

Ethan Redman

17 Star Crescent

West Pennant Hills 2125

Mobile: 0477 453 077

Email: ethanr3dman@outlook.com

DOB: 17/01/2002

Work Experience:

12 months at Kumon Tutoring Firm.

4 years of both Football and Futsal refereeing.

Qualifications:

Currently enrolled in year twelve at The Hills Grammar School, on a 100% Academic Scholarship, in all honours classes. I have achieved 5th grade violin, and 8th grade trombone. My chosen HSC subjects are Music 2, Music Extension, Information Processes Technology, Physics, Maths Extension 1, and Advanced English. I currently play Trombone in the Sydney Youth Orchestra's Philharmonic Orchestra, and Sussudio Big Band, a local group based in Wahroonga.

Awards:

McGrath Year 11 House Captain.

Joint recipient of Music 2 Award for year 11.

All-rounder Award and Information Software Technology Award received in year 10.

Music Award for year 9.

2017/2018 Junior Referee of the year.

Bronze Duke of Edinburgh Award.

Skills, Experience and personal attributes:

Communication skills

I am a strong communicator, having taken part in various debates state-wide, and in doing so, reached the final of the HICES (Heads of Independent Co-Educational Schools) Debating Competition. For the past four years I have been a member of both junior and senior drama ensembles at my school, and have performed various plays, in one of which I held a lead role. In this role, I opened the performance with a soliloquy.

As an honours English student, I am always working on my techniques of writing and communicating efficiently. I enjoy writing both narratives and essays alike, annotating and analysing works, to achieve succinct communication and prose.

Leadership skills

In year six, I was a prefect at my primary school, and regularly helped organise events throughout the school year. In that same year, I attended the Galston High School Bands Workshop day, and mentored three younger trombonists. I have also been an assistant at my instrument tutor's music camp, where I helped supervise a number of young brass players. Last year, I tutored one of my teacher's trombone students.

As part of Australian Business Week, I was elected to be team leader of my group. We would go on to receive the award for the most successful business throughout the week. I was also a house captain at my school in year 11.

Initiative and enterprise

As one of my major hobbies, I often arrange and compose music. In year 10, for my school's Creative Arts Carnival, I arranged a piece voluntarily to perform with two year-12 students and a brass tutor. As part of my Music 2 course I elected to write a Musicology Essay on Microrhythms of other cultures. For my Extension component, I composed two 3-minute compositions, one for tenor sax and rhythm section, and one for a more modern quintet.

Voluntary Work:

At my school, I often volunteer for various events. For the past four years, I have volunteered as a tour guide at my school's Open Day, where I lead two tours throughout the day, answering questions about the school and specifically the scholarship program. I also volunteered for this year's Hills School Expo, where I did much the same thing, representing my school by talking about various aspects of the curriculum. In the past, I have volunteered for some of my music tutors in which they asked me to play at a retirement village and a palliative care unit.

Extra-curricular activities / interests and hobbies:

- I play trombone in three School bands (concert, orchestra, jazz), and percussion in one (percussion ensemble).
- Currently playing in the Sydney Youth Philharmonic as part of the Sydney Youth Orchestras program. This is my third year as a part of this program.
- I have attended three HICES camps in which each time I was part of the orchestra. Also attended the HICES jazz festival.
- Member of the School House Choir.
- Duke of Edinburgh Award.
- Debating.
- Refereeing (football).
- I play two instruments (trombone, percussion [played violin for 5 years]).
- Previously played violin in the North Sydney String Orchestra, and trombone in the North Sydney Wind Orchestra.
- Attended two Sydney Youth Orchestra Week-long Workshop.

Academic Report - Semester One, 2018 Year 11

It is not unusual for students to be amazed at the size of the 'step up' between the end of Year 10 and the beginning of the final two years of secondary schooling. They feel, quite rightly, that a different approach to their learning, commitment and motivation is required. Teachers have very high expectations, both in terms of the levels at which students must be thinking and the amount of work they should be doing. At the same time, Year 11 face more adult responsibilities and experiences than ever before in their relationships within and beyond the School.

It is pleasing to note that our Year 11 students have made a strong beginning to the year. They are a wonderful group of young people: friendly, capable and supportive of each other. They are well prepared for the academic challenges of the Preliminary courses of study. As they become accustomed to greater demands, as they practise more and extend themselves to work harder, they will find themselves developing intellectually and able to meet those demands more easily. They should read these reports carefully, and act on the advice of their teachers in preparation for Semester 2.

Our students are working with experienced and highly qualified teachers who want to see them embrace and enjoy the higher levels of learning to which they are exposed. I urge Year 11 to make the most of every learning opportunity.

Michael Smith
Principal

Reporting Student Achievement in Year 11

The School provides parents and caregivers with ongoing information and guidance on each student's growth in scholarship, personal development and citizenship. Such information is shared in several ways.

Information Evenings

Parents and students are invited to attend a function where senior teachers explain specific issues and plans.

Parent, Student and Teacher Interviews

Academic interviews provide an opportunity for parents to discuss their child's achievement and application with each of his/her teachers.

Parent, Student and Mentor meetings

An opportunity for students and parents to meet with the Mentor and set goals for the year ahead.

Academic Reports

Every semester a formal written report is provided to parents summarising a student's achievement and application in each subject.

How to Read this Academic Report

The Academic Report presents a detailed analysis of a student's achievement and application for each course they are enrolled in. The information provided will normally include:

- levels of achievement for course outcomes
- an Examination Mark and the Examination Median (if applicable) and Position in Course
- an indicator of overall effort
- teacher's comment, including areas for improvement.

Student Course Outcomes

At Hills Grammar we report information on student progress in terms of student course outcomes. A student outcome, plainly speaking, is something that the student knows, understands or can do. Our teachers, like all educators in NSW, design their educational programs in line with outcomes specified and mandated by the NSW Education Standards Authority (NESA) syllabus documents. Assessment tasks and examinations test specific outcomes. It makes sense, then, to report on the level of achievement the students have attained against these outcomes. The following descriptors are to be used when interpreting a student's achievement of Course Outcomes:

Extensive:	Students have achieved the outcome at an extensive level for the stage. They demonstrate breadth and depth in their knowledge and understanding of the outcome and have a very high level of proficiency in the processes and skills for the stage.
High:	Students have achieved the outcome at a thorough level for the stage. They consistently demonstrate a high level of knowledge and understanding of the outcome and proficiency in the processes and skills for the stage.
Sound:	Students have achieved the outcome at a sound level for the stage. They demonstrate sound knowledge and understanding of the outcome and proficiency in the processes and skills for the stage.
Developing:	Students have achieved the outcome at a basic level for the stage. They demonstrate a developing level of knowledge and understanding of the outcome and some proficiency in the processes and skills for the stage.
Elementary:	Students at this level are working at an elementary level with the outcome for the stage. They demonstrate an elementary level of knowledge and understanding of the outcome and a very limited proficiency in the processes and skills for the stage. They may need guidance and teacher support in order to demonstrate achievement of the outcomes and to increase consistency of performance.

Marks and Grades for Academic Reports

The course Marks and Course Median (middle mark) provided in Academic Reports, give an overall numeric summary (Years 7-11 only) of a student's achievement in relation to the syllabus outcomes being assessed. Course Marks are based on all assessment tasks completed at the time of reporting. The table below lists the general achievement descriptors for Year 11:

A:	The student demonstrates extensive knowledge of content and understanding of course concepts, and applies highly developed skills and processes in a wide variety of contexts. In addition the student demonstrates creative and critical thinking skills using perceptive analysis and evaluation. The student effectively communicates complex ideas and information.
B:	The student demonstrates thorough knowledge of content and understanding of course concepts, and applies well-developed skills and processes in a variety of contexts. In addition the student demonstrates creative and critical thinking skills using analysis and evaluation. The student clearly communicates complex ideas and information.
C:	The student demonstrates sound knowledge of content and understanding of course concepts, and applies skills and processes in a range of familiar contexts. In addition the student demonstrates skills in selecting and integrating information and communicates relevant ideas in an appropriate manner.
D:	The student demonstrates a basic knowledge of content and understanding of course concepts, and applies skills and processes in some familiar contexts. In addition the student demonstrates skills in selecting and using information and communicates ideas in a descriptive manner.
E:	The student demonstrates an elementary knowledge of content and understanding of course concepts, and applies some skills and processes with guidance. In addition the student demonstrates elementary skills in recounting information and communicating ideas.

Examination marks and course marks are adjusted to reflect NESA performance bands and assigned cut-offs for the A - E scale. More information about the determination of marks and grades is discussed in 'Assessment and Reporting 7-12' on the School Intranet (Academic Programs).

Teacher Analysis

Contemporary education and the School's Learner Model places emphasis on assessment *for* learning. Positive education approaches have also been influential in the organisation of this section into two areas of commentary: current strengths and areas for improvement. Students and their parents are encouraged to seek further feedback as required at the Student-Teacher-Parent Evening and on other occasions throughout Year 11.

Year 11 Student Wellbeing Outline

During House time, now called 'Connect', each Year 11 student has worked with their House Mentor (formerly known as House Tutor) to develop their individual academic and wellbeing goals, supported by a series of one-to-one mentoring meetings over the semester. They have also enjoyed the opportunity to participate in Co-curricular activities during Connect time. Highlights of the semester have included the Connect Short Film Festival and Creative Arts Carnival. Our Positive Education (Pos Ed) Workshops have continued fortnightly to assist students develop their wellbeing across the domains of Purpose and Meaning, Relationships, Independence, Strengths and Mindset ("PRISM"). Year 11 students have focused on the importance of developing a growth mindset as well as exploring the application of perseverance and grit across all aspects of their lives. This was complemented by mindfulness activities using photography.

In Semester 1, Year 11 students have been provided with additional resources to equip them with effective study skills and examination preparation by participating in a series of workshops facilitated by Elevate Education. They also attended the Annual Study Conference, which was designed to acquaint them with the requirements, expectations and standards of the Year 11 course. They are encouraged to continue to strive for personal excellence in their studies and in all aspects of their engagement with the School.

Mr Ben Donaldson
Head of McGrath House

Semester One, 2018

Ethan REDMAN
Year 11 (MC06)
Mentor: Mr Tristan Jones, Mrs Cristina Tanase

Days Absent

Courses Studied

Course	Units
English (Advanced) - Preliminary	2
Mathematics Extension 1 - Preliminary	1
Mathematics - Preliminary	2
Physics - Preliminary	2
Japanese Continuers - Preliminary	2
Information Processes and Technology - Preliminary	2
Music 2 - Preliminary	2
Total Units	13

House Mentor Comment

Ethan is a positive and friendly member of our House group who attends House time with a positive attitude. He involves himself in all our group activities and brings a very positive energy to our House group. Ethan has a challenging academic program and is working consistently to develop his understanding. Ethan's results are a reflection of his determination and strong work ethic. Ethan is an excellent role model for all the members in our House group and I congratulate him on his continued involvement in every aspect of School Life. I am looking forward to continuing to work with Ethan in Term 3.

