

Daniel Hart

Address: 33 Cattlebrook Road, Port Macquarie, NSW

M: 0490 733 877

Education

2019 Year 12 (current)
St Columba Anglican School
Port Macquarie, NSW

Subjects

-Advanced English -Biology -Construction
-Advanced and Extension Maths-Physics

Work history

2018-2019 **Team member** (1 year casual-current)
Pizza Obsession

Duties	Trained and employed for tasks including food preparation, making of pizzas, dish washing, serving customers and deliveries. Required an ability to learn quickly and constantly improve or accomodate.
--------	---

2019 **Year 12 construction work placement (1 week, full time)**
St Columba Anglican School

Duties	Worked closely with construction teacher to complete jobs around the school, and work on his personal construction projects.
--------	--

2018 **Kitchen hand** (Two months casual)
Perfect Pizzas

Duties	Trained and employed for tasks including food preparation, making, oven, dish washing and general hospitality skills. Required an ability to learn quickly and constantly improve or accomodate.
--------	--

2018 **Year 11 construction work placement** (1 week, full time)
Granite Transformations Coffs Harbour

Duties	Assisted in all aspects of carpentry orientated work. This involved assembling and installing kitchens and cabinets. Required a practical ability and willingness to learn.
--------	---

2017-2018 **Customer service team member** (Six months, casual)
Woolworths Lakewood

Duties Trained and involved in use of checkouts, customer service role and trolley collection. Required effective communication, reliable and honest work ethic, flexibility and efficient use of point of sale.

2017-2018 **Blueberry picking** (2 seasons, casual)
Ticoba Blueberries and Avocados (Comboyne)

Duties Casual piece work during blueberry season, worked with team of pickers and packers. Gained experience with on-call based, flexible working times. Required reliable communication, ability to work efficiently and constant teamwork.

Awards and Training

- First Aid Certificate- Completed basic first aid training with qualified instructor (Matthew Sincock, Allens Training) at Bellingen Youth Centre, February 2018.
- Journey to Manhood Program- Involved in supporting a community led, four to five day camp run to support struggling young men to find direction and reconnect with father figures. Have acted in a mentoring role in 2018 and 2019, plan on continuing to have a commitment to this program.
- Duke of Edinburgh- Completed bronze and silver award, currently working towards gold. This program requires regular, continuous involvement in activities including hiking, physical activity, a skill and volunteering.
- White card- Completed general workplace construction induction through school.
- Academic awards/achievements:
 - Mathematics effort award (Preliminary course)
 - First in Design and Technology (Preliminary course)
 - First in Physics (Preliminary and HSC course)
 - First in Construction (Preliminary and HSC course)
 - First in Biology (HSC course)
 - First in Advanced Mathematics (HSC course)

Bishop Druitt College

DANIEL HART

Year 11 Report Semester 2 2018

FAITHFULNESS IN SERVICE

Daniel Hart

Year 11 Report Semester 2 2018

BIOLOGY

Mr Charles Boshier

Students examine the structure and function of organisms at both the cellular and tissue levels in order to describe how they facilitate the efficient provision and removal of materials to and from all cells in organisms. They are introduced to and investigate biochemical processes through the application of the Working Scientifically skills processes.

Effort Grade: 1

Learning Habits	Rarely	Developing	Competent	Highly Competent	Advanced
Reflective: Plans and prepares for learning					✓
Reflective: Provides and acts on feedback					✓
Resourceful: Asks effective questions to move forward					✓
Collaborative: Participates effectively in learning groups					✓
Collaborative: Behaviour supports learning					✓
Resilient: Gives full attention and effort when performing a skill or demonstrating understanding					✓
Resilient: Persistently challenges abilities, skills and understanding					✓

Yearly Grade: B

Course Outcomes	Life Skills	Modified - N/A	Basic	Sound	Thorough	Extensive
Utilises critical thinking skills and scientific analysis when processing primary and secondary data.						✓
Appreciates the influence of imagination and creativity in scientific research and the relevance of Biology in their lives.						✓
Evaluates hypotheses and procedures when conducting an effective scientific investigation.					✓	

Comments and Recommendations

Daniel can find solutions to difficult challenges and can approach tasks from creative and innovative perspectives. He can address complex problems, will seek assistance in class whenever necessary and respond to feedback. To move learning forward Daniel could continue with his efforts and consider leading a study group to build a deeper understanding of concepts.

