

**Killara High School
Course Report
2018 - Senior Report Semester 2 - Year 11**

Samuel LI

Included Subjects:

Chemistry Yr11

Engineering Studies Yr11

English (EAL/D) Yr11

Mathematics Accelerated Extension Yr11

Mathematics Accelerated Yr11

Physics Yr11

Software Design and Development Yr11

Jane DENNETT

Principal

Killara High School provides written student progress reports twice each year in Semesters 1 and 2.
This report details student progress in Semester 2.

Outstanding Achievement	A	The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
High Achievement	B	The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.
Sound Achievement	C	The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.
Basic Achievement	D	The student has a basic knowledge and understanding of the content and has achieved a basic level of competence in the processes and skills.
Limited Achievement	E	The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

The cover page of this report provides a list of the courses studied by your child at Killara High School.

Each course report contains information about your child's

- course mark or examination mark
- progressive assessment rank
- social development
- commitment to learning
- application to learning
- achievement levels for course specific outcomes.

A comment from the class teacher highlights your child's strengths as well as strategies to guide improvement.

It is important to note that the rank a student receives at this time may change markedly as the course continues.

If you have any questions or concerns or should you wish to discuss your child's progress, please contact the Year Adviser, Stage Head Teacher or the Head Teacher of the course concerned.

A printed copy of this report is available upon request from the school.

RoSA Grade Information for parents

The Record of School Achievement (RoSA) is the credential for students who leave school after Year 10 and before they receive their Higher School Certificate (HSC).

The RoSA is a cumulative record of student academic achievement

The RoSA is designed to record and credential a secondary school student's academic results up until the HSC. It is important for parents, employers and students to know that grades awarded for the RoSA credential are given fairly and consistently. The NSW syllabuses state **what** students at each stage are expected to learn. The A to E Common Grade Scales describe **how well** students have achieved.

NSW teachers are very experienced in determining the standard of work that warrants a particular grade.

- The RoSA details grades using an A to E grading scale, and the NSW Education Standards Authority works with teachers to ensure that appropriate standards are developed and applied.
- The NSW Education Standards Authority provides schools with information about the historical allocation or patterns of grades awarded by that school over recent years. This serves as a guide for the allocation of grades to current students.
- These methods of moderation and monitoring of grades helps ensure that parents and employers know that a grade awarded in one school is equivalent to the same grade awarded in another school.

Common Grade Scale for Preliminary Courses

The Common Grade Scale describes performance at each of five grade levels.

Grade	Performance
A	The student demonstrates extensive knowledge of content and understanding of course concepts, and applies highly developed skills and processes in a wide variety of contexts. In addition the student demonstrates creative and critical thinking skills using perceptive analysis and evaluation. The student effectively communicates complex ideas and information.
B	The student demonstrates thorough knowledge of content and understanding of course concepts, and applies well-developed skills and processes in a variety of contexts. In addition the student demonstrates creative and critical thinking skills using analysis and evaluation. The student clearly communicates complex ideas and information.
C	The student demonstrates sound knowledge of content and understanding of course concepts, and applies skills and processes in a range of familiar contexts. In addition the student demonstrates skills in selecting and integrating information and communicates relevant ideas in an appropriate manner.
D	The student demonstrates a basic knowledge of content and understanding of course concepts, and applies skills and processes in some familiar contexts. In addition the student demonstrates skills in selecting and using information and communicates ideas in a descriptive manner.
E	The student demonstrates an elementary knowledge of content and understanding of course concepts, and applies some skills and processes with guidance. In addition the student demonstrates elementary skills in recounting information and communicating ideas.

