EDUCATION

Loreto Kirribilli

February 2014 - 2019

I am currently in Year 12 at Loreto Kirribilli.

St Mary's Primary School, North Sydney

January 2007 - December 2013

Year 6 - School Vice-Captain

EXPERIENCE

Babysitting

May 2015 - PRESENT

- I have been babysitting for over 4 years.
- I have completed over 100 hours of babysitting.

Childcare

June/July School Holidays 2016 and September/October School Holidays 2016

- Voluntary assistance at Ridge Street Kid's Club, a primary school children's holiday program, located in North Sydney
- Completed over 20 hours of voluntary work.

Community Service

February 2017 – December 2017

- Community service and volunteer work at Pathways Nursing Home, Northbridge for two hours a week from 2017-2018.
- I have completed 30 hours of community service.

Cana Farm Retreat

June 2017 – July 2017

- Community service and volunteer work at Cana Farm, which works to rehabilitate those who have been in prison or have a mental illness and integrate them into society.
- This involved planting and picking vegetables
- I have completed 20 hours of volunteer work here.

Coaching

March 2018 – September 2019

- Coaching a junior hockey team for two consecutive years, running drills and teaching skills.
- I have completed 50 hours of coaching.

Duke of Edinburgh

February 2017 – Present

- Bronze and Silver Duke of Edinburgh completed.
- Currently completing the Gold level.
- Completed over 90 hours of Physical activity, Skills and Service.

Smith Family Student2student reading program

February 2018 – September 2018

- Reading with disadvantaged children over the phone to improve their literacy skills.
- Three times a week for 30 minutes over 6 months.
- I have completed 25 hours of volunteer reading.

ACHIEVEMENTS

- Award for Academic Excellence for six consecutive years
- Duke of Edinburgh Bronze and Silver Award
- Currently completing Gold Duke of Edinburgh Award
- Honour Pocket for Academic Excellence and Service

LEADERSHIP

Primary School Vice-Captain

January 2013 – December 2013

Hockey Captain

January 2018 – December 2018

JPIC Council member

January 2015 – December 2015, January 2018 – December 2019

Benenson Society

January 2017 – PRESENT

SKILLS

I have strong communication skills developed over many years of school debating and community service work. I also have excellent time management skills, balancing my school commitments with a number of extra-curricular activities including dancing, outdoor and indoor hockey, touch football and cross country.

I am mature and have a strong sense of responsibility, having been babysitting for a number of local families for over two years and also caring for my three younger siblings.

I have successfully completed the Bronze level and Silver level Duke of Edinburgh program and am currently undertaking the Gold level. This program requires strong team collaboration, the ability to think independently and strong time management skills. My participation in group dance and many team sports, my role as hockey captain, participation in the JPIC committee and membership in the Benenson society has also helped me to develop strong leadership and organisational skills and to be a supportive and dedicated member of a team.

Available on request.

Confidential Testimonial

Grace Alexandra Smith

This reference is to support Loreto Kirribilli student Grace Alexandra Smith in her application to James Cook University.

Grace has been an outstanding student who has excelled academically throughout her years at Loreto Kirribilli. Most recently Grace has been recognised with the prestigious 2019 Honour Pocket for Academic Excellence, Leadership and School Spirit. The 2019 President's Medallion for Outstanding Contribution and Spirit was also bestowed on Grace, an Award that acknowledges Grace's exceptional attributes beyond her academic achievements. Grace earned the 2019 Prize for Excellence, placing first in two subjects, Physics and Chemistry, in a competitive cohort. She also secured four Awards for Achievements for English Advanced, Mathematics Extension 1, Mathematics Extension 2 and Studies of Religion 1 unit.

In 2018 Grace earned the Award for Academic Excellence and subject Prizes for Excellence in Mathematics Extension 1 and Physics. She also received the Award for Achievement in Chemistry, the Mathematics Higher School Certificate Accelerated Course and Studies of Religion 1 unit.

A committed student, Grace's academic record has included the singular 2017, 2016, 2015 and 2014 Award for Academic Excellence. Her comprehensive record of achievement includes the Prize for Excellence Italian in 2016 and 2017 and the 2016 Prize for Excellence the Mathematics Accelerated Course. In 2017 she received both the Prize for Excellence in Science and the Science Fair Award. The breadth of Grace's achievements is evident as, between 2014 and 2017, Grace secured Awards for Achievement fourteen times; three times in Mathematics, Religious Education and Geography, twice in Italian and in History, Science and Commerce.

A self-motivated learner Grace enjoys being challenged academically, particularly in teams addressing creative problem solving exercises. She has a long record of engaging in academic extension activities including participating in the 2018 NSW Parliament House Constitutional Convention, the 2017 interschool Da Vinci Decathlon where teams of students compete to solve real world problems, and in 2014 she contributed to the Loreto Vision project.

Serving in the important leadership role of Justice Peace and Integrity of Creation Student Representative in two years, 2018 and 2015, Grace raised funds for charities and developed social justice initiatives in the school. Taking her responsibilities seriously, Grace is to be commended for developing leadership skills through the Duke of Edinburgh's International scheme, earning her Bronze Award in 2017, her Silver Award in 2018 and in 2019 her Gold Award. Grace has honed her skills in rhetoric and developed confidence in communication through participation in the successful Loreto Kirribilli Mock Trial team and the 2019 Ignatian Interschool Student Forum. Grace reports that these experiences taught her to value everyone's opinions and contributions in effective decision making. Humble but confident, Grace mixes easily with staff and parents as demonstrated when she assisted at the 2019 Parents and Friends Function volunteer. Grace has been a worthy role model to younger students, a task she formalized through the Big Sister Little Sister program at school.

As the recipient of the 2019 Honour Pocket for Academic Excellence, Leadership and School Spirit and the President's Medallion for Outstanding Contribution and Spirit Grace's leadership has focused on social justice

causes. She has expressed the profound impact her experiences with disadvantaged members of the community has had on her and her strong desire to work in health in rural and regional communities. In 2018 Grace spent ten days with an Indigenous community in Arnhem Land and noted how the community's wellbeing was impacted by a lack of medical care. A talented student of languages Grace has expressed her interest in learning about their culture and language and her curiosity about how to contribute to greater reconciliation and support of their environmental initiatives.

