
EMANUEL SCHOOL

2019 Year 12

Semester 1

Mia Port

Days Absent – 4

House Tutor's Comment

Mia has continued to be a mature, driven and friendly member of the Tutor Group and is an excellent role model to the younger Year Groups in her capacity as Szenes House Captain. She wears her uniform impeccably and is responsible and reliable. Mia is always willing to assist with Madrichim Events, providing support to the Head Madrich and Madricha. She promptly organises our weekly House Assemblies, demonstrating her House spirit. This semester, Year 12 have listened to a variety of guest speakers with a focus on considering future careers. These speakers have ranged from medical professionals, business leaders to the communications and media industries. Mia is focused on achieving her academic potential. Her motivation to succeed and work ethic are enabling her to achieve a number of the goals she has set for herself. She has tackled the challenges of HSC and her extra-curricular commitments with composure and positivity. I wish her all the best for the final months of High School.

Ms D Goldmann

Executive Comment

Mia has contributed to the culture of the School through her role as House Madricha. She has made outstanding progress this semester, resulting in a Principal's Award for both Academic Effort and Academic Achievement. A capable student with an exemplary work ethic, Mia has balanced her leadership and academic commitments wisely. She is encouraged to refine her examination technique through practising past papers under timed conditions and to reflect on the feedback provided.

Mr A Watt

Principal

Emanuel School reports your child's progress with written reports twice a year and through interviews and meetings. You may contact the School to discuss this report and Mia's progress with the Teacher, House Tutor or Head of House:

Extra-curricular Activities
HS House Captains-2019
Sport

Year 12 Assessment is based on formal HSC tasks.

Key to Grades

A - Advanced Achievement: The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these to new situations.

B - High Achievement: The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.

C - Satisfactory Achievement: The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes.

D - Developing Achievement: The student is developing knowledge and understanding of the content and has achieved a basic level of competence in the processes and skills.

E - Experiencing Difficulties: The student has an elementary knowledge and understanding in a few areas of the content and has achieved very limited competence in some of the processes and skills.

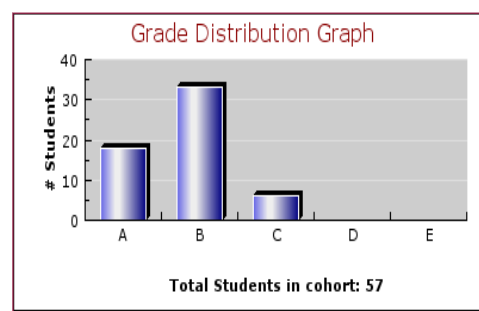

Grades are awarded for each listed course outcome and the overall course grade is a summary of student achievement in that course.

Grades A-E for Mathematics relate to specific ability-grouped classes within the Year. In Years 7-10 an "A" may be awarded to students in sets 1, 2 or 3 if their level of academic achievement is judged to be excellent at that level.

English Advanced

Grade: A

We began the HSC English Advanced course in Term 4 last year with our study of Texts and Human Experiences, involving an in-depth study of the play 'Rainbow's End', by Jane Harrison. Students were assessed in that unit through a multimodal presentation on the play and a related text. In Term One, students studied T. S. Eliot's poetry for Module B: Critical Study of Text and have this term begun their study of 'The Tempest', by William Shakespeare, and 'Hag-Seed', by Margaret Atwood, for Module A: Comparative Study of Texts and Context. Students have also studied Craft of Writing throughout the course. Students were assessed this year through an essay on T. S. Eliot's poetry and a Craft of Writing task.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Demonstrates an understanding of the themes and ideas of the texts studied and can relate them to concepts covered in the course		✓			
Demonstrates an understanding of the ways composers use language to shape meaning in texts		✓			
Demonstrates an ability to write extended analytical pieces that shape meaning for specific audiences, purposes and contexts	✓				
Demonstrates an ability to write creatively and create extended imaginative or interpretive texts for specific audiences, purposes and contexts	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

