

Report for Stephen Lincon

Term 3, 2021

Cutler House

Year 12

Cutler House

Days absent: 1

Stephen has worked consistently this term and has had a diligent approach to his studies, which has been reflected in his results. His teachers have suggested some strategies in order for him to prepare for his final examinations. During Mentor periods, his friendly personality and sense of humour have been much appreciated. He has always been willing to join in conversations and participate in games within the mentor group. He has been a great role model to the rest of Cutler House with his dedication to his studies, his willingness to volunteer and his exemplary behaviour. Because of these attributes he is well respected by staff and peers and will be greatly missed. I wish him all the best in his future endeavours.

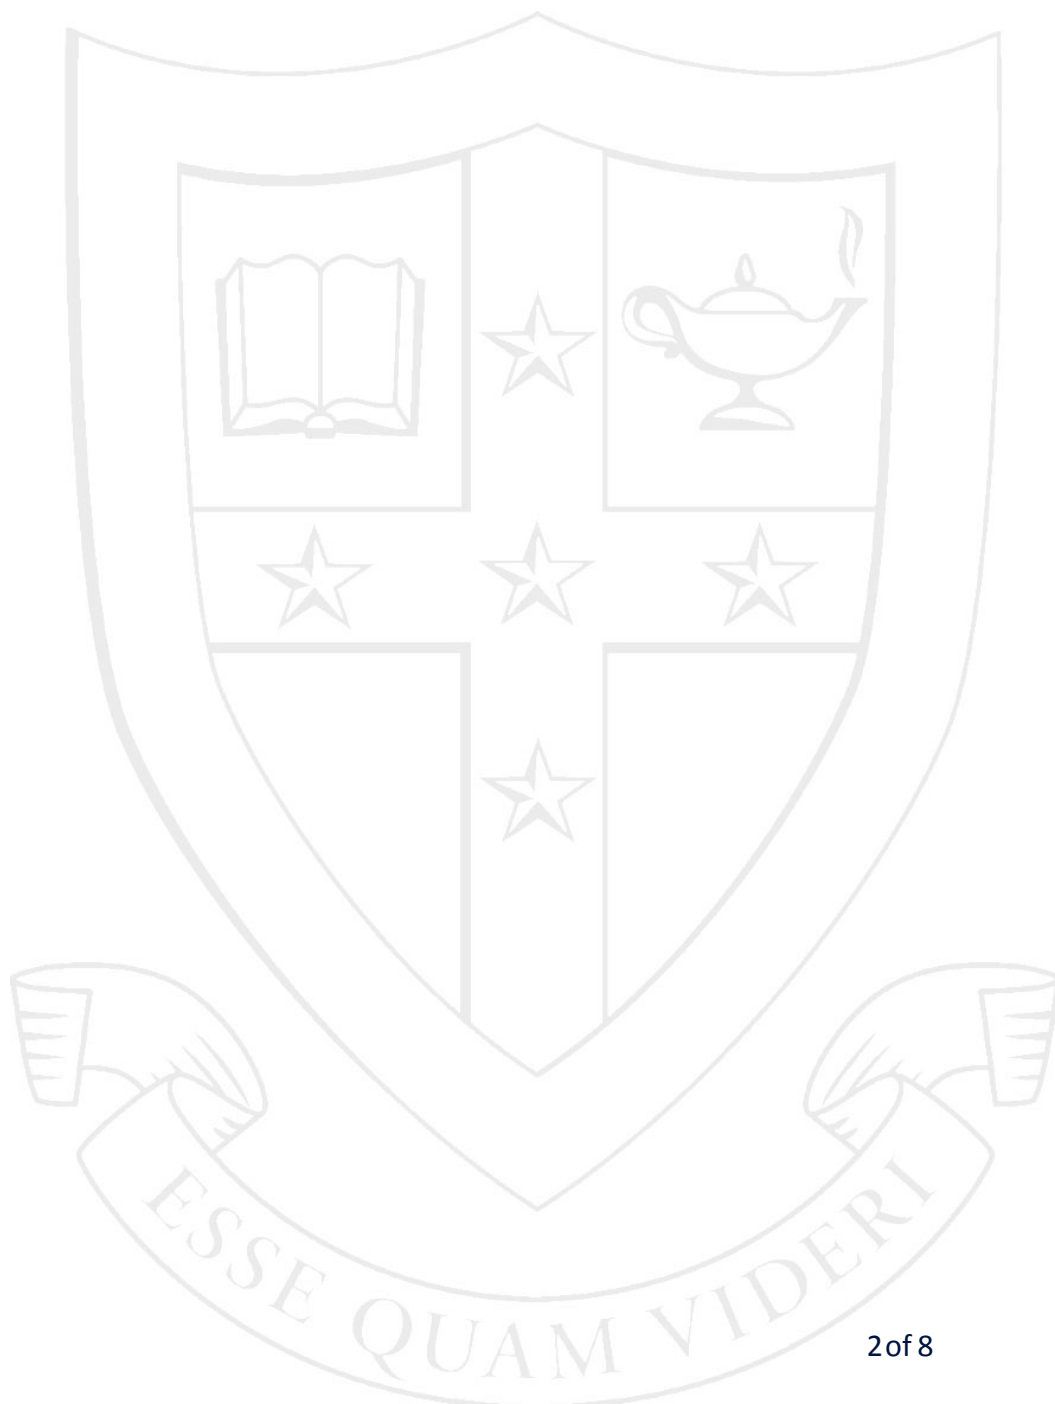

Mentor: Miss Hannah Bamford

Housemaster: Mrs Angelique Sanders

This is an outstanding report. Stephen has met the challenges of Term 3 superbly and is well placed for a strong HSC result. I would also like to commend Stephen on his outstanding contribution to the School during his time at Cranbrook. I wish him every success for the future.

