

2020 Year 12 Yearly

DANIEL TIN YIU MIU

12 Mentor

Mr Bishoy Kolta

Montgomery

Daniel is an energetic and outgoing young man who has enjoyed participating in Tennis and Football this semester. He is particularly proud of his involvement in the Cadets program and being named the Montgomery House Captain. He has found success this semester in both Chemistry and Physics, which he accounts to his level of genuine interest in the subjects. He has struggled in maintaining a constant study pattern, however, he feels he has improved in his overall work ethic. Daniel's plan for the rest of the semester is to enjoy the rest of the year while focusing on his HSC Examinations to achieve his highest possible ATAR. It has been a pleasure sharing this journey with Daniel.

Days absent: 3

Subject Summary

Subject	Grade	Subject APA	Teacher
12 English Advanced (HSC)	A	1	Mr Tim Felton
12 Mathematics Extension 1 (HSC)	A	1	Mr Ian Bradford
12 Mathematics Extension 2 (HSC)	A	1	Mr Ian Bradford
12 Chemistry (HSC)	A	1	Ms Chantal Dreesbeimdieke
12 Physics (HSC)	A	2	Mr Ethan Truong
Application Point Average (APA)		1.2	

Mr Greg Nunan
Director of Studies Senior Academy

Mr Andrew Weeding
Head of Senior Academy

12 English Advanced (HSC)

Daniel is a diligent student who has demonstrated time and again a capacity to produce work of an excellent standard. He is an independent worker who is perceptive and is also a very conceptual thinker, and his assessment tasks have always reflected this. Although he is a quiet and independent worker, he is always willing to contribute to discussions and defend a point of view. His Trial HSC results indicate that he is well-prepared for his HSC. I would encourage him, however, to replicate writing under timed conditions on a regular basis in the coming period. It has been a pleasure to work with a student of Daniel's calibre throughout the past two years, and I wish him well for his future.

A typical student who achieves Academic Honours in Stage 6 English (Advanced) demonstrates insightful understanding and evaluation of the way meaning is shaped in texts by context and media of production. In composing and responding to texts, he will access a very broad range of language features with a sophisticated understanding of purpose, demonstrate a very high degree of control of expression and display highly developed skills in interpretation, synthesis and analysis of textual detail.

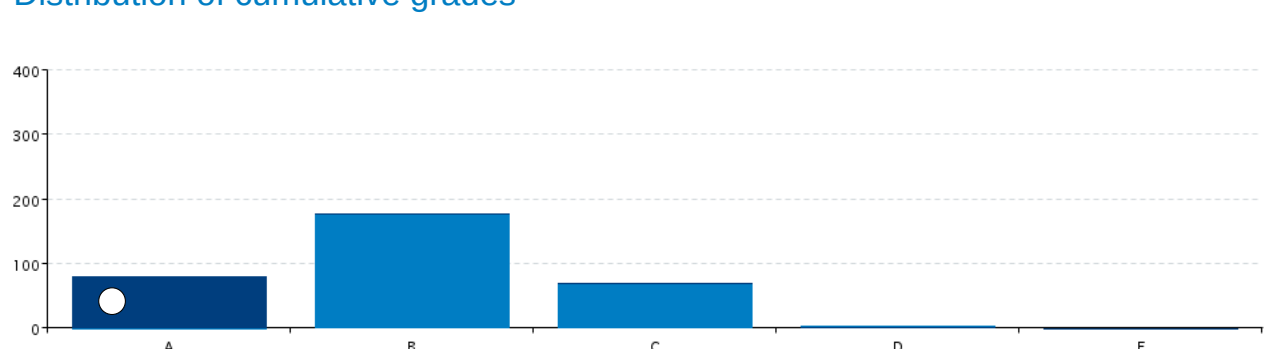

Task results

Task	Mark	Average	Rank	Number in Course	Weighting
1	96	80	25	334	25
2	100	78	1	334	25
3	85	66	36	334	20
4	88	72	33	334	30

Cumulative task results

Grade	Rank	Numbers in Course	Classwork	Homework
A	19	334	1	1

Distribution of cumulative grades

12 Mathematics Extension 1 (HSC)

The calculus-based Mathematics Extension 1 and Mathematics Extension 2 courses are designed to promote the development of knowledge, skills and understanding in relation to important concepts within areas of Mathematics that have applications in an increasing number of contexts. This includes the development of deductive and inductive reasoning skills and the ability to solve challenging mathematical problems via the use and synthesis of course theorems. For an overall comment about Daniel's progress in both courses please refer to the comment in the Mathematics Extension 2 section of this report.

