

ADENA SHEPS

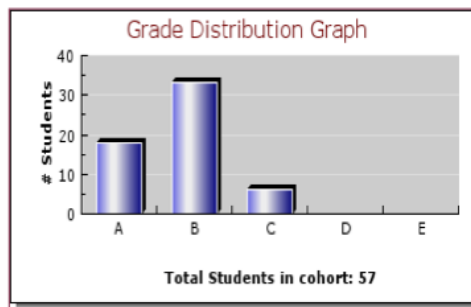

Year 12 Emanuel School Half-Yearly Report and Year 11 Final Report for
Advanced Mathematics

English Advanced

Grade: A

We began the HSC English Advanced course in Term 4 last year with our study of Texts and Human Experiences, involving an in-depth study of the play 'Rainbow's End', by Jane Harrison. Students were assessed in that unit through a multimodal presentation on the play and a related text. In Term One, students studied T. S. Eliot's poetry for Module B: Critical Study of Text and have this term begun their study of 'The Tempest', by William Shakespeare, and 'Hag-Seed', by Margaret Atwood, for Module A: Comparative Study of Texts and Context. Students have also studied Craft of Writing throughout the course. Students were assessed this year through an essay on T. S. Eliot's poetry and a Craft of Writing task.

Course Outcomes

Level of Achievement

Adena

	A	B	C	D	E
Demonstrates an understanding of the themes and ideas of the texts studied and can relate them to concepts covered in the course	✓				
Demonstrates an understanding of the ways composers use language to shape meaning in texts	✓				
Demonstrates an ability to write extended analytical pieces that shape meaning for specific audiences, purposes and contexts	✓				
Demonstrates an ability to write creatively and create extended imaginative or interpretive texts for specific audiences, purposes and contexts	✓				

Adena

Always

Usually

Sometimes

Seldom

	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

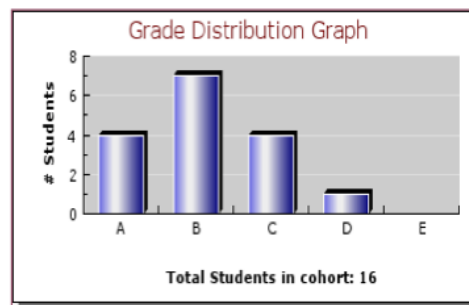

Adena is a talented, mature student whose written and oral expression are highly sophisticated. She is insightful and works extremely hard to maintain excellence, preparing as many drafts as she can prior to assessment tasks and using the feedback to refine her responses. Adena is quiet in class and does not contribute to group discussions but listens intently and takes notes effectively. Her speech on the Texts and Human Experiences module was very good and her essay on the poetry of T. S. Eliot was excellent. Adena's Craft of Writing responses were outstanding. She is encouraged to continue to work in a dedicated manner and to seek assistance whenever it is required.

Ms M Frank

Business Studies

Grade: **A**

In Semester 1 Year 12 Business Studies students studied the topics Finance and Operations. The focus of Operations is to examine the strategies for effective operations management in large businesses. The Finance topic teaches students about the role of interpreting financial information in the planning and management of a business.

Course Outcomes	Level of Achievement				
	A	B	C	D	E
Adena					
Applies mathematical concepts appropriately in business situations	✓				
Communicates business information, ideas and issues, using relevant business terminology and concepts in appropriate forms	✓				
Explains management strategies and their impact on businesses	✓				

Adena	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

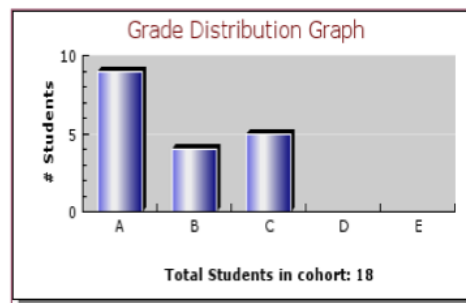

Adena has worked diligently throughout the Business Studies course and is developing a very sophisticated writing style that reflects her extensive knowledge for each key business function. She has benefitted from the drafting process as she has learnt to refer to the stimulus in her answers and this is key to success in the HSC. Adena has achieved fine results in her assessments. She wrote an insightful essay on Qantas' operational management and it achieved the highest mark in the cohort. She has been very receptive to feedback and has re-drafted responses in order to continuously improve her essay writing skills.