Mr Robert Meakin
Head of Senior School

Academic summary

	Course	Performance grade	Rank in assessment tasks
Economics	2 Unit	A	Task 4: =6/56
English Advanced	2 Unit	A	Task 4: 14/94
Physics	2 Unit	A	Task 4: 2/26
Science Extension	1 Unit	A	Task 3: =1/6

Explanatory Notes

Performance Grade: The following Performance Grade Scale indicates student performance in each secondary year at Cranbrook School.

It describes performance at each of five grade levels, based on classwork, homework and assessment tasks.

A The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.

B The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.

C The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.

D The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.

E The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

Economics

2 Unit

With the shift to distance learning due to Covid-19 restrictions, students ended their Economics course from home. Students learnt about the aims and operation of macroeconomic and microeconomic policies in the Australian economy. Students researched these policies and considered their impacts. Research on the Chinese economy was also conducted.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development

is prepared for class				✓
contributes positively in class				✓
completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 4: =6/56

Stephen has worked tirelessly to extend and challenge himself and as a result has developed a strong understanding of the many complex aspects of the course. He has chosen to work quite independently, but with my support and feedback, and his hard work has translated to impressive results. I congratulate him the mature way he has coped with distance learning and all the Covid-19 related disruptions. Stephen may now turn his attention to course revision and planning unseen questions. Despite an impressive result in the trial examination, I know the essays were disappointing for him and ensuring he manages his time and addresses the question will be important in the HSC examination. Stephen has been a pleasure to teach and I congratulate him on the success he has rightfully enjoyed in Economics.

Teacher: Mrs Paulina White

English Advanced

2 Unit

Students completed their HSC Trials. As part of their revision for this task, students developed study techniques, consulted a range of sample responses and constructed responses to HSC style questions, including practice papers under timed conditions.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
analysing			✓

completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 4: 14/94

Stephen is a conscientious and strategic worker who has been rewarded in a strong internal rank with the HSC Trial examinations. His essay on 'Henry IV, Part I' was particularly impressive and it is important that he recognises what elements this essay possesses that can be transferred to his other analytical compositions. It is vital that Stephen replicates his ability to target particular questions in his topic sentences and that the analytical insights he generates fulfil the sub-questions, related concepts, and rubric connections engendered in set tasks. The HSC Trial examinations also gave Stephen valuable feedback on how to improve his Module C performance. After a well-deserved break, I encourage Stephen to set weekly goals so that he may finish well.

Teacher: Mr Thomas McDonnell

Physics

2 Unit

Students learn about the formation of matter during the big bang. This leads to a consideration of nuclear physics and the atomic theory throughout the nineteenth century. Students finish with today's quantum mechanical model of the atom and the standard model of matter.