Semester One, 2018

Student: Ethan REDMAN

Teacher: Ms Justine Zarebski (11ENA1)

English (Advanced) - Preliminary

Course Outline

In Term 1, students undertook an exploration of short stories, poems, podcasts and short films as part of the Reading to Write module. Through this, students developed their own Composition Portfolio, which included a short story, exegesis and a critical analysis of a published short story. In Term 2, students have been analysing F. Scott Fitzgerald's 'The Great Gatsby' or Claire Atkin's 'Nona and Me', considering how narratives shape culture and bridge historical eras. The course mark has been mapped to reflect NESA Performance Bands and is based on one assessment only. The achievement grade is therefore provisional.

Course Outcomes and Student Achievement

Analyses and uses language forms, features and structures of texts considering appropriateness for specific purposes, audiences and contexts and evaluates their effects on meaning.	Extensive
Thinks imaginatively, creatively, interpretively and critically to respond to, evaluate and compose texts that synthesise complex information, ideas and arguments.	High
Reflects on, evaluates and monitors own learning and adjusts individual and collaborative processes to develop as an independent learner.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Course Mark 91% Course Median 76% Current Position in Course 2/59

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	9	30	15	4	-

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan approaches the demands of the Advanced English course diligently and has a firm understanding of the concepts and texts explored in class. His willingness to think laterally about the potential meanings of texts is particularly commendable. Ethan demonstrates a highly developed ability to synthesis complex ideas about cultural practices as part of an integrated and sustained critical analysis of 'The Great Gatsby'. He has approached the Preliminary Advanced course with motivation and diligence this semester and received a very pleasing result in his Creative Writing composition.

Areas for Improvement

Whilst Ethan demonstrates a mastery of the content, he is encouraged to practise and refine his written responses to polish his expression, give clarity to his ideas and avoid being verbose. His creative writing will continue to improve with practice and so I encourage him to continue submitting draft scripts and to read widely.

Semester One, 2018

Student: Ethan REDMAN

Teacher: Mrs Amelita Willson (11M32)

Mathematics Extension 1 - Preliminary

Course Outline

Students have studied the following topics: Algebraic Methods; Real and Irrational numbers and their arithmetic; Functions and Relations, Inequalities with variable denominators; Curve Sketching, including sketching graphs of functions with horizontal and vertical asymptotes; Regions in the Plane; Trigonometry, including the sine and cosine rules; Identities and Equations. The course mark has been mapped to reflect NESA Performance Bands and is based on one assessment only. The achievement grade is therefore provisional.

Course Outcomes and Student Achievement

Manipulates trigonometric ratios and equations.	High
Use co-ordinate methods and algebra to solve problems, including division of intervals.	High
Uses properties of functions and inverse functions to sketch and analyse graphs and algebraic techniques.	High

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Course Mark	77%	Course Median	70%	Current Position in Course	11/38
-------------	-----	---------------	-----	----------------------------	-------

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	12	10	5	7	4

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is a hard-working student, who has made consistently sound progress throughout the semester. He is an enthusiastic learner who relishes the chance to extend his knowledge and understanding in class. Ethan engages in all class activities and his contribution to class discussions are valuable and often insightful. Graphing techniques include the ability to analyse the domain and range of functions, the use of symmetry and the determination of intercepts and asymptotes and Ethan has mastered all of these techniques.

Areas for Improvement

Ethan must focus his revision on harder applications of trigonometry including equations involving trigonometric identities. In order to improve the quality of his answers to some extended response questions, he must continue to read questions carefully and support his answers fully by showing appropriate detailed working.

Semester One, 2018

Student: Ethan REDMAN

Teacher: Mrs Amelita Willson (11M232)

Mathematics - Preliminary

Course Outline

Students have studied the following topic areas: Methods in Algebra, Numbers and Surds, Graphs and Inequations, Functions and their Graphs. The course mark has been mapped to reflect NESA Performance Bands and is based on one assessment only. The achievement grade is therefore provisional.

Course Outcomes and Student Achievement

Performs routine arithmetic and algebraic manipulation involving surds, simple rational expressions and trigonometric identities.	Extensive
Chooses and applies appropriate arithmetic, algebraic, graphical, trigonometric and geometric techniques.	Extensive
Understands the concept of a function and the relationship between a function and its graph.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Course Mark	88%	Course Median	81%	Current Position in Course	17/56
-------------	-----	---------------	-----	----------------------------	-------

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	33	9	8	2	4

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan shows a keen interest in Mathematics and approaches challenging problems with an open mind and perseverance. He applies mathematical techniques to problems in a wide range of practical contexts; recognising the type of mathematics problem is a strength. Ethan has a strong understanding of Algebra and is able to manipulate expressions and equations to solve problems. This is pleasing as these skills are a foundation for the Mathematics course. His good results are indicative of both the diligence and natural ability that he brings to the Mathematics course.

Areas for Improvement

Development of checking techniques will assist Ethan in avoiding minor errors. Using the reference sheet provided in examinations could prompt a starting point for challenging questions. It is useful to be familiar with its contents and also to know what information is not included.

Student: Ethan REDMAN

Teacher: Mrs Aarthi Govender (11PH1)

Physics - Preliminary

Course Outline

Students have studied the modules on Kinematics and Dynamics this semester. In each module inquiry questions are included in the course content and used to frame the syllabus content. In the first module students describe and analyse motion in terms of scalar and vector quantities in two dimensions. By studying this module, students come to understand that scientific knowledge enables scientists to offer valid explanations and make reliable predictions, particularly in regard to the motion of an object. In the second module students focus on designing, evaluating and conducting investigations and interpreting trends in data to solve problems related to dynamics. They recognise that the relationship between the motion of objects and the forces that act on them is often complex. Students will also engage in a series of Depth Studies throughout the course which allows for further development of concepts that have been inspired by the syllabus. The course mark has been mapped to reflect NESA Performance Bands and is based on one assessment only. The achievement grade is therefore provisional.

Course Outcomes and Student Achievement

Skills	
Conducts investigations to collect valid and reliable primary and secondary data and information.	Extensive
Analyses and evaluates primary and secondary data and information.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Course Mark 87% Course Median 72% Current Position in Course 3/29

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	3	7	13	1	4

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is a capable and conscientious student who is always polite and well-mannered and completes his work carefully and accurately. His results for the practical assessment task demonstrated a good understanding of the key concepts tested, which was clearly evident from the manner in which he answered the analytical questions. Ethan's scientific report for the Depth Study was well-written and thorough using the appropriate format.

Areas for Improvement

In order to build on these results, I would advise Ethan to develop comprehensive notes and a detailed summary of the course material as the topic is being studied. He must also complete all the relevant 'Dot Point' textbook questions to help him practise both his understanding of concepts tested, as well as his interpretation of the question. I would encourage Ethan to attend Physics 'drop-in' classes in order to discuss areas of concern and to reinforce key concepts.

Semester One, 2018

Student: Ethan REDMAN

Teacher: Mr Tsukasa Ishida (11JPN2)

Japanese Continuers - Preliminary

Course Outline

Students commenced their Preliminary studies by learning advanced grammatical structures and vocabulary, which enable them to comprehend information related to the topic of The Individual. Subtopics included family, friends and interests. In addition, students learned to talk and write about their daily routine using the casual form of the Japanese language. Some students also had the opportunity to use their Japanese skills whilst hosting students from our Japanese Sister School. The course mark has been mapped to reflect NESA Performance Bands and is based on one assessment only. The achievement grade is therefore provisional.

Course Outcomes and Student Achievement

Demonstrates an understanding of spoken Japanese and relevant details within the range of given topics.	High
Demonstrates an understanding of a Japanese text written and identifies relevant detail.	High

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Course Mark 82% Course Median 82% Current Position in Course 5/8

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	3	2	3	-	-

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan consistently makes excellent connections in the language with previous work studied. In Task 1, he displayed a thorough understanding of spoken and written texts in Japanese. Ethan is able to manipulate the language learnt to create creative written pieces of written work.

Areas for Improvement

Ethan is encouraged to interact with Japanese beyond the content of the coursework by reading and listening to authentic Japanese texts in order to improve his level of authenticity. It is essential that he completes all tasks set for homework and consolidate classwork on a daily basis at home. A greater variety of Kanji is required in order to improve the impression of Ethan's writing.

I would like to thank Ethan for hosting a student from our Sister School when they visited this semester.

Student: Ethan REDMAN

Teacher: Mr Mark Harrington (11IPT2)

Information Processes and Technology - Preliminary

Course Outline

The topics covered this semester have been Introduction to Information Systems and Tools for Information Processes. Introduction to Information Systems looks at the role information systems play in society. It focuses on the raw ingredients for an information system including data and information, information technology and participants. Tools for Information Processes deals with the tools available through information technology to create and maintain information systems. This unit has focused on the understanding of the information technology used in the seven information processes. The course mark has been mapped to reflect NESA Performance Bands and is based on one assessment only. The achievement grade is therefore provisional.

Course Outcomes and Student Achievement

Describes the nature of information processes and information technology.	High
Identifies and describes the information processes within an information system.	Sound
Selects and ethically uses computer based and non-computer based resources and tools to process information.	Extensive
Analyses and describes an identified need.	High
Generates ideas, considers alternatives and develops solutions for a defined need.	High

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Course Mark 81% Course Median 81% Current Position in Course 4/9

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	1	4	2	1	-

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan demonstrates curiosity in technology and the use of information systems in a broad range of contexts. He has shown the ability to apply a range of software techniques and applications when developing an App for his first assessment. Ethan looks for creative ways to utilise technologies to develop solutions to problems. He also confidently relates current social and ethical issues in the analysis of information systems.

Areas for Improvement

Ethan needs to look to clarify concepts and ideas through questioning and discussion as this will improve the depth of his understanding. He would also benefit from reviewing the key ideas relating to the information processes within systems.

Semester One, 2018

Student: Ethan REDMAN

Teacher: Mr Owen Nelson (11MU21)

Music 2 - Preliminary

Course Outline

Students have continued to expand their skills and knowledge in the four component areas of performance, composition, musicology and aural. The core topic of Music 1600-1900 has been the source of this semester's study of works from the baroque and classic periods. The composition process has commenced with portfolio style assessment being the focus for creative work. Performance and Aural skills have been a focus through individual and groupwork. Students have also been invited to attend the Sydney Symphony Meet the Music concert series held at the Sydney Opera House. The course mark has been mapped to reflect NESA Performance Bands and is based on one assessment only. The achievement grade is therefore provisional.