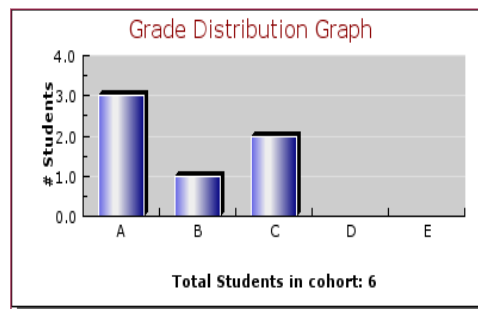

Mia is an interested and hard-working student who always participates in class discussion and collaborative group work. She has demonstrated excellent knowledge and understanding of the texts, concepts and skills studied this semester. Earlier this year, her essay on T. S. Eliot's poetry showed strong knowledge of the poems but she needed to refer to the question more consistently throughout. Since this task, she has worked on developing her planning in response to unseen questions and she should practise under timed conditions. Her Craft of Writing task connected closely to the question at hand and she should develop a wider variety of techniques to explore in detail in her reflection. She is advised to continue handing in handwritten practice responses for teacher feedback. Mia is commended for her determination and efforts this semester.

Mrs K Woolf

Chemistry

Grade: A

The Chemistry Stage 6 Syllabus explores the structure, composition and reactions of and between all elements, compounds and mixtures that exist in the Universe. The discovery and synthesis of new compounds, the monitoring of elements and compounds in the environment, and an understanding of industrial processes and their applications to life processes are central to human progress and our ability to develop future industries and sustainability. The course further develops an understanding of Chemistry through the application of Working Scientifically skills. It focuses on the exploration of models, understanding of theories and laws, and examination of the interconnectedness between seemingly dissimilar phenomena. This semester students have completed their study of Module 5: Equilibrium and Acid Reactions, Module 6: Acid/Base Reactions and Module 7: Organic Chemistry. Students' understanding of the topics studied this semester and experimental skills were assessed through the completion of a Skills and Research Task, Depth Study and Topic Test.

Course Outcomes	Level of Achievement				
	A	B	C	D	E
Mia					
Demonstrates ability to apply knowledge and understanding of scientific concepts encountered this semester		✓			
Demonstrates ability to work scientifically on experimental investigations	✓				
Demonstrates ability to communicate scientific information and understanding	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

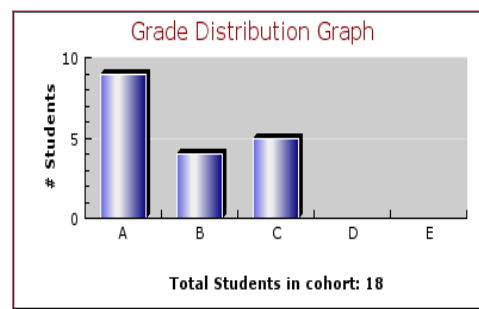

Mia is to be commended on her mature and diligent approach to the study of Chemistry. She applies herself well in class and completes all tasks to a high level. Mia has developed a good understanding of the concepts covered this semester and is able to use this to answer questions both in class and on examinations. She is encouraged to read widely in this subject to further enhance her understanding of the ideas covered. Mia should also answer as many textbook and examination style questions as possible to practise the skills needed to give complete and detailed answers. Mia has been a pleasure to teach this semester.

Ms J Selinger

Mathematics Extension 1

Grade: A

In this reporting period students have furthered their understanding of Trigonometry, converting to radian measure, graphing Trigonometric Graphs, differentiating and integrating Trigonometric Functions, including double, compound angle, auxiliary angles and t-results and solving questions from three dimensional situations. Students then studied Polynomials, including estimating roots using Newton's Method. Students studied Inverse functions and Inverse Trigonometry. They then explored rates and Exponential Growth. Performances of Understanding occurred in Term 4 2018 and Term 1 2019 through in-class assessments and in Term 2 through the Half-Yearly Examination.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Demonstrates a further understanding and application of Trigonometry through an exploration of the Trigonometric Function and the Inverse Trigonometric function	✓				
Demonstrates an ability to further explore Calculus and its application to the Physical World	✓				
Demonstrates an understanding of Preliminary Extension 1 concepts such as inequalities, induction, circle geometry and parametric equations.	✓				
Demonstrates an understanding of polynomials and Newton's method of approximation	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively		✓		
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

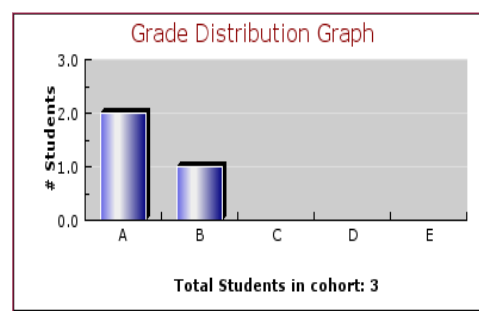

Mia continues to demonstrate the initiative required to study the Extension 1 Course. She displays the abilities to think clearly, to generalise and to work at an abstract level. Mia is both logical and intuitive in her approach to problem solving. She works with a cheerful determination and has developed the self-discipline and self-reliance for senior work. Mia has an excellent work ethic and spends time outside of class consolidating her understanding of specific topics. She is quick to share her understanding and to explain concepts to classmates and has been explaining new work to them in class. This is impressive and will help her to consolidate her own knowledge.