FAITHFULNESS IN SERVICE

Daniel Hart

Year 11 Report Semester 2 2018

11 CONSTRUCTION

Mr Joel Blythe

During class students have studied Workplace Health and Safety within the construction industry. In practical lessons, students have established a building site, undertaken preliminary site works and setting out for a slab on ground. Students gained knowledge in reading plans and basic site set-out.

Effort Grade: 1

Learning Habits	Rarely	Developing	Competent	Highly Competent	Advanced

Resilient: Persistently challenges abilities, skills and understanding					✓

Yearly Grade:

Course Outcomes	Life Skills	Modified - N/A	Basic	Sound	Thorough	Extensive
Completes the required theory work booklets						✓
Works in a team to achieve a common goal						✓
Developing practical skills in a construction environment						✓

Comments and Recommendations

Daniel has demonstrated that he is developing excellent practical skill and is concentrating on learning how to carry out measurements and calculations. He has completed all of the required work booklets. Daniel participates in all on-site activities and provides valuable input. To move learning forward, he is encouraged to continue to apply himself.

FAITHFULNESS IN SERVICE

Daniel Hart

Year 11 Report Semester 2 2018

DESIGN AND TECHNOLOGY

Mr Dale Graham

This semester students will complete a design folio and project that requires them to create a storage or display unit from recycled materials. They are introduced to the design process and the folio procedures that facilitate the development and construction of appropriate design solutions. The second design task further explores the design process through the creation of a mixed material furniture piece.

Effort Grade: 1

Learning Habits	Rarely	Developing	Competent	Highly Competent	Advanced
Reflective: Plans and prepares for learning					✓
Reflective: Provides and acts on feedback					✓
Resourceful: Asks effective questions to move forward					✓
Collaborative: Participates effectively in learning groups					✓
Collaborative: Behaviour supports learning					✓

Resilient: Persistently challenges abilities, skills and understanding					✓

Yearly Grade: A

Course Outcomes	Life Skills	Modified - N/A	Basic	Sound	Thorough	Extensive
Displays proficiency and skills in the development and production of their design project to meet identified needs and opportunities						✓
Uses management and communication techniques, tools and research methods to develop a design folio						✓
Examines design theory and practice and consolidates that knowledge in the yearly exam						✓

Comments and Recommendations

Daniel can engage in the theoretical course material with minimal direction. He can complete a design folio that exhibits exceptional detail across all sections and is professional in appearance. Daniel can construct a major project that utilises a wide variety of tools, techniques and materials. To move learning forward he can continue to apply a high level of effort to all areas of the subject.

FAITHFULNESS IN SERVICE

Daniel Hart

Year 11 Report Semester 2 2018

ENGLISH ADVANCED

Ms Lisa Wainwright

Students have explored the different ways technological, social and political change has influenced literary development over time. Students have evaluated the different ways literary forms, like poetry are valued.

Effort Grade: 1

Learning Habits	Rarely	Developing	Competent	Highly Competent	Advanced
Reflective: Plans and prepares for learning					✓
Reflective: Provides and acts on feedback					✓
Resourceful: Asks effective questions to move forward					✓
Collaborative: Participates effectively in learning groups					✓
Collaborative: Behaviour supports learning					✓
Resilient: Gives full attention and effort when performing a skill or demonstrating understanding					✓
Resilient: Persistently challenges abilities, skills and understanding					✓

Yearly Grade: A

Course Outcomes	Life Skills	Modified - N/A	Basic	Sound	Thorough	Extensive
Demonstrates skills in imaginative, critical and reflective thinking about meaning						✓
Demonstrates skills in reflection as a way to evaluate their processes of composing, responding and learning						✓
Evaluates concepts in a range of texts						✓

Comments and Recommendations

Daniel can articulately discuss the key concepts and texts examined in a perceptive and sophisticated way. He completes all the required work, revision and extension activities to a high level. Daniel can write beautiful creative writing pieces and is equally adept in writing analytical and evaluative compositions. It has been an absolute pleasure to teach Daniel. I wish him all the best at his new school and with his HSC studies.