Grace has an extensive record of engaging with disadvantage and diversity. In 2017 she worked in a retirement home over a 30-week period where she talked with and read with the elderly and accompanied them on day trips around Sydney. The next year Grace volunteered at Cana Farm in Kingswood, working with rehabilitated offenders to help plant and harvest vegetables and pack hampers for sale at local markets. Commencing in 2018 Grace gave her time to the Smith Family Student2Student Reading program for a number of years, which involves reading with disadvantaged school children to help them develop stronger literacy skills. Grace has been a member of the Benenson Society through 2018 and 2019, advocating on social justice issues to promote positive change in society. In 2018 Grace was a most worthy recipient of the Loreto Award given to the student who embodies the values of our Loreto founder, Mary Ward.

Grace has attracted leadership opportunities and accolades in sport. She served as Hockey Captain in 2018 following on from playing hockey over six years from 2014 through to 2019. For three of these years, 2016 through to 2018, she represented the school in the NSW Combined Catholic Colleges Hockey competition. In 2018 Grace was also the coach for a Year 8 team and assisted in skills development training for several teams. Her efforts earned her the 2018 Outstanding Contribution and Involvement in Sport Award.

The 2017 Touch Football Most Improved Award and the 2017 Touch Football Eastern Suburbs Most Improved Award were presented to Grace marking her progress in Touch Football, a sport she played over six seasons at Loreto Kirribilli, most recently in 2019. During her years at the school Grace has taken part in Snowsports and Tennis. Each year she has competed in the Swimming Carnival and joined in the Loreto Kirribilli tradition of Water Ballet. In her middle school years Grace competed in Cross Country.

Grace has consistently contributed to the cultural life of the school through her involvement in House Dance, and Music Festival House Choir over the years, including in her final Year 12.

Punctual, energetic and committed, Grace is to be commended on her excellent achievements and outstanding contributions to the school. She is respectful, reliable, dependable and sensitive to the needs of others. Grace works to build a positive environment for all and is open and willing to listen. Consequently she has built supportive peer relationships and served as a role model to younger students.

Grace has my highest recommendation.

Mrs Anna Dickinson

Principal

September 2019

Honour Pocket 2019

Grace Smith, Year 12 Academic Excellence and Service

Grace is a humble, unassuming young woman who rarely draws attention to herself. There is an understated grace about her approach to the world. She appreciates the importance of sharing her giftedness and does so subtly and gently. As a learner, Grace is inquisitive, thorough and constantly seeks to improve. Such qualities have seen her flourish academically over the years, saving the best for her senior school career.

Grace has always put her academic progress first and thoroughly enjoys the intellectual rigour demanded of her. Over the years, Grace has received the Prize for Excellence for Italian, Mathematics, Science, Physics, Mathematics Extension 1 and Mathematics HSC Accelerated Course. In addition, she has been the recipient of Academic Awards for History, Religious Education, Geography, Commerce and Chemistry. Since Year 7 Grace has received the Academic Award for Excellence. She has demonstrated this giftedness by her participation in the Da Vinci Decathlon as well as being the recipient of the Science Fair Award.

It is much more than this academic component to school life that nourishes Grace, she has also contributed to the cultural and sporting life of the school through her involvement in House Dance, Music Festival House Choir, Cross Country, Hockey, Touch football and Snow sports. She has also represented the school in a number of sporting activities and was Hockey Captain in 2018.

A young woman of service, Grace has an innate understanding that people require help. She has role modelled quality relationships to her peers and younger students alike. Furthermore, Grace volunteered her time to reading to disadvantaged children by participating in The Smith Family Student2Student Reading program, she has also been involved with the Benenson Society and was part of the Verity Immersion to East Arnhem Land. Grace has served humbly on the Justice, Peace and Integrity of Creation Council in Year 8 and Year 11.

Grace was the recipient of the Loreto Award in 2018 for demonstrating the school values and is to be commended for the continued focus she has demonstrated in approaching her studies. A diligent and determined student we are proud to present Grace with an Honour pocket for Academic Excellence and Service.

CIRCLE CLASS COMMENT Grace is to be commended for the continued focus she has demonstrated in approaching her studies this semester, and for the supportive peer relationships developed within Barry 7 Circle Class. She has been a role model during class reflections and prayer to all students in Circle Class. Academically, Grace should be congratulated for the outstanding results obtained in her Trial HSC Examination. Her teachers have all noted Grace's outstanding commitment to each subject. Grace is encouraged to further her depth of knowledge and critical thinking skills, and to practise examination style questions.

Year 12

Studies of Religion

In Religious Education we seek to know, live and celebrate the Christian message, to stimulate an awareness of other religious traditions and to enthuse our students to both contribute to and challenge the society in which they live.

COURSE OUTLINE

The Religious Tradition Depth Study of Islam focused on the contribution of significant people, ideas, practices and ethical teachings to the understanding of Islam as a living religious tradition. All course material was represented in the HSC Trial Examination.

ACHIEVEMENT OF OUTCOMES

Describes and analyses the influence of religion and belief systems on individuals and society	- OUTSTANDING
Examines the influence and expression of religion and belief systems in Australia	- OUTSTANDING
Describes and analyses how aspects of religious traditions are expressed by their adherents	- OUTSTANDING

Mark	49 out of 50	This mark is derived from the Trial HSC Examination mark.
Median	36	
Cumulative Rank	=2/83	100% of assessment completed

Comment	Grace is a mature student who has been consistently engaged with each topic. Her responses in class indicate a sophisticated understanding of the course content. Grace's performance in each section of the Trial HSC Examination demonstrated her strong ability to construct a well written response. She should be particularly proud of her excellent extended response. Grace is now encouraged to maintain her positive approach and focus on mastering all subject matter.
Teacher	Mr Morgan Dunn

Academic Report

GRACE SMITH

Year 12

English Advanced

The study of English enables students to take their place as confident, articulate communicators, critical, imaginative thinkers and active participants in society, to perceive the world from a variety of perspectives and to value the richness of diversity.

