole essays, but it will be just as useful to simply practice essay spines – introductions, paragraph openings, conclusions – in order to become more fluid at answering the question. I am sure that Tom's work ethic will ensure him success in whatever he turns his mind to, from cycling to technology, and I wish him all the best in the future.

Progressive rank (Based on all assessments): 107/150

Information on the Knowledge, Understanding and Skills Levels

Level 1

Level 2

Level 3

Level 4

Level 5

Level 6

Reading comprehension

Very limited progress understanding texts. Broad concepts loosely understood with little knowledge of detail.

Limited success understanding and/or appreciating texts. Broad concepts understood with some knowledge of detail.

Satisfactory understanding and awareness of concepts with sound understanding of different texts.

Reasonable/good understanding of concepts. Is confident and proficient with various text types.

Effective understanding of concepts. Is comfortable and proficient with various text types.

Sophisticated and critical understanding of texts and concepts. Synthesis and depth in overall comprehension of all texts.

Analytical engagement

Very limited success in writing analytical responses. More care and attention needed. Analytical terminology used insufficiently or inaccurately.

Limited success in writing analytical responses. More evidence and rigour needed. Language a little unstable. Analytical terminology used insufficiently.

Sound analytical writing with good use of evidence. Sound control of language. Analytical terminology being used appropriately.

Reasonable/good analytical writing with very good use of evidence. Reasonable/good interpretive skills and good use of analytical terminology.

Effective analytical writing with effective use of evidence. Effective control of language with some flair. Effective interpretive skills and effective use of analytical terminology.

Sophisticated analytical skills. Sustained, precise, clear and insightful language. Sophisticated interpretive skills with accomplished use of appropriate terminology.

Creative engagement

Basic creative writing skills and basic understanding of how to represent ideas for creative purposes. More care and attention needed.

Limited creative writing skills. Language a little unstable. Limited understanding of how to represent ideas for creative purposes.

Sound creative writing skills. Sound control of language. Reasonable understanding of how to represent ideas for creative purposes.

Reasonable/good creative writing skills. Good control of language. Representing ideas with insight and care for creative purposes.

Effective creative writing skills. Effective control of language with some flair. Representing ideas with insight and care for creative purposes.

Sophisticated creative writing with originality and flair. Sustained, precise, clear and insightful language. Representing ideas with originality and aplomb.

Speaking and listening

Very limited ability and/or confidence in verbalising ideas, with limited ability to listen/respond effectively.

Limited ability and/or confidence in verbalising ideas and arguments, some difficulty in listening/responding at times.

Some ability to verbalise ideas in different contexts, speaking with clarity and listening/responding well.

Good skills in speaking and listening in different contexts, sustaining ideas well and speaking with some depth and clarity.

Effective skills in speaking and listening in different contexts, developing ideas well and speaking with sustained depth and clarity.

Sophisticated skills in speaking and listening in different contexts, developing ideas eloquently and speaking with sustained depth and clarity.

Course Description

This course is intended to give students a thorough understanding of, and competence in some further aspects of mathematics which are applicable to the real world. It includes the entirety of the 2 Unit Mathematics course as a subset and focuses on mastery of these skills to enable more abstract and complex mathematics to be learned. The course is content-rich and fast-paced, enabling successful students with a solid basis for further mathematical or related studies at a tertiary level.

Teacher Comment

Tom has improved his engagement during classes this year in Mathematics. He has been asking more questions and been proactive about seeking help when required. Tom has at times fallen behind in set work and this has impacted his results from time to time. I should note that I have seen an improvement in his overall performance from his preliminary year, particularly in the Mathematics Advanced course. His responses, however, in his trial examination indicated a severe lack of preparation as he was not able to answer routine questions. To improve further before the final HSC examinations, Tom needs to target his weaknesses. Namely, he must practise questions that assess the topics of graphing techniques, conditional probability, calculus and trigonometry in the Advanced course and permutations, combinations and further calculus in the Extension 1 course. Tom must complete routine questions before practising past paper questions under timed conditions. I wish him well in his future endeavours.

Students at this level show thorough knowledge, skills and understanding that they apply independently and accurately in a range of new contexts.

Understands and solves problems involving further trigonometric equations

Students at this level show insufficient knowledge, skills and understanding of routine tasks.

Students at this level show evidence of engaging with some aspects of syllabus outcomes, but there is a need for a consolidation of the knowledge, skills and understanding that underpin the learning for this stage.

Students at this level show sound knowledge, skills and understanding that they can apply independently and accurately in a range of new contexts.