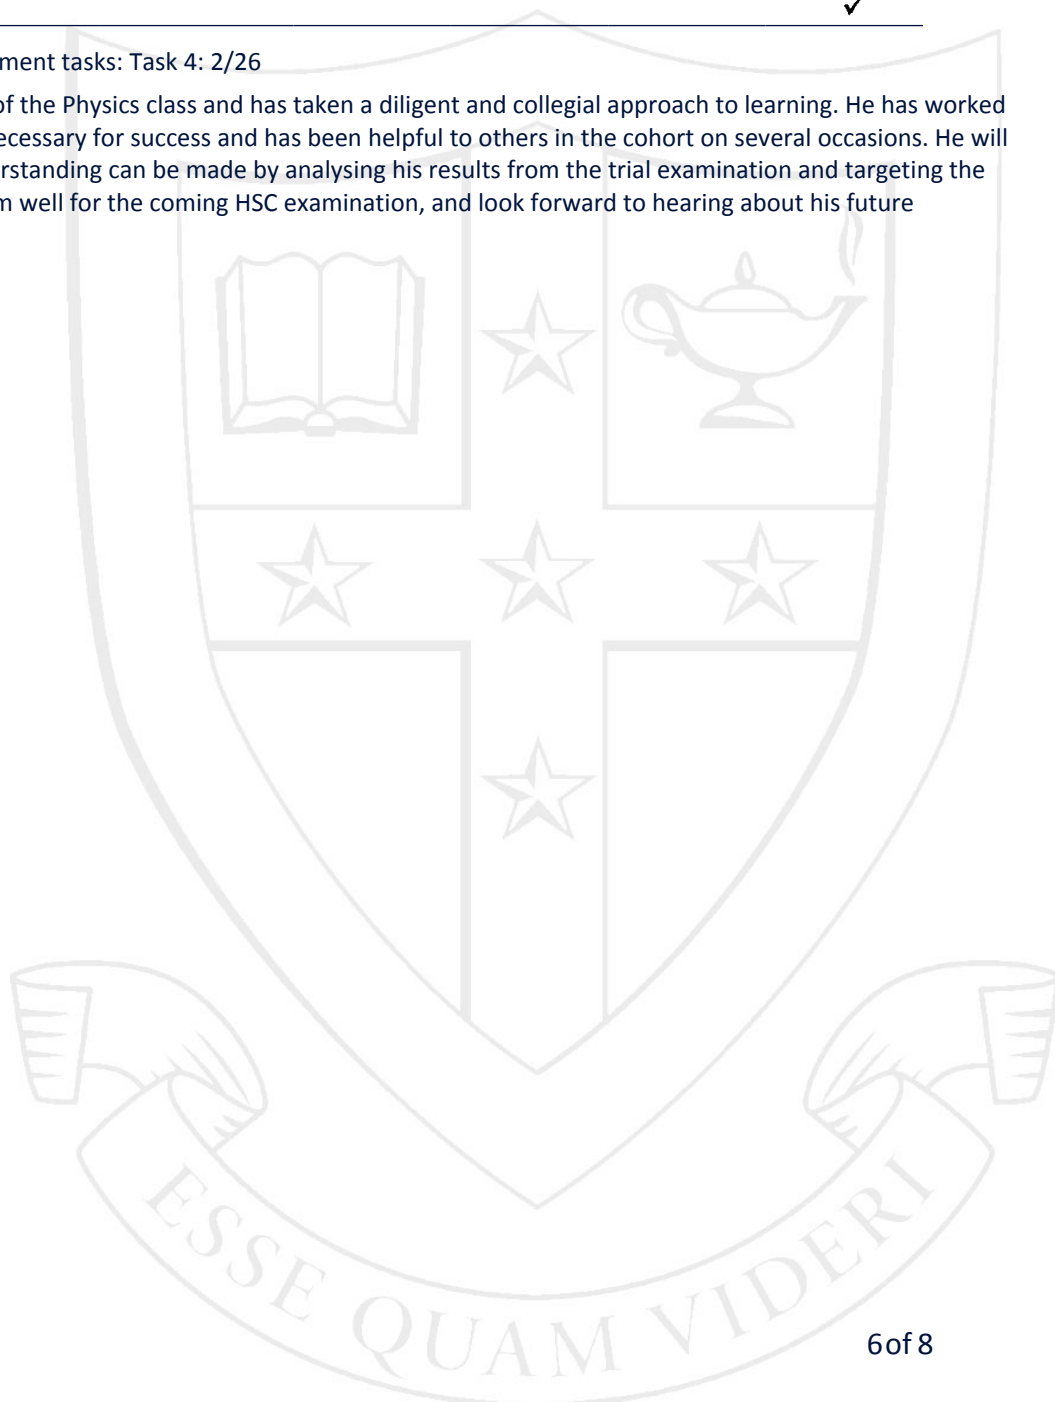

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
inquiring and designing				✓
processing and evaluating				✓
reflecting on the impacts of science				✓

Attitude and Effort	Rarely	Inconsistently	Usually	Consistently
is prepared for class				✓
contributes positively in class				✓
completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 4: 2/26

Stephen has been a positive member of the Physics class and has taken a diligent and collegial approach to learning. He has worked hard to learn the concepts and skills necessary for success and has been helpful to others in the cohort on several occasions. He will find that the greatest gains in his understanding can be made by analysing his results from the trial examination and targeting the areas in which he is weakest. I wish him well for the coming HSC examination, and look forward to hearing about his future endeavours.

Teacher: Mr David Cameron

Science Extension

1 Unit

Students complete their coursework with data analysis and reporting of results. After finalising the practical component of their major projects, students complete their portfolios and reports, summarising the progress and findings of their 12-month project.