FAITHFULNESS IN SERVICE

Daniel Hart

Year 11 Report Semester 2 2018

MATHEMATICS

Mr Craig Verbruggen

Students have studied the topics Plane Geometry, Quadratic Polynomials and Calculus, having put them into practice in pure and applied contexts.

Effort Grade: 2

Learning Habits	Rarely	Developing	Competent	Highly Competent	Advanced
Reflective: Plans and prepares for learning				✓	
Reflective: Provides and acts on feedback			✓		
Resourceful: Asks effective questions to move forward				✓	
Collaborative: Participates effectively in learning groups					✓
Collaborative: Behaviour supports learning					✓
Resilient: Gives full attention and effort when performing a skill or demonstrating understanding				✓	
Resilient: Persistently challenges abilities, skills and understanding				✓	

Yearly Grade: A

Course Outcomes	Life Skills	Modified - N/A	Basic	Sound	Thorough	Extensive
Applies a variety of strategies to solve problems involving geometrical arguments						✓
Applies a variety of strategies to solve problems involving trigonometry						✓
Applies a variety of strategies to solve problems involving the quadratic polynomial						✓

Comments and Recommendations

Daniel can efficiently solve complex calculus related problems and seeks to reinforce mastery by collaborating with peers. He can ask effective questions to reinforce and deepen the learning for his peers and himself. To move learning forward Daniel could further his understanding with a study routine that includes summary development and the utilisation of all content shared on Google Classroom.

FAITHFULNESS IN SERVICE

Daniel Hart

Year 11 Report Semester 2 2018

MATHEMATICS EXTENSION 1

Mr Craig Verbruggen

Students have studied the topics Plane Geometry, Calculus, Polynomials and Sequences and Series, having put them into practice in pure and applied contexts.

Effort Grade: 2

Learning Habits	Rarely	Developing	Competent	Highly Competent	Advanced
Reflective: Plans and prepares for learning					✓
Reflective: Provides and acts on feedback				✓	
Resourceful: Asks effective questions to move forward					✓
Collaborative: Participates effectively in learning groups					✓
Collaborative: Behaviour supports learning					✓
Resilient: Gives full attention and effort when performing a skill or demonstrating understanding				✓	
Resilient: Persistently challenges abilities, skills and understanding			✓		

Yearly Grade: C

Course Outcomes	Life Skills	Modified - N/A	Basic	Sound	Thorough	Extensive
Applies a variety of strategies to solve problems involving parametric equations				✓		
Applies a variety of strategies to solve problems involving polynomials					✓	
Applies a variety of strategies to solve problems involving harder trigonometry				✓		

Comments and Recommendations

Daniel can efficiently solve complex calculus related problems and works independently in a quest to seek mastery of all concepts. He has been a focused student, completing all tasks, whose work is always of a high standard. To move learning forward Daniel should actively move on to additional enrichment work when he reflects on whether he has mastered content yet.

FAITHFULNESS IN SERVICE

Daniel Hart

Year 11 Report Semester 2 2018

PHYSICS

Mr Paul McCormack

Modules covered in Physics this semester include Kinematics and Dynamics. In these modules students investigate the forces and interactions involved in the movement of and collisions between objects.