COURSE OUTLINE

Texts and Human Experiences: common module

Students deepen their understanding of how texts represent individual and collective human experiences by examining human qualities and emotions associated with, or arising from, these experiences. Students appreciate, explore, interpret, analyse and evaluate the ways language is used to shape these representations in a range of texts in a variety of forms, exploring how texts may give insight into human behaviour and motivations. They also consider the role of storytelling throughout time to express and reflect particular lives and cultures. Text: Orwell Nineteen Eight-Four.

Module A: Textual Conversations: Students explore the ways in which the comparative study of texts can reveal resonances and dissonances between and within texts, exploring common or disparate issues, values, assumptions or perspectives, and how these are depicted. Texts: Shakespeare, William, King Richard III, Pacino, Al, Looking for Richard

Module B: Critical Study of Text: Students develop detailed analytical and critical knowledge, understanding and appreciation of selected poems from Earth Hour by David Malouf. Central to this study is the close analysis of the text's construction, content and language to develop students' own rich interpretation of the text, basing their judgements on detailed evidence drawn from their research and reading.

Module C: Craft of Writing: Students strengthen and extend their knowledge, skills and confidence as writers writing for a range of authentic audiences and purposes to convey ideas with power and increasing precision. Students appreciate, examine and analyse challenging short prescribed texts as well as texts from their own wide reading, as models and stimulus for the development of their own ideas and written expression.

ACHIEVEMENT OF OUTCOMES

Responds to and evaluates complex texts for understanding interpretation and critical analysis	- OUTSTANDING
Strategically adapts and applies knowledge, skills and understanding of language concepts in new and different contexts	- OUTSTANDING
Analyses, evaluates and uses language forms, features and structures of texts	- OUTSTANDING
Independently responds to, composes and evaluates a range of complex texts for imaginative expression	- OUTSTANDING

Mark	91 out of 100	This mark is derived from the Trial HSC Examination mark.
Median	73	
Cumulative Rank	=5/86	100% of assessment completed

Comment	Grace's performance in the Trial HSC Examination was commendable, a testament to her outstanding commitment and increasing confidence. Her thoughtful approach to the study of each module has provided her with a strong foundation for developing independent, well-articulated arguments. The challenges to be confronted in the final weeks require further thinking about concepts and the construction of arguments that are sustained, tightly structured and expressed in a convincing personal voice. Further critical readings, the analysis and evaluation of a more expansive range of textual features in all modules and extensive writing are needed for the last stage of the course.

Academic Report

GRACE SMITH

Year 12

Mathematics Extension 1

The study of Mathematics aims to develop students' abilities to observe, represent and investigate patterns and relationships, communicating this knowledge in a supportive environment that encourages risk-taking and challenge.

COURSE OUTLINE

Students have studied the following HSC topics: Integration by Substitution, Trigonometric Functions, including harder trigonometric integrals, Inverse Functions and Inverse Trigonometric Functions, Further Polynomials, Applications of Calculus to the Physical World, Mathematical Induction and Binomial Theorem. They have also experienced harder problems on all areas of the Mathematics Course.

ACHIEVEMENT OF OUTCOMES

Solves problems involving harder applications of the Mathematics Course and the Preliminary Mathematics Extension 1 Course	- OUTSTANDING
Understands and uses iterative methods for numerical estimation of the roots of a polynomial; understands and uses inductive reasoning in the construction of proofs	- OUTSTANDING
Determines harder integrals, including trigonometric integrals, and by reduction to a standard form through a given substitution	- HIGH
Uses a variety of strategies, including the chain rule, to investigate mathematical models of situations involving rates of change, exponential growth and decay, displacement, velocity and acceleration, simple harmonic motion and projectile motion	- OUTSTANDING
Uses the relationship between functions and inverse functions and their derivatives	- HIGH
Uses a variety of strategies to investigate mathematical models of situations involving binomial theorem	- HIGH
Evaluates mathematical solutions to problems and communicates her solutions using appropriate notation and logical argument	- OUTSTANDING

Mark	91 out of 100	This mark is derived from the Trial HSC Examination mark.
Median	72	
Cumulative Rank	=2/37	100% of assessment completed

Comment Grace has worked with interest and enthusiasm throughout the course. She prepared very conscientiously for the Trial HSC Examination and is to be congratulated on this excellent result. Grace achieved near full marks on each question throughout her examination paper. As Grace displays an excellent grasp of the course, she is encouraged to maintain and develop this understanding by practising questions of a high level of difficulty, concentrating on accessing unusual questions successfully. She is to be commended for her efforts.

Teacher Ms Julie Walker

Academic Report

GRACE SMITH

Year 12

Mathematics Extension 2

The study of Mathematics aims to develop students' abilities to observe, represent and investigate patterns and relationships, communicating this knowledge in a supportive environment that encourages risk-taking and challenge.

COURSE OUTLINE

Students have studied the following topic areas: Complex Numbers, Polynomials, Graphs, Conics, Integration, Volumes and Mechanics. They have also experienced harder problems on all aspects of the Mathematics Extension 1 Course and extended their knowledge of Permutations, Combinations and Probability, Circle Geometry and Induction

ACHIEVEMENT OF OUTCOMES

Uses the relationship between algebraic and geometric representations of complex numbers	- OUTSTANDING
Uses efficient techniques for the algebraic manipulation required in dealing with polynomials	- OUTSTANDING
Combines the ideas of algebra and calculus to determine the important features of the graphs of a wide variety of functions	- OUTSTANDING
Uses the relationship between algebraic and geometric representations of conic sections; and uses efficient techniques for the algebraic manipulation required in conics	- OUTSTANDING
Applies further techniques of integration, including partial fractions, integration by parts and recurrence formula, to problems	- OUTSTANDING
Uses techniques of slicing and cylindrical shells to determine volumes	- OUTSTANDING
Uses ideas and techniques from calculus to solve problems in mechanics involving resolution of forces, resisted motion and circular motion	- HIGH
Solves problems involving harder applications of Mathematics Extension 1 work by choosing appropriate strategies to construct arguments and proofs in both concrete and abstract settings	- HIGH
Communicates abstract ideas and relationships using appropriate notation and logical argument	- OUTSTANDING

