

2020 Year 12 Yearly

MARK FREDERICK BUDDEE

12 Mentor

Mr Anthony Stuart

Bryden

In what has been an unpredictable year for all concerned, I believe Mark seems to have embraced his own personal challenges very well. During Mentor this year, both online and in person, we have spent considerable time discussing the importance of the boys helping themselves, and each other, so that they maintain a strong mental wellbeing. Many of our discussions focused on the ability to have empathy for others by spending time listening, and encouraging our mates, particularly through times of adversity. Mark has matured into a fine young man and it has been a pleasure to have him in my mentor class. I know he will thrive on the opportunities that will come his way in the future.

Subject Summary

Subject	Grade	Subject APA	Teacher
12 English Advanced (HSC)	B	1	Mr Paul Kantek
12 Mathematics Extension 1 (HSC)	A	1	Mr Ian Bradford
12 Mathematics Extension 2 (HSC)	B	1	Mr Ian Bradford
12 Chemistry (HSC)	A	1.5	Ms Chantal Dreesbeimdieke
12 Physics (HSC)	A	1.5	Mr Greg Nunan
12 German (HSC)	A	1.5	Mr Richard Winstanley
12 German Extension (HSC)	B	1.5	Mr Richard Winstanley
Application Point Average (APA)		1.3	

Mr Greg Nunan
Director of Studies Senior Academy

Mr Andrew Weeding
Head of Senior Academy

12 English Advanced (HSC)

Mark is a capable student who has gradually developed confidence in his ability to understand complex concepts in texts. His most recent approach to learning has been admirable, characterised by an ardent striving to reach his personal best. This determined approach positively influenced his results in the Trial HSC. He performed strongly in the Common Module short answer and essay sections, and his results in the Module A and Module B essays were also quite pleasing. However, Module C is an area that he should seek to refine as he prepares for the HSC. Mark is advised to continue developing a more rigorous and deeply personal understanding of the set texts.

A typical student who achieves High Standard in Stage 6 English (Advanced) demonstrates perceptive understanding and analysis of the way meaning is shaped in texts by context and media of production. In composing and responding to texts, he will access a broad range of language features with a developed understanding of purpose, will compose texts with sustained control of expression, and display developed skills in interpretation, synthesis and analysis of textual detail.

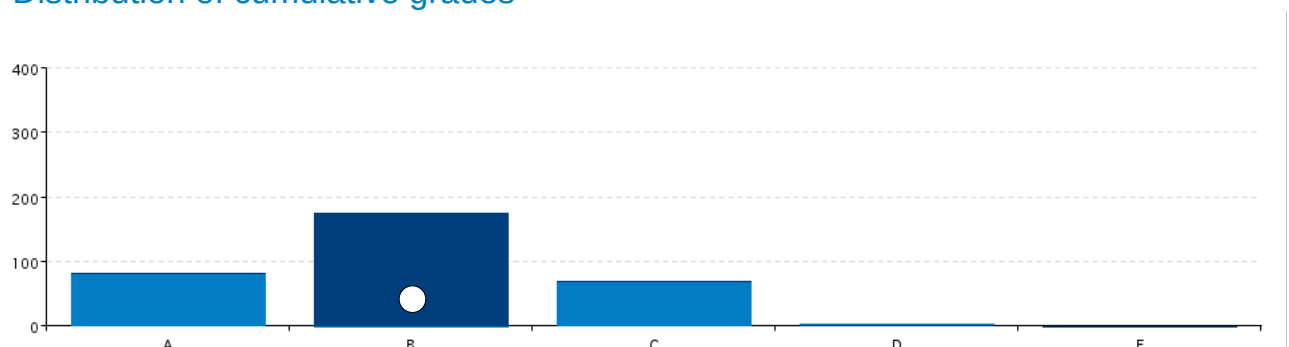

Task results

B	169	334	1	1

Distribution of cumulative grades

12 Mathematics Extension 1 (HSC)

The calculus-based Mathematics Extension 1 and Mathematics Extension 2 courses are designed to promote the development of knowledge, skills and understanding in relation to important concepts within areas of Mathematics that have applications in an increasing number of contexts. This includes the development of deductive and inductive reasoning skills and the ability to solve challenging mathematical problems via the use and synthesis of course theorems. For an overall comment about Mark's progress in both courses please refer to the comment in the Mathematics Extension 2 section of this report.