Effort Grade: 1

Learning Habits	Rarely	Developing	Competent	Highly Competent	Advanced
Reflective: Plans and prepares for learning					✓
Reflective: Provides and acts on feedback					✓
Resourceful: Asks effective questions to move forward				✓	
Collaborative: Participates effectively in learning groups					✓
Collaborative: Behaviour supports learning					✓
Resilient: Gives full attention and effort when performing a skill or demonstrating understanding					✓
Resilient: Persistently challenges abilities, skills and understanding					✓

Yearly Grade: A

Course Outcomes	Life Skills	Modified - N/A	Basic	Sound	Thorough	Extensive
Evaluates hypotheses and procedures when conducting an effective scientific investigation.						✓
Utilises critical thinking skills and scientific analysis when processing primary and secondary data.						✓
Appreciates the influence of imagination and creativity in scientific research and the relevance of Physics in their lives.						✓

Comments and Recommendations

Daniel can maintain a high level of focus and engagement in theory lessons and work individually on set tasks. He can produce well-structured written responses and clearly explain the important elements and principles of Physics. He can contribute mature and insightful comments in positive classroom discussion. To move learning forward Daniel should maintain his answering of questions from varied sources to afford his deeper understanding and improved written responses.

End of Report

Report issued without alteration or erasure

FAITHFULNESS IN SERVICE

DEFINITION OF TERMS IN THE YEARS 8-11 REPORT

Grade for Effort

Grade for effort is awarded according to the following criteria:

- 1 Achieves most of the indicators all of the time
- 2 Achieves most of the indicators most of the time
- 3 Achieves some of the indicators most of the time
- 4 Achieves some of the indicators some of the time
- 5 Achieves a few of the indicators some of the time

The range of indicators to be considered:

- Is punctual to class with necessary equipment
- Completes assigned class work and homework
- Participates in class with a positive attitude towards learning
- Is capable of working independently and with others as part of a team
- Acts responsibly and is well behaved
- Responds positively to advice or feedback
- Is respectful of other students and their learning

Learning Habits

The following terms describe the level of mastery a student has reached for each learning disposition.

Advanced, Highly Competent, Competent, Developing, Rarely

Academic Grade

The grade listed in the semester report each year, summarises achievement in selected course components. These will be a subset of the total skills and knowledge assessed by the end of the school year. The grade on this report may therefore not be indicative of the final grade to be received after a full year of assessment.

Student achievement is measured against standards, rather than against the achievement of other students. In standards referenced assessment, the number of students who are awarded any one grade in a subject may vary from semester to semester, according to the quality of student work. In addition, the number of students who are awarded particular grades (eg: A, B, C, D or E) will vary from subject to subject.

The following terms describe the Academic Grade given for the level of achievement of all knowledge and skills in each course:

- A** The student demonstrates extensive knowledge of content and understanding of course concepts, and applies highly developed skills and processes in a wide variety of contexts. In addition the student demonstrates creative and critical thinking skills using perceptive analysis and evaluation. The student effectively communicates complex ideas and information.
- B** The student demonstrates thorough knowledge of content and understanding of course concepts, and applies well-developed skills and processes in a variety of contexts. In addition the student demonstrates creative and critical thinking skills using analysis and evaluation. The student clearly communicates complex ideas and information.
- C** The student demonstrates sound knowledge of content and understanding of course concepts, and applies skills and processes in a range of familiar contexts. In addition the student demonstrates skills in selecting and integrating information and communicates relevant ideas in an appropriate manner.
- D** The student demonstrates a basic knowledge of content and understanding of course concepts, and applies skills and processes in some familiar contexts. In addition the student demonstrates skills in selecting and using information and communicates ideas in a descriptive manner.
- E** The student demonstrates an elementary knowledge of content and understanding of course concepts, and applies some skills and processes with guidance. In addition the student demonstrates elementary skills in recounting information and communicating ideas.

Course Outcomes

The following terms describe the level of competency achieved against each outcome of the course.

Extensive, Thorough, Sound, Basic, Modified and Life Skills.

Life Skills or Modified: These descriptors are used by the Learning Resources Centre in relation to Life Skills and Modified reporting. Students who are awarded 'Modified' or 'Life Skills' are assessed using tasks that have been adapted. Their program of study may include a 'Modified' or 'Life Skills' program.

Assessment Tasks

Individual task marks and feedback are now reported through the Parent Lounge throughout the year - go to Student Details/Curricular Activities.

Please note:

- If the student is new to the school, changed subjects or subject level or has been away from school across an assessment period, some assessment tasks or outcomes may not have been assessed at the time of reporting.
- If parents wish to discuss this report, please contact the relevant teacher by email - go to Parent Lounge/Student Details and select Email Class Teachers.