Ms D Goldmann

Mathematics Extension 1

Grade: A

In this reporting period students have furthered their understanding of Trigonometry, converting to radian measure, graphing Trigonometric Graphs, differentiating and integrating Trigonometric Functions, including double, compound angle, auxiliary angles and t-results and solving questions from three dimensional situations. Students then studied Polynomials, including estimating roots using Newton's Method. Students studied Inverse functions and Inverse Trigonometry. They then explored rates and Exponential Growth. Performances of Understanding occurred in Term 4 2018 and Term 1 2019 through in-class assessments and in Term 2 through the Half-Yearly Examination.

Course Outcomes	Level of Achievement				
	A	B	C	D	E
Adena					
Demonstrates a further understanding and application of Trigonometry through an exploration of the Trigonometric Function and the Inverse Trigonometric function	✓				
Demonstrates an ability to further explore Calculus and its application to the Physical World	✓				
Demonstrates an understanding of Preliminary Extension 1 concepts such as inequalities, induction, circle geometry and parametric equations.	✓				
Demonstrates an understanding of polynomials and Newton's method of approximation	✓				

Adena	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

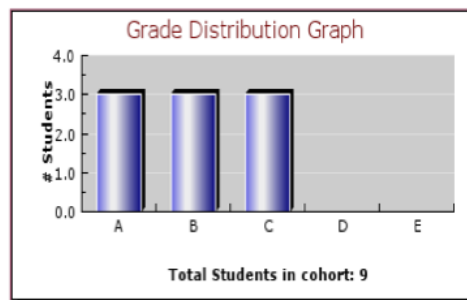

Adena is an attentive worker. She completes her work with a minimum of fuss and happily asks questions outside of class time when she is having difficulty understanding a new concept. She enjoys the subject and strives to understand every aspect of this difficult Extension 1 course. Adena diligently completes her homework and has a strong understanding of the concepts covered. Adena is a noteworthy thinker who has grown considerably in her acknowledgment of her ability to tackle questions that she found initially daunting. Adena is encouraged to complete a past Trial each fortnight to ensure that she has a greater perspective on how topics can be tested and connected. She has reflected that she needs to practise Multiple-Choice questions to become aware of potential misconceptions. To designate one study a fortnight to completing Multiple-Choice Questions would help further this objective.

Mrs M Lyons-Zwarenstein

Software Design and Development

Grade: **A**

This semester students have progressed with their Major Software Project, completing the Design stage. Through the project, they have learnt about the Software Development Cycle and Social & Ethical Issues and commenced work on the relationship between hardware and software. Students will continue towards the culmination of their Major Project and complete the course in preparation for the Trial HSC Examinations.

Course Outcomes	Level of Achievement				
	A	B	C	D	E
Adena					
Differentiates the various methods used to construct software solutions	✓				
Describes how the major components of a computer system store and manipulate data	✓				
Identifies and evaluates legal, social and ethical issues in a number of contexts	✓				

Adena	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

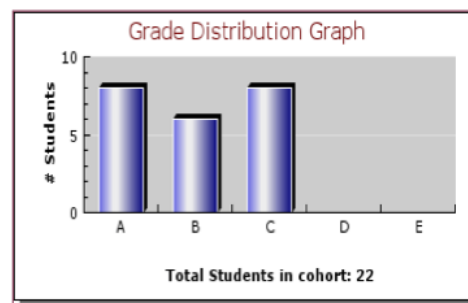

Adena approaches Software Design and Development with diligence and her attentiveness to her note taking sets a solid foundation. Adena has successfully completed stage one of the Major Project, Research and Planning Software, with outstanding results. Adena has demonstrated a thorough understanding of the course in her written work and her application of software coding to solve problems. There were some small areas for improvement in her algorithms. Adena is showing herself to be a highly capable student and I am confident she will deliver an excellent submission for stage two of the project.