Senior Report Semester 2 - Year 11 2018

Samuel LI - Year 11

Subject	RoSA Grade
Chemistry Yr11	B
Engineering Studies Yr11	A
English (EAL/D) Yr11	B
Mathematics Accelerated Extension Yr11	A
Physics Yr11	B
Software Design and Development Yr11	B

Extra-curricular Involvement

Samuel LI

Killara High School - 2018 - Senior Report Semester 2 - Year 11

Event	Dates	Attendance
Senior (Year 11-12) Australian Maths Competition (AMC) - Mon 13 Aug 2018	13/08/2018	Present

Chemistry Yr11

Samuel LI

Teacher: Tanu ARORA

Killara High School - 2018 - Senior Report Semester 2 - Year 11

Progressive Assessment Rank out of 113	11
--	----

Examination Mark out of 100	85
-----------------------------	----

Outcomes					
	Limited	Basic	Sound	High	Outstanding
Explores the many different types of chemical reactions				✓	
Describes, applies and quantitatively analyses the mole concept and stoichiometric relationships				✓	
Designs and evaluates investigations in order to obtain primary and secondary data and information			✓		

Social Development				
	Rarely	Sometimes	Usually	Always
Consistently completes assigned tasks to the best of their ability				✓
Shows respect and positively interacts with peers and teachers by following directions				✓
Collaborates with peers and teachers by actively participating in class activities and sharing ideas			✓	

Commitment to Learning				
	Rarely	Sometimes	Usually	Always
Monitors own learning and applies feedback to achieve personal improvement				✓
Demonstrates critical thinking by identifying problems and making independent judgements				✓
Accepts responsibility for their learning by demonstrating organisational, research and time management skills			✓	

Application						
Application	Unsatisfactory	Minimal	Inconsistent	Satisfactory	Commendable	Excellent

Teacher Comment
Samuel is a diligent and conscientious student who approaches his studies with enthusiasm. He is talented and motivated and has achieved excellent results in this subject. He is an able member of class who understands even the more difficult concepts with great ease. He has a solid grasp of the vast majority of the scientific concepts covered this year and makes worthwhile contributions in class. Samuel is to be congratulated on his achievement and is encouraged to work with the same enthusiasm in the future.

Engineering Studies Yr11

Samuel LI

Teacher: Murray ARNISON

Killara High School - 2018 - Senior Report Semester 2 - Year 11

Progressive Assessment Rank out of 36	9
---------------------------------------	---

Course Mark out of 100	85
------------------------	----

Outcomes					
	Limited	Basic	Sound	High	Outstanding
Describes the types of materials, components and processes and explains their implications for engineering development			✓		
Uses mathematical, scientific and graphical methods to solve problems of engineering practice				✓	
Develops written, oral and presentation skills and applies these to engineering reports					✓
Applies graphics as a communication tool			✓		
Identifies the social, environmental and cultural implications of technological change in engineering					✓

Social Development				
	Rarely	Sometimes	Usually	Always
Consistently completes assigned tasks to the best of their ability				✓
Shows respect and positively interacts with peers and teachers by following directions				✓
Collaborates with peers and teachers by actively participating in class activities and sharing ideas				✓

Commitment to Learning				
	Rarely	Sometimes	Usually	Always
Monitors own learning and applies feedback to achieve personal improvement				✓
Demonstrates critical thinking by identifying problems and making independent judgements				✓
Accepts responsibility for their learning by demonstrating organisational, research and time management skills			✓	

Application						
Application	Unsatisfactory	Minimal	Inconsistent	Satisfactory	Commendable	Excellent

Teacher Comment
Samuel is a talented, conscientious and highly motivated student who has achieved some excellent results in Engineering Studies this year. He is very committed to his studies and engages at the highest level. His performance during this semester has been pleasing, however, his result in the recent examination, although pleasing, was not reflective of his ability. Samuel's behaviour and focus in class are excellent. His performance in the recent examination highlights the need to ensure that he revises his work regularly to reinforce his deep knowledge and understanding, as this will build his confidence under examination conditions.

English (EAL/D) Yr11

Samuel LI

Teacher: Amanda TAPLIN

Killara High School - 2018 - Senior Report Semester 2 - Year 11

Progressive Assessment Rank out of 42	11
---------------------------------------	----

Course Mark out of 100	76
------------------------	----

Outcomes					
	Limited	Basic	Sound	High	Outstanding
Creatively and critically presents information and opinions based on a range of texts and media while demonstrating understanding of literary devices and language structures				✓	
Responds to and composes increasingly complex texts for understanding, interpretation and critical analysis demonstrating knowledge of how texts can represent the personal and public worlds				✓	

Social Development				
	Rarely	Sometimes	Usually	Always
Consistently completes assigned tasks to the best of their ability			✓	
Shows respect and positively interacts with peers and teachers by following directions				✓
Collaborates with peers and teachers by actively participating in class activities and sharing ideas				✓