A typical student who achieves Academic Honours in Stage 6 Mathematics Extension 1, demonstrates extensive knowledge, skills and understanding appropriate to the course and uses sophisticated multi-step reasoning in both numerical and theoretical contexts. He rapidly integrates ideas from the Mathematics course using well-developed algebraic, deductive or graphing skills to successfully solve a variety of familiar and unfamiliar problems. He also communicates effectively and efficiently, appropriate mathematical language, notation, diagrams and graphs.

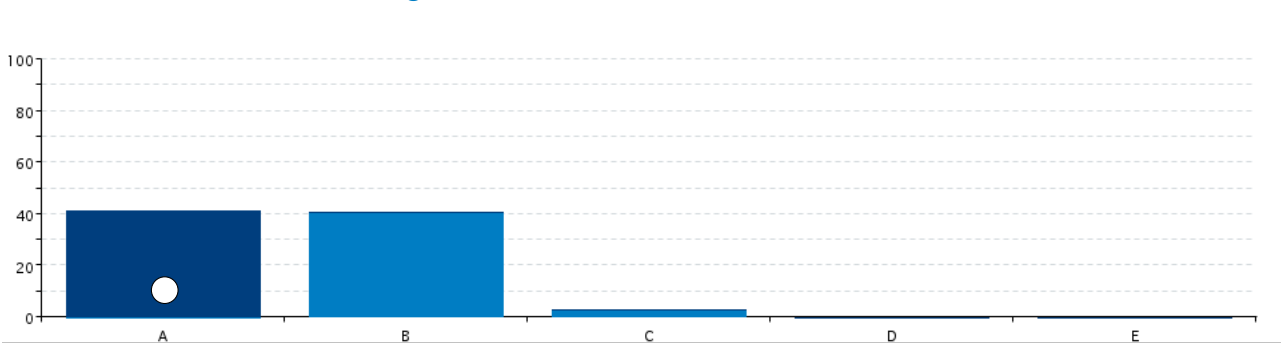

Task results

Task	Mark	Average	Rank	Number in Course	Weighting
1	82	73	33	89	25
2	93	81	16	89	30
3	91	75	7	89	10
4	90	75	7	89	35

Cumulative task results

Grade	Rank	Numbers in Course	Classwork	Homework
A	18	89	1	1

Distribution of cumulative grades

12 Mathematics Extension 2 (HSC)

Daniel's interest in ensuring a favourable result in this course has benefited him enormously these past months. There has been evident growth and vigour in his approach to his Mathematics. He produced two fine Trial papers and he can be pleased with his performance to date. He can improve on his efforts by showing greater care in his written responses and patience when working through the latter and more challenging questions. A really strong finish to his studies is essential in securing the flattering results that are requisite for a high university entrance score (ATAR). I commend Daniel in this pursuit.

A typical student who achieves Academic Honours in Stage 6 Mathematics Extension 2, demonstrates extensive knowledge, skills and understanding appropriate to the course and uses sophisticated multi-step reasoning in both numerical and theoretical contexts. He rapidly integrates ideas from the Mathematics Extension course using well-developed algebraic, deductive or graphing skills to successfully solve a variety of familiar and unfamiliar problems. He also communicates effectively and efficiently using appropriate mathematical language, notation, diagrams and graphs.