Mrs M Lyons-Zwarenstein

Mathematics Extension 2

Grade: A

In this reporting period students studied Complex Numbers. They were introduced to the number i and used vector representations and modulus argument form. They then studied graphs by transforming known graphs and using implicit differentiation. Students examined Polynomials and used techniques from this topic to help solve complex number questions, as well as simplify partial fractions. They studied Conics in both Cartesian and Parametric forms, and used complex numbers to describe conic shapes. They began their study of Integration. Performances of Understanding occurred in Term 4 2018 and Term 1 2019 through in-class assessments and in Term 2 2019 through the Half Yearly Examination.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Demonstrates an understanding of Integration by applying a table of integrals and substitution	✓				
Demonstrates an understanding of complex numbers		✓			
Demonstrates an understanding of graphs by applying domain and range operations to a graph	✓				
Demonstrates an understanding of polynomials by applying the division transformation, theory of roots and partial fractions	✓				
Demonstrates an understanding of conics by applying the locus, Cartesian and parametric interpretations of conic sections	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

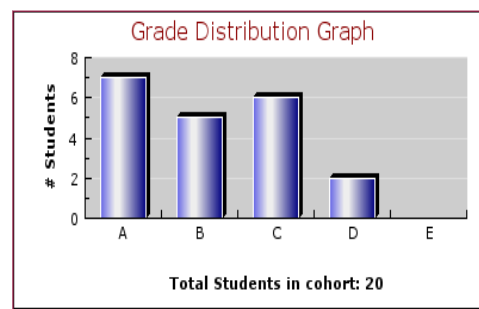

The improvement in Mia's results has been slow and steady, from a satisfactory result in the first assessment test on Complex Numbers and Graphs, to particularly impressive results in the second assessment test on Polynomials and Conics and also in the recent Half Yearly Examination. I have been impressed by her determination to succeed and by her diligence to complete more work than has been expected of her. She is to be congratulated for being the first student to complete 100 Integration questions. Mia listens to advice and acts on it accordingly. Her logical approach to her studies is to be commended. Mia sets her work out clearly and cogently and is developing sensible techniques for answering questions under examination conditions. I look forward to Mia's continued progress.

Ms C Laumberg

PDHPE

Grade: A

In Semester 1 Year 12 PDHPE students studied HSC Core 2 (Factors Affecting Performance) and the HSC option, Sports Medicine. Core 2 considers how training, psychology, nutrition, recovery strategies and skill acquisition affect performance. The Sports Medicine option looks at the considerations surrounding participation in sport, as well as the treatment of and recovery from injuries. Attainment of course outcomes was evaluated through a Powerpoint Presentation based assignment (Sports Medicine), an in-class task on Core 2 (Factors Affecting Performance) and the Half Yearly Examination.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Critically analyses approaches to training and skill development and investigates the contributions of psychology, nutrition and recovery strategies to performance	✓				
Explains how a variety of training approaches and other interventions enhance performance	✓				
Selects and applies strategies for the management of injuries and the promotion of safety in sport and physical activity	✓				
Demonstrates an ability to learn and recall theoretical course content	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively		✓		
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

Mia is a dedicated student with an outstanding work ethic. She starts each lesson with a positive attitude and a readiness to learn. Mia has an excellent ability to learn, remember and recall syllabus content. She produced a Powerpoint Presentation in the Sports Medicine assessment task which highlighted her thorough knowledge of injury management, prevention strategies and rehabilitation. Mia is commended on her result in the Factors Affecting Performance assessment task Half Yearly Examination, receiving an excellent mark. Her responses throughout her paper displayed a comprehensive understanding of course content. Mia's main area for improvement is ensuring she applies relevant and specific examples to support her answers in examination questions. Mia is encouraged to maintain her thorough study notes and submit practice questions that further develop her written responses, under timed examination conditions.