Course Outcomes and Student Achievement

Observes and discusses in detail the concepts of music in works representative of the mandatory and additional topics.	Extensive
Analyses and discusses compositional processes with stylistic, historical, cultural, social and musical considerations.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Course Mark	88%	Course Median	79%	Current Position in Course	2/4
-------------	-----	---------------	-----	----------------------------	-----

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	2	1	1	-	-

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan has a developing musical sense showing his natural potential in this subject. He makes an effort to contribute to class discussions with appropriate observations regarding the listening material presented. His solo performances have demonstrated an emerging awareness of stylistic interpretation and expression. In his creative work, Ethan has demonstrated an understanding of compositional devices that has allowed him to create original works of a high standard.

Areas for Improvement

In his creative work, Ethan's skills are improving and he has presented original work that demonstrates an understanding of the relationship between melody and harmony. Ethan's practical work has the potential for improvement with further individual effort and depth of understanding.

Academic Report - Semester Two, 2018 Year Eleven

From the Principal

I would like to congratulate Year 11 students on the completion of the Preliminary Higher School Certificate. In all their subjects they have been challenged to grapple with complex concepts, as well as a significant body of knowledge. Contemporary education involves students in the sophisticated application of a wide variety of skills and technology, which is stimulating and, at the same time, very demanding.

These reports make it clear that, in almost every case, our students have embraced the challenges of Year 11 with integrity, enthusiasm and diligent effort. In some instances, results indicate that greater effort is needed in terms of the independent study that characterises Higher School Certificate success. I commend the content of this report and suggest that students look closely at the information contained herein so as to ensure they learn from the year just completed.

In Term 4, Year 11 attended and enjoyed with their parents and staff the Commencement of Year 12 Dinner and were commissioned as the Class of 2019. They have commenced their Higher School Certificate courses and have committed, through personal effort and endeavour, to accept responsibility for their learning. They can be assured of the ongoing support of their School and are encouraged to work closely and rigorously with each other and their teachers during the year ahead.

Each end of year break brings with it an opportunity for reflection and renewal. Students will need time for these things so that they can begin the new year refreshed and full of energy and determination. They must, however, set some time aside for holiday assignments, assessment preparation, reading of texts and organisation of their study routine.

The staff and I wish all of Year 11 a successful transition into their final year of study at Hills Grammar.

Mr Michael Smith
Principal

Reporting Student Achievement in Year Eleven

The School provides parents and caregivers with ongoing information and guidance on each student's growth in scholarship, personal development and citizenship. Such information is shared in several ways.

Information Evenings

Parents and students are invited to attend a function where senior teachers explain specific issues and plans.

Parent, Student and Teacher Interviews

Academic interviews provide an opportunity for parents to discuss their child's achievement and application with each of his/her teachers.

Parent, Student and Mentor meetings

An opportunity for students and parents to meet with the Mentor and set goals for the year ahead.

Academic Reports

Every semester a formal written report is provided to parents summarising a student's achievement and application in each subject.

How to Read this Academic Report

The Academic Report presents a detailed analysis of a student's achievement and application for each course they are enrolled in. The information provided will normally include:

- levels of achievement for course outcomes
- an Examination Mark and the Examination Median (if applicable) and Position in Course
- an indicator of overall effort
- teacher's comment, including areas for improvement.

Student Course Outcomes

At Hills Grammar we report information on student progress in terms of student course outcomes. A student outcome, plainly speaking, is something that the student knows, understands or can do. Our teachers, like all educators in NSW, design their educational programs in line with outcomes specified and mandated by the NESA syllabus documents. Assessment tasks and examinations test specific outcomes. It makes sense, then, to report on the level of achievement the students have attained against these outcomes. The following descriptors are to be used when interpreting a student's achievement of Course Outcomes:

Extensive:	Students have achieved the outcome at an extensive level for the stage. They demonstrate breadth and depth in their knowledge and understanding of the outcome and have a very high level of proficiency in the processes and skills for the stage.
High:	Students have achieved the outcome at a thorough level for the stage. They consistently demonstrate a high level of knowledge and understanding of the outcome and proficiency in the processes and skills for the stage.
Sound:	Students have achieved the outcome at a sound level for the stage. They demonstrate sound knowledge and understanding of the outcome and proficiency in the processes and skills for the stage.
Developing:	Students have achieved the outcome at a basic level for the stage. They demonstrate a developing level of knowledge and understanding of the outcome and some proficiency in the processes and skills for the stage.
Elementary:	Students at this level are working at an elementary level with the outcome for the stage. They demonstrate an elementary level of knowledge and understanding of the outcome and a very limited proficiency in the processes and skills for the stage. They may need guidance and teacher support in order to demonstrate achievement of the outcomes and to increase consistency of performance.

Marks and Grades for Academic Reports

The course Marks and Course Median (middle mark) provided in Academic Reports, give an overall numeric summary (Years 7-11 only) of a student's achievement in relation to the syllabus outcomes being assessed. Course Marks are based on all assessment tasks completed at the time of reporting. The table below lists the general achievement descriptors for Year 11 - Preliminary HSC:

A:	The student demonstrates extensive knowledge of content and understanding of course concepts, and applies highly developed skills and processes in a wide variety of contexts. In addition the student demonstrates creative and critical thinking skills using perceptive analysis and evaluation. The student effectively communicates complex ideas and information.
B:	The student demonstrates thorough knowledge of content and understanding of course concepts, and applies well-developed skills and processes in a variety of contexts. In addition the student demonstrates creative and critical thinking skills using analysis and evaluation. The student clearly communicates complex ideas and information.
C:	The student demonstrates sound knowledge of content and understanding of course concepts, and applies skills and processes in a range of familiar contexts. In addition the student demonstrates skills in selecting and integrating information and communicates relevant ideas in an appropriate manner.
D:	The student demonstrates a basic knowledge of content and understanding of course concepts, and applies skills and processes in some familiar contexts. In addition the student demonstrates skills in selecting and using information and communicates ideas in a descriptive manner.
E:	The student demonstrates an elementary knowledge of content and understanding of course concepts, and applies some skills and processes with guidance. In addition the student demonstrates elementary skills in recounting information and communicating ideas.

Examination marks and course marks are adjusted to reflect the NSW Education Standards Authority (NESA) performance bands and assigned cut-offs for the A - E scale. More information about the determination of marks and grades is discussed in 'Assessment and Reporting 7-12' on the School Intranet (Academic Programs).

Teacher Analysis

Contemporary education and the School's Learner Model places emphasis on assessment *for* learning. Positive education approaches have also been influential in the organisation of this section into two areas of commentary: current strengths and areas for improvement. Students and their parents are encouraged to seek further feedback as required at the Student-Teacher-Parent Evening and on other occasions throughout Year 11.

Year Eleven Student Wellbeing Outline

At the start of Term 4, Year 11 were inducted into the Class of 2019 at the Year 12 Presentation Dinner at Oatlands House. They were commissioned as Student Leaders for the year ahead and as such accepted greater responsibility as the most senior students of the School. They have embraced their role as leaders with confidence and commitment, with a common goal of setting an excellent example to the younger students.

Term 3 concluded with all students completing end of year examinations, the results of which are reported herein. All students should now have revised their course selections and commenced their HSC coursework with renewed rigour and energy. The students are encouraged to adopt a growth mindset as they embark on this new phase, confident that by this time next year they will be as well prepared as possible for the final HSC examinations. In support of this, the School has implemented a transition program whereby Year 11 step up into Year 12, ensuring they are aware of their rights, responsibilities and the numerous requirements of the Higher School Certificate.

Year 12 students are now under the care and guidance of the Head of Year 12 and a senior member of faculty appointed to each group as an Academic Mentor. Students are setting academic and wellbeing goals for the year ahead and will track their progress during individual mentoring sessions with their Academic Mentor. They are expected to use Connect time effectively for study and are encouraged to access the Nexus resources after hours; Nexus provides a teacher on duty between 5:00pm and 8:00pm Monday to Thursday each week of the school year and extended opening hours during the school holiday period.

Working in partnership, students, staff and parents will ensure the Class of 2019 look forward to an enjoyable, challenging and fulfilling final year ahead.

Mr Ben Donaldson
Head of McGrath House

Semester Two, 2018

Ethan REDMAN
Year Eleven (MC06)
Tutor: Mr Tristan Jones, Mrs Cristina Tanase

House Tutor Comment - Mr Tristan Jones, Mrs Cristina Tanase

Ethan is a polite and well mannered student who has fulfilled his role as McGrath House Captain with distinction and it was gratifying to see him persevere when faced with the challenges that this role brings. Ethan's participation in the Senior Music Orchestra has enabled him to make valuable contributions to the life of the School. Comments from Ethan's teachers indicate that he has made notable progress this semester and that he can produce quality work when he sets his mind to it. As he embarks on his HSC journey, I encourage Ethan to carefully consider the constructive assessment feedback offered by his teachers, particularly in Mathematics Extension 1 and Japanese. In working towards his goals over the next 12 months, I hope that he will take advantage of the expert academic support available to him. It has been a pleasure having Ethan as a member of our House group and I wish him every success in his future studies.

Semester Two, 2018

Student: Ethan REDMAN

Teacher: Ms Justine Zarebski (11ENA1)

English Advanced - Preliminary

Course Outline

Students have completed a critical study of the Shakespearean text 'Othello' or 'King Lear'. Students also completed a study of Fitzgerald's 'The Great Gatsby' or Watkins 'Nona and Me', which developed the students' understanding of the relationship between text and context. The examination mark and course mark have been mapped to reflect the NESA A-E Performance Bands. The course mark, position in course and Record of Achievement A-E Grades are based on performance in all Preliminary HSC assessment tasks.

Course Outcomes and Student Achievement

Responds to, composes and evaluates complex texts for understanding, interpretation, critical analysis, imaginative expression and pleasure.	Extensive
Analyses and uses language forms, features and structures of texts considering appropriateness for specific purposes, audiences and contexts and evaluates their effects on meaning.	Extensive
Thinks imaginatively, creatively, interpretively and critically to respond to, evaluate and compose texts that synthesise complex information, ideas and arguments.	Extensive
Investigates and evaluates the relationships between texts.	Extensive
Evaluates the diverse ways texts can represent personal and public worlds and recognises how they are valued.	Extensive
Explains and evaluates cultural assumptions and values in texts and their effects on meaning.	Extensive
Reflects on, evaluates and monitors own learning and adjusts individual and collaborative processes to develop as an independent learner.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark	88%	Examination Median	66%		
Course Mark	88%	Course Median	74%	Position in Course	5/60

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	7	19	25	6	3

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan demonstrates an advanced ability to summarise his understanding of a text in his essays. His evaluations of texts are insightful and demonstrate a perceptive understanding of ideas and values. Ethan has made notable progress in English this semester and is to be commended for his diligence. In his essay on 'King Lear', Ethan demonstrates a sophisticated ability to engage with the question, adopting a confident tone and sense of voice that is sustained throughout.