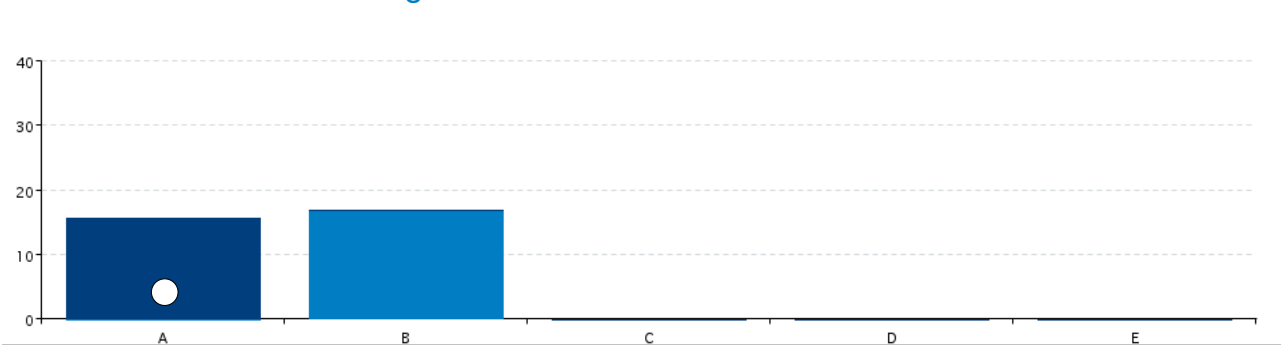

Task results

Task	Mark	Average	Rank	Number in Course	Weighting
1	58	63	18	33	25
2	78	68	8	33	15
3	86	83	16	33	25
4	92	80	5	33	35

Cumulative task results

Grade	Rank	Numbers in Course	Classwork	Homework
A	10	33	1	1

Distribution of cumulative grades

12 Chemistry (HSC)

Daniel has developed a detailed knowledge of Chemistry and should be extremely proud of his assessment results. His concentration in class and participation in discussion work have been exemplary. The Practical Assessment Task revealed outstanding competence in various skills-based activities. His Trial Examination responses demonstrate an extensive knowledge and understanding that flows readily and succinctly into problem solving applications. Some avoidable errors did occur that he can fix over the coming weeks. Daniel must now continue to engage with his teacher and peers so that he can achieve to the highest level in the HSC examination.

A typical student who achieves Academic Honours in Chemistry demonstrates an extensive knowledge and understanding of chemistry concepts, has an outstanding ability to describe and explain these concepts clearly and accurately and applies them to unfamiliar situations. He demonstrates a very high level of critical thinking skills, analyses, evaluates and extrapolates data effectively, identifies complex relationships, quantifies explanations and descriptions and synthesises information to draw conclusions. He also communicates succinctly, logically and sequentially using a variety of scientific formats and demonstrates a high level of ability to design an experimental procedure.

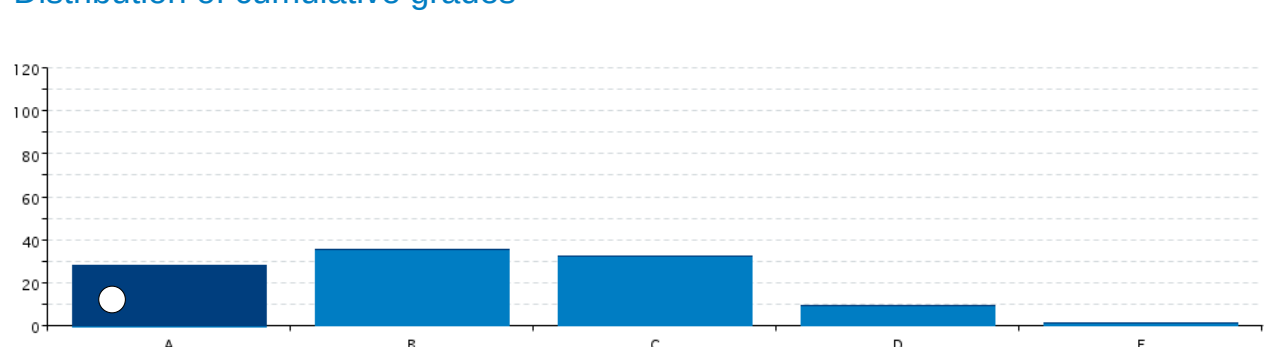

Task results

Task	Mark	Average	Rank	Number in Course	Weighting
1	88	62	4	110	20
2	88	60	3	110	20
3	74	57	11	110	30
4	83	63	7	110	30