Commitment to Learning				
	Rarely	Sometimes	Usually	Always
Monitors own learning and applies feedback to achieve personal improvement				✓
Demonstrates critical thinking by identifying problems and making independent judgements				✓
Accepts responsibility for their learning by demonstrating organisational, research and time management skills				✓

Application						
Application	Unsatisfactory	Minimal	Inconsistent	Satisfactory	Commendable	Excellent

Teacher Comment
Samuel is an attentive and responsible student who shows interest and insight in set tasks. His approach to learning reveals a genuine effort to improve. In the yearly examination, Samuel used the language of opinion and persuasion to clearly express an opinion. Gaining a deeper understanding of visual literacy would assist his HSC coursework next year. While Samuel can express ideas in a meaningful way, he must maintain commitment to higher standards and revise core content to further develop his language skills in EAL/D English.

Mathematics Accelerated Extension Yr11

Samuel LI

Teacher: Rema NATH

Killara High School - 2018 - Senior Report Semester 2 - Year 11

Progressive Assessment Rank out of 83	5
--	----------

Examination Mark out of 50	41
-----------------------------------	-----------

Outcomes					
	Limited	Basic	Sound	High	Outstanding
Solves harder problems involving algebraic and arithmetic manipulation					✓
Uses multi-step deductive reasoning to solve harder problems involving trigonometry including those in three dimensions				✓	
Solves problems involving circle geometry					✓
Chooses and applies appropriate algebraic, graphical and geometric techniques				✓	

Social Development				
	Rarely	Sometimes	Usually	Always
Consistently completes assigned tasks to the best of their ability				✓
Shows respect and positively interacts with peers and teachers by following directions				✓
Collaborates with peers and teachers by actively participating in class activities and sharing ideas				✓

Commitment to Learning				
	Rarely	Sometimes	Usually	Always
Monitors own learning and applies feedback to achieve personal improvement				✓
Demonstrates critical thinking by identifying problems and making independent judgements				✓
Accepts responsibility for their learning by demonstrating organisational, research and time management skills				✓

Application						
Application	Unsatisfactory	Minimal	Inconsistent	Satisfactory	Commendable	Excellent

Teacher Comment
An outstanding student, Samuel synthesises mathematical techniques, results and ideas creatively across Mathematics and Extension courses. However, under time constraints, he seems to make silly mistakes and loses the easier marks. Samuel needs to ensure that he has shown sufficient detail on his graphs and all lines of working are clearly set out. He forms conjectures, makes predictions, carries out experiments, records and analyses observations and explains and generalises his results. Samuel is resourceful and takes risks in his problem solving. He is progressing extremely well and has the ability to excel at this level of Mathematics.

Mathematics Accelerated Yr11

Samuel LI

Teacher: Rema NATH

Killara High School - 2018 - Senior Report Semester 2 - Year 11

Progressive Assessment Rank out of 111	20
--	----

Examination Mark out of 100	85
-----------------------------	----

Outcomes					
	Limited	Basic	Sound	High	Outstanding
Applies techniques from the study of probability to solve problems. Understands and uses the language and notation of probability					✓
Manipulates algebraic expressions involving logarithmic and exponential functions					✓
Expresses practical problems in mathematical terms based on simple models. Applies techniques from the study of calculus to solve problems				✓	
Applies appropriate techniques from the study of series to solve problems				✓	

Social Development				
	Rarely	Sometimes	Usually	Always
Consistently completes assigned tasks to the best of their ability				✓
Shows respect and positively interacts with peers and teachers by following directions				✓
Collaborates with peers and teachers by actively participating in class activities and sharing ideas				✓

Commitment to Learning				
	Rarely	Sometimes	Usually	Always
Monitors own learning and applies feedback to achieve personal improvement				✓
Demonstrates critical thinking by identifying problems and making independent judgements				✓
Accepts responsibility for their learning by demonstrating organisational, research and time management skills				✓

Application						
Application	Unsatisfactory	Minimal	Inconsistent	Satisfactory	Commendable	Excellent

Teacher Comment
A motivated student, Samuel has shown the commitment and perseverance to succeed in this course. He exhibits the manipulative skills and knowledge base appropriate to the Mathematics course. Samuel identifies appropriate approaches to the solution of many difficult problems and uses calculus and other methods to determine the features of, and to graph, a wide range of functions. He uses sophisticated multi-step reasoning in his problem solving. Samuel communicates effectively using appropriate mathematical language, notation, diagrams and graphs. He would benefit from a thorough revision of harder applications of series to model financial contexts and complex volume questions that involve revolution about y-axis. Samuel is congratulated on his outstanding performance in Mathematics.