Students at this level show thorough knowledge, skills and understanding that they apply independently and accurately in a range of new contexts.

Course Description

This course is intended to give students a thorough understanding of, and competence in some further aspects of mathematics which are applicable to the real world. The course is calculus-based with a heavy number and algebra component which is useful for concurrent studies in science and commerce. It is also a necessary level for further studies in mathematics as a minor discipline at a tertiary level.

Teacher Comment

Students at this level show thorough knowledge, skills and understanding that they apply independently and accurately in a range of new contexts.

Students at this level show extensive knowledge, skills and understanding that they apply independently and accurately in a range of new contexts.

**Course Description**

During this reporting period, students undertook the modules From Universe to the Atom and The Nature of Light. The coursework involved an excursion to ANSTO as part of a depth study researching the uses of radioisotopes in medicine, agriculture and industry. This led to an exploration of the scientific evidence to support the Big Bang theory, the origin of the elements and the historical development of our model of the atom. A study of light explored the theories and observations that led to the development of the quantum model of light. Students designed an experiment to investigate radioactive decay and conducted several investigations involving behaviours of light, including interference, diffraction, polarisation and the photoelectric effect. Formal assessment included a depth study report and the Trial HSC Examination. Data from classroom and homework have also been used to determine levels of achievement.

Teacher Comment

Tom continues to find Physics challenging. Assessment task results have been patchy, with Tom's grasp of some important concepts being tenuous. He has also found it difficult to keep abreast of his homework obligations, and he seems to have been on the backfoot for much of the course. A highlight though was a respectable score in the second assessment task, where he displayed a fair understanding of electromagnetism. Results for the Trial HSC Examination probably fell short of Tom's goals. In particular, he did not perform well in the extended response question on the nature of light. He is advised to practise this style of question as the HSC examination will contain several questions of this type. In addition, Tom has not mastered the finer details of circular motion and nuclear physics. If Tom can muster a final burst of effort, then there is every prospect that he can improve on his current results, as his recent examination score does not represent his full potential.

Level 5

Level 6

Knowledge and understanding of scientific ideas

Demonstrates negligible knowledge and understanding of course content.

The student has an elementary knowledge and understanding of some areas of the course content.

The student has a basic knowledge and understanding of the course content.

The student has a sound knowledge and understanding of the main areas of the course content.

The student has a thorough knowledge and understanding of the course content.

The student has an extensive knowledge and understanding of the course content.

Planning and conducting investigations and gathering and processing relevant data and information

The student needs guidance and experiences significant difficulties applying the processes and skills of planning and conducting investigations and gathering and processing relevant data and information.

The student has achieved very limited competence in some of the processes and skills of planning and conducting investigations and gathering and processing relevant data and information.

The student has achieved a limited level of competence in the processes and skills of planning and conducting investigations and gathering and processing relevant data and information.

The student has achieved an adequate level of competence in the processes and skills of planning and conducting investigations and gathering and processing relevant data and information.

The student has a high level of competence in the processes and skills of planning and conducting investigations and gathering and processing relevant data and information.

The student has achieved a very high level of competence in the processes and skills of planning and conducting investigations and gathering and processing relevant data and information.

Applying problem solving techniques and demonstrating scientific thinking by communicating information and understanding

The student needs guidance and experiences significant difficulties communicating limited information and understanding.

The student can communicate very limited information and understanding and has very limited knowledge and skills.

The student can communicate limited information and understanding and apply limited knowledge and skills.

The student can adequately communicate information and understanding and apply knowledge, and skills.

The student can readily communicate information and understanding and apply knowledge, and skills to new situations.

The student can very readily communicate information and understanding and apply knowledge, and skills to new situations.

**Course Description**

Information Processes and Technology is the study of computer-based information systems. It focuses on information processes performed by these systems and the information technology that allows them to take place. Social, ethical and non-computer procedures resulting from the processes are considered. Different types of information systems are studied. Through project work, students will create their own information system to meet an identified need.

Teacher Comment

Tom has been a conscientious student throughout the course and did an excellent job with his preparation for the Trial Examination. He has improved on the result achieved in the exam style written assessment on the Decision Support System option topic. His efforts see him ranked fourth in the class. The raw mark he achieved in the Trial Examination was a passable band 5 result and he knows what is required to secure a band 5 result or better in the HSC Final Examination. Continued revision with a focus on the more technical aspects of the course content along with refining his written responses to leverage keywords will enable him to achieve the result he desires.

Level 2

Level 3

Level 4

Level 5

Level 6

Proposes ways in which information systems will meet emerging needs

Has achieved below the minimum standard expected.