Areas for Improvement

Ethan made some avoidable errors in his extended response on 'The Great Gatsby' in the yearly examination, which were detrimental to his overall result. I encourage him to focus on time management to ensure cohesion and accuracy and the development of a sustained response. I advise Ethan to continue refining his critical analysis skills and to approach me for feedback.

Semester Two, 2018

Student: Ethan REDMAN

Teacher: Mrs Amelita Willson (11M232)

Mathematics - Preliminary

Course Outline

Students have studied the following topics this semester: Algebra and Surds, Co-ordinate Geometry, Trigonometry, Indices, the Derivative, the Quadratic function and revision of all topics covered in Semester 1. The examination mark and course mark have been mapped to reflect the NESA A-E Performance Bands. The course mark, position in course and Record of Achievement A-E Grades are based on performance in all Preliminary HSC assessment tasks.

Course Outcomes and Student Achievement

Performs routine arithmetic and algebraic manipulation involving surds, simple rational expressions and trigonometric identities.	High
Chooses and applies appropriate arithmetic, algebraic, graphical, trigonometric and geometric techniques.	High
Determines the derivative of a function through routine application of the rules of differentiation.	Extensive
Understands a concept of a function and a relationship between a function and its graph.	High

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark	78%	Examination Median	77%		
Course Mark	76%	Course Median	74%	Position in Course	28/55

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	26	12	12	6	-

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is attentive in class and actively engages in classroom discussion. He can successfully determine the derivative of a function through routine application of the rules of differentiation and relate it to the slope of its graph. I encourage Ethan to continue to enjoy the challenge of Mathematics and to remain dedicated to achieving results that are commensurate with his ability.

Areas for Improvement

The result received this semester does not reflect Ethan's full potential in Mathematics and as such, greater focus and effort are needed. He has at times, been inconsistent with the completion of homework. To enable him to improve his results in this course, consistency with completion of all work and making sure he is up to date is essential. Ethan is encouraged to work through past HSC questions as topics are completed. These can be found on the Student Share Drive.

Semester Two, 2018

Student: Ethan REDMAN

Teacher: Mrs Amelita Willson (11M32)

Mathematics Extension 1 - Preliminary

Course Outline

Students have studied the following topics this semester: Methods of Algebra, Numbers and Functions, Trigonometry, Co-ordinate Geometry, Indices and Logarithms, Differentiation, the Quadratic Function, the Geometry of the Parabola, Integration and Revision of Semester 1 topics. The examination mark and course mark have been mapped to reflect the NESA A-E Performance Bands. The course mark, position in course and Record of Achievement A-E Grades are based on performance in all Preliminary HSC assessment tasks.

Course Outcomes and Student Achievement

Applies Trigonometry, Mathematical Induction, Co-ordinate Geometry and Graphing techniques.	Extensive
Uses Quadratic theory and Parametrics.	Sound
Uses differentiation, logs and exponentials.	High
Uses techniques of Intergration to calculate areas and volumes.	Developing

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark	64%	Examination Median	69%		
Course Mark	74%	Course Median	71%	Position in Course	14/38

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	12	12	6	5	3

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan has worked well this semester and has made sound progress. He has shown growth in understanding and problem solving skills. Ethan has mastered the content and problem solving techniques associated with the periodic trigonometric functions, identities and equations.

Areas for Improvement

It is pleasing to note Ethan's enthusiasm for working in a collaborative environment, but he needs to make sure he is able to work just as effectively independently. Moreover, errors can often be made when solutions to questions are not thoroughly and systematically set out. Ethan is advised to consistently implement the habit of showing thorough working when completing practice questions. This will assist him in avoiding making careless errors in examinations. Ethan must now focus his revision on the Integration topic so that he is better equipped in answering questions at the HSC level.

Semester Two, 2018

Student: Ethan REDMAN

Teacher: Mrs Aarthi Govender (11PH1)

Physics - Preliminary

Course Outline

This semester students have studied the modules on Waves and Thermodynamics as well as Electricity and Magnetism. In the Waves module students examined mechanical waves and electromagnetic waves, including their similarities and differences, as well as gained an understanding of how waves transfer energy without the transfer of matter. In the Thermodynamics topic they studied the relationship between energy, work, temperature and matter. In the Electricity and Magnetism module they gained an understanding that atomic theory and the laws of conservation of energy and electric charge are unifying concepts in understanding the electrical and magnetic properties and behaviour of matter. Students also examined the analysis of electrical circuits and the transfer and conversion of energy in electrical circuits which have led to a variety of technological applications. The examination mark and course mark have been mapped to reflect the NESA A-E Performance Bands. The course mark, position in course and Record of School Achievement A-E Grades are based on performance in all Preliminary HSC assessment tasks.

Course Outcomes and Student Achievement

Designs and evaluates investigations in order to obtain primary and secondary data and information.	Extensive
Selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media.	High
Solves scientific problems using primary and secondary data, critical thinking skills and scientific processes.	Sound
Communicates scientific understanding using suitable language and terminology for a specific audience or purpose.	Extensive
Recalls and applies relevant knowledge, ideas and procedures in Physics.	Sound

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark	74%	Examination Median	71%		
Course Mark	82%	Course Median	73%	Position in Course	4/28

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	2	10	7	3	6

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is a pleasant and capable student who can produce quality work when he sets his mind to it. His answers in the yearly examination showed a good understanding of key concepts in the Waves module. Ethan's model on the depth study was engaging and creative, showing an extensive understanding of Physics concepts.

Areas for Improvement

Ethan must continue to build on the study skills that he has established this year in order to realise his full potential. He should also pay closer attention to the depth of knowledge required when completing first hand investigations as this will further improve his understanding of the key concepts. I recommend that Ethan continues to maintain a detailed set of notes on all the syllabus material covered, reviewing this as the course progresses.

Semester Two, 2018

Student: Ethan REDMAN

Teacher: Mr Mark Harrington (11IPT1)

Information Processes and Technology - Preliminary

Course Outline

This semester the course has focused on the information processes and the development of individual information systems. The use of a structured approach is highlighted through the systems development cycle. The students have completed a project that required them to complete a number of information processes to develop a system to meet a specified need. Incorporated in all areas of the course is the analysis of issues relating to information systems. The examination mark and course mark have been mapped to reflect the NESA A-E Performance Bands. The course mark, position in course and Record of Achievement A-E Grades are based on performance in all Preliminary HSC assessment tasks.

Course Outcomes and Student Achievement

Identifies and describes social and ethical issues.	High
Selects and ethically uses computer based and non-computer based resources and tools to process information.	Extensive
Recognises and explains the interdependence between each of the information processes.	High
Develops and explains solutions for an identified need which address all of the information processes.	High
Generates ideas, considers alternatives and develops solutions for a defined need.	High

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark	85%	Examination Median	71%		
Course Mark	82%	Course Median	77%	Position in Course	4/9

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	1	4	2	1	1

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan has shown a strong understanding of both information technology and system development concepts. He is willing to challenge ideas and ask questions and this has helped him develop a strong understanding of course concepts. Ethan has independently developed skills in a broad range of applications and applied these effectively in a range of contexts. Ethan's broad knowledge of information technology has been a feature of his work in this course.

Areas for Improvement

Ethan needs to refine his analysis of questions, particularly in examinations, to develop the focus of his responses. He should also focus on working to develop the clarity in his written expression to further improve his examination results.

Semester Two, 2018

Student: Ethan REDMAN

Teacher: Mr Tsukasa Ishida (11JPN2)

Japanese Continuers - Preliminary

Course Outline

Students have continued to expand their knowledge of grammatical structures, vocabulary and Kanji. The topics covered were neighbourhood and school life under the main theme of The Individual. They also compared Australian and Japanese neighbourhoods and school systems. The students completed assessment tasks which assessed the four skills; speaking listening, reading and writing. The examination mark and course mark have been mapped to reflect the NESA A-E Performance Bands. The course mark, position in course and Record of Achievement A-E Grades are based on performance in all Preliminary HSC assessment tasks.

Course Outcomes and Student Achievement

Demonstrates an understanding of spoken Japanese and relevant details within the range of given topics.	Sound
Communicates effectively using a range of vocabulary and structures.	High
Demonstrates an understanding of a Japanese text written in a variety of styles and the ability to identify relevant detail.	Sound
Demonstrates an ability to organise and express ideas effectively using appropriate vocabulary, expressions and text types.	Sound

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark	73%	Examination Median	76%		
Course Mark	76%	Course Median	79%	Position in Course	5/8

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	2	2	4	-	-

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is a positive contributor to the teaching and learning discussions that are an integral part of the Year 11 Japanese class. He demonstrates a general understanding of a range of written texts. Ethan is able to communicate across a range of topics and demonstrates a good control of vocabulary and language structures.

Areas for Improvement

Ethan is strongly encouraged to utilise the extra time provided by the teacher. It is essential that he complete all tasks set for homework and consolidate classwork on a daily basis at home. Ethan is advised to revise the listening items associated with the course book to improve his comprehension skills. He is encouraged to prepare for speaking tasks thoroughly by handing in responses for marking and feedback.

Mousukoshi ganbarimashou, Ethan kun!

Semester Two, 2018

Student: Ethan REDMAN

Teacher: Mr Owen Nelson (11MU21)

Music 2 - Preliminary

Course Outline

Students have continued to expand their skills and knowledge in the four component areas of performance, composition, musicology and aural. The core topic of Music 1600-1900 has been the continuing source of study of works from the Classic and Romantic periods, as well as the additional topic Australian Music. The composition process has commenced with portfolio style assessment being the focus for creative work. Performance and Aural skills have been developed through individual and groupwork. Students were invited to attend the Sydney Symphony Meet the Music concert series held at the Sydney Opera House. The examination mark and course mark have been mapped to reflect the NESA A-E Performance Bands. The course mark, position in course and Record of Achievement A-E Grades are based on performance in all Preliminary HSC assessment tasks.