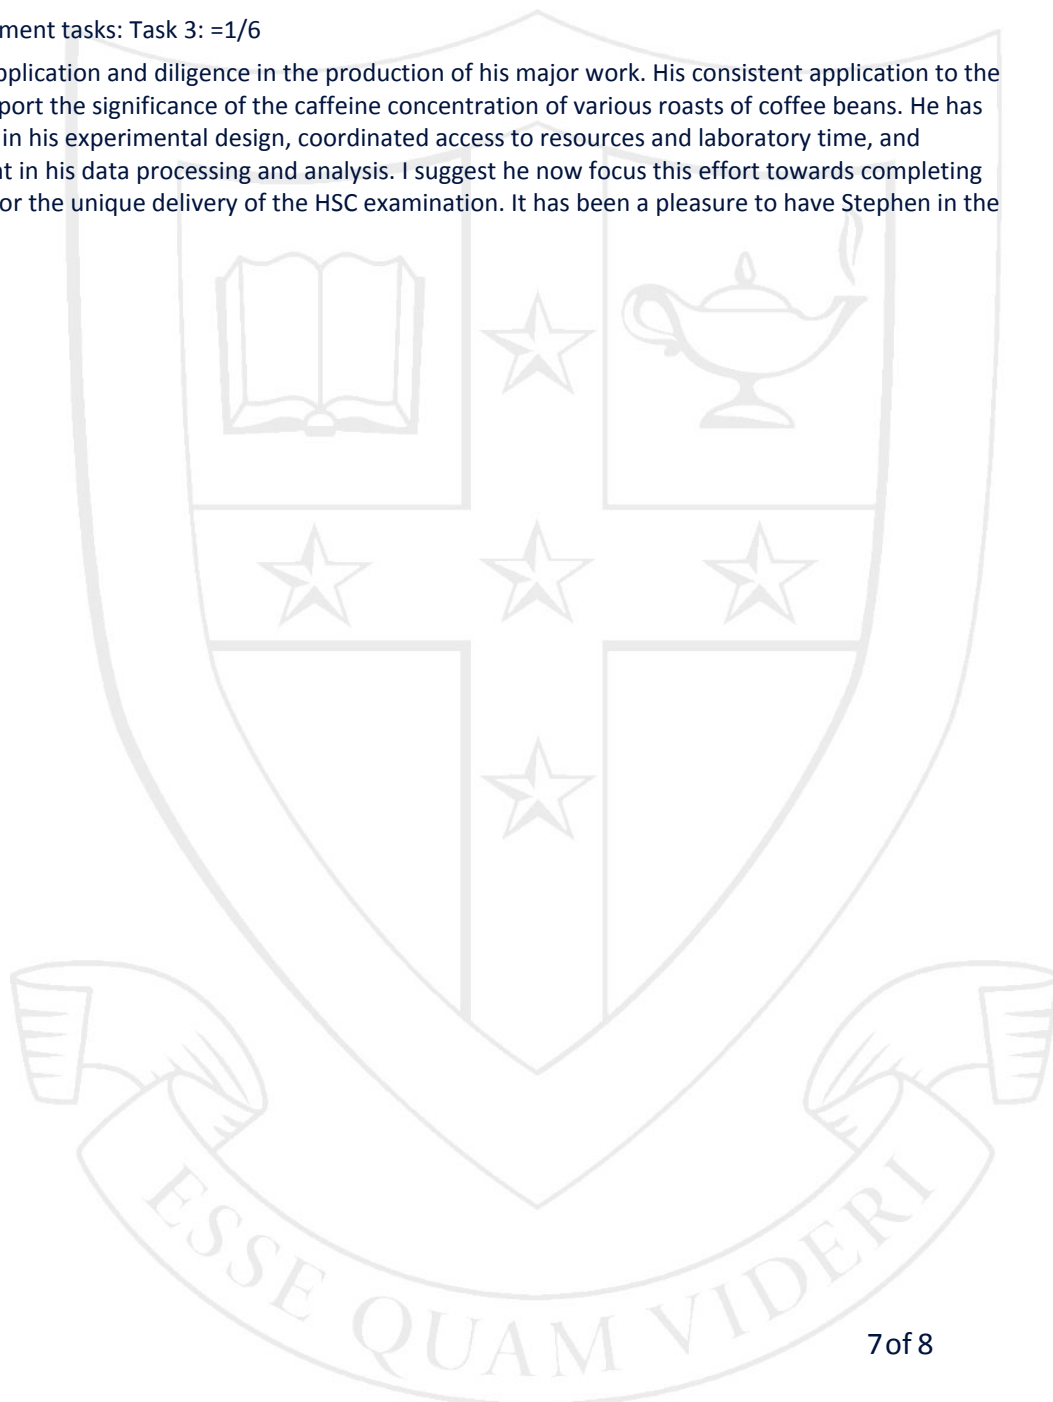

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
inquiring and designing				✓
processing and evaluating				✓
reflecting on the impacts of science				✓

Attitude and Effort	Rarely	Inconsistently	Usually	Consistently

contributes positively in class				✓
completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 3: =1/6