A typical student who achieves Academic Honours in Stage 6 Mathematics Extension 1, demonstrates extensive knowledge, skills and understanding appropriate to the course and uses sophisticated multi-step reasoning in both numerical and theoretical contexts. He rapidly integrates ideas from the Mathematics course using well-developed algebraic, deductive or graphing skills to successfully solve a variety of familiar and unfamiliar problems. He also communicates effectively and efficiently, appropriate mathematical language, notation, diagrams and graphs.

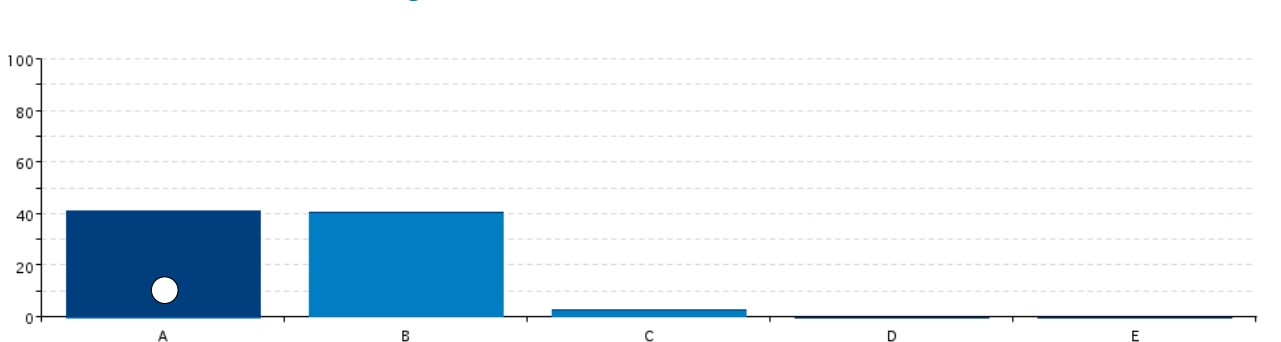

Task results

Task	Mark	Average	Rank	Number in Course	Weighting
1	82	73	33	89	25
2	91	81	25	89	30
3	88	75	18	89	10
4	90	75	7	89	35

Distribution of cumulative grades

12 Mathematics Extension 2 (HSC)

There have been evident strides taken by Mark to improve his understanding of content between the reporting periods. This is pleasing and shows strength of character on his part. Perseverance in his study habits over these last weeks is crucial in ensuring a commendable HSC result and I would encourage Mark to work through as many past papers as is practicable in achieving this goal. This will imbue Mark with self-confidence and ensure a smooth transition to the HSC Examinations themselves.

A typical student who achieves High Standard in Stage 6 Mathematics Extension 2, demonstrates comprehensive knowledge, skills and understanding appropriate to the course and uses logical reasoning in both numerical and theoretical contexts. He combines ideas from the Mathematics Extension course with algebraic, deductive or graphing skills to successfully solve familiar and unfamiliar problems and applies a range of problem solving skills. He also communicates effectively, mathematical language, notation, diagrams and graphs.