Mark	92 out of 100	This mark is derived from the Trial HSC Examination mark.
Median	82	
Cumulative Rank	2/5	100% of assessment completed

Comment	Grace has worked diligently throughout this course and is to be congratulated on the outstanding result she achieved in her Trial HSC Examination. In final preparation for the HSC Examination, Grace should practise as many past papers as possible turning her attention to the complex problems on the topic, Harder Extension 1. She needs to concentrate on the wording and structure of examination style questions and link parts of the question together to solve these problems successfully. Grace's strong motivation and application to all tasks have contributed to this excellent result.
---------	---

Teacher	Ms Julie Walker
---------	-----------------

Academic Report

GRACE SMITH

Year 12

Physics

The study of Science is designed to develop interest and enthusiasm for Science, as well as an appreciation of its role in one's life, society, both locally and globally. It provides an opportunity for learners to develop the skills of communication, collaboration, critical and creative thinking, so that they may find solutions to contemporary science-related problems and issues in order to make a positive contribution to society.

COURSE OUTLINE

During the course students have studied four core modules. In the Advanced Mechanics module students develop an understanding that all forms of complex motion can be understood by analysing the forces acting on a system. Electromagnetism allows the students to discover that the scientific understanding of the interactions that take place between charged particles and electric and magnetic fields have led to significant technological developments and advances in physics. The Nature of Light module explores the observations and evidence that led to the development of quantum theory and the theory of relativity and the technologies that have arisen from these discoveries. From the Universe to the Atom looks at humans' fascination with the Universe and the continual push to explore the fundamentals of Physics.

ACHIEVEMENT OF OUTCOMES

Displays understanding and appropriately applies the required skills in planning and conducting first-hand investigations, and assessing validity of conclusions from data gathered	- HIGH
Applies the required skills in gathering and addressing information from secondary sources to present and communicate Physics concepts and principles in an appropriate manner to a target audience	- OUTSTANDING
Demonstrates knowledge and understanding of the content and concepts covered in the four modules studied	- HIGH
Communicates information, displays scientific thinking and solves problems related to the concepts covered in the modules studied	- HIGH

Mark	86 out of 100	This mark is derived from the Trial HSC Examination mark.
Median	71	
Cumulative Rank	1/9	100% of assessment completed

Comment	Grace has continued to excel, achieving an outstanding result in her Physics Trial HSC Examination. She has demonstrated great depth of knowledge and continues to improve on constructing explicit response to questions. Grace should continue to complete HSC style questions under examination conditions.
Teacher	Dr Joe Liu

Academic Report

GRACE SMITH

Year 12

Chemistry

The study of Science is designed to develop interest and enthusiasm for Science, as well as an appreciation of its role in one's life, society, both locally and globally. It provides an opportunity for learners to develop the skills of communication, collaboration, critical and creative thinking, so that they may find solutions to contemporary science-related problems and issues in order to make a positive contribution to society.

COURSE OUTLINE

During the course students have studied four core modules. In Equilibrium and Acid Reactions the students study the effects of various changes on equilibrium systems and analyse the quantitative relationship between products and reactants in equilibrium reactions. Acid/Base reactions investigates the characteristics of acid and base reactions and their importance in everyday life. In Organic Chemistry, the students explore the principles and applications of chemical synthesis in the field of organic chemistry and their benefits in meeting the needs of society. The Applying Chemical Ideas module allows the student to appreciate the immense importance of identifying and analysing chemicals to use in scientific research, medicine, environmental management, quality control, mining and many other fields.

ACHIEVEMENT OF OUTCOMES

Gathers information from first hand investigations to demonstrate scientific thinking and solve problems related to the chemistry concepts covered	- HIGH
Displays understanding and appropriately applies the required skills in planning and conducting first hand investigations, and assessing validity of conclusions from data gathered	- HIGH
Demonstrates knowledge and understanding of the content and concepts covered in the four modules studied	- OUTSTANDING
Applies the required skills in gathering and addressing information from secondary sources to present and communicate key chemical concepts in an appropriate manner to a target audience	- HIGH

Mark	90 out of 100	This mark is derived from the Trial HSC Examination mark.
Median	69	
Cumulative Rank	1/17	100% of assessment completed

Comment Grace has performed outstandingly in the Chemistry Trial HSC Examination, demonstrating extensive knowledge and application of skills. The multiple choice and short answer sections did indicate a need to practise K_{eq} , K_{sp} , ICE and equilibrium calculations, while her skills and written responses were thorough. Grace is encouraged to complete as many HSC style questions as possible under examination conditions.

Teacher Dr Joe Liu

Academic Report

Guidelines for interpreting this Report

The Cumulative Rank is the rank achieved by Student in assessment task to date

The Percentage of Assessment Completed is the weighting of assessment tasks to date

The marks achieved on the report are marks in progress only and not a prediction of the student's final mark

Glossary

Outcomes

·describe what a student is expected to know, understand and be able to do as a result of learning in each course

Mark

·a number which takes into account class work, projects, assignments, assessment tasks and/or examinations

Median

·the mark scored by the student in the middle of the group

Standards for Student Achievement

Not applicable

·has not been assessed for this outcome due to a special focus on an individual program, the student's particular needs or late enrolment.

Outstanding

·demonstrates exceptional competence, high quality standards and superior skills, and a sophisticated understanding of the concepts associated with this outcome

·completes all tasks accurately and effectively

·meets this outcome with initiative, creativity and independent inquiry

High

·demonstrates thorough competence in the processes and skills, and a good understanding of the broad concepts associated with this outcome

·completes set tasks regularly and applies learned skills to new situations

·displays initiative and independent learning skills to new situations

Substantial

·understands the broad concepts and demonstrates competence in the processes and skills associated with this outcome

·completes most set tasks without assistance and generally applies learning to new situations

·displays initiative and independent learning skills in a range of activities

Satisfactory

·demonstrates an acceptable level of development in this outcome

·with some guidance, completes most set tasks, gains basic competence in processes and skills and displays some initiative

·sometimes applies learning to new situations

Elementary

·displays limited competence in the processes and skills for this outcome

·needs routine support and guidance to display achievement

·displays limited competence in the processes and skills associated with this outcome

·completes some of the set tasks

Not achieved

·is unable to meet the outcome at this stage even though appropriate opportunities for learning and assessment have been provided

·has not completed set tasks or gained relevant skills to achieve at elementary level at this stage

Year 12

English Advanced

The study of English enables students to take their place as confident, articulate communicators, critical, imaginative thinkers and active participants in society, to perceive the world from a variety of perspectives and to value the richness of diversity.