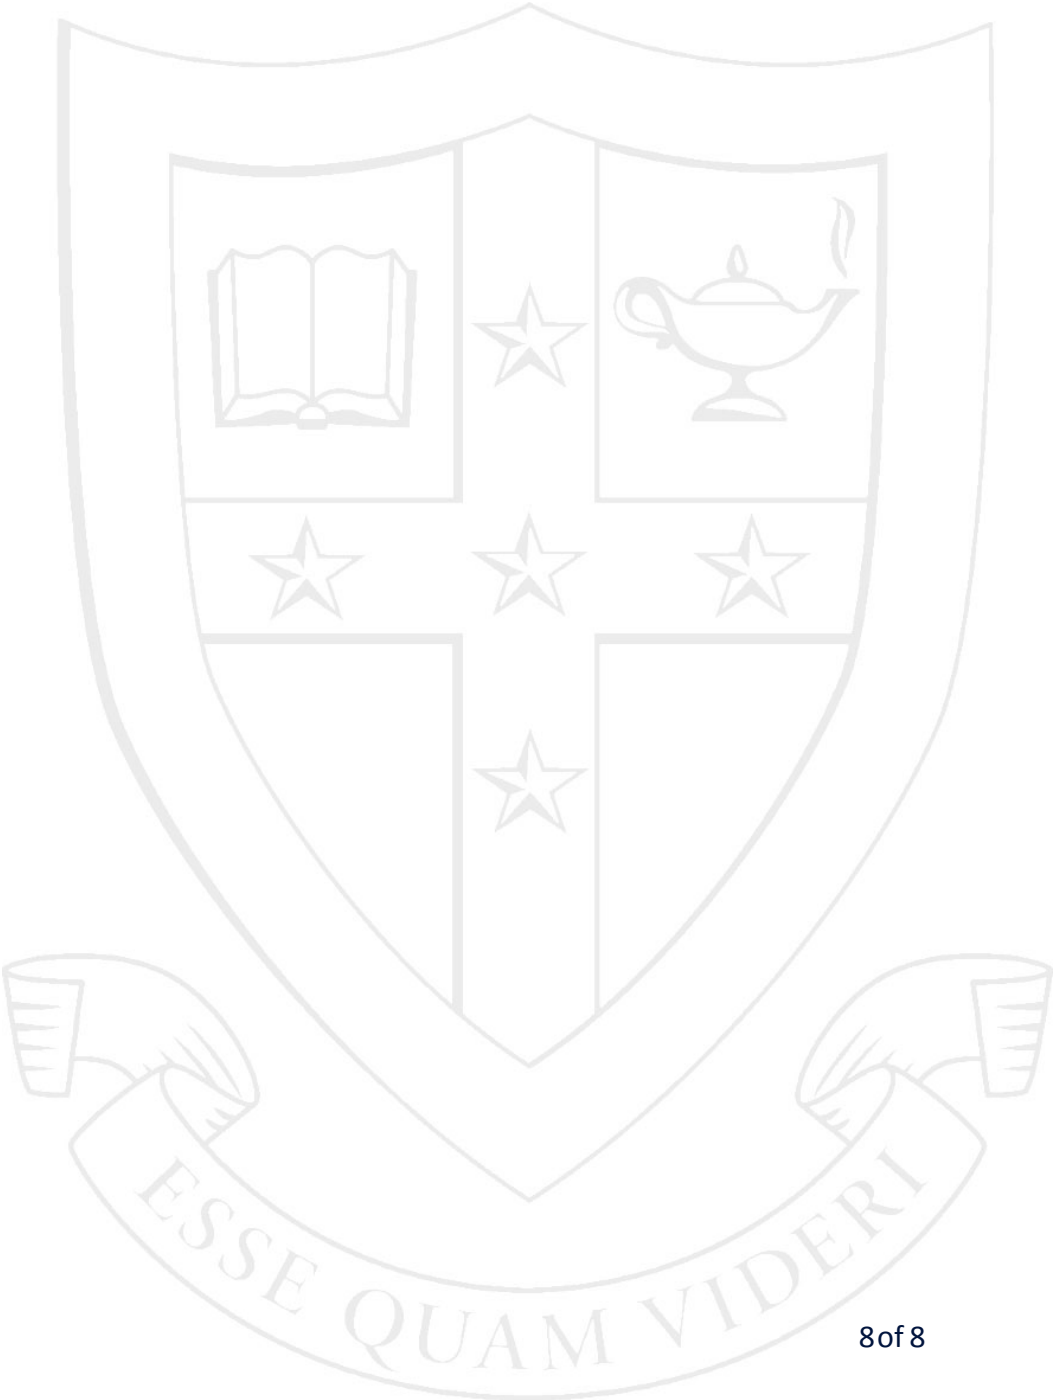

Stephen is to be commended for his application and diligence in the production of his major work. His consistent application to the process has resulted in his ability to report the significance of the caffeine concentration of various roasts of coffee beans. He has worked to overcome many limitations in his experimental design, coordinated access to resources and laboratory time, and demonstrated substantial development in his data processing and analysis. I suggest he now focus this effort towards completing practice papers online in preparation for the unique delivery of the HSC examination. It has been a pleasure to have Stephen in the Science Extension class this year.

Teacher: Mrs Erin Munn

Report for Stephen Lincon

Term 3, 2020

Cutler House

Year 11

Cutler House

Stephen's academic results are excellent and he has maintained his extremely high standards over the two terms. His focus in the short term is on his HSC Mathematics and Chemistry, so he will need to incorporate the final suggestions from his teachers into his revision plan. Balance is the key for Stephen over this period of time and he needs to ensure he allocates adequate time to his other subjects as he begins his HSC year. Once again, he was awarded a place on the Headmaster's List for Outstanding Academic Achievement.

While the year has not allowed us to engage in our full program of co-curricular activities, Stephen enjoyed a winter Tennis season. Stephen is integral to the Mentor group and contributes in his own articulate and thoughtful way. He supports his peers through his steady friendship and seeks advice from them when needed. I would expect Stephen to be an integral part of the leadership the year 12 Cutler group now needs to display, as this will help him develop his own leadership skills. Stephen has a busy time ahead with HSC preparations over this holiday break but I know he will have planned out his study and will be focused on achieving his best. Good luck!