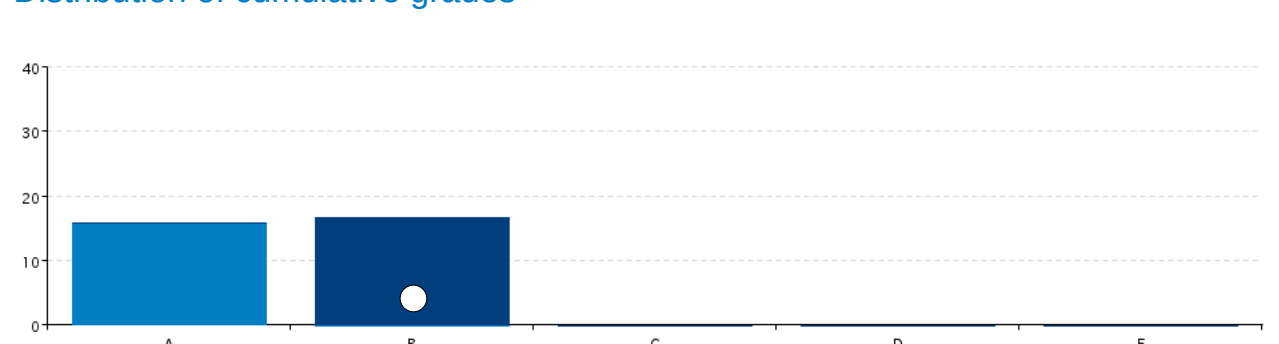

Task results

Task	Mark	Average	Rank	Number in Course	Weighting
1	50	63	31	33	25
2	63	68	21	33	15
3	74	83	24	33	25
4	72	80	25	33	35

12 Chemistry (HSC)

Mark has developed a good knowledge and understanding of Chemistry that complements his analytical and descriptive abilities. He has learnt a lot from the regular completion and submission of the weekly assignments issued throughout the course. He must use the feedback from the final tasks to resolve his weaknesses and perfect his technique in answering examination questions. Throughout the coming weeks, regular submission of work for feedback will help him add the required detail to his extended responses to achieve at the highest level. I wish Mark well as he prepares for the HSC examination.

A typical student who achieves Academic Honours in Chemistry demonstrates an extensive knowledge and understanding of chemistry concepts, has an outstanding ability to describe and explain these concepts clearly and accurately and applies them to unfamiliar situations. He demonstrates a very high level of critical thinking skills, analyses, evaluates and extrapolates data effectively, identifies complex relationships, quantifies explanations and descriptions and synthesises information to draw conclusions. He also communicates succinctly, logically and sequentially using a variety of scientific formats and demonstrates a high level of ability to design an experimental procedure.

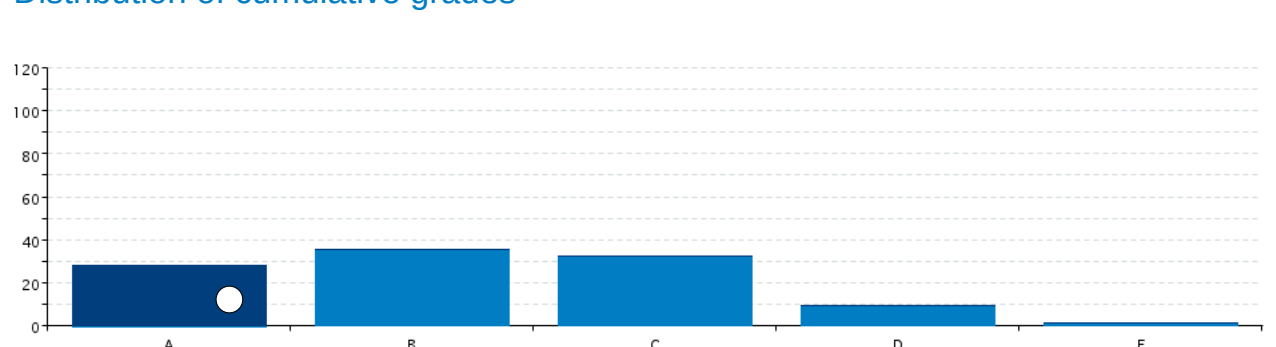

Task results

Task	Mark	Average	Rank	Number in Course	Weighting
1	68	62	34	110	20
2	77	60	18	110	20
3	68	57	24	110	30
4	75	63	30	110	30

Distribution of cumulative grades

12 Physics (HSC)

Mark should be very pleased with his Trial Examination result, although it was below his expectations. His performance demonstrated a thorough understanding of most of the course outcomes. He sometimes has a tendency to misread questions and not provide an appropriate response. He is aware of what is needed and I am sure he will take on this advice. Recall of practical work, improved accuracy in calculations and incorporating examples and relevant formula into answers and understanding of the complexity of the Module 7 and 8 concepts are all areas to focus on prior to the HSC. Mark is a most capable Physics student who should look forward to significant success in the final examination.