Course Outcomes and Student Achievement

Performs repertoire that reflects the topics studied as both a soloist and an ensemble member.	Extensive
Demonstrates an understanding of musical concepts by interpreting, notating, analysing, discussing, creating and evaluating combinations of musical symbols.	Extensive
Composes, improvises and analyses melodies and accompaniments for familiar sound sources, solo, small or large ensembles.	Extensive
Analyses and discusses compositional processes with stylistic, historical, cultural, social and musical considerations.	Extensive
Identifies, recognises, experiments with and discusses the uses and effects of technology in music.	Extensive
Performs as a means of self expression, demonstrating a willingness to participate in musical experiences and to accept and use constructive criticism.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark	95%	Examination Median	80%		
Course Mark	90%	Course Median	75%	Position in Course	1/4

	Extensive(A)	High(B)	Sound(C)	Developing(D)	Elementary(E)
Overall Achievement	2	2	-	-	-

Course Distribution of Overall Achievement - Individual Student Result Shaded

Effort	Excellent	Good	Satisfactory	Needs Improvement
---------------	-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan has demonstrated a strong understanding of music concepts in musicology activities and has constructively applied his skills in analytical tasks. His practical work has developed positively and he has performed with a convincing understanding of the stylistic and technical demands of the chosen repertoire. In his creative work, Ethan has shown the ability to creatively manipulate original material using compositional devices that will enable him to develop his ideas with a high level of musicianship.

Areas for Improvement

Ethan's practical skills are solid but could improve with further attention to nuance and phrasing within the style. He has enthusiastically approached the need to notate his musical ideas, utilising his understanding of music theory and aural skills but there is further understanding of style and genre required in the future in order for Ethan to reach his goals.

Co-curricular Record 2018

The Co-curricular program at Hills Grammar is an integral part of the whole school curriculum. There are wonderful opportunities for students to develop their skills and interests across a broad range of activities including Sport, Creative and Spoken Arts, Music, Leadership and Service Learning, STEM and Outdoor Education. These activities take place before school, after school and during the Thursday Connect period with some areas having weekend commitments.

Aims of the program are:

- to foster and develop student leadership
- to encourage and develop co-operation, responsibility and 'team' work
- to develop a sense of belonging and school spirit
- to foster good rapport between staff, students and parents
- to inspire students to strive for excellence in all areas of endeavour
- to provide opportunities for parents, ex-parents and ex-students to contribute to the School
- to establish links with the wider community and develop relationships with various groups
- to provide opportunities for students to achieve success in a diverse mix of interests

Badminton & Table Tennis

Attendance: Consistent

Description

Both these games demands excellent fitness: aerobic stamina, agility, explosive strength, speed and precision. It is also a technical sport, requiring good motor coordination and the development of sophisticated movements. Badminton is played with a racquet, shuttlecock and net on a rectangular shaped court with opposing teams at either side of the net. Table Tennis, also known as Ping-Pong, is played on a tabletop with a net separating either end of the table. Each play uses a paddle (or bat) and lightweight ball.

Outcomes

- Adapts and improvise movements in varying contexts of space.
- Demonstrates movement skills in challenging contexts.
- Uses movement to effectively react in different contexts.

Orchestra

Attendance: Consistent

Description

This ensemble is for experienced musicians that demonstrate a high level of commitment and musicianship. The Orchestra performs primarily at the Music Showcase and Annual Presentation of Awards. Musicians in this ensemble are involved in other musical activities throughout the year.

Outcomes

- Demonstrates high level instrumental/vocal ensemble skills.
- Demonstrates high level instrumental/vocal performance skills in the chosen instrument/voice.
- Demonstrates self and group discipline showing empathy and respect for fellow musicians and teachers.
- Responsible use of Music department resources.

Percussion Ensemble

Attendance: Consistent

Description

This ensemble consists of students with previous percussion experience in Years 7 to 12. It is expected that students would be taking individual percussion lessons either at school or externally. The ensemble performs at Music Showcase and other school events.

Outcomes

- Develops proficient instrumental/vocal ensemble skills.
- Develops competent instrumental/vocal performance skills in the chosen instrument/voice.
- Understands self and group discipline including empathy and respect for fellow musicians and teachers.
- Responsible use of Music department resources.

Senior Concert Band

Attendance: Sometimes

Description

Students involved in this ensemble have a wide range of experience and are taking individual lessons on their chosen instrument. The Senior Concert Band performs a challenging range of repertoire at official school events, including the Annual Presentation of Awards and other school assemblies. Most students progress into the Senior Concert Band from the Junior or Intermediate Band depending on their ability level and progress.

Outcomes

- Develops proficient instrumental/vocal ensemble skills.
- Develops competent instrumental/vocal performance skills in the chosen instrument/voice.
- Understands self and group discipline including empathy and respect for fellow musicians and teachers.
- Responsible use of Music department resources.

Senior Music Camp

Attendance: Consistent

Description

The Senior Music Camp is held in Term 4 each year. Students involved in the Senior Concert Band, Senior and Intermediate String Ensembles (combined), Intermediate Guitar Ensemble, Stage Band, Vocal Ensemble, Senior House Choir and Senior Orchestra are invited to attend.

Outcomes

- Develops proficient instrumental/vocal ensemble skills.
- Develops competent instrumental/vocal performance skills in the chosen instrument/voice.
- Understands self and group discipline including empathy and respect for fellow musicians and teachers.
- Responsible use of Music department resources.

Senior School Musical

Attendance: Consistent

Description

The Senior School Musical provides an opportunity for actors, singers, dancers and orchestra to take part in a music theatre production of a high standard. Cast members will be rehearsing each week during Terms 1 and 2. Evening performances will be held in June 2018.

Outcomes

- Understanding of self and group discipline including empathy and respect for fellow musicians and teachers
- Demonstration of high level instrumental/vocal performance skills

Stage Band

Attendance: Consistent

Description

The Stage Band is an auditioned group of musicians who perform challenging repertoire in a range of jazz styles. Performers in the Stage Band are committed members of numerous music ensembles, and feature prominently in public events at school and in the wider community. Opportunities for improvisation and solo work are well catered for in this ensemble. Rehearsals are held weekly, although the band may require extra rehearsal commitment prior to their gigs.

Outcomes

- Demonstrates high level instrumental/vocal ensemble skills.
- Demonstrates high level instrumental/vocal performance skills in the chosen instrument/voice.
- Demonstrates self and group discipline showing empathy and respect for fellow musicians and teachers.
- Responsible use of Music department resources.

Hills
Grammar

Academic Report - Semester One 2019 Year Twelve

From the Principal and Head of Senior School

The first semester has passed rapidly and Year 12 have been working consistently to meet requirements and engage in their learning. We encourage them, to continue to pace themselves, dealing with each challenge, assessment and opportunity in turn. With continued hard work and the support of their family and their School they will be able to confidently approach the final examinations in October / November. This year is a test of character, and we encourage each student to strive with courage and determination to achieve their goals.

Year 12's primary focus has quite rightly been the academic program. The half yearly reports provide feedback on student progress and should be seen as a signpost to inform future endeavours. Strong results should be consolidated and viewed as a springboard for even greater achievement. Any problem areas should be tackled, and it is vital that students persevere with a disciplined and organised approach to their studies. Teachers are very willing to support and assist them with extra lessons and guidance. They only have to ask. By working in partnership with their teachers and peers, Year 12 should confidently move forward with their studies.

We want Year 12 to look back on this year as a time of fulfilment, during which they set and worked toward achieving their personal goals and contributed generously to all aspects of our community. We want them all to succeed academically to the very best of their ability, and to develop and maintain strong, positive relationships with their teachers and their fellow Year 12 students.

We would like to acknowledge Year 12 for their hard work and for the example they have been for our younger students, particularly through their involvement in 'The World's Greatest Shave', enthusiastically embraced as a cause and illustrating their commitment, compassion and empathy. They should be justly proud of their involvement and the extraordinary outcomes, as is the School of each of them.

We wish Year 12 every success as they progress through Semester 2 of their final year of study at Hills Grammar.

Mr Michael Smith
Principal

Mr David Cook
Head of Senior School

Reporting Student Achievement in Year Twelve

The School provides parents and caregivers with ongoing information and guidance on each student's growth in scholarship, personal development and citizenship. Such information is shared in several ways.

Information Evenings

Parents and students are invited to attend a function where senior teachers explain specific issues and plans.

Parent, Student and Teacher Interviews

Academic interviews provide an opportunity for parents to discuss their child's achievement and application with each of his/her teachers.

Parent, Student and Mentor meetings

An opportunity for students and parents to meet with the Mentor and set goals for the year ahead.

Academic Reports

Every semester a formal written report is provided to parents summarising a student's achievement and application in each subject.

How to Read this Academic Report

The Academic Report presents a detailed analysis of a student's achievement and application for each course they are enrolled in. The information provided will normally include:

- levels of achievement for course outcomes
- Position in Course
- an indicator of overall effort
- teacher's comment, including areas for improvement.

Student Course Outcomes

At Hills Grammar we report information on student progress in terms of student course outcomes. A student outcome, plainly speaking, is something that the student knows, understands or can do. Our teachers, like all educators in NSW, design their educational programs in line with outcomes specified and mandated by the NESA syllabus documents. Assessment tasks and examinations test specific outcomes. It makes sense, then, to report on the level of achievement the students have attained against these outcomes. The following descriptors are to be used when interpreting a student's achievement of Course Outcomes:

Extensive:	Students have achieved the outcome at an extensive level for the stage. They demonstrate breadth and depth in their knowledge and understanding of the outcome and have a very high level of proficiency in the processes and skills for the stage.
High:	Students have achieved the outcome at a thorough level for the stage. They consistently demonstrate a high level of knowledge and understanding of the outcome and proficiency in the processes and skills for the stage.
Sound:	Students have achieved the outcome at a sound level for the stage. They demonstrate sound knowledge and understanding of the outcome and proficiency in the processes and skills for the stage.
Developing:	Students have achieved the outcome at a basic level for the stage. They demonstrate a developing level of knowledge and understanding of the outcome and some proficiency in the processes and skills for the stage.
Elementary:	Students at this level are working at an elementary level with the outcome for the stage. They demonstrate an elementary level of knowledge and understanding of the outcome and a very limited proficiency in the processes and skills for the stage. They may need guidance and teacher support in order to demonstrate achievement of the outcomes and to increase consistency of performance.

Teacher Analysis

Contemporary education and the School's Learner Model places emphasis on assessment *for* learning. Positive education approaches have also been influential in the organisation of this section into two areas of commentary: current strengths and areas for improvement. Students and their parents are encouraged to seek further feedback as required at the Student-Teacher-Parent Evening and on other occasions throughout Year 12.