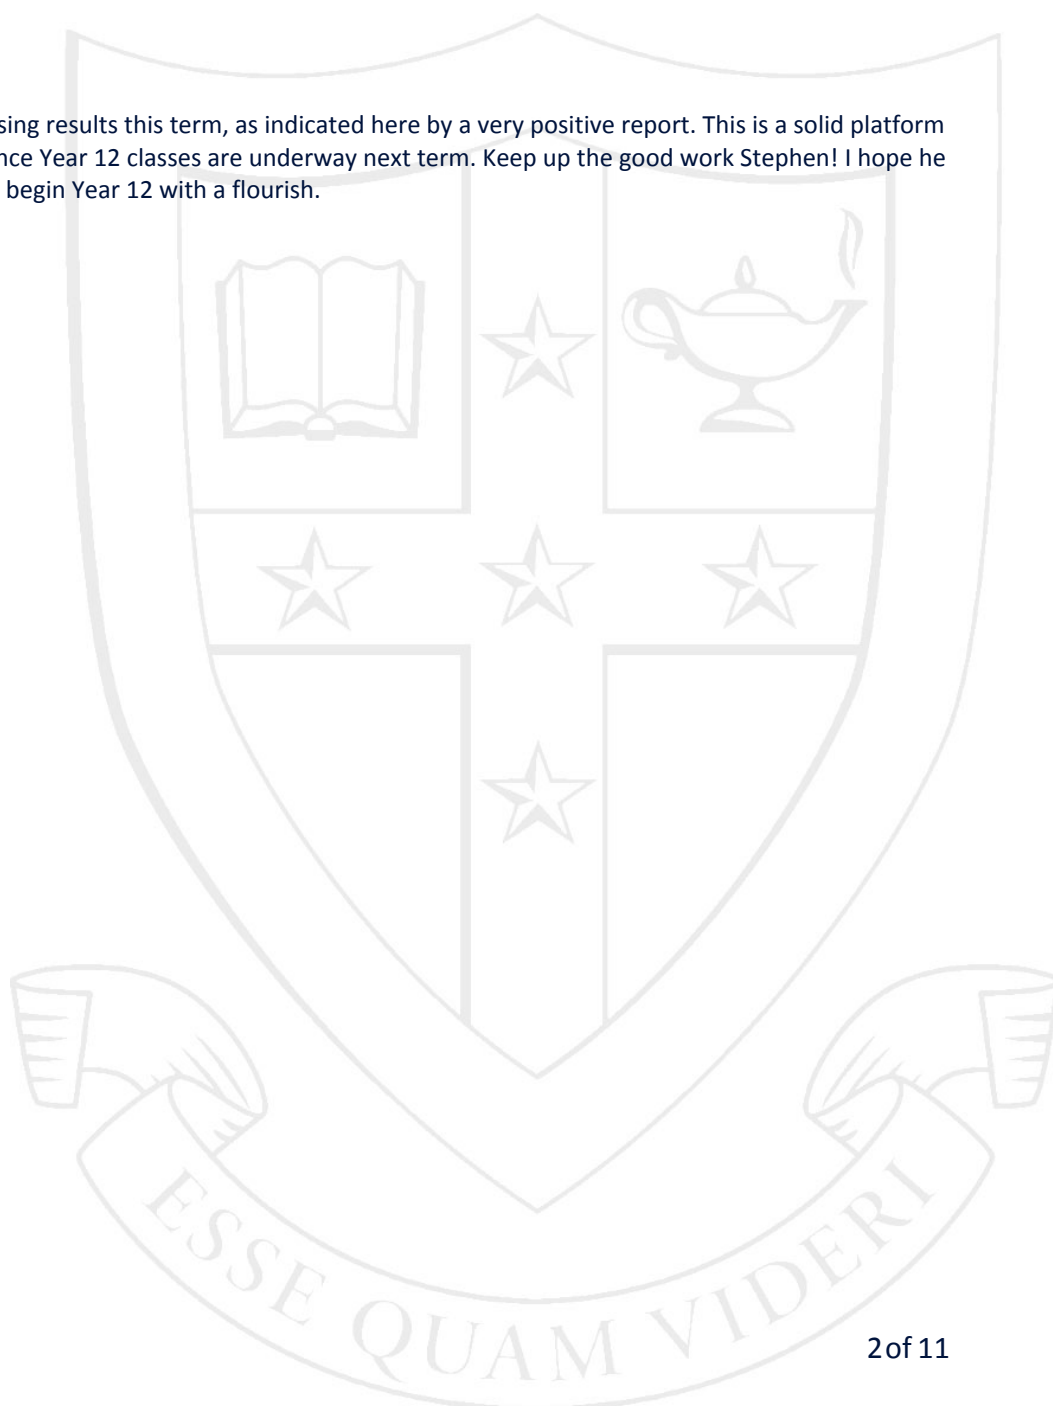

Mentor: Mr Mark Salmon

Housemaster: Mrs Angelique Sanders

Stephen has produced some very pleasing results this term, as indicated here by a very positive report. This is a solid platform from which to achieve great success once Year 12 classes are underway next term. Keep up the good work Stephen! I hope he enjoys a restful break so that he might begin Year 12 with a flourish.

Mr Nicholas Jolly
Deputy Head of Senior School

Academic summary

Explanatory Notes

Performance Grade: The following Performance Grade Scale indicates student performance in each secondary year at Cranbrook School.

It describes performance at each of five grade levels, based on classwork, homework and assessment tasks.

A The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.

B The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.

C The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.

D The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.

E The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

Chemistry

2 Unit

Students learn about the techniques used by chemists to analyse the structure and abundance of inorganic and organic substances and the importance of these techniques. Students also evaluate the implications of chemical synthesis and design on society.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
inquiring and designing				✓
processing and evaluating				✓
reflecting on the impacts of science				✓
Attitude and Effort	Rarely	Inconsistently	Usually	Consistently
is prepared for class				✓

completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 3: =2/46

Stephen is a highly capable and engaged Chemistry student. He has excelled in all aspects of the Chemistry course. Most notably, is his high rank in the trial examination. This is a fantastic result and leaves him positioned to do well in the final HSC examination. Stephen has solid content knowledge. He has made deep connections within and between units. He has fine-tuned his writing and now must just continue to practise answering to the verb and giving the appropriate level of detail in each question. I encourage Stephen to continue to submit past papers for feedback as this on-going process has and will continue to help him improve. I wish Stephen the best of luck for the final HSC examination and look forward to seeing what he can achieve in HSC Chemistry and his other units of study.