St Columba Anglican School

Secondary School Report

Year 12 Semester 1 Report 2019

Name: Daniel Hart

Year: 12

Advanced English

Mr K Mills

This semester marks the beginning of a new statewide Advanced English course for the Higher School Certificate. The changes that have been made aim to encourage the students to become more creative and agile thinkers, to develop their critical writing and to nurture effective communication in a diverse and changing society. This semester, which started in Term IV last year, has seen the students engage with Amanda Lohrey's Australian novella, 'Vertigo', drawing inspiration from it and a text of their own choosing to mentor their own creative writing. The unit culminated in a multimodal video presentation. This year, students have completed a critical study of T. S. Eliot's challenging modernist poetry and are now considering the textual conversation that occurs between William Shakespeare's final play, 'The Tempest,' and Margaret Atwood's re-imagining of this play as a 2016 novel 'Hag-Seed'. The semester concluded with students completing a practice Half-Yearly Examination.

Demonstrates the organisational skills for learning.

1

Completes homework to the best of her or his ability.

1

Outcomes

Engages personally with texts

A

Develops and applies contextual knowledge

B

Understands and applies knowledge of language forms and features

B

Reflects on own processes of responding, composing and learning.

A

Responds to and composes texts for specific audiences and purposes

B

Class Mark %	78	Course Average %	74
--------------	----	------------------	----

Comment

Daniel is a pleasant and capable student who demonstrates a good understanding of the concepts and skills associated with the Advanced English course. He is producing work of an acceptable standard, performing consistently in both assessment tasks. Daniel can process ideas and information from a range of classroom texts dealing with challenging ideas, including sustained teacher and peer discourse. He listens to others and comments appropriately and is most helpful with his contribution to our class discussions. I would encourage Daniel to continue writing practice papers under timed conditions as a means of preparing for the Higher School Certificate.

Mathematics

Dr J Stewart

This semester, students have investigated the relationship between exponential and logarithmic functions. Students have extended their knowledge of calculus addressed in the Preliminary Mathematics course to include geometric applications of the derivative and integral calculus. Students have also extended their knowledge of plane geometry and refined their approach to formal proofs.

Assessment Rank

Mathematics Extension 1

Dr J Stewart

In Extension I Mathematics this semester students have explored new methods of reasoning in the form of proofs by induction. They have also studied the expansion of binomial expressions and applied this in a practical setting to the study of probability. Integral calculus has been expanded to include the use of substitutions for more complex functions whilst the study of Polynomials has explored approximate methods of calculating solutions. Students have been active in developing an understanding of the concepts behind these processes and, as such, have developed greater skills in analysing and synthesising information.

Comment

Daniel is making excellent progress in Extension 1 Mathematics. He has worked very hard to develop a deep and comprehensive knowledge of all course outcomes and is able to communicate his understanding using efficient mathematical language. Daniel has the potential to achieve results at the highest level in this course and I encourage him to continue his efforts in this regard.

ST COLUMBA
ANGLICAN SCHOOL
PORT MACQUARIE

Biology

Mrs J Duncan

In the first Biology module on Heredity, students reviewed processes of sexual and asexual reproduction and their significance in ensuring the continuity of species. The structure of DNA, its importance in being replicated correctly during cell division and its critical role in directing protein synthesis have also been studied. Students have investigated a range of inheritance patterns and have used these to predict expected characteristics in offspring, extending this learning to population genetics. In the second module on Genetic Change, students have considered mutagens, how these cause a range of mutations and the effect of these on genetic material. The use of biotechnology and various genetic technologies to induce genetic change in medical, industrial and agricultural applications have been extensively studied with consideration of their impact on Earth's biodiversity, their potential to alter DNA permanently and the benefits, issues and ethics associated with the use of genetic modification. Practical investigations have been undertaken throughout the semester to reinforce course content and enhance working scientifically skills, including the first assessment task which investigated the interaction between genes and the environment.

Assessment Rank

Demonstrates the organisational skills for learning.