A typical student who achieves Academic Honours in Physics demonstrates an extensive knowledge and understanding of Physics concepts, has an outstanding ability to describe and explain them clearly and accurately and can apply them to unfamiliar situations. He applies a very high level of critical thinking skills, analyses, evaluates and extrapolates data effectively, identifies complex relationships, quantifies explanations and descriptions and synthesizes information to draw conclusions. He will also communicate succinctly, logically and sequentially using a variety of scientific formats and demonstrates a very high level of ability to design an experimental procedure.

Distribution of cumulative grades

12 German (HSC)

Mark has worked hard this year to further build on his knowledge of German and the final result is highly impressive. He received the highest mark in the cohort for the Trial Examination and for this he should be highly commended. He closely examines feedback and does not hesitate to ask questions when unsure of grammatical structures or how to approach a question. He must now ensure that he maintains his high level of proficiency up until the HSC examination. I recommend that he finds time daily to complete different sections of past papers in order to fine tune his skills across all areas. I have had the pleasure of teaching Mark for five years and wish him well with his future plans.

A typical student who achieves Academic Honours in Stage 6 German uses complex structures and sophisticated vocabulary to exchange information and opinions and express ideas fluently and accurately in a range of contexts. He competently conveys information appropriate to different social contexts, purpose and audience. He expresses a range of ideas with few inaccuracies. He demonstrates an excellent understanding of unfamiliar written and spoken texts and an ability to summarise all relevant information.

Distribution of cumulative grades

12 German Extension (HSC)

Mark has made excellent progress in the course of late and should be commended for the outstanding result that he achieved in the recent Trial Examination. He writes authentically, using sophisticated language, and this is a huge accomplishment for a non native speaker. He must continue to practise both his spoken and written German in the lead up to the upcoming HSC examinations, in order to ensure that he always has a balanced argument as part of his content. I also encourage him to read all of the extracts of the prescribed text again and make thorough notes on the characterisation and themes in each. It has been pleasing to watch Mark excel in this subject over the course of the year.

A typical student who achieves High Standard in Extension German is able to formulate and sustain a detailed and well-developed written and spoken argument with clarity. He demonstrates substantial knowledge of vocabulary and language structures and expresses ideas and opinions effectively. He responds to and analyses texts in German effectively.

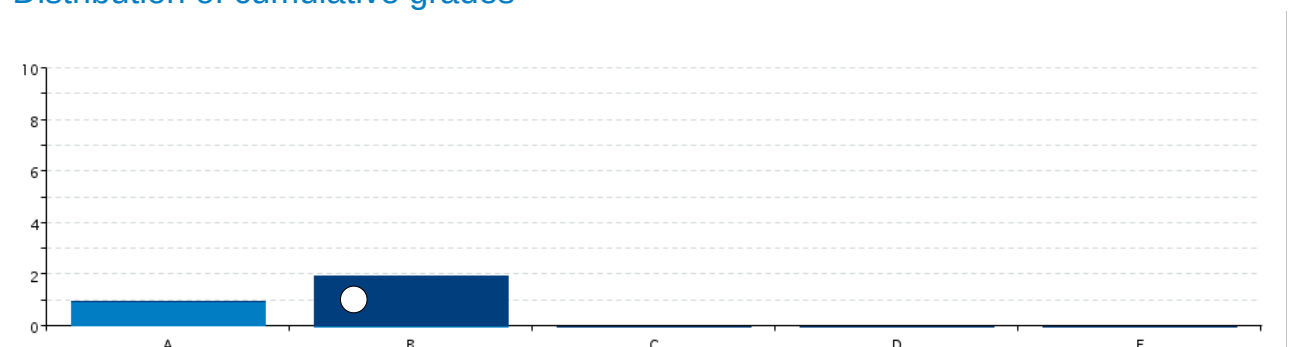

Task results