Cumulative task results

Grade	Rank	Numbers in Course	Classwork	Homework
A	6	110	1	1

Distribution of cumulative grades

12 Physics (HSC)

Daniel has continued to apply himself in a commendable fashion; pursuing depth and breadth of knowledge through inquiry and practise. His assessment tasks demonstrate an excellent knowledge of the course content. He must continue to develop his skills in interpreting and responding to questions across a variety of question styles to be able to cohesively and coherently communicate his ideas. Daniel is encouraged to sustain his current work ethic and work consistently to maximise his performance in the HSC Examination.

A typical student who achieves Academic Honours in Physics demonstrates an extensive knowledge and understanding of Physics concepts, has an outstanding ability to describe and explain them clearly and accurately and can apply them to unfamiliar situations. He applies a very high level of critical thinking skills, analyses, evaluates and extrapolates data effectively, identifies complex relationships, quantifies explanations and descriptions and synthesizes information to draw conclusions. He will also communicate succinctly, logically and sequentially using a variety of scientific formats and demonstrates a very high level of ability to design an experimental procedure.

September 2020

Daniel T Y Miu

Daniel Tin Yiu Miu joined Knox Grammar Senior School as a day boy in year 9, creating a new chapter in his secondary school life.

Throughout his years at Knox, Daniel has been a passionate student, working diligently in his studies. He actively participates in group discussions, demonstrates a great deal of confidence in his work allowing him to help his peers if possible, and will always seek help to keep improving. His hard work led to him achieving A's throughout all his subjects, earning him silver academic colours and an excellent academic protocol average. Additionally, he was selected to be an accelerated student in Mathematics Advanced. Taking the subject's HSC exams in year 11, achieving a mark of 98 overall. In Chemistry, Daniel volunteered to be a study group leader which involved working with teachers to develop a culture of social learning within the cohort. Daniel was an outstanding leader.

Daniel has been a part of the Knox Cadet Unit for 4 years. He spent his first year in a recruit company, learning the basics to be a cadet. Then in his second year, he joined the Signallers platoon, learning the basics of using radio communications in a cadet unit. In his final 2 years, he joined a senior company, where he learnt survival skills. He very much enjoyed the friendships forged and overcoming the challenges that presented.

Daniel took on other leadership roles in his senior years, such as being selected for the Peer Support Program, where he mentored the Year 7 Students. Furthermore, he was a member of the student leadership portfolio in 2019, which planned a leadership skills bootcamp and overlooked the actions of the other portfolios.

In Year 12, he was appointed House Captain for Montgomery House where he helped plan his house's performance on Founder's Day, and actively encouraged others to participate in House events. While many events were cancelled as the result of COVID-19, he gave his best to fulfil his role.

As he actively participating in House sports, Daniel played tennis and football for Knox. He always put in his best effort into his sport, striving to improve his skills and enjoying the games regardless of the outcome.

Daniel, in 2019, participated in the Cambodia Immersion. This enabled him to immerse himself with the Cambodian Culture, whilst teaching disadvantaged children the English language. In addition to his efforts in teaching, he raised \$1000 dollars to help build libraries, supporting the development of English in Cambodia. He also participated in a service learning program. where he worked at Vinnies, gaining invaluable experience working as a Volunteer, giving back to the community.

Throughout his time at Knox, Daniel has consistently demonstrated initiative, positivity and energy which has boosted morale. He has a genuine, friendly nature that allows him to easily relate to others and has been a much valued and respected member of the Knox community.

It is with confidence that I strongly recommend Daniel in any future endeavour he undertakes. I have no doubt that he will continue to succeed in what he sets his mind to.

Yours sincerely,

Mr Bishoy Kolta
YR 12 Mentor