Mr A Ezekiel

EMANUEL SCHOOL

2019 Year 12

Semester 2

Mia Port

Days Absent – 6

House Tutor's Comment

Mia recently concluded her year as Szenes House Captain, a role she enacted with integrity and enthusiasm. She is an exemplary role model to the younger year groups and has served Szenes House and Emanuel School with pride. Mia planned and delivered engaging games and activities for our Szenes House Assemblies and the students appreciated her efforts. She wears her uniform impeccably, is punctual and always willing to help out with school activities. Mia is interested in gaining a qualification in Medicine or Chemical Engineering. She has always been appreciative of her education and I am sure that she will succeed in her future studies. It has been a pleasure to have Mia in the Tutor Group and I wish her all the best for her HSC Examinations and future endeavours.

Ms D Goldmann

Executive Comment

Mia is an outstanding student with an exemplary work ethic. She has balanced her academic and leadership commitments well. Mia's performance in Mathematics was particularly pleasing. She will receive a Principal's Award for both Academic Achievement and Effort. In the lead up to her final examinations, Mia is encouraged to practise past papers under exam conditions and to reflect on the feedback provided by her teachers. Mia has been a great asset to Emanuel, leading and contributing to different aspects of school life. We wish her every success in her future endeavours.

D - Developing Achievement: The student is developing knowledge and understanding of the content and has achieved a basic level of competence in the processes and skills.

E - Experiencing Difficulties: The student has an elementary knowledge and understanding in a few areas of the content and has achieved very limited competence in some of the processes and skills.

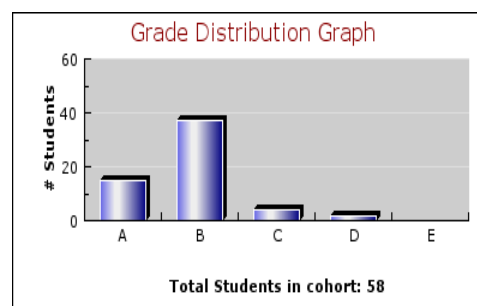

Grades are awarded for each listed course outcome and the overall course grade is a summary of student achievement in that course.

Grades A-E for Mathematics relate to specific ability-grouped classes within the Year. In Years 7-10 an "A" may be awarded to students in sets 1, 2 or 3 if their level of academic achievement is judged to be excellent at that level.

English Advanced

Grade: B

This semester, students concluded their study of Module B: Critical Study of Text with an essay on T. S. Eliot's poetry. Students then studied Module A: Textual Conversations. This unit involved examining how Shakespeare's 'The Tempest' was appropriated into Margaret Atwood's novel 'Hag-Seed'. Students have continued to work on Module C: The Craft of Writing and were assessed on this through an in-class task. The Trial Examination consisted of three essays and a comprehension section.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Demonstrates an understanding of the themes and ideas of the texts studied and can relate them to concepts covered in the course	✓				
Demonstrates an understanding of the ways composers use language to shape meaning in texts		✓			
Demonstrates an ability to write extended analytical pieces that shape meaning for specific audiences, purposes and contexts		✓			
Demonstrates an ability to write creatively and create extended imaginative or interpretive texts for specific audiences, purposes and contexts		✓

Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

Mia is a capable student who has demonstrated thorough knowledge and understanding of the texts, concepts and skills studied this year. She has been working hard to plan her ideas and evidence prior to tasks or examinations, and to tailor her analysis specifically to key words within essay questions. Her responses in the Trial HSC Examination revealed an effective understanding of texts, with her comprehension and essay responses presenting some solid arguments and synthesis throughout. Mia should continue handing in practice papers in the lead up to her HSC Examinations. She is commended for her hard work and efforts towards her English studies.

Mrs K Woolf

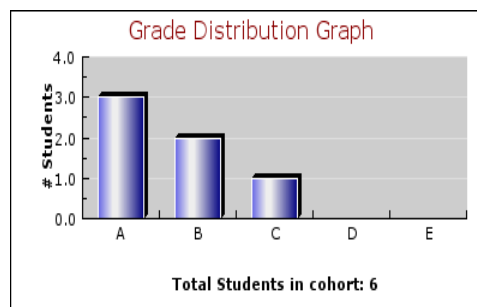

Chemistry

Grade: A

The Chemistry Stage 6 Syllabus explores the structure, composition and reactions of and between all elements, compounds and mixtures that exist in the Universe. The discovery and synthesis of new compounds, the monitoring of elements and compounds in the environment, and an understanding of industrial processes and their applications to life processes are central to human progress and our ability to develop future industries and sustainability.