1

Completes homework to the best of her or his ability.

2

Outcomes

Demonstrates knowledge and understanding about the nature, development, use and influence of Science.

A

Develops hypotheses, plans and safely undertakes first-hand investigations to collect valid and reliable data.

A

Processes, analyses and evaluates first and second-hand data to develop evidence-based conclusions.

B

Applies scientific understanding and critical thinking skills to produce solutions to problems.

B

Presents ideas and evidence using suitable scientific language and terminology for a specific audience or purpose.

A

Class Mark %	93	Course Average %	71
--------------	----	------------------	----

Comment

Daniel is a capable and composed young man who is a welcome addition to our class. He has set his sights on performing well in Biology and is working hard to achieve this. At this point in time, Daniel is demonstrating a comprehensive mastery of the outcomes addressed in the first two modules of the course. His Genetics Investigation was excellent and reflected his ability to work through the scientific process and prepare a professional report on his findings. This task placed him first in a very competitive cohort and I congratulate Daniel on this outstanding result. Continuing to prepare study notes and maintaining an effective study timetable to secure new and previously learned content is critical at this stage. Daniel occasionally attends the additional class which focuses on completing examination-style questions. I encourage him to attend these more regularly to improve his skills. There is some healthy competition in the cohort and retaining first place rank by the year's end is certainly possible with the same commitment, application and effort. I wish Daniel well for the rest of the year and look forward to guiding his learning.

Effort
Performance

1 = Excellent
A = Extensive

2 = Good

Physics

Mr M Eichler

With the commencement of the Higher School Certificate programme, the students this semester have studied the course modules of Advanced Mechanics and Electromagnetism. In Advanced Mechanics, students developed an understanding that all forms of complex motion can be understood by analysing the forces acting on a system, including the energy transformations taking place within and around the system. By applying new mathematical techniques, students modelled and predicted the motion of objects. They examined two-dimensional motion, including projectile motion and uniform circular motion, along with the orbital motion of planets and satellites, which were modelled as an approximation to uniform circular motion. The understanding gained in Advanced Mechanics was applied in a Depth Study investigating the physics of model rockets. In teams, students analysed the physics involved in predicting the height and time of flight of a model rocket. They then conducted an experiment to test their predictions and compared their model to the actual data. This experiment and analysis of the results was assessed.

In Electromagnetism students examined the similarities and differences in the interactions of single charges in electric and magnetic fields. Phenomena that include the force produced on a current-carrying wire in a magnetic field, the force between current-carrying wires, Faraday's Law of Electromagnetic Induction, the principles of transformers and the workings of motors and generators were investigated. The role of the law of conservation of energy in these situations was also explored.

Comment

Daniel is a very capable and engaged student who has a great aptitude for Physics. He consistently demonstrates that he has a clear understanding of the links between ideas and can reason through commonly encountered problems. In order to improve upon this result, the two key areas I need to see Daniel work on are clearly showing his working in problems and applying his understanding to a broader range of situations. With respect to setting out his work, Daniel needs to ensure he adequately justifies each step and includes all formulae used. Overall, Daniel is achieving at a very high level and these recommendations are aimed to fine tune his skills and understanding, so he can fully demonstrate his ability. At this point in the course there is only 2% difference in marks across the top four students, so every little bit extra can influence the final ranking.

Construction

Mr J Munro

This semester, students extended their skills and knowledge of the construction industry as they worked towards completing their competencies for the Certificate II course. They worked with a variety of tools and materials and further developed their knowledge of the processes involved in setting out a building site and reading and interpreting plans and specifications. Students undertook a small personal interest project requiring them to finish a task with quality in mind. Extensive work has been completed in the preparation for students Higher School Certificate Examinations later in the year.

Comment

Daniel demonstrated outstanding diligence throughout the semester completing extra classes to further his knowledge of the construction industry. This aided him in achieving an excellent examination result displaying a firm understanding of safety protocols and developing a work plan. His ability to complete practical work with quality has continued to develop as he applied himself to all tasks with confidence. Daniel has proven to be a leader amongst his peers with a firm knowledge of the processes undertaken in the completion of work simulated tasks. I encourage Daniel to continue to engage and work diligently during all lessons to further achieve in this subject.