Identifies the nature of information systems.

Demonstrates a basic understanding of information systems.

Outlines the function of information systems and information technology.

Demonstrates an understanding of information systems with respect to emerging needs.

Demonstrates a thorough understanding of information systems with respect to emerging needs.

Justifies the selection and use of appropriate resources and tools to effectively develop and manage projects

Has achieved below the minimum standard expected.

Identifies the resources and tools related to project management.

Describes the resources and tools related to project management.

Describes and applies the resources and tools related to project management.

Demonstrates a thorough understanding of the resources and tools related to project management.

Demonstrates a comprehensive understanding of the resources and tools related to project management.

Assesses the ethical implications of selecting and using specific resources and tools

Has achieved below the minimum standard expected.

Identifies ethical implications related to selecting and using specific resources and tools.

Describes ethical implications related to selecting and using specific resources and tools.

Demonstrates an understanding of ethical implications related to selecting and using specific resources and tools.

Thoroughly understands ethical implications related to selecting and using specific resources and tools.

Comprehensively demonstrates an understanding of ethical implications related to selecting and using specific resources and tools.

Analyses situations, identifies a need and develops solutions

Has achieved below the minimum standard expected.

Identifies a need for a computer based solution.

Describes the need for a computer based solution..

Demonstrates the ability to analyse a situation and describes the need for a computer based system.

Effectively analyses a situation and describes the need for a computer based system.

Comprehensively analyses all aspects situation and describes the need for a computer based system.

Selects and applies a methodical approach to planning, designing or implementing a solution

Has achieved below the minimum standard expected.

Demonstrates limited ability to apply appropriate mechanisms for problem solving.

Demonstrates considerable ability in applying appropriate mechanisms for problem solving.

Effectively selects and applies a methodical approach to planning, designing or implementing a solution.

Thoroughly applies a methodical approach to planning, designing or implementing a solution.

Comprehensively describes and demonstrates a methodical approach to planning, designing or implementing a solution.

Implements effective management techniques

Has achieved below the minimum standard expected.

Identifies a range of management techniques.

Describes a range of management techniques.

Demonstrates effective management techniques.

Demonstrates appropriate management techniques to suit a given need or situation.

Comprehensively describes and demonstrates a wide range of management techniques to suit a given need or situation.

Uses methods to thoroughly document the development of individual and/or group projects

Has achieved below the minimum standard expected.

Identifies the need for documentation related to individual or group projects.

Describes a limited range of documentation relating to individual or group projects.

Demonstrates the use of documentation relating to individual or group projects.

Thoroughly describes and demonstrates an extensive range of documentation techniques relating to individual or group projects.

Comprehensively describes and demonstrates an wide range of documentation techniques relating to individual or group projects.

Course Description

This course provides students with the opportunity to develop skills in designing and developing software solutions, project management and communication. It does this by looking at the different ways in which software can be developed, the tools that can be used to assist in this process and by considering the interaction between software and other components of computer systems. Students apply a systematic approach to develop and document software solutions using a variety of data structures and language facilities.

Teacher Comment

Tom has developed a good knowledge of the course content and demonstrated this well in the Trial HSC Examination. He now needs to revise and practise his exam technique to ensure his performance in the final exam delivers the best result of which he is capable. His Major Project included some very good technical documentation but his time management and reluctance to seek help to solve problems meant that his solution did not address all the project requirements to the best of his ability. Tom now has the time and the opportunity to prepare for the final exam and will be able to achieve the result he desires by applying himself to this revision.

Knowledge, Understanding and Skills - See over page for explanation of KUS levels.	Level	6	5	4	3	2	1	N/A
Applies appropriate development methods to solve software problems			✓					
Applies a modular approach to implement well structured software solutions and evaluates their effectiveness				✓				
Applies project management techniques to maximise the productivity of the software development			✓					
Creates and justifies the need for the various types of documentation required for a software solution			✓					
Selects and applies appropriate software to facilitate the design and development of software solutions				✓				
Develops effective user interfaces, in consultation with appropriate people			✓					

Note: N/A means that this KUS has not been assessed in this reporting period

Learning Profile - Level of effort and application demonstrated over the course of this reporting period.	A	B	C	D	E	N/A
Conduct in Class		✓				
Engagement with learning		✓				
Reflective practice			✓			
Works collaboratively			✓			
Completion of work		✓				