COURSE OUTLINE

Texts and Human Experiences: common module

Students deepen their understanding of how texts represent individual and collective human experiences by examining human qualities and emotions associated with, or arising from, these experiences. Students appreciate, explore, interpret, analyse and evaluate the ways language is used to shape these representations in a range of texts in a variety of forms, modes and media, exploring how texts may give insight into the anomalies, paradoxes and inconsistencies in human behaviour and motivations. They consider the role of storytelling throughout time to express and reflect particular lives and cultures. Text: Orwell Nineteen Eighty-Four

Module A: Textual Conversations

Students explore the ways in which the comparative study of texts can reveal resonances and dissonances between and within texts. They consider the ways that a reimagining or reframing of an aspect of a text might mirror, align or collide with the details of another text, also exploring common or disparate issues, values, assumptions or perspectives, and how these are depicted. Texts: Shakespeare, William, King Richard III, Pacino, Al, Looking for Richard

Module C: Craft of Writing

Students strengthen and extend their knowledge, skills and confidence as writers writing for a range of authentic audiences and purposes to convey ideas with power and increasing precision. Students appreciate, examine and analyse challenging short prescribed texts as well as texts from their own wide reading, as models and stimulus for the development of their own ideas and written expression.

ACHIEVEMENT OF OUTCOMES

Responds to and evaluates complex texts for understanding interpretation and critical analysis	- HIGH
Strategically adapts and applies knowledge, skills and understanding of language concepts in new and different contexts	- HIGH
Analyses, evaluates and uses language forms, features and structures of texts	- SUBSTANTIAL
Independently responds to, composes and evaluates a range of complex texts for imaginative expression	- HIGH

Mark	81 out of 100	This mark is derived from common assessment tasks.
Median	70	
Cumulative Rank	=7/88	45% of assessment completed

Comment	Grace's diligence in deconstructing the central texts studied, and writing responses that fulfil the expectations of a question have been consistent and evident throughout the past two terms. In her determination to prepare for her assessments, she has, perhaps, approached the questions with her own expectations of what is required rather than being ready to directly answer the given question. Grace must now work on taking risks with her thinking, seeking frequent opportunities to discuss her understanding through writing and teacher conferencing. The reading and craft of writing sections that test diversity of thinking and compositional styles pose unpredictable questions.

Academic Report

GRACE SMITH

Year 12

Mathematics Extension 1

The study of Mathematics aims to develop students' abilities to observe, represent and investigate patterns and relationships, communicating this knowledge in a supportive environment that encourages risk-taking and challenge.

COURSE OUTLINE

Students have completed the Preliminary Course and studied the following HSC topics: Integration by Substitution, Harder Integrals in Trigonometric Functions and they have commenced their study of Inverse Functions. They have experienced harder problems on all areas of the Mathematics course, but in particular on Probability and Calculus involving Logarithmic, Exponential and Trigonometric Functions.

ACHIEVEMENT OF OUTCOMES

Displays understanding of the topics studied in the Preliminary Mathematics Extension 1 Course and harder applications of all topics studied in the Mathematics Course	- OUTSTANDING
Determines harder integrals, including trigonometric integrals and by reduction to a standard form through a given substitution	- OUTSTANDING
Uses the relationship between functions and inverse functions and their derivatives	- OUTSTANDING
Evaluates mathematical solutions to problems and communicates her solutions using appropriate notation and logical argument	- OUTSTANDING

Mark	89 out of 100	This mark is derived from common assessment tasks.
Median	72	
Cumulative Rank	4/39	40% of assessment completed

Comment	Grace is hard working student who has a mature approach to her studies. She displays a high level of understanding of the course and is able to apply her knowledge to solve unfamiliar problems. Grace is commended on her efforts and advised to work through past HSC Examinations, ensuring that she can answer standard questions efficiently and accurately before engaging with the more challenging questions towards the end of the papers.
Teacher	Ms Julie Walker

Academic Report

GRACE SMITH

Year 12

Mathematics Extension 2

The study of Mathematics aims to develop students' abilities to observe, represent and investigate patterns and relationships, communicating this knowledge in a supportive environment that encourages risk-taking and challenge.

COURSE OUTLINE

Students have studied the following topic areas: Complex Numbers, Polynomials, Graphs and Conic Sections. They have also experienced harder problems on the Extension 1 Course, but particularly on Permutations and Combinations as well as on Circle Geometry.

ACHIEVEMENT OF OUTCOMES

Uses the relationship between algebraic and geometric representations of complex numbers	- HIGH
Uses efficient techniques for the algebraic manipulation required in dealing with questions involving polynomials	- HIGH
Combines the ideas of algebra and calculus to determine the important features of the graphs of a wide variety of functions	- SUBSTANTIAL
Uses the relationship between algebraic and geometric representations of conic sections; and uses efficient techniques for the algebraic manipulation required in dealing with questions involving conic sections	- HIGH
Chooses appropriate strategies to construct arguments and proofs in solving harder Extension 1 problems	- SUBSTANTIAL
Communicates abstract ideas and relationships using appropriate notation and logical argument	- HIGH

Mark	86 out of 100	This mark is derived from common assessment tasks.
Median	86	
Cumulative Rank	=3/6	45% of assessment completed

Comment	Grace approaches class work, homework and assignment work diligently and has a keen desire to improve her knowledge and skills. As careless errors in her assessment on Graphs marred her solutions, she should review this area of the course carefully. To improve on these results, Grace should work through past HSC Examinations, focusing on the wording and structure of examination style questions, and using the links between parts of questions to help foster the critical thinking required to solve the complex problems associated with this course.
---------	---

Teacher	Ms Julie Walker

Academic Report

GRACE SMITH

Year 12

Physics

The study of Science is designed to develop interest and enthusiasm for Science, as well as an appreciation of its role in one's life, society, both locally and globally. It provides an opportunity for learners to develop the skills of communication, collaboration, critical and creative thinking, so that they may find solutions to contemporary science-related problems and issues in order to make a positive contribution to society.