Pastoral Care Comment

Since re-joining St Columba near the end of last year, Daniel has had a semester of tremendous progress and exemplar results in his academic pursuits. He has quickly settled back into his peer group and has established positive relationships with his friends. I note that Daniel has not yet been actively involved in earning an award within the School's Honour Roll program. I encourage him to seek ways to qualify for a Bronze Award through his involvement in the wider life of the School. I look forward to further growth from Daniel in the second half of the year.

Year: 12

Advanced English

Mrs S Kelly

In order to enhance their personal, social and vocational lives, the Advanced English course aims to help students develop critical and sophisticated language skills and become thoughtful, imaginative and effective communicators in a diverse and changing world. This semester, students engaged with Module A: Textual Conversations, in which they considered the connections between Shakespeare's 'The Tempest' and its evolution into Margaret Atwood's 'Hag-seed.' Following this, they completed a study of Module C: The Craft of Writing, which challenged them to develop agility in their writing and apply a keen critical eye when reading a variety of texts. Through an examination of these prescribed texts, and other related texts, students considered the ways in which language is used in increasingly sophisticated ways to communicate ideas that affect readers, listeners and viewers. The semester concluded with the Trial Examination, feedback and revision.

Comment

Daniel is a capable and well-read student of English who has consistently demonstrated his ability to question and decipher the ideas represented in the texts studied and to form critical and insightful perspectives around them. His pleasant and approachable nature has been appreciated by staff and students alike, and he should feel proud of his considerate interactions and contributions in class. In the recent Trial Examination, Daniel demonstrated his flair for this discipline through consistently strong and sophisticated extended responses. For further success, Daniel is encouraged to apply his knowledge to a variety of questions prior to the examinations and produce drafts for teacher feedback. It has been a pleasure to teach Daniel and I wish him well for his future studies.

Mathematics

Dr J Stewart

This semester the students have completed the course with a focus on sequences and series. These concepts have been applied to real life applications such as annuities and loans. As a result of completing this course, students have gained an appreciation and understanding of scope, usefulness, beauty and elegance of mathematics. Students have further developed the ability to reason in a broad range of mathematical contexts.

Comment

Daniel has demonstrated mastery of all facets of this course. He is a serious, diligent and talented student of Mathematics who applies himself enthusiastically to all aspects of his studies. It has been a pleasure to teach Daniel in this subject and I would encourage him to pursue a career in Mathematics.

Mathematics Extension 1

Dr J Stewart

This semester, students studying Extension 1 Mathematics have gained an appreciation of the interrelationships between ideas drawn from different areas of Mathematics. Students have used a variety of strategies to investigate mathematical models of situations involving binomial probability, projectile motion, simple harmonic motion, and exponential growth and decay. Students have further determined integrals by reduction to a standard form through a given substitution. They have applied the chain rule to problems including those involving velocity and acceleration as functions of displacement. Students have also used the relationship between functions, inverse functions and their derivatives.

Comment

Daniel's efforts in Extension 1 Mathematics have been excellent. He has worked very hard to achieve mastery of complex concepts and is able to apply his knowledge creatively to solve a variety of problems. Daniel works well collaboratively with his peers and has a diligent approach to his classwork. With continued effort, Daniel should achieve a Higher School Certificate result in Extension 1 Mathematics of which he can be very proud. I have enjoyed teaching Daniel in this course and I wish him well with his future endeavours.

Biology

Mrs J Duncan

In the third Biology module on Infectious Disease, students examined the cause, transmission, prevention, treatment and control of a range of infectious diseases in local, regional and global arenas. The human immune system and its response in protecting individuals from infectious disease has been studied as well as herd immunity and vaccination through a formal Depth Study. Disease prevention and management was further extended to include various medical and agricultural applications. In the final module on Non-infectious Disease and Disorders, students considered causes, effects, incidence, prevalence and mortality of a range of non-infectious diseases in humans. They explored specific technologies in treating disorders like hearing loss, visual defects and kidney issues. The purpose and benefits of epidemiological studies to human health, in addition to prevention of non-infectious diseases via educational programs and genetic engineering were examined. Practical and research investigations have been undertaken throughout the semester to reinforce course content and enhance working scientifically skills. Student knowledge, understanding and skills have been assessed through a Vaccination Depth Study and a Higher School Certificate Trial Examination.