The course further develops an understanding of Chemistry through the application of Working Scientifically skills. It focuses on the exploration of models, understanding of theories and laws, and examination of the interconnectedness between seemingly dissimilar phenomena.

This semester students have completed their study of Module 7: Organic Chemistry and Module 8: Applying Chemical Ideas. Students' understanding of the topics studied this semester and experimental skills were assessed through the completion of a Depth Study and Trial Examination.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Demonstrates ability to apply knowledge and understanding of scientific concepts encountered this semester		✓			
Demonstrates ability to work scientifically on experimental investigations	✓				
Demonstrates ability to communicate scientific information and understanding	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

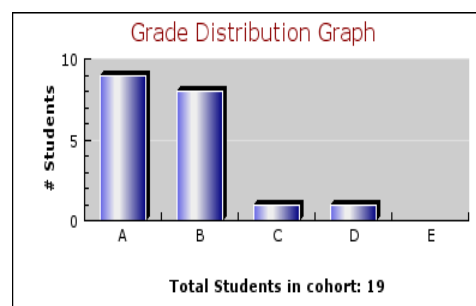

Mia has applied herself to the study of Chemistry with distinction. She is always willing to take responsibility for her learning and ask questions if she is unsure of a concept. Mia's answers on the recent Trial Examination indicate that she has a good understanding of the concepts covered and can apply this to a variety of situations. She made a number of careless errors and there were some areas in which she did not have the information she needed to fully answer the question. She should now ensure that she completes as many examination style questions as possible to identify any areas needing further study and practise answering these types of question. Mia completed an excellent Depth Study and her approach to this task was commendable. She has been a pleasure to teach and I wish her all the best for the HSC examination and the future.

Ms J Selinger

Mathematics Extension 1

Grade: A

During Semester 2, students furthered their understanding of Trigonometry, working with Inverse Trigonometric Functions, defining, graphing, differentiating and integrating them. They studied Further Trigonometry by solving questions on 3-dimensional situations. Students then explored the physical applications of Calculus, expanding their knowledge of rates, exponential growth and decay, and motion - including Simple Harmonic Motion and Projectile Motion. They then studied Pascal's Triangle and The Binomial Theorem finding particular terms, proofs and Binomial Probability. Performances of Understanding occurred through an in-class assessment and the Trial Examination.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Demonstrates a further understanding and application of Trigonometry through an exploration of the Trigonometric Function and the Inverse Trigonometric function	✓				
Demonstrates an ability to further explore Calculus and its application to the Physical World	✓				
Demonstrates an understanding of Preliminary Extension 1 concepts such as inequalities, induction, circle geometry and parametric equations.	✓				
Demonstrates an understanding of The Binomial Theorem including proofs and Binomial Probability	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

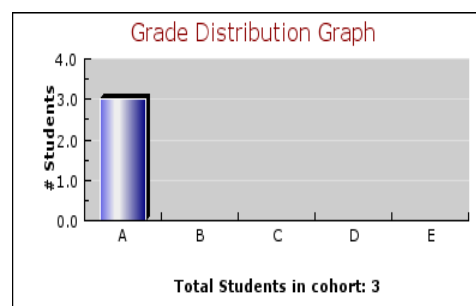

Mia is a most committed student; an example to her peers as she constantly gives of her best, refuting her fatigue as she constantly tries to learn new things by considering how else questions can be posed. Mia displays an exceptional talent for Mathematics and her results on every assessment task have been outstanding. She shows considerable independence of thought and has excellent insight into difficult problems which she has to conquer using her insight, intuition and skills. Mia has the capacities to think clearly, to generalise and to work at an abstract level. She shows a real insight into this level of Mathematics, often finding quick and succinct methods of answering questions. Mia should aim to complete a Trial or HSC Past Paper once a week, working backwards from the most applied to the more rote questions to incite her application skills while still ensuring accuracy. Mia's positive disposition and love for Mathematics have equipped her with skills that will support her further studies. I have thoroughly enjoyed teaching Mia over the last three years, watching her confidence in herself and her willingness to take academic risks grow. I wish her every success both in the HSC and for the future.