COURSE OUTLINE

During this semester students have studied Electromagnetism, Advanced Mechanics and the Nature of Light. Within these modules the development of theories and models concerning mechanics, electricity and magnetism and light are explored. The students further learn to apply mathematical calculations to all forms of complex motion, understand similarities and differences in the interaction of charges in electric and magnetic fields and understand the observations that led to the development of the quantum theory and the theory of relativity.

ACHIEVEMENT OF OUTCOMES

Demonstrates knowledge and understanding of the concepts in the modules: Electromagnetism and Advanced Mechanics	- SUBSTANTIAL
Appropriately applies the required skills in planning and conducting first-hand investigations, and assesses the validity and reliability of data gathered	- HIGH
Demonstrates understanding and application of the skills needed in communicating information, scientific thinking and problem solving	- HIGH

Mark	83 out of 100	This mark is derived from common assessment tasks.
Median	71	
Cumulative Rank	2/9	50% of assessment completed

Comment Grace is to be congratulated for her dedication to understanding the difficult concepts in Physics. She is progressing very well in all three outcomes according to the two assessment tasks so far. Her classwork and homework are of a high standard and she often hands in extra work for feedback. Grace should continue with her revision regime.

Teacher Dr Joe Liu

Academic Report

GRACE SMITH

Year 12

Chemistry

The study of Science is designed to develop interest and enthusiasm for Science, as well as an appreciation of its role in one's life, society, both locally and globally. It provides an opportunity for learners to develop the skills of communication, collaboration, critical and creative thinking, so that they may find solutions to contemporary science-related problems and issues in order to make a positive contribution to society.

COURSE OUTLINE

In the Equilibrium and Acids Reactions module, students study the effects of changes in temperature, pressure and concentration of chemicals on equilibrium systems, understand the use of Le Chatelier's principle to predict the outcome of these reactions and further analyse equilibrium reactions. The Acid Base Reactions module explores reactions between acids, bases and a variety of different substances. Students also appreciate the importance of acids and bases in their everyday lives.

ACHIEVEMENT OF OUTCOMES

Demonstrates knowledge and understanding of the concepts in the modules: Equilibrium and Acid Reactions and Acid/Base reactions	- HIGH
Appropriately applies the required skills in planning and conducting first-hand investigations, and assesses the validity and reliability of data gathered	- HIGH
Displays understanding and application of the skills needed in communicating information, scientific thinking and problem solving	- HIGH

Mark	91 out of 100	This mark is derived from common assessment tasks.
Median	75	
Cumulative Rank	2/17	50% of assessment completed

Comment	Grace is to be congratulated for her efforts in Chemistry. She continues to demonstrate resilience and an ability to learn from her mistakes. Grace obtained the highest mark in the class for Assessment Task 1 but can improve on her critical thinking and application of knowledge skills. Her Assessment Task 2 indicates a thorough knowledge of chemistry and research skills. Grace is encouraged to continue to practise relevant past HSC style questions and submit her responses for feedback.

Academic Report

Guidelines for interpreting this Report

The Cumulative Rank is the rank achieved by Student in assessment task to date

The Percentage of Assessment Completed is the weighting of assessment tasks to date

The marks achieved on the report are marks in progress only and not a prediction of the student's final mark

Glossary

Outcomes

·describe what a student is expected to know, understand and be able to do as a result of learning in each course

Mark

·a number which takes into account class work, projects, assignments, assessment tasks and/or examinations

Median

·the mark scored by the student in the middle of the group

Standards for Student Achievement

Not applicable

·has not been assessed for this outcome due to a special focus on an individual program, the student's particular needs or late enrolment.

Outstanding

·demonstrates exceptional competence, high quality standards and superior skills, and a sophisticated understanding of the concepts associated with this outcome

·completes all tasks accurately and effectively

·meets this outcome with initiative, creativity and independent inquiry

High

·demonstrates thorough competence in the processes and skills, and a good understanding of the broad concepts associated with this outcome

·completes set tasks regularly and applies learned skills to new situations

·displays initiative and independent learning skills to new situations

Substantial

·understands the broad concepts and demonstrates competence in the processes and skills associated with this outcome

·completes most set tasks without assistance and generally applies learning to new situations

·displays initiative and independent learning skills in a range of activities

Satisfactory

·demonstrates an acceptable level of development in this outcome

·with some guidance, completes most set tasks, gains basic competence in processes and skills and displays some initiative

·sometimes applies learning to new situations

Elementary

·displays limited competence in the processes and skills for this outcome

·needs routine support and guidance to display achievement

·displays limited competence in the processes and skills associated with this outcome

·completes some of the set tasks

Not achieved

·is unable to meet the outcome at this stage even though appropriate opportunities for learning and assessment have been provided

·has not completed set tasks or gained relevant skills to achieve at elementary level at this stage

Mrs Michelle Clark

CIRCLE CLASS COMMENT Grace is a friendly and engaged member of Circle Class, who continues to be a positive role model for younger students in the Circle Class. She should aim to have a more active role in Circle Class activities next year. Grace's goal for Semester Two has been to work on her time management skills, which should stand her in good stead leading into her HSC year. There are positive reoccurring themes in her report, such as organisation, excellent knowledge and understanding and detailed examination techniques. Grace should be congratulated for her efforts this semester according to these comments from her report.

Year 11

In Religious Education we seek to know, live and celebrate the Christian message, to stimulate an awareness of other religious traditions and to enthuse our students to both contribute to and challenge the society in which they live.

