

Report for Jiuyu Zhang

Term 3, 2020

Cutler House

Year 11

Cutler House

Days absent: 0

Peter has excelled in most subjects this Semester and is to be commended on his work ethic. While his focus is now on his HSC Mathematics and Chemistry he will need to incorporate the suggestions from his teachers so he can ensure he is prepared for the HSC courses in his other subjects. Economics and English can be a focus next term as there is room for improvement in both subjects.

I congratulate Peter on his appointment as Prefect and Head of Cutler House. He is well respected by all and I am confident he will leave his mark on the House. He is quietly respectful and his caring nature will ensure that all boys will feel valued in our community.

Peter has a busy time ahead with HSC preparations over this holiday break but I know he will have planned out his study and will be focused on achieving his best. Good luck!

Mentor: Mr Mark Salmon

Housemaster: Mrs Angelique Sanders

Peter has produced some very pleasing results this term, as indicated here by a very positive report. This is a solid platform from which to achieve great success once Year 12 classes are underway next term. Keep up the good work Peter! I hope he enjoys a restful break so that he might begin Year 12 with a flourish.

Mr Nicholas Jolly
Deputy Head of Senior School

Academic summary

	Course	Performance grade	Rank in assessment tasks
Chemistry	2 Unit	A	Task 3: =4/46
Economics	2 Unit	A	Task 3: =9/65 Task 4: =8/65
English Advanced	2 Unit	B	Task 3: =28/121
Mathematics Advanced	2 Unit	A	Task 3: =2/65 Task 4: =1/65
Mathematics Extension 1	1 Unit	A	Task 3: 3/46 Task 4: =3/47
Physics	2 Unit	A	Task 1: =2/47 Task 2: =2/47 Task 3: 1/47

Explanatory Notes

Performance Grade: The following Performance Grade Scale indicates student performance in each secondary year at Cranbrook School.

It describes performance at each of five grade levels, based on classwork, homework and assessment tasks.

- A** The student has an extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
- B** The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and these skills to most situations.
- C** The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the processes and skills.
- D** The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.
- E** The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

Chemistry

2 Unit

Students learn about the techniques used by chemists to analyse the structure and abundance of inorganic and organic substances and the importance of these techniques. Students also evaluate the implications of chemical synthesis and design on society.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
inquiring and designing				✓
processing and evaluating				✓
reflecting on the impacts of science				✓
Attitude and Effort	Rarely	Inconsistently	Usually	Consistently
is prepared for class				✓
contributes positively in class				✓
completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 3: =4/46

Peter is a highly capable and diligent Chemistry student. He has excelled in all aspects of the Chemistry course. Most notably, he achieved a fantastic mark in the trial examination, ensuring he has a top rank among the cohort. This is an outstanding result and leaves him positioned to do well in the final HSC examination. Peter has solid content knowledge. He has made deep connections within and between units. He has fine-tuned his writing and now must just continue to practise answering to the verb and giving the appropriate level of detail in each question. An area of weakness in the trial examination was in the multiple-choice questions. He should practise this style of question under timed conditions. I encourage Peter to continue to submit past papers for feedback as this on-going process has and will continue to help him improve.

Teacher: Miss Stephanie Maher

Economics

2 Unit

Students learn about the failures of a market economy. They are introduced to the significant role played by the government and the Reserve Bank of Australia in managing the Australian economy.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
investigating				✓
communicating				✓
thinking critically				✓
Attitude and Effort	Rarely	Inconsistently	Usually	Consistently
is prepared for class				✓
contributes positively in class				✓
completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 3: =9/65 Task 4: =8/65

Peter has approached his Economics study with a motivated and engaged attitude and this has translated to an outstanding grasp of the subject. He has worked consistently to develop his understanding of the economic foundations covered in the course and has maintained detailed, neat notes. Peter's recent examination performance was fine, but below expectation and we will reflect on reasons for this. He should still feel confident in his ability in the subject. Ensuring his essay responses provide the necessary focus and detail is an area for Peter to improve. He will excel in the HSC course if he maintains his focused approach.

