Model Farms High School Report Information

Student involvement and extra curricula activities are included in this report.

Academic Marks

The assessment range line graph represents a student's examination performance in relation to all other students in that course. The shaded area represents the range of examination marks, the black dot represents the average and the white box represents the specific student mark.

Student Profile

This section shows the student's approach to learning and the level of application demonstrated in the identified areas.

Areas of Learning

Students are awarded a Grade based on their overall level of academic achievement in accordance with Department guidelines. The performance outcomes describing overall academic performance in achieving course outcomes is highlighted below:

A - Extensive

The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.

B - Thorough

The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.

C - Sound

The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.

D - Basic

The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skill.

E - Elementary

The student has an elementary knowledge and understanding in a few areas of the content and has achieved very limited competence in some of the processes and skills.

Comments

Teachers make an honest appraisal of the student's performance, effort and achievements throughout the course.

Should you have any concerns regarding the information contained in this report, or the progress of your child, please do not hesitate to contact the relevant Year Adviser or Head Teacher.

Areas of Learning	
uses, evaluates and justifies processes, skills and knowledge required to effectively respond to and compose texts in different modes, media and technologies	B
critically analyses and uses language forms, features and structures of texts justifying appropriateness for specific purposes, audiences and contexts and evaluates their effects on meaning	B
thinks imaginatively, creatively, interpretively, critically and discerningly to respond to, evaluate and compose texts that synthesise complex information, ideas and arguments	B
investigates and evaluates the relationships between texts	A
reflects on, evaluates and monitors own learning and refines individual and collaborative processes as an independent learner	B

A = Extensive, B = Thorough, C = Sound, D = Basic, E = Elementary

Teacher Comment

Dillon has shown pleasing engagement with the content. He is a keen contributor to our class discussions and it is this willingness to grapple with a range of perspectives that allows Dillon to convey insight in his writing. He needs to strive for further sustained answers - both in class activities and extended responses. As well, the overall quality of his arguments would be assisted by a greater academic register. Stronger awareness of the authors' varying contexts will also enhance his work.

Areas of Learning

applies techniques involving calculus to model and solve problems	B
applies the inverse function with methods of differentiation and integration	B
uses calculus in the solution of applied problems	A
applies advanced trigonometric concepts and techniques in simplifying expressions involving compound angles and solving trigonometric equations	A

A = Extensive, B = Thorough, C = Sound, D = Basic, E = Elementary

Teacher Comment

Dillon is a dedicated student who applies effort and concentration in class. He works collaboratively with others to develop his skills and depth of knowledge and provides additional learning opportunities for his peers. Dillon's assessment tasks results were excellent, despite containing some fundamental errors. Dillon's disappointment in his marks stems from his frustration in knowing the concepts well but not communicating them clearly enough under exam conditions.

Areas of Learning	
uses the rules related to algebraic and geometric representations of complex numbers	B
chooses appropriate strategies to construct arguments and proofs in both practical and abstract settings	C
applies techniques of integration to structured and unstructured problems	A

A = Extensive, B = Thorough, C = Sound, D = Basic, E = Elementary

Teacher Comment

Dillon is a conscientious and enthusiastic student, who has applied himself consistently in class throughout this semester. As a result, he has achieved some very pleasing outcomes in Mathematics Extension 2. Dillon always completes his set tasks and participates actively in class discussions. However, he needs to focus more on areas such as Proofs and revise his work regularly, if he wants to achieve some improved results. I encourage him to maintain this fine effort in the future.

Areas of Learning	
Performs stylistically, music that is characteristic of topics studied, both as a soloist and as a member of an ensemble	A
Articulates an aural understanding of musical concepts and their relationships in a wide variety of musical styles	B
Demonstrates a willingness to accept and use constructive criticism	A
Creates melodies and accompaniments characteristic of the course	A
Participates in performance, composition, musicology and aural activities	A

A = Extensive, B = Thorough, C = Sound, D = Basic, E = Elementary

Teacher Comment

Dillon has produced extensive outcomes in performing and composing tasks. The musicology task was well organised and could have benefited from more detailed focus on the concepts. Dillon has a talent for songwriting and was able to produce an excellent composition task as a result. He is developing his HSC performance pieces well and should be well prepared if he continues to practise. Dillon can improve his understanding of the concepts with regular revision.

Areas of Learning	
Describes the motion of objects influenced by circular and gravitational forces	A
Solves problems quantitatively by applying Physics principles	B
Communicates Physics principles with respect to real world applications	A
Conducts investigations to collect valid and reliable data	A

A = Extensive, B = Thorough, C = Sound, D = Basic, E = Elementary

Teacher Comment

Dillon is a very capable student who contributes to the learning of the classroom environment. He asks relevant questions which in turn benefits the whole class. He shows a good understanding of Module 6 and explains it well with the application of Physics principles. Dillon needs to continue to go through past HSC questions that are relevant to the present HSC. Dillon's learning is dynamic and with a continued positive attitude he should do well in Physics.

Creates and justifies the need for the various types of documentation required for a software solution	A
Develops and evaluates effective user interfaces, in consultation with appropriate people	B

A = Extensive, B = Thorough, C = Sound, D = Basic, E = Elementary

Teacher Comment

Dillon has proven to be a very diligent student in the Software Design and Development course this year. All practical and book work has been completed to a high standard and at all times, demonstrating a high degree of care and effort. Dillon's project work demonstrates a high capacity of understanding how to interpret and then meet the needs of a programming scenario.