COURSE OUTLINE Studies of Religion 1 Unit

The Preliminary Course consists of two areas of study: Nature of Religion and Beliefs and Religious Tradition Depth studies. The focus of the first area of study is the distinctive response to the human search for meaning in life and includes Australian Aboriginal beliefs and spiritualities. The Religious Traditions studied in depth are Christianity and Islam, developing a comprehensive view of these traditions as living religious systems that link directly with the lives of the adherents

ACHIEVEMENT OF OUTCOMES

Describes the characteristics of religion and belief systems	- HIGH
Examines significant aspects of religious traditions	- HIGH
Describes the influence of religious traditions in the life of adherents	- HIGH

Mark	42	out of	50	The mark is derived from combination of assessment and examination marks.
Median	35			
Grade	A			

Comment	A focused listener and motivated learner, Grace has achieved excellent results in Studies of Religion. She takes responsibility for her own learning and has developed a strong understanding of all aspects of the course. Grace is encouraged to consistently engage in all collaborative activities and to submit work regularly as this may provide further opportunities for consolidation.
Teacher	Mr Morgan Dunn

Academic Report

GRACE SMITH

Year 11

The study of English enables students to take their place as confident, articulate communicators, critical, imaginative thinkers and active participants in society, to perceive the world from a variety of perspectives and to value the richness of diversity.

COURSE OUTLINE English Advanced

The English Advanced course is designed for students to undertake the challenge of higher-order thinking to enhance their personal, social, education and vocational lives. The application of critical and creative skills in composition of and response to texts, in order to develop achievement through understanding the nature and function of complex texts, is the focus of the Year 11 Common Module: Reading to Write, Module A: Narratives that Shape our World and Module B: Critical Study of Literature.

ACHIEVEMENT OF OUTCOMES

Critically analyses, uses language forms, features and structures of texts, justifying appropriateness for specific purposes, audiences and contexts, and evaluates their effects on meaning	- OUTSTANDING
Thinks imaginatively, creatively, interpretively, critically and discerningly to respond to, evaluate and compose texts that synthesise complex information, ideas and arguments	- OUTSTANDING
Reflects on, evaluates and monitors own learning and refines individual and collaborative processes as an independent learner	- HIGH

Mark	82	out of	100	The mark is derived from combination of assessment and examination marks.
Median	71			
Grade	A			

Comment	Grace has considerable ability in the areas of imaginative writing and language analysis. Her narratives show very strong command of the elements of narrative and excellent control of voice. She is able to clearly explain the relationship between language usage and meaning, and should apply this skill when discussing evidence in her analytical responses. Grace is quietly industrious in the classroom and is encouraged to participate in discussions, to help refine her understanding of the concepts and ideas in texts.
Teacher	Ms Deborah Simpson

LORETO KIRRIBILLI

Academic Report

GRACE SMITH

Year 11

The study of English enables students to take their place as confident, articulate communicators, critical, imaginative thinkers and active participants in society, to perceive the world from a variety of perspectives and to value the richness of diversity.

COURSE OUTLINE English Preliminary Extension 1

English Extension is designed for students undertaking English Advanced to study at a more intensive level, engaging with complex levels of conceptualisation and seeking the opportunity to work in increasingly independent ways. The focus of the Year 11 course is *Ways of Living and Thinking: the Individual and Society*. After some consideration of early philosophical theories, More's *Utopia* and Orwell's *Animal Farm*, an exploration, analysis and critical evaluation of different examples of similar texts in a range of contexts, students develop a range of imaginative, interpretive and analytical compositions.

ACHIEVEMENT OF OUTCOMES

Articulate understanding through speaking, listening, reading, writing, viewing and representing	- OUTSTANDING
Express understanding of how cultural, historical and social contexts and values are represented in critical and creative texts	- OUTSTANDING
Reflect on and evaluate their own processes of learning and critical and creative thinking	- OUTSTANDING

Mark	48	out of	50	The mark is derived from combination of assessment and examination marks.
Median	44			
Grade	A			

Comment	Grace's considerable ability to think critically and creatively, and to embrace a broad range of challenging ideas and texts were evident in this course. Her contribution to a presentation in Term 2 was imaginative and invaluable, and her composition for last term displayed controlled writing and originality. Grace's synthesis of philosophies broached this year was successful in her final assessment.
Teachers	Ms Christine Davis Mr Hugo Grieve

Academic Report

GRACE SMITH

Year 11

The study of Mathematics aims to develop students' abilities to observe, represent and investigate patterns and relationships, communicating this knowledge in a supportive environment that encourages risk-taking and challenge.

COURSE OUTLINE Mathematics Extension 1

Students have studied the following additional Preliminary Mathematics topics: Parabola as a Locus, Tangent to a Curve and Derivative of a Function, and an introduction to Trigonometric Functions involving radian measure. From the Mathematics Extension 1 Course they have studied Inequalities with the Unknown in the Denominator, Circle Geometry, 3D Trigonometry, Internal and External Division of Lines into Given Ratios, Polynomials and Further Trigonometry. They have also experienced harder problems on all areas of the Preliminary Mathematics Course.

ACHIEVEMENT OF OUTCOMES

Solves problems involving any harder applications of the Preliminary Mathematics Course, including Parabola as a Locus	- OUTSTANDING
Solves problems involving inequalities with the unknown in the denominator, and internal and external division of lines into a given ratio	- OUTSTANDING
Solves problems in circle geometry using multi-step deductive reasoning	- OUTSTANDING
Applies appropriate arithmetic, algebraic and graphical techniques to the study of polynomials	- OUTSTANDING
Applies appropriate arithmetic, algebraic and graphical techniques to the study of further trigonometry, including solving practical 3-D problems	- OUTSTANDING
Relates the derivative of a function to the slope of its graph; determines the derivative of a function through routine application of the rules of differentiation; understands and uses the language and notation of calculus	- OUTSTANDING
Evaluates mathematical solutions to problems and communicates her solutions using appropriate notation and logical argument	- OUTSTANDING

Mark	48	out of	50	The mark is derived from combination of assessment and examination marks.
Median	36			
Grade	A			

Comment	Grace achieved outstanding results in the Year 11 Examination. She is able to solve efficiently standard questions from the entire course as well as challenging problems. These results reflect her application in class, with homework and revision. Grace is encouraged to maintain her efforts and enthusiasm to this high standard of learning.
Teacher	Ms Julie Walker

Academic Report

GRACE SMITH

Year 11

The study of Science is designed to develop interest and enthusiasm for Science, as well as an appreciation of its role in one's life, society, both locally and globally. It provides an opportunity for learners to develop the skills of communication, collaboration, critical and creative thinking, so that they may find solutions to contemporary science-related problems and issues in order to make a positive contribution to society.