Physics Yr11

Samuel LI

Teacher: Alexander KAMMER

Killara High School - 2018 - Senior Report Semester 2 - Year 11

Progressive Assessment Rank out of 93	16
---------------------------------------	----

Examination Mark out of 100	89
-----------------------------	----

Outcomes					
	Limited	Basic	Sound	High	Outstanding
Describes and explains events in terms of Newton's Laws of Motion, the law of conservation of momentum and the law of conservation of energy					✓
Explains and analyses waves and the transfer of energy by sound, light and thermodynamic principles					✓
Conducts investigations to collect valid and reliable primary and secondary data and information				✓	

Social Development				
	Rarely	Sometimes	Usually	Always
Consistently completes assigned tasks to the best of their ability			✓	
Shows respect and positively interacts with peers and teachers by following directions		✓		
Collaborates with peers and teachers by actively participating in class activities and sharing ideas			✓	

Commitment to Learning				
	Rarely	Sometimes	Usually	Always
Monitors own learning and applies feedback to achieve personal improvement		✓		
Demonstrates critical thinking by identifying problems and making independent judgements		✓		
Accepts responsibility for their learning by demonstrating organisational, research and time management skills		✓		

Application						
Application	Unsatisfactory	Minimal	Inconsistent	Satisfactory	Commendable	Excellent

Teacher Comment
Samuel is a quiet and conscientious student who has demonstrated excellent progress this year. He has approached his studies with a positive attitude in class and has supported his learning by completing all classwork and asking questions to clarify concepts. Samuel has achieved a superb result in his most recent assessment task. He has demonstrated a thorough understanding of general physics principles, however, to improve he should revise momentum. Samuel has conducted investigations as part of his depth study on motion and has achieved a highly commendable result. The Working Scientifically skills he should focus on to improve include questioning and predicting, planning an investigation and communicating using appropriate scientific language. Overall, Samuel has demonstrated a solid foundation in this course and in conjunction with a regular study routine he should continue to improve in Year 12.

Software Design and Development Yr11

Samuel LI

Teacher: Mariah BELL

Killara High School - 2018 - Senior Report Semester 2 - Year 11

Progressive Assessment Rank out of 19	5
---------------------------------------	---

Course Mark out of 100	80
------------------------	----

Outcomes					
	Limited	Basic	Sound	High	Outstanding
Describes the interactions between the elements of a computer system				✓	
Uses and justifies the need for appropriate project management techniques					✓
Uses and develops documentation to communicate software solutions to others					✓
Investigates a structured approach in the design and implementation of a software solution			✓		

Social Development				
	Rarely	Sometimes	Usually	Always
Consistently completes assigned tasks to the best of their ability			✓	
Shows respect and positively interacts with peers and teachers by following directions				✓
Collaborates with peers and teachers by actively participating in class activities and sharing ideas			✓	

Commitment to Learning				
	Rarely	Sometimes	Usually	Always
Monitors own learning and applies feedback to achieve personal improvement			✓	
Demonstrates critical thinking by identifying problems and making independent judgements			✓	
Accepts responsibility for their learning by demonstrating organisational, research and time management skills		✓		

Application						
Application	Unsatisfactory	Minimal	Inconsistent	Satisfactory	Commendable	Excellent

Teacher Comment
Samuel has made sound progress this semester in Software Design and Development. His yearly examination result showed his growing knowledge and understanding of course concepts. Samuel created outstanding documentation for the Coding Project which successfully communicated all relevant components of the software development cycle. However, the practical software solution was disappointing as it failed to meet the requirements of the brief as Samuel was required to build one application with many ciphers attached. He would benefit from using his time more effectively in class to ensure he has ample clarification on tasks to produce work that is of a higher standard.
