Name: Nicholas Charles Freeborn
Year: 12
Teacher: Mr M Bentley

Student Profile	A:Outstanding B:Commendable C:Satisfactory D:Needs Improvement E:Unacceptable	Profile:
Is punctual and well prepared for class and uses time effectively.		A
Completes set work to the best of his ability and submits it on time.		A
Works well both independently and as a member of a group.		A
Actively engages and participates in class activities.		A

Learning Outcomes	A:Excellent B:High C:Sound D:Developing E:Elementary	The student's level of achievement is:
Addresses appropriate Working Scientifically Outcomes in investigating and evaluating key experiments performed in the development of modern theories of light.		B
Demonstrates knowledge of content of Module 6 Electromagnetism.		A
Describes and predicts the complex motion of objects - including projectile, circular and satellite motion.		B
Explains the motion of charged particles in electric and magnetic fields which leads to analysing applications of the motor effect and electromagnetic induction.		B
Explains the development of theories of the nature of light from Newton and Huygens through to a quantum model of light, including implications of the special theory of relativity.		B
Explains the origin of elements and the development of models of the atom and its components, including the standard model of particle physics.		B

Assessment Schedule	Average	Mark / Grade
Practical Examination /27	19.3	22
Depth Study /100	81.1	85
Topic Test /27	20.4	23
Trial Examination /100	61.5	67

Rank: 7 / 18

Nicholas is a capable and conscientious student who has shown promise of a pleasing result in Physics. I recommend he focuses on practising exam style questions in this last phase of preparation and looks to connect the broader concepts in extended response answers.