Teacher: Mrs Paulina White

English Advanced

2 Unit

Students study Module B: Critical Study of Literature. In this module, students develop detailed analytical and critical knowledge, understanding and appreciation of William Shakespeare's play Othello. Through increasingly informed and personal responses to the text in its entirety, students understand the distinctive qualities of the text, notions of textual integrity and significance.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development

Performance grade: B Rank in assessment tasks: Task 3: =28/121

Peter never gives less than his best. He comes to class prepared with questions and is hungry to learn. He acts upon feedback and is constantly striving to improve his skills. He attained a solid 16/20 in his Term 2 assessment on our Comparative Study on 'Clockwork Orange' and 'Ghost in the Shell'. His Term 3 Preliminary examination was pleasing as he received 14/20 for his Reading Task, displaying solid analytical skills. His 13/20 for his 'Othello' response showed depth of textual knowledge and understanding of the thematic concerns and character but he failed to address the question. He has the maturity to recognise the importance of markers' comments, and reflect on his strengths and weaknesses. Overall, he has shown real potential, which augurs well as we commence HSC work.

Teacher: Ms Cheryl McCann

Mathematics Advanced

2 Unit

Students learn about radian measure, revise concepts in trigonometry and learn to apply calculus to trigonometric equations. They also learn about applications of calculus to the physical world, with a focus on exponential growth and decay, as well as motion in a straight line. Students learn about probability and how to apply their knowledge to solve problems.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
investigating patterns				✓
communicating				✓
applying mathematics in real-world contexts				✓

Attitude and Effort	Rarely	Inconsistently	Usually	Consistently

Performance grade: A Rank in assessment tasks: Task 3: =2/65 Task 4: =1/65

See comment for Mathematics Extension 1.

Teacher: Mr Christopher Aynsley

Mathematics Extension 1

1 Unit

Students learn about inverse functions and apply this knowledge and their knowledge of calculus to trigonometric functions. Students learn about applications of calculus to the physical world, such as rates of change, projectile motion and simple harmonic motion.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
investigating patterns				✓
communicating				✓
applying mathematics in real-world contexts				✓

Attitude and Effort	Rarely	Inconsistently	Usually	Consistently

completes set tasks				✓
acts on feedback to improve				✓

Performance grade: A Rank in assessment tasks: Task 3: 3/46 Task 4: =3/47

Peter's outstanding results speak for themselves. He has had a terrific finish to both the Advanced and Extension 1 Mathematics courses. He has performed to an extremely high level in all assessment tasks this semester. He has laid the perfect foundation from which to approach his HSC examinations. I wish him well over the final stretch and would strongly encourage him to pursue Extension 2 Mathematics next term. It has been a pleasure teaching Peter over the past two years.

Teacher: Mr Christopher Aynsley

Physics

2 Unit

Students learn about wave properties and the electromagnetic spectrum, including how temperature, thermal energy and particle motion are related. This is followed by studying the relationships between electrostatics, electrical circuits and magnetism.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
inquiring and designing				✓
processing and evaluating				✓
reflecting on the impacts of science				✓

Performance grade: A Rank in assessment tasks: Task 1: =2/47 Task 2: =2/47 Task 3: 1/47

Peter is a polite and motivated Physics student who is to be commended on the obvious effort to maintain a high standard across all assessment tasks this year. He has achieved an excellent result in his yearly examination, placing first in the cohort. He has exhibited mastery of extended responses and quantitative questions. An improved understanding of definitions from all content areas will assist in his use of terminology. Peter is a fine student and it has been a pleasure to have him in class this year.

*Term 3, 2021
Cutler House
Year 12*

Cutler House

Days absent: 0

Peter has continued to work with diligence and consistent effort. His results are impressive as they reflect the work he has done. His teachers have suggested some strategies for him to continue to work towards his best as his final examinations approach. He is well respected by his teachers and peers, and regularly assists his peers with their academic needs. As Prefect and Head of Cutler House, he has demonstrated great leadership skill and organisation. This paired with his caring nature made him a perfect role model within the House and to the school as a whole. During Mentor period, he always participated in group discussions and ensured that everyone was included in activities. He will be greatly missed within the House and Mentor group. I wish him all the best in his future endeavours. He leaves us as a true Cranbrookian.

Mentor: Miss Hannah Bamford

Housemaster: Mrs Angelique Sanders

This is an outstanding report. Peter has met the challenges of Term 3 superbly and is well placed for a strong HSC result. I would also like to commend Peter on his outstanding contribution to the School during his time at Cranbrook. I wish him every success for the future.