Teacher: Miss Stephanie Maher

Economics

2 Unit

Students learn about the failures of a market economy. They are introduced to the significant role played by the government and the Reserve Bank of Australia in managing the Australian economy.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
investigating				✓
communicating				✓
thinking critically				✓
Attitude and Effort	Rarely	Inconsistently	Usually	Consistently
is prepared for class				✓

Performance grade: A Rank in assessment tasks: Task 3: =9/65 Task 4: =2/65

Stephen is to be congratulated on his excellent progress in Economics. He has worked consistently to develop his understanding of the foundations of Economics covered in the course. Stephen's keen interest in the course is evident and his note taking and prep are always completed to a high standard. His recent examination performance showed thorough preparation and a flair for essay writing that continues to impress. He is a mature and valued member of our class. He will excel in the HSC course if he maintains this focused approach to his Economics studies. I encourage Stephen to continue his habit of staying a little ahead of where we are up to in class, and extend himself with wide reading.

Teacher: Mrs Paulina White

English Advanced

2 Unit

Students study Module B: Critical Study of Literature. In this module, students develop detailed analytical and critical knowledge, understanding and appreciation of William Shakespeare's play Othello. Through increasingly informed and personal responses to the text in its entirety, students understand the distinctive qualities of the text, notions of textual integrity and significance.

contributes positively in class				✓
completes set tasks				✓
acts on feedback to improve				✓

Performance grade: B Rank in assessment tasks: Task 3: =16/121

Stephen is a committed student who has worked consistently throughout the Preliminary HSC English Advanced Course. He performed exceptionally well in the reading task section of the yearly examination. This reflects his organised approach to his writing and the progress he has made in his analytical prose. His essay on 'Othello' possessed high level concepts and an appreciation of the social and political dimensions of the play, however, explicitly anchoring it to the question is still something he is developing. Stephen's great strength is preparation, however, it is important that he does not shoehorn practice essays into new questions; linking to all aspects of the question is essential.

Teacher: Mr Thomas McDonnell

Geography

2 Unit

Students learn about global challenges through the study of natural resource use via Coltan and Coal and the changing nature of the world's population. Students also complete an individual geographical inquiry project using primary and secondary sources in order to produce an engaging documentary.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
investigating				✓
communicating				✓
thinking critically				✓
Attitude and Effort	Rarely	Inconsistently	Usually	Consistently
is prepared for class				✓
contributes positively in class				✓
completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 2: =1/44 Task 3: =2/45

Stephen is to be commended for an outstanding year and exceptional academic results in Preliminary Geography. He has continued to work productively in the classroom with an efficiency work ethic and ability to think critically about geographic trends and patterns, most evident in the unit on Natural Resources and Coal production. Stephen's highlight has been his outstanding Senior Geography Project (SGP) on Urban Soundscapes and how sound influences the 'Culture of Place' in Sydney. His final documentary highlighted his detailed and sophisticated collection of primary data and creativity in producing a short film. Stephen is to be commended for his outstanding start to his HSC studies in Geography and I would advise him to now focus on his preparation for our first core unit on Viticulture and Tamburlaine Organic Winery.

Teacher: Mr Matthew Carroll

Mathematics Advanced

2 Unit

Students learn about radian measure, revise concepts in trigonometry and learn to apply calculus to trigonometric equations. They also learn about applications of calculus to the physical world, with a focus on exponential growth and decay, as well as motion in a straight line. Students learn about probability and how to apply their knowledge to solve problems.