SEMESTER ONE 2019

Ethan REDMAN
Year Twelve (MC11)
Mentor: Mr Mitchell Clendinning

Total Units	12

Mentor Comment

Ethan is a spirited and friendly member of our Academic Mentor group. He participates thoughtfully in Connect discussions and applies himself to academic work consistently. Ethan's commitment across subjects will ensure that he has a range of options when it comes to post-school options. Ethan's teachers have noted that it is imperative that he keeps working on his writing and problem-solving through regular practice. This is also includes thoroughly revising course material in preparation for examinations. Congratulations on a productive semester, Ethan!

Student: Ethan REDMAN

Teacher: Ms Justine Zarebski (12ENA01)

English Advanced

Course Outline

This semester students have completed a comprehensive unit of inquiry on the Common Module: Texts and Human Experiences, incorporating intensive analysis of Shakespeare's 'The Merchant of Venice'. Students have also completed Module A: Textual Conversations, studying Virginia Woolf's novel 'Mrs Dalloway' and Stephen Daldry's film 'The Hours'. The position in course is based on performance in all HSC assessment tasks completed to date.

Course Outcomes and Student Achievement

Independently responds to, composes and evaluates a range of complex texts for understanding, interpretation, critical analysis, imaginative expression and pleasure.	Extensive
Critically analyses and uses language forms, features and structures of texts justifying appropriateness for specific purposes, audiences and contexts and evaluates their effects on meaning.	Extensive
Investigates and evaluates the relationships between texts.	High
Evaluates the diverse ways texts can represent personal and public worlds and recognises how they are valued.	Extensive
Explains and evaluates nuanced cultural assumptions and values in texts and their effects on meaning.	Extensive
Reflects on, evaluates and monitors own learning and refines individual and collaborative processes as an independent learner.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Position in Course 7/54

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is an able student who is capable of producing outstanding results. He has a highly developed ability to sustain a well-supported argument in response to an essay question about an aspect of the human experience. In his essay on 'The Merchant of Venice', Ethan demonstrated a strong and personal engagement with the text through insightful and detailed textual analysis. Further, Ethan has a fluent, engaging style of delivery in speeches, including appropriate inflections and voice modulation and highly controlled, complementary body language.

Areas for Improvement

Ethan is advised to look at the marker feedback to ensure that he can use their specific suggestions to improve key areas before the next assessment. He needs to be regularly practising the core writing skills required in analytical responses in order to ensure that his results remain consistent.

SEMESTER ONE 2019

Student: Ethan REDMAN

Teacher: Mrs Amelita Willson (12M2302)

Mathematics

Course Outline

Students have covered the following areas of study this semester: Exponential and the Logarithmic Functions, Differentiation of various algebraic functions, Integration and Locus. Course revision together with a review of examination technique has been undertaken throughout this period. The position in course is based on performance in all HSC assessment tasks completed to date.

Course Outcomes and Student Achievement

Applies appropriate techniques from the study of trigonometric functions to solve problems.	Extensive
Seeks to apply mathematical techniques to problems in a wide range of practical contexts.	Extensive
Understands the concept of a function and the relationship between a function and its graph.	High
Relates the derivative of a function to the slope of its graph.	High
Uses techniques of integration to solve problems and calculate areas and volumes.	High

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Position in Course 9/46

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan shows a keen and interested approach and has made sound progress this semester. He has performed well in the project task and should feel confident moving forward in the course. Ethan is to be commended for willingly presenting solutions on the white board. He is an attentive listener and asks questions to clarify his understanding. Once a technique is developed and modelled in class, Ethan is able to answer questions independently.

Areas for Improvement

Development of checking techniques will assist Ethan in avoiding careless errors. He is encouraged to pay attention to neatness and the setting out of his work, to improve the presentation and correctness of solutions.

Student: Ethan REDMAN

Teacher: Mrs Amelita Willson (12M302)

Mathematics Extension 1

Course Outline

Students have covered the following areas of study: Mathematical Induction, Calculus, Exponential and Logarithmic Functions, Trigonometric Functions and Inverse Functions, Polynomials, Geometry of the Circle. The position in course is based on performance in all HSC assessment tasks completed to date.

Course Outcomes and Student Achievement

Solves problems involving permutations and combinations, inequalities, polynomials, circle geometry and parametric representations.	High
Uses a variety of strategies to investigate mathematical models of situations involving binomial probability, projectiles, simple harmonic motion, or exponential growth and decay.	High
Uses the relationship between functions, inverse functions and their derivatives.	Elementary
Applies the chain rule to problems including those involving velocity and acceleration as functions of displacement.	High
Evaluates mathematical solutions to problems and communicates them in an appropriate form.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Position in Course 19/29

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is to be commended for his consistent and steady application to his work. He is a good mathematical thinker who, at times, takes the lead in classroom discussions and has the ability to make insightful observations. Ethan is to be commended for seeking clarification and checking his thinking when problem solving.

Areas for Improvement

Ethan is encouraged to consistently set out his working in response to questions, taking care to avoid shortcuts which can often lead to careless errors and loss of marks. More attention needs to be given to the details in solving Trigonometric Equations. It is also recommended that he continues to thoroughly revise and practise differentiation and integration techniques.

Student: Ethan REDMAN

Teacher: Mrs Aarthi Govender (12PH01)

Physics

Course Outline

During this semester, students studied two modules, Advanced Mechanics and Electromagnetism. In the unit on Advanced Mechanics students develop an understanding that all forms of complex motion can be understood by analysing the forces acting on a system, including the energy transformations taking place within and around the system. By applying new mathematical techniques, students model and predict the motion of objects within systems. Electromagnetism takes a closer look at the similarities and differences in the interactions of single charges in electric and magnetic fields providing students with a conceptual foundation for this module. Phenomena studied include the force produced on a current-carrying wire in a magnetic field, the force between current-carrying wires, Faraday's Law of Electromagnetic Induction, the principles of transformers and the workings of motors and generators can all be understood as instances of forces acting on moving charged particles in magnetic fields. The position in course is based on performance in all HSC assessment tasks completed to date.

Course Outcomes and Student Achievement

Selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media.	High
Analyses and evaluates primary and secondary data and information.	High
Solves scientific problems using primary and secondary data, critical thinking skills and scientific processes.	Sound
Communicates scientific understanding using suitable language and terminology for a specific audience or purpose.	Sound

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Position in Course 6/21

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is a polite and pleasant student who works collaboratively and is always positive in his interactions with others. He demonstrates a high level of understanding of key concepts when undertaking the analysis of data gathered from practical investigations. Ethan's result for the assessment task on the Electromagnetism module demonstrated a good understanding of the concepts related to his model.

Areas for Improvement

Ethan is encouraged to gather and process information from all course materials to enhance his knowledge of Physics, this in turn will allow him to improve the quality of his answers. When working through the content, he should complete regular summaries and then answer related questions. This will allow him to seek assistance with difficult concepts. In order to make the connection and link the key ideas that are being tested, it is important that he practises past examination questions and submits them for feedback.

Student: Ethan REDMAN

Teacher: Mr Mark Harrington (12IPT01)

Information Processes and Technology

Course Outline

This semester, students have focused on the development of Information Systems in a range of contexts and the impact these have on society. Information Systems and Databases focused on computer systems whose purpose is to provide information to users and the use of databases as a means of gaining access to information. Project Management has looked at the tools necessary to plan, design and implement a purposeful information system. Communications Systems investigated computer systems that allow the exchange of data and information electronically. The position in course is based on performance in all HSC assessment tasks completed to date.

Course Outcomes and Student Achievement

Applies and explains an understanding of the nature and function of information technologies to a specific practical situation.	High
Analyses and describes a system in terms of the information processes involved.	Extensive
Evaluates and discusses the effect of information systems on the individual, society and the environment.	High
Explains and justifies the way in which information systems relate to information processes in a specific context.	Extensive
Assesses the ethical implications of selecting and using specific resources and tools, and recommends and justifies the choices.	High

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Position in Course 1/6

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan has a natural flair for the type of systems-thinking required in IPT and demonstrates this in class discussions and written tasks. He looks to deepen his understanding of content by questioning and challenging ideas. Ethan has strong information technology skills and uses these effectively to solve problems. He confidently relates current social and ethical issues in the analysis of information systems.

Areas for Improvement

Ethan needs to develop his analysis of questions to ensure he addresses questions fully in written responses. He also needs to use terminology more appropriately and purposefully in both verbal and written expression.

Student: Ethan REDMAN

Teacher: Mr Owen Nelson (12MU201)

Music 2

Course Outline

This semester, the topic of study has been Music of the Last Twenty Five Years, covering a variety of genres and styles from Australian and overseas composers. Practical work has focused on the preparation and presentation of individual performance items in readiness for the HSC practical examinations. The compulsory composition component has been covered in class through individual work on the submitted composition and portfolio. The position in course is based on performance in all HSC assessment tasks completed to date.

Course Outcomes and Student Achievement

Performs repertoire that reflects the mandatory and additional topics and addresses the stylistic and technical demands of the music as a soloist and as a member of an ensemble.	Extensive
Understands the capabilities of performing media, incorporates technologies into compositions and performances as appropriate to the contexts studied.	Extensive
Demonstrates an understanding of musical concepts by interpreting, notating, analysing, discussing, composing and evaluating combinations of musical symbols.	Extensive
Composes works focusing on a range of concepts, for familiar and unfamiliar sound sources, solo, small and large ensembles, or using a variety of musical structures.	Extensive
Analyses, discusses, evaluates and clearly articulates compositional processes with stylistic, historical, cultural, social and musical considerations.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Position in Course 2/4

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan has continued to work at a high level in all areas of the course this semester demonstrating a coherent approach to the preparation of assessment tasks. In his creative work, he has shown the ability to creatively manipulate original material using compositional devices that will enable him to develop his ideas with a high level of musicianship. He has demonstrated a strong understanding of musical concepts in musicology activities and has constructively applied his skills in analytical tasks.

Areas for Improvement

For his elective, Ethan must now consolidate his ideas and work efficiently to complete set tasks in order to have the time to review his work before the final submission is due next term. His practical skills are solid but could improve with further attention to nuance and phrasing within the style.

Student: Ethan REDMAN

Teacher: Mr Owen Nelson (12MU302)

Music Extension

Course Outline

Students in this course have been following an individual program of study that reflects their choice of specialisation. In Performance, the focus is on the preparation and presentation of the performance program and associated background material. In Composition and Musicology, the focus is on the preparation and submission of either two extended compositions or an essay. Assessment tasks are determined through a process of negotiation with each student and performance opportunities have been provided at the Music Cafe in Term 1. The position in course is based on performance in all HSC assessment tasks completed to date.