Mrs M Lyons-Zwarenstein

Mathematics Extension 2

Grade: A

In Semester 2, students furthered their skills in Integration, studying integration by parts, partial fractions, substitution, standard integrals, trigonometric functions and iteration. They found volumes of solids of revolution through slicing, cylindrical shells and parallel cross-sections of similar shapes. They studied Mechanics through resisted motion, circular motion, conical pendulums and banked tracks. They also studied harder Extension 1 topics including Inequalities, Strong Induction and Circle Geometry. An assessment occurred each term where students received feedback on their progress.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Demonstrates an understanding of complex numbers	✓				
Demonstrates an understanding of graphs by applying domain and range operations to a graph	✓				
Demonstrates an understanding of polynomials by applying the division transformation, theory of roots and partial fractions	✓				
Demonstrates an understanding of Integration by applying a table of integrals, substitution and finding volumes by slicing and cylindrical shells	✓				
Demonstrates an understanding of conics by applying the locus, Cartesian and parametric interpretations of conic sections	✓				
Demonstrates an understanding of mechanics by applying motion in a resisted medium and in two dimensions	✓				
Demonstrates an understanding of harder Extension 1 concepts including inequalities, induction and circle geometry	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

With a sound foundation in all aspects of the course, Mia can look forward to the forthcoming examinations with great confidence. She shows a real insight into this level of Mathematics, often finding quick and succinct methods of answering questions. She achieved an excellent Trial Examination mark, which ranked her equal first. This is an incredible achievement of which she can be extremely proud. Although she has developed her understanding of Graphs, there is still room for further improvement. Mia showed clever insight into some of the later questions in the examination. Her persistence in attempting the difficult recurrence integration question three times and finally solving it perfectly was impressive. She has clearly been revising carefully and her presentation of inequality proofs is outstanding, showing all reasoning carefully and logically. Mia's positive contributions to class discussions and determination to understand every detail of the course have made our lessons fun. She is consistently engaged in lessons and uses feedback to develop her skills. Her obvious love of Mathematics and her willpower to succeed are particularly impressive. I have thoroughly enjoyed teaching Mia this year. She is a delightful and polite young woman and I wish her every success in the future.

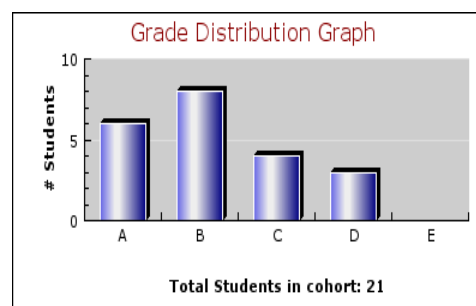

Ms C Laumberg

PDHPE

Grade: A

In Semester 2, students studied the HSC Core 1 topic, Health Priorities in Australia, and the option module, Improving Performance. Core 1 examined the health status of Australia's population and the role of the health care system and health promotion in addressing our priority health issues. The option module looked in more detail at how athletes can train and plan for improved performance. Attainment of course outcomes was evaluated through a research report and a Trial Examination.

Course Outcomes	Level of Achievement				
Mia	A	B	C	D	E
Explains how a variety of training approaches and other interventions enhance performance	✓				
Analyses the health status of Australians in terms of current trends and groups most at risk	✓				
Explains the different roles and responsibilities of individuals, communities and governments in addressing Australia's health priorities	✓				
Demonstrates an ability to learn and recall theoretical course content	✓				

Mia	Always	Usually	Sometimes	Seldom
Uses class time productively		✓		
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback		✓		

Comment

Mia is a hard-working student who is to be commended on her meticulous approach to this subject. She has demonstrated a broad knowledge of PDHPE syllabus content and has prepared thoroughly for assessment tasks. Mia has performed consistently in all assessment tasks in PDHPE, including her Trial Examination. Her responses throughout the examination displayed a comprehensive understanding of course content and an improvement in the structure of her extended response answers. In order to improve her mark, Mia needs to ensure she identifies key words in the question, so that she can provide a detailed answer that meets the criteria of each question. Mia is encouraged to consolidate her excellent performances by continuing to revise her study notes with an increased focus on providing more subject specific terminology and relevant examples where possible throughout her written responses. She should also continue to complete past papers and submit them for feedback.

Mr A Ezekiel