Mr C Maker

Visual Arts

Grade: A

This semester, students have focused on developing their bodies of work, through investigations of the works of other artists as well as through their own experiments with materials, processes, techniques and styles. Students are now working towards refining and resolving their conceptual and material practice. They have undertaken several case studies investigating dissidence in culture and how this is manifested in contemporary visual art, as well as the foundations of representation in Art from the Neolithic to the Modern era. This learning has been applied to a series of submitted and examination-style assessment tasks.

Course Outcomes

Level of Achievement

Adena

	A	B	C	D	E
Demonstrates ability to initiate and organise artmaking practice that is sustained and reflective	✓				
Demonstrates conceptual strength in the development a body of work that exhibits coherence and may be interpreted in a range of ways	✓				
Demonstrates ability to apply understanding of practice in art criticism and art history	✓				
Demonstrates an understanding of how to represent an informed point of view about the visual arts in their critical and historical accounts	✓				

Adena	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others			✓	
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

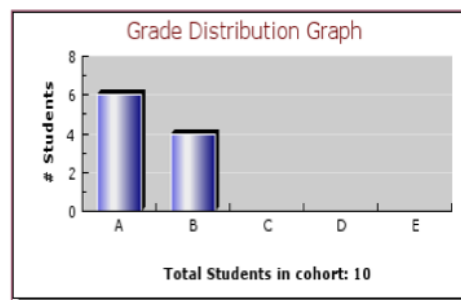

Adena is an inspired and deeply driven student of Visual Arts. Since the beginning of the HSC course, Adena's drive and joy for creating has sustained her strong connection to her artmaking and general creative process. Adena's exemplary use of her Visual Arts Process Diary has reflected this enthusiasm and has been at the source of the creative insights in her artmaking. Adena's work within the critical and historical elements of the course has demonstrated a strong capacity to prepare for and respond to complex extended and short answer tasks, both as submitted and examination based assessments. Adena has needed to develop a number of significant new technical skills and understandings within her chosen medium of resin based sculpture and installation. Her continued driven engagement with her process has resulted in some very promising directions for her body of work.

Mr E Messiah

Mathematics

Grade: A

In Semester 2, students applied their knowledge of Calculus to Logarithmic, Exponential and Trigonometric functions. This involved learning about natural logarithms, the irrational number e and radian measure. Students also learnt how to relate Calculus to the real world through Exponential Growth and Decay, introductory Rates, and Motion. Performances of Understanding occurred in Term 2 through an in-class assessment and Term 3 through the Trial Examination.

Course Outcomes Adena	Level of Achievement				
	A	B	C	D	E
Demonstrates an understanding of Differentiation and applications thereof	✓				
Demonstrates an understanding of Series including Finance	✓				
Demonstrates an understanding of Preliminary Course content	✓				
Demonstrates an understanding of Integration	✓				
Demonstrates an ability to work mathematically by questioning, applying strategies, communicating, reasoning and reflecting	✓				

Adena	Always	Usually	Sometimes	Seldom
Uses class time productively	✓			
Works well with others	✓			
Completes tasks to the best of his/her ability	✓			
Is well organised	✓			
Works well independently	✓			
Is able to receive and act on teacher feedback	✓			

Comment

Adena is an enthusiastic and attentive worker. She completes her work with a minimum of fuss and happily asks questions when she is having difficulty understanding a new concept. She enjoys the subject and strives to understand every aspect of the course. Adena has acknowledged that marks are lost because of inaccuracies or working too quickly. As a result, she has developed her own strategy to check her examination after completing. This system has clearly been effective for her as she achieved an excellent Trial Examination result. In the lead up to the HSC, she is encouraged to complete a Trial or HSC Past Paper once a week, working backwards from the most applied to the more rote questions, to incite her application skills, while still ensuring accuracy. Through arduous exploration of past papers, Adena is becoming familiar with even the most abstract concepts and the connections between different content areas in the course. She is encouraged to continue sourcing questions from past papers to further challenge herself while also enabling her to expand her technique for solving problems. Adena is a notable thinker who has grown considerably in her ability to demonstrate her thinking on paper.

Mrs M Lyons-Zwarenstein