Course Outcomes and Student Achievement

Composes with highly developed technical skill and stylistic refinement demonstrating the emergence of a personal style.	Extensive
Leads critical evaluation and discussion sessions on all aspects of his/her own compositions and the compositions of others.	Extensive
Articulates sophisticated arguments supported by musical evidence and demonstrates independence of thought with regard to compositional processes, techniques and devices used, showing the emergence of a personal style.	Extensive
Demonstrates a sophisticated understanding of the concepts of music and their relationship to each other with reference to works composed.	Extensive
Presents, discusses and evaluates the problem-solving process with regard to composition and the realisation of the composition.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Position in Course 1/4

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is developing his compositional and interpretive skills in ways that demonstrate musical sophistication and sensitivity, showing an increasing understanding of style within the areas in which he has chosen to compose. His composition skills demonstrate musical sophistication and sensitivity through an astute approach to the stylistic demands of the style.

Areas for Improvement

Ethan could extend the range of listening experiences related to his submitted works to gain further insight into the interpretive approach required for success with his chosen styles. He must carefully plan the completion of his submitted compositions over the coming months in order to help him to reach his goals.

Academic Report - Semester Two 2019 Year Twelve

From the Principal and Head of Senior School

The Higher School Certificate course can be an intense period of time, both academically and personally for our students, particularly as students approach the end of their schooling at Hills Grammar.

Students are faced with a series of demanding assessment tasks, culminating in the Trial HSC examinations. Some students submit major works in Visual Arts, Design & Technology, History Extension and English Extension 2. Others complete performance examinations in Music and Drama or speaking examinations in Languages.

At the same time, Year 12 participate in farewell ceremonies and rituals at school, marking this important stage in their lives in a fitting way. These events are an indication of the affection we feel for them, and of our appreciation for the contribution which they have all made, in many different ways, to the life of the School.

All of Year 12 should now draw upon all their resources and their energy for the Higher School Certificate examinations commencing on Thursday 17 October 2019.

We urge all our students to work diligently and calmly in the remaining weeks leading up to the final examinations, and wish them every success. However, 'success' means far more than examination marks, and our hope for our graduates is that they will move forward with confidence, and that they will be happy, responsible members of the wider community who pursue areas of passion, interest and talent.

We wish the Class of 2019 all the very best for the pathways they will now travel.

Michael Smith
Principal

David Cook
Head of Senior School

Reporting Student Achievement in Year Twelve

The School provides parents and caregivers with ongoing information and guidance on each student's growth in scholarship, personal development and citizenship. Such information is shared in several ways.

Information Evenings

Parents and students are invited to attend a function where senior teachers explain specific issues and plans.

Parent, Student and Teacher Interviews

Academic interviews provide an opportunity for parents to discuss their child's achievement and application with each of his/her teachers.

Parent, Student and Mentor meetings

An opportunity for students and parents to meet with the Mentor and set goals for the year ahead.

Academic Reports

Every semester a formal written report is provided to parents summarising a student's achievement and application in each subject.

How to Read this Academic Report

The Academic Report presents a detailed analysis of a student's achievement and application for each course they are enrolled in. The information provided will normally include:

- levels of achievement for course outcomes
- an Examination Mark and the Examination Median (if applicable) and Position in Course
- an indicator of overall effort
- teacher's comment, including areas for improvement.

Student Course Outcomes

At Hills Grammar we report information on student progress in terms of student course outcomes. A student outcome, plainly speaking, is something that the student knows, understands or can do. Our teachers, like all educators in NSW, design their educational programs in line with outcomes specified and mandated by the NESA syllabus documents. Assessment tasks and examinations test specific outcomes. It makes sense, then, to report on the level of achievement the students have attained against these outcomes. The following descriptors are to be used when interpreting a student's achievement of Course Outcomes:

Extensive:	Students have achieved the outcome at an extensive level for the stage. They demonstrate breadth and depth in their knowledge and understanding of the outcome and have a very high level of proficiency in the processes and skills for the stage.
High:	Students have achieved the outcome at a thorough level for the stage. They consistently demonstrate a high level of knowledge and understanding of the outcome and proficiency in the processes and skills for the stage.
Sound:	Students have achieved the outcome at a sound level for the stage. They demonstrate sound knowledge and understanding of the outcome and proficiency in the processes and skills for the stage.
Developing:	Students have achieved the outcome at a basic level for the stage. They demonstrate a developing level of knowledge and understanding of the outcome and some proficiency in the processes and skills for the stage.
Elementary:	Students at this level are working at an elementary level with the outcome for the stage. They demonstrate an elementary level of knowledge and understanding of the outcome and a very limited proficiency in the processes and skills for the stage. They may need guidance and teacher support in order to demonstrate achievement of the outcomes and to increase consistency of performance.

Teacher Analysis

Contemporary education and the School's Learner Model places emphasis on assessment *for* learning. Positive education approaches have also been influential in the organisation of this section into two areas of commentary: current strengths and areas for improvement. Students and their parents are encouraged to seek further feedback as required right up to the HSC examinations themselves.

Ethan REDMAN

Mentor Comment

Ethan is a thoughtful, considerate and exemplary member of our Academic Mentor group. He willingly assists other students with problems pertaining to Mathematics and Physics and remains focused in the allocated time. Ethan's contribution to events such as the Conversation & Canapes New Parent Dinner, as well as his participation in various Music programs in the School, ensures a lasting impression for his peers and the School as a whole. Ethan embodies the School Values of Respect and Integrity, qualities that will keep him in good stead as he pursues post-school options. I wish Ethan every success in his future endeavours.

Student: Ethan REDMAN

Teacher: Ms Justine Zarebski (12ENA01)

English Advanced

Course Outline

This semester students completed Module B, a critical study of the poetry of TS Eliot, focusing on developing a personal response to the text. They have also studied Module C, 'The Craft of Writing' through a close examination of Gwen Harwood's 'Father & Child' and Nam Le's 'Love and Honour and Pride and Pity and Compassion and Sacrifice'. Revision of the Common Module and Module A has also been part of the semester's work. Examination marks have been mapped to reflect the NESA performance bands. The position in course is based on all assessment tasks completed in the HSC course and is the final course ranking.

Course Outcomes and Student Achievement

Strategically adapts and applies knowledge, skills and understanding of language concepts and literary devices in new and different contexts.	Extensive
Evaluates the diverse ways texts can represent personal and public worlds and recognises how they are valued.	Extensive
Explains and evaluates nuanced cultural assumptions and values in texts and their effects on meaning.	Extensive
Reflects on, evaluates and monitors own learning and refines individual and collaborative processes as an independent learner.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark 83/100 Examination Median 75/100 Position in Course 9/53

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is a dedicated student who has an expansive knowledge of the course content. His essays effectively develop sophisticated explanations for complex ideas in response to essay questions, demonstrating genuine insight. Ethan has a perceptive understanding of how human experiences are represented and a strong ability to articulate his ideas in response to an unseen question.

Areas for Improvement

Ethan needs to practise writing longer and more comprehensive essays under timed conditions in order to obtain better results in the HSC examination. Ethan needs to analyse the literary techniques employed in texts and their effects more comprehensively, particularly how they contribute to the reader's understanding of the human experience. He needs to make the writing and submission of practice essays a regular part of his study routine from now until the HSC examination.

Student: Ethan REDMAN

Teacher: Mrs Amelita Willson (12M2302)

Mathematics 2 Unit

Course Outline

Students have covered the following areas of study: Algebra, Differentiation, Integration, Exponential and Logarithmic Functions, Trigonometric Functions and Applications of Calculus to the Physical World, including Exponential Growth and Decay, Sequences and Series, Probability, Locus and the Parabola and all topics in the Preliminary course. Course revision together with a review of examination technique has been undertaken throughout this period. Examination marks have been mapped to reflect the NESA performance bands. The position in course is based on all assessment tasks completed in the HSC course and is the final course ranking.

Course Outcomes and Student Achievement

Manipulates algebraic expression involving logarithmic and exponential functions.	Extensive
Applies appropriate techniques from the study of calculus, geometry, probability, trigonometry and series to solve problems.	Extensive
Uses the derivative to determine features of the graph of a function.	Extensive
Uses techniques of Integration to calculate areas and volumes.	Extensive
Expresses practical problems in mathematical terms based on simple given models.	Extensive
Performs routine arithmetic and algebraic manipulation involving surds, simple rational expressions and trigonometric identities.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark 89/100 Examination Median 78/100 Position in Course 5/39

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan shows a keen and interested approach to his work and has made pleasing progress this semester. His consistent hard-work has been reflected in his results; and he is to be congratulated on his strong results in the Trial HSC examination. He has successfully demonstrated his understanding of mathematical techniques by applying them over a range of mathematical problems. Ethan has also mastered the techniques to solve problems relating to exponential functions from different modelling contexts and the interpretation of initial value, rate of growth or decay, half-life values in these contexts.

Areas for Improvement

Ethan needs to practise answering more complex Geometry questions to prepare for the HSC examination. He is also advised to focus on developing his checking techniques which will assist him in avoiding careless errors.

Student: Ethan REDMAN

Teacher: Mrs Amelita Willson (12M302)

Mathematics Extension 1

Course Outline

Students have completed the following areas of study: Velocity and Acceleration as functions of Displacement, Simple Harmonic Motion, Projectile Motion, The Binomial Theorem, Theory of Polynomials, Integration by Substitution, Approximation Methods in Solving Equations, Modified Growth and Decay, and Trigonometry and all of the Preliminary course. Course revision together with a review of examination technique has been undertaken throughout this period. Examination marks have been mapped to reflect the NESA performance bands. The position in course is based on all assessment tasks completed in the HSC course and is the final course ranking.

Course Outcomes and Student Achievement

Uses inductive reasoning in the construction of proofs.	Extensive
Applies the chain rule to problems including those involving velocity and acceleration as functions of displacement and uses a variety of strategies to investigate mathematical models of situations involving projectiles and Simple Harmonic Motion.	Developing
Solves problems based on Preliminary Course material and Parametrics.	Sound
Applies the techniques of Calculus to Trigonometric Functions, and performs arithmetic and algebraic manipulations involving Trigonometric Ratios.	Sound
Applies the rules of Differentiation and Integration, and extends these to problems involving applications of Calculus.	Sound

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark 75/100 Examination Median 70/100 Position in Course 11/29

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan demonstrates a combination of intellectual curiosity and conscientious work ethic in this course. He exhibits focus and attention to the work by asking searching questions to clarify his understanding. Ethan sets an example of excellence in behaviour and co-operation. He is always willing to help his peers and participates constructively in discussions.

Areas for Improvement

For the remaining time, prior to the HSC examination, Ethan must devote significant time on completing practice papers under examination conditions, as part of a strategy to deepen his knowledge of this course. This will also strengthen his ability to analyse problems and quickly choose the appropriate techniques for solving problems. Ethan needs to continue to develop his ability to use the Binomial Theorem to identify terms and prove identities. Further practice of examination style questions in this topic will help improve his confidence.