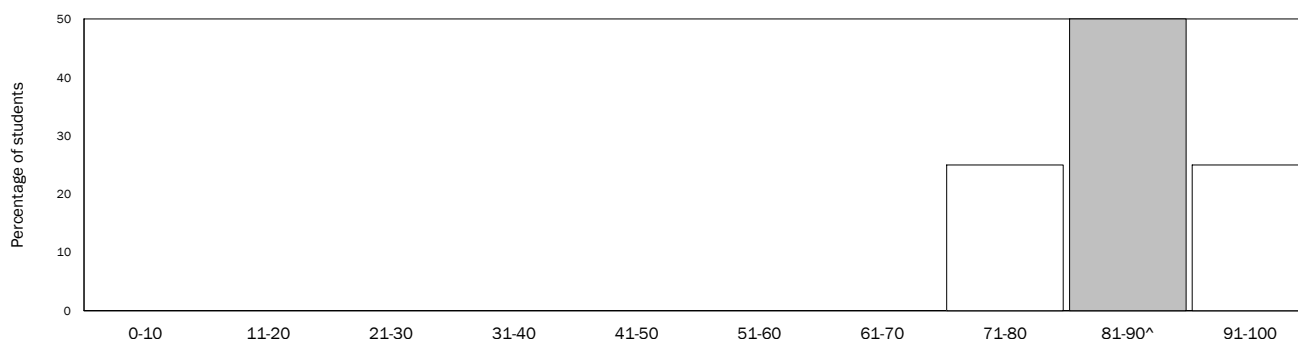

Assessments completed and results achieved in this subject	Tom's Mark	Tom's Rank	Ave Mark for Cohort
Ass1: Option Topic Test	72	3 / 4	83
Ass2: Major Project	73	3 / 4	78
Ass3: Trial HSC Examination	86	2 / 4	84

Achievement Levels (Shaded column shows current achievement level)

Course Average (Trial Exam Only): 84

Student's Mark (Trial Exam Only): 86/100

Progressive rank (Based on all assessments): 3/4

Information on the Knowledge, Understanding and Skills Levels

Level 1

Level 2

Level 3

Level 4

Level 5

Level 6

Applies appropriate development methods to solve software problems

Has achieved below the minimum standard expected.

Can apply some methods to solve software problems.

Shows some knowledge of methods involved in the solving of software problems.

Demonstrates knowledge and understanding algorithmic solutions in solving software problems.

Demonstrates a strong understanding of the process required to solve software problems.

Demonstrates a thorough understanding required to produce efficient algorithms to solve software problems.

Applies a modular approach to implement well structured software solutions and evaluates their effectiveness

Has achieved below the minimum standard expected.

Has a basic understanding of a modular approach to implementing a structured solution.

Can recognise and implement some modular processes required for a software solution.

Can develop and implement sound modular processes required for a well structured software solution.

Can develop and implement good modular processes required for a well structured software solution.

Can develop and implement high quality and efficient modular processes required for a well structured software solution.

Applies project management techniques to maximise the productivity of the software development

A mark in this band indicates that the student has achieved below the minimum standard expected.

Recognises some development methodologies and project management techniques.

Designs a partial software solution recognising the need for project management techniques.

Uses development methodologies and project management techniques to design a software solution.

Uses development methodologies and project management techniques to analyse a problem and design a relevant software solution.

Uses appropriate development and project management techniques to analyse a problem and design a complete software solution.

Creates and justifies the need for the various types of documentation required for a software solution

Has achieved below the minimum standard expected.

Has a basic understanding of documentation in relation to a software solution.

Has a good understanding of several types of documentation in relation to a software solution.

Is able to produce a good quality and relevant documents in relation to a software solution.

Able to produce a variety of quality support documents needed to support a quality software solution.

Able to produce high quality support documentation needed to support a quality software solution.

Selects and applies appropriate software to facilitate the design and development of software solutions

A mark in this band indicates that the student has achieved below the minimum standard expected.

Distinguishes between software components.

Demonstrates a basic knowledge of the interrelationships between software.

Modifies a software solution to a problem reflecting knowledge of the interrelationships between software.

Designs a software solution to a problem reflecting an understanding of software interrelationships.

Designs an effective software solution to a problem reflecting a sophisticated understanding of software interrelationships.

Develops effective user interfaces, in consultation with appropriate people

A mark in this band indicates that the student has achieved below the minimum standard expected.

Identifies examples of effects of effective user interface design.

Shows some knowledge of effects of effective user interface design.

Demonstrates knowledge and understanding of effects of effective user interface design.

Relates knowledge and understanding of effects of effective user interface design in the development process.

Analyses the effects of effective user interface design in the development process.