Mr Robert Meakin
Head of Senior School

Academic summary

	Course	Performance grade	Rank in assessment tasks
Economics	2 Unit	A	Task 4: =14/56
English Advanced	2 Unit	A	Task 4: =15/94
Physics	2 Unit	A	Task 4: 1/26
Science Extension	1 Unit	A	Task 3: =1/6

E The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

Economics

2 Unit

With the shift to distance learning due to Covid-19 restrictions, students ended their Economics course from home. Students learnt about the aims and operation of macroeconomic and microeconomic policies in the Australian economy. Students researched these policies and considered their impacts. Research on the Chinese economy was also conducted.

Performance grade: A Rank in assessment tasks: Task 4: =14/56

Peter has worked tirelessly to extend and challenge himself and as a result has developed a strong understanding of the many complex aspects of the course. His hard work has translated to impressive results. I congratulate him on the mature way he has coped with distance learning and all the Covid-19 related disruptions. Peter may now turn his attention to course revision and planning unseen questions. Despite an impressive result in the trial examination, I know the essays were disappointing for him and ensuring he adds necessary detail, including limitations discussion for policy questions, will be important in the HSC examination. Peter has been a pleasure to teach and I congratulate him on the success he has rightfully enjoyed in Economics.

Teacher: Mrs Paulina White

English Advanced

2 Unit

Students completed their HSC Trials. As part of their revision for this task, students developed study techniques, consulted a range of sample responses and constructed responses to HSC style questions, including practice papers under timed conditions.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development

Performance grade: A Rank in assessment tasks: Task 4: =15/94

Peter is one of the most determined and conscientious students that I have had the pleasure of teaching. He is very capable and has the skills and ability to engage with complex texts and concepts and articulate a clear personal response. He has read widely and has submitted numerous responses for feedback, leading to an extremely thorough understanding of the various modules. He has performed extremely well in his Term 3 Trial Examination coming =14 in the cohort, and his assessment work has been telling of his gift and command of contextual knowledge, stylistic analysis of composer techniques. He is on track but understands that he now must return to his texts and commit to a thorough revision program. I know he will consolidate his efforts in these last few weeks as he has the ability to really succeed in this subject in his HSC.

Teacher: Ms Cheryl McCann

Physics

2 Unit

Students learn about the formation of matter during the big bang. This leads to a consideration of nuclear physics and the atomic theory throughout the nineteenth century. Students finish with today's quantum mechanical model of the atom and the standard model of matter.

Performance grade: A Rank in assessment tasks: Task 4: 1/26

Peter has performed extraordinarily well in Physics over the past two years. Consistently at the top of the cohort, Peter has shown a great level of maturity in his approach to his work. I have been impressed by his willingness to assist others in the class, and his willingness to share ideas. His website with his course notes is a perfect example of that. He should be proud of what he has achieved so far. I am confident I don't need to remind him to keep focused over the remaining few weeks into the HSC, and I am certain he will leave no stone unturned. I wish him well for the HSC Examination, and I look forward to hearing about his future success.

Teacher: Mr David Cameron

Science Extension

1 Unit

Students complete their coursework with data analysis and reporting of results. After finalising the practical component of their major projects, students complete their portfolios and reports, summarising the progress and findings of their 12-month project.

Achievement	Limited Development	Adequate Development	Substantial Development	Excellent Development
knowing and understanding				✓
inquiring and designing				✓
processing and evaluating				✓
reflecting on the impacts of science				✓
Attitude and Effort	Rarely	Inconsistently	Usually	Consistently

Performance grade: A Rank in assessment tasks: Task 3: =1/6

Peter is to be commended for his application and diligence in the production of his major work. His consistent application to the process has resulted in his ability to identify a significant improvement to the recovery of cathodic materials in the recycling of batteries. Despite a setback in the acquisition of materials, Peter's time management allowed him to surpass his peers in completing the collection of primary data. More impressive is his substantial generosity of time, often offering help to members of the class throughout the process of the major project. I suggest he now focus this effort towards completing practice papers online in preparation for the unique delivery of the HSC examination. It has been a pleasure to have Peter in the Science Extension class this year.