Student: Ethan REDMAN

Teacher: Mrs Aarthi Govender (12PH01)

Physics

Course Outline

This semester students studied two modules. In Module 7 'The Nature of Light', they explored the evidence supporting the theories and models developed in mechanics, electricity, magnetism and the nature of matter, including those of Newton and Maxwell. They then studied the development of Quantum Theory and the Theory of Relativity. In Module 8 'From the Universe to Atom', students studied the state of the universe and the experimental discoveries that revolutionised the understanding of the nature of matter and the impact that technology has had and will have in the future. In studying this module, students can appreciate that the fundamental particle model is forever being updated and that our knowledge remains incomplete. Examination marks have been mapped to reflect the NESA performance bands. The position in course is based on all assessment tasks completed in the HSC course and is the final course ranking.

Course Outcomes and Student Achievement

Selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media.	High
Solves scientific problems using primary and secondary data, critical thinking skills and scientific processes.	Sound
Applies relevant formulae in Physics to carry out HSC style questions on all modules studied.	Extensive
Recalls relevant knowledge, ideas and procedures in Physics in all modules studied.	Extensive
Applies relevant knowledge, ideas and procedures in Physics in all modules studied.	Sound

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark 82/100 Examination Median 69/100 Position in Course 4/21

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan is a polite and friendly student who works hard to try and understand the complex theoretical concepts in the Physics course. He has put in a greater effort during the latter part of this semester to gain an improved understanding of key ideas being studied. He demonstrated a good grasp of concepts related to the From the Universe to Atom module in the Trial HSC examination. His research task on Light and Special Relativity clearly demonstrated his acute interest and understanding of the topic.

Areas for Improvement

I would encourage Ethan to work through his summary notes and ensure that he has a thorough understanding of all key concepts so that he is able to clearly identify them in his extended response questions. I would also recommend that he ensures that his study notes are aligned to the syllabus in a concise way; this will assist him in improving the quality of his answers and achieving those higher bands. I encourage Ethan to continue to practise past examination papers in the lead up to the HSC examination and pay closer attention to the structure of his answers.

It has been a pleasure to teach Ethan and I wish him all the best for the future.

Student: Ethan REDMAN

Teacher: Mr Mark Harrington (12IPT01)

Information Processes and Technology

Course Outline

Students have now completed studies of Systems Development, Information Systems and Databases, Communications Systems, Transaction Processing Systems and Multimedia. Underlying these units of work has been the study of issues relating to the impact of information technology on society. A major project requiring the development of a multimedia system has been completed as well as a case study of an information system for managing transactions in a commercial environment. Examination marks have been mapped to reflect the NESA performance bands. The position in course is based on all assessment tasks completed in the HSC course and is the final course ranking.

Course Outcomes and Student Achievement

Applies and explains an understanding of the nature and function of information technologies to a specific practical situation.	Extensive
Analyses and describes a system in terms of the information processes involved.	High
Evaluates and discusses the effect of information systems on the individual, society and the environment.	High
Justifies the selection and use of appropriate resources and tools to effectively develop and manage projects.	Extensive
Explains and justifies the way in which information systems relate to information processes in a specific context.	High
Assesses the ethical implications of selecting and using specific resources and tools, and recommends and justifies the choices.	High

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark 85/100 Examination Median 79/100 Position in Course 1/6

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan has an exceptional ability to process information and link concepts. He asks probing questions to clarify ideas and deepen his understanding of course concepts. Ethan has independently developed skills in a range of tools to develop his voice recognition system. He readily analyses systems and is able to confidently identify key components.

Areas for Improvement

Ethan needs to ensure he analyses questions carefully to ensure he is addressing the question directly in his response. When appropriate, he needs to link his responses to the scenario in examination questions.

It has been a pleasure to see the development Ethan has made in his use and application of technology. Well done, Ethan.

Student: Ethan REDMAN

Teacher: Mr Owen Nelson (12MU201)

Music 2

Course Outline

This semester the topic of study has been Music of the Last Twenty-Five Years, covering a variety of genres and styles from Australian and overseas composers. Practical work has focused on the preparation and presentation of individual performance items in readiness for the HSC practical examinations. The compulsory composition component has been covered in class through individual work on the submitted composition and portfolio. Examination marks have been mapped to reflect the NESA performance bands. The position in course is based on performance in all assessment tasks completed in the HSC course and is the final course ranking.

Course Outcomes and Student Achievement

Performs repertoire that reflects the mandatory and additional topics and addresses the stylistic and technical demands of the music as a soloist and as a member of an ensemble.	Extensive
Composes works focusing on a range of concepts, for familiar and unfamiliar sound sources, solo, small and large ensembles, or using a variety of musical structures.	Extensive
Analyses, discusses, evaluates and clearly articulates compositional processes with stylistic, historical, cultural, social and musical considerations.	Extensive
Critically evaluates and discusses in detail the concepts of music in works representative of the mandatory and additional topics.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark 90/100 Examination Median 85/100 Position in Course 2/4

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Areas of Strength

Ethan has continued to demonstrate an outstanding level of personal commitment in all areas of the course this year. In his creative work, he has taken the guidance offered constructively and has actively sought assistance and inspiration from a variety of sources. He has shown an ability to work independently and I encourage him to continue revising his prepared listening and concepts of music over the coming weeks.

Areas for Improvement

As the HSC written examination approaches, Ethan should carefully revise set works so that he is able to recall musical information quickly and coherently. He enjoys the challenge of demonstrating his knowledge of chosen repertoire which should provide the motivation necessary to continue preparing for the final music examination.

Student: Ethan REDMAN

Teacher: Mr Owen Nelson (12MU301)

Music Extension

Course Outline

Students have been following an individual program of study that reflects their elective choices. In the Performance strand, the focus is on the preparation and presentation of the program and associated background material on the chosen pieces. In the Composition strand, the focus is on the preparation and presentation of two contrasting original compositions and association portfolios. Examination marks have been mapped to reflect the NESA performance bands. The position in course is based on all assessment tasks completed in the HSC course and is the final course ranking.

Course Outcomes and Student Achievement

Composes with highly developed technical skill and stylistic refinement demonstrating the emergence of a personal style.	Extensive
Leads critical evaluation and discussion sessions on all aspects of his/her own compositions and the compositions of others.	Extensive
Articulates sophisticated arguments supported by musical evidence and demonstrates independence of thought with regard to compositional processes, techniques and devices used, showing the emergence of a personal style.	Extensive
Demonstrates a sophisticated understanding of the concepts of music and their relationship to each other with reference to works composed.	Extensive

Possible levels of achievement: Extensive, High, Sound, Developing, Elementary

Examination Mark 47/50 Examination Median 44/50 Position in Course 2/4

Effort

Excellent	Good	Satisfactory	Needs Improvement
-----------	------	--------------	-------------------

Teacher Analysis

Extension Composition

Ethan is developing his technical and interpretive skills in ways that demonstrate musical sophistication and sensitivity, given the demands of the chosen style and devices used. His composition work is highly encouraging, showing a nuanced approach to the stylistic demands of the music, with a personally expressive creative outcome.

I have thoroughly enjoyed having Ethan as a student in my class and I wish him all the best with his future endeavours.

Co-curricular Record 2019

The Co-curricular program at Hills Grammar is an integral part of the whole school curriculum. There are wonderful opportunities for students to develop their skills and interests across a broad range of activities including Sport, Creative and Spoken Arts, Music, Leadership and Outdoor Education. These activities take place before school, during lunch and after school with further weekend commitments in some areas. In addition, every Thursday the Co-curricular Connect period enables students to participate in their mandatory Co-curricular activity.

Aims of the program are:

- to foster and develop student leadership
- to encourage and develop co-operation, responsibility and 'team' work
- to develop a sense of belonging and school spirit
- to foster good rapport between staff, students and parents
- to inspire students to strive for excellence in all areas of endeavour
- to provide opportunities for parents, ex-parents and ex-students to contribute to the School
- to establish links with the wider community and develop relationships with various groups
- to provide opportunities for students to achieve success in a diverse mix of interests

Conversation & Canapes New Parent Dinner Student Helper

Description

Hills Grammar's Leadership Program training involves students participating in leadership development sessions, camps or days as organised by the school or offered outside of the school.

Outcomes

- Improve and develop leadership skills and knowledge.
- Improve awareness of leadership programs in the School.
- Encourage students to become involved in leadership through elected positions or volunteer programs.

Hills Grammar Open Day Student Helper

Description

Hills Grammar's Leadership Program training involves students participating in leadership development sessions, camps or days as organised by the school or offered outside of the school.

Outcomes

- Improve and develop leadership skills and knowledge.
- Improve awareness of leadership programs in the School.
- Encourage students to become involved in leadership through elected positions or volunteer programs.

Orchestra

Description

This ensemble is for experienced musicians that demonstrate a high level of commitment and musicianship. The Orchestra performs primarily at the Music Showcase and Annual Presentation of Awards. Musicians in this ensemble are involved in other musical activities throughout the year.

Outcomes

- Demonstrates high level instrumental/vocal ensemble skills.
- Demonstrates high level instrumental/vocal performance skills in the chosen instrument/voice.
- Demonstrates self and group discipline showing empathy and respect for fellow musicians and teachers.
- Responsible use of Music department resources.

Stage Band

Description

The Stage Band is an auditioned group of musicians who perform challenging repertoire in a range of jazz styles. Performers in the Stage Band are committed members of numerous music ensembles, and feature prominently in public events at school and in the wider community. Opportunities for improvisation and solo work are well catered for in this ensemble. Rehearsals are held weekly, although the band may require extra rehearsal commitment prior to their gigs.

Outcomes

- Demonstrates high level instrumental/vocal ensemble skills.
- Demonstrates high level instrumental/vocal performance skills in the chosen instrument/voice.
- Demonstrates self and group discipline showing empathy and respect for fellow musicians and teachers.
- Responsible use of Music department resources.

Year 12 Co-curricular Program

Description

The Year 12 Co-curricular Program aims at providing balance in their school program. The Academic Program should be the priority in Year 12. Research tells us however, that by engaging in physical activity, students will be contributing to their academic outcomes. Physical Activity will reduce stress levels, improve sleep, increase energy levels and contribute to their overall wellbeing.

Outcomes

- Participate in a supportive environment encouraging participation through the development of skills and good sporting behaviour.
- Promote enjoyable experiences for all players encouraging lifelong participation in sport generally.
- Participants improve their fitness levels and engage in physical activity to assist in a balanced lifestyle.