Comment

Daniel is a capable and unpretentious young man who has continued to make great gains in his learning of Biology. His commitment and strong work ethic have been the foundations for his success in achieving first place rank in a very competitive cohort. I congratulate Daniel on this outstanding and well-deserved result. He is a most efficient worker and has a deep and thorough knowledge of most concepts and processes covered in the course. However, from his Trial Examination paper, Daniel has identified the content areas, outcomes and skills that require further attention and I encourage these to be addressed straightaway. With continued emphasis on his study habits and the practice of preparing planned written responses, Daniel will be ensuring that he effectively utilises revision time prior to the final examination. He has been a respected and reliable team player in group activities and has made a valuable contribution to the classroom environment. I have enjoyed guiding Daniel's learning through the Year 12 Biology course and wish him all the best in his future endeavours.

Physics

Mr M Eichler

This semester, Physics students have studied the course modules of The Nature of Light and From the Universe to the Atom. In the module The Nature of Light, students investigated the changing ideas about what light is and the conflicting evidence available. They developed an understanding that light must be both a wave and a particle, the dual-nature of light. The consequences of the absolute value for the speed of light is examined further in terms of the Special Theory of Relativity. In the module From the Universe to the Atom, students investigate how our understanding of the nature of the atom has developed with the discovery of new information over time. This ranges from nucleosynthesis occurring after the formation of the universe, to within stars, through to the Standard Model of matter and the world of quantum mechanics. Students have completed a two-hour practical test assessing a range of skills and concepts from modules Electromagnetism (covered last term), The Nature of Light and From the Universe to the Atom. They have also completed a Higher School Certificate Trial Examination.

Comment

Daniel is a quiet and modest, but very capable young man who has applied himself consistently throughout the course and convincingly earned first place in Physics. A well-deserved achievement! Daniel has an excellent aptitude for Physics and can formulate links between key concepts. In practical activities he has demonstrated excellent collaboration and critical thinking skills. His setting out of calculations has improved, enabling him to better deal with more challenging problems. In preparing for the final examination, Daniel needs to continue working through examination-style questions, taking care to check the small details and finessing his responses. His ability, hard work and effort will ensure that Daniel succeeds at whatever he puts his mind to. It has been a pleasure to work with him and I wish Daniel all the best in his future endeavours.

Construction

Mr J Munro

This semester, students extended their skills and knowledge of the construction industry as they worked towards completing their competencies for the Certificate II course. They worked with a variety of tools and materials and further developed their knowledge of the processes involved in setting out a building site and using levelling devices. Students undertook small construction projects and worked with bearer and joist structures. This required them to use a range of skills that they have developed throughout the course and apply these with precision and accuracy.

Comment

Daniel has an outstanding ability in Construction. He has been an asset to the class in providing leadership to others in the completion of group projects. He has demonstrated extensive knowledge of all areas involved in the construction industry, in particular, that of bearer and joist construction. Daniel has an outstanding ability in the use of carpentry tools, highlighting his ability to complete all work with quality. He has competently completed various estimations and costings of construction projects demonstrating that he can successfully provide accurate quotations of jobs. I encourage Daniel to continue to revise for his Higher School Certificate Examination and commend him for his efforts this year.

Pastoral Care Comment

Daniel is an amicable student who cherishes the close relationships he has with his peers. He has given worthwhile effort to develop his depth of understanding in his academic work and is now poised to reap the benefits of those efforts through completion of his final Higher School Certificate examinations. In particular, I commend Daniel for maintaining steady high-level results across several of his subjects. I hope that his final results provide the springboard to the next phase in chasing down his dreams. It has been a pleasure to get to know Daniel as his Year Patron and I wish him well for whatever lies in his future.