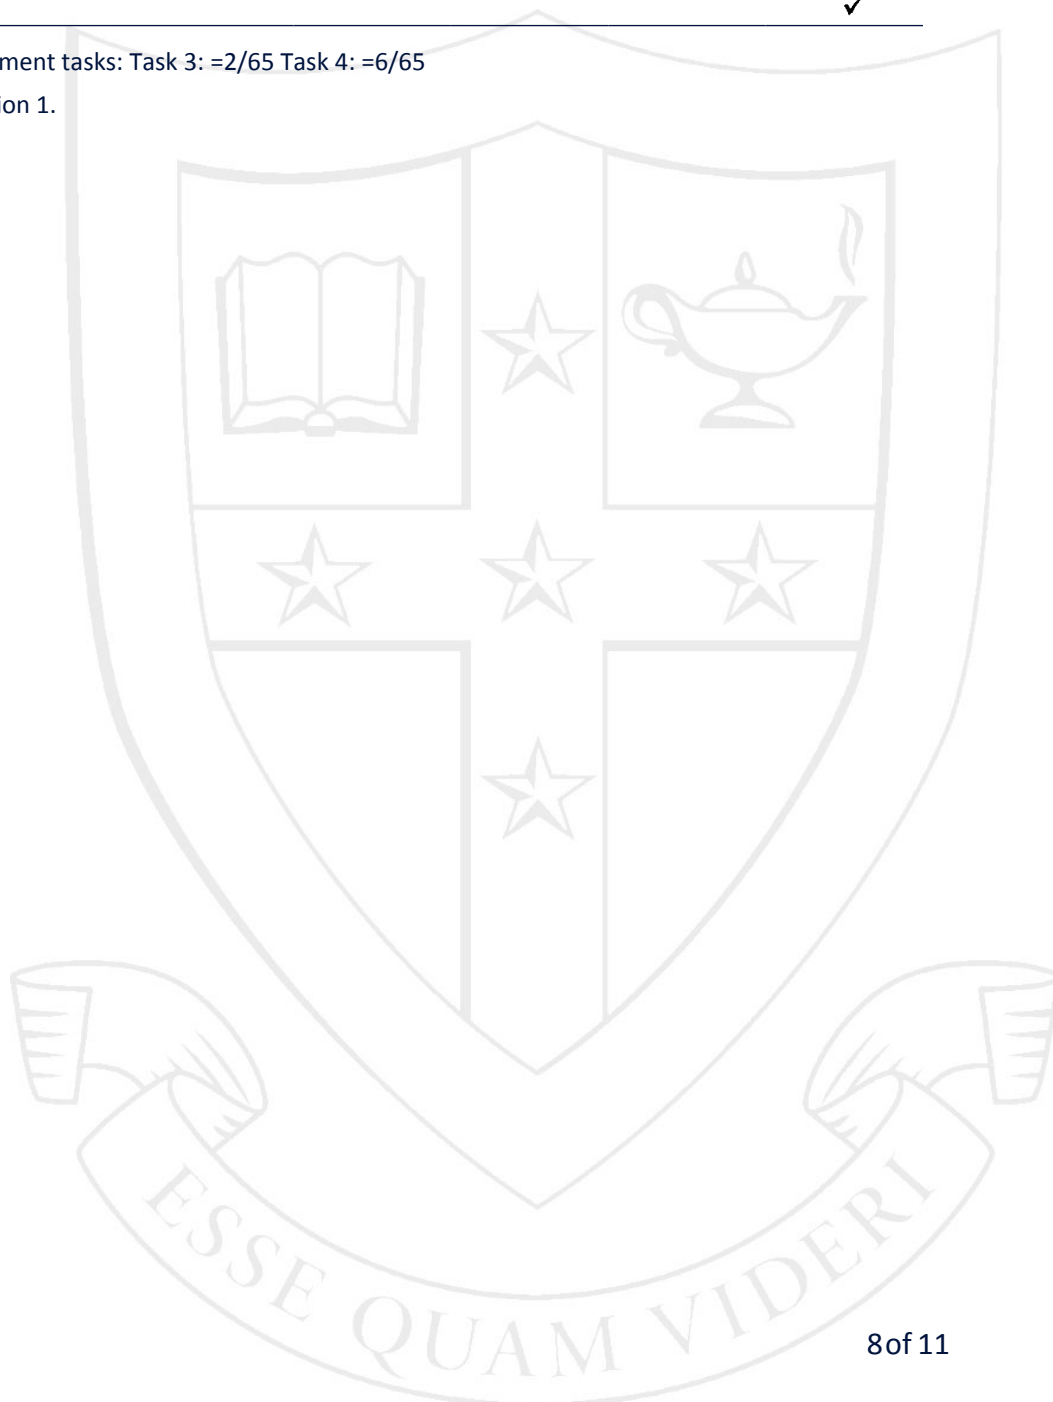

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓

Performance grade: A Rank in assessment tasks: Task 3: =2/65 Task 4: =6/65

See comment for Mathematics Extension 1.

Teacher: Mr Christopher Aynsley

Mathematics Extension 1

1 Unit

Students learn about inverse functions and apply this knowledge and their knowledge of calculus to trigonometric functions. Students learn about applications of calculus to the physical world, such as rates of change, projectile motion and simple harmonic motion.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
investigating patterns				✓
communicating				✓
applying mathematics in real-world contexts				✓

Performance grade: A Rank in assessment tasks: Task 3: 8/46 Task 4: =1/47

Stephen's outstanding results speak for themselves. He has had a terrific finish to both the Advanced and Extension 1 Mathematics courses. He has performed to an extremely high level in all assessment tasks this semester. He has laid the perfect foundation from which to approach his HSC examinations. I wish him well over the final stretch and would strongly encourage him to pursue Extension 2 Mathematics next term. It has been a pleasure teaching Stephen over the past two years.

Teacher: Mr Christopher Aynsley

Physics

2 Unit

Students learn about wave properties and the electromagnetic spectrum, including how temperature, thermal energy and particle motion are related. This is followed by studying the relationships between electrostatics, electrical circuits and magnetism.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
inquiring and designing				✓

Performance grade: A Rank in assessment tasks: Task 1: =2/47 Task 2: =2/47 Task 3: 2/47

Stephen is a motivated and diligent Physics student who is to be commended on the obvious effort to maintain a high standard across all assessment tasks this year. He has achieved an excellent result in his yearly examination, placing second in the cohort. He has exhibited improvements in multiple choice and especially in extended response questions, being the only student to be awarded full marks in the essay question. To continue his development, he must practise the skills content related to processing data. Stephen is a fine student and it has been a pleasure to have him in class this year.