COURSE OUTLINE Chemistry

During this course students have studied four core modules that have the Working Scientifically outcomes and content integrated at the core of each module.

In Properties and Structure of Matter learners analyse trends and patterns in relation to the properties of substances and the structure of an atom. In Introduction to Quantitative Chemistry they uncover the need to quantify reactions in order to make predictions about yields and use appropriate mathematical representations to solve problems. In Reactive Chemistry students investigate how chemicals react, the changes in matter and energy that take place during these reactions and how they relate to chemicals used in everyday life. In Drivers of Reactions they examine factors that initiate and drive a reaction and the role of enthalpy and entropy in relation to bonding.

ACHIEVEMENT OF OUTCOMES

Conducts investigations to collect valid and reliable primary qualitative data and processes and evaluates the data and design appropriately	- HIGH
Solves scientific problems using primary and secondary data, critical thinking skills and scientific processes	- OUTSTANDING
Analyses and evaluates primary and secondary data and information to communicate scientific understanding using suitable language and terminology for a specific audience	- HIGH
Demonstrates knowledge and understanding of the content, concepts and skills covered in the four modules studied	- HIGH
Demonstrates the practical skills required to safely carry out first-hand investigations related to the syllabus	- HIGH

Mark	84	out of	100	The mark is derived from combination of assessment and examination marks.
Median	71			
Grade	A			

Comment Grace is to be congratulated for her efforts in Chemistry which are reflected in her Year 11 Examination result. She has a positive attitude to class and works hard to understand the content covered in Chemistry. Grace needs to now concentrate her efforts on refining her knowledge, in particular her interpretation of high level verbs such as analyse, assess and evaluate, so that any further improvement may be possible.

Teacher Dr Joe Liu

Academic Report

GRACE SMITH

Year 11

The study of languages develops in students a breadth of outlook that enables them to take their place in the local and global community, accepting of difference and valuing the language, tradition and culture of other peoples.

COURSE OUTLINE Italian Continuers

In the course the students focused on one of the prescribed themes and its associated topics. The prescribed themes for study were: the individual and the changing world. Associated topics included: personal identity, personal memories, relationships with family and friends, the elderly, health and leisure and travel. Students developed competency in the skills of listening and responding, reading and responding, writing and speaking through tasks associated with a range of texts and text types that reflected the themes and topics. Students also gained insight into the culture of Italian-speaking communities through the study of a range of texts.

ACHIEVEMENT OF OUTCOMES

Competency in listening and responding skills: ability to convey the gist of texts and identify specific information; summarise the main ideas; identify the tone, purpose, context and audience; draw conclusions from or justify an opinion; infer points of view, attitudes or emotions; interpret, analyse and evaluate information that is in Italian.	- OUTSTANDING
Competency in reading and responding skills (comprehension): ability to convey the gist of texts and identify specific information that is in Italian; summarise the main ideas; identify the tone, purpose, context and audience; draw conclusions from or justify an opinion; interpret, analyse and evaluate information in Italian; infer points of view, attitudes or emotions from language and context.	- OUTSTANDING
Competency in reading and responding skills (comprehension and writing): ability to understand general and specific aspects of text by appropriately exchanging information in Italian in response to questions, statements, comments and/or other specific items provided in the text; and ability to incorporate accurate and varied vocabulary and sentence structures, and relevant ideas.	- OUTSTANDING
Competency in speaking skills: ability to communicate confidently and fluently in Italian about the student's personal world; ability to present relevant information and opinions and ability to incorporate accurate and varied vocabulary and sentence structures, and relevant ideas.	- OUTSTANDING
Competency in writing skills: ability to apply language structures to create original text; compose informative, descriptive, reflective, persuasive or evaluative texts appropriate to context, purpose and/or audience; structure and sequence ideas and information in Italian.	- HIGH

Mark	88	out of	100	The mark is derived from combination of assessment and examination marks.
Median	80			
Grade	A			

Comment	Grace is diligent and displays continued commitment to the study of Italian. She is able to manipulate the language authentically and creatively. Grace displays the ability to incorporate sophisticated language structures and idiomatic expressions in her written responses but is advised to include information that satisfies the demands of the task. Her comprehension skills are solid. Grace is encouraged to continue practising reading skills, in particular the questions requiring more information, developing the necessary skill of providing all relevant points needed for a complete answer. She has worked steadily to achieve an excellent standard in the Year 11 course.

Academic Report

GRACE SMITH

Year 11

The study of Science is designed to develop interest and enthusiasm for Science, as well as an appreciation of its role in one's life, society, both locally and globally. It provides an opportunity for learners to develop the skills of communication, collaboration, critical and creative thinking, so that they may find solutions to contemporary science-related problems and issues in order to make a positive contribution to society.

COURSE OUTLINE Physics

During this course students have studied four core modules that have the Working Scientifically outcomes and content integrated at the core of each module.

In Kinematics learners describe, measure and analyse motion and come to understand that scientists are able to make reliable predictions in regard to motion of an object. Dynamics allows them to investigate Newton's Laws of Motion and how they can be used to describe the effect of forces on objects. In Waves and Thermodynamics students explore the behaviour and properties of waves, as well as, energy and how it is transferred from one place to another. Electricity and Magnetism allow them to examine how atomic theory and the laws of conservation of energy and electric charge are unifying concepts in understanding the electrical and magnetic properties and behaviour of matter.

ACHIEVEMENT OF OUTCOMES

Conducts investigations to collect valid and reliable primary qualitative data and processes and evaluates the data and design appropriately	- OUTSTANDING
Solves scientific problems using primary and secondary data, critical thinking skills and scientific processes	- OUTSTANDING
Designs and conducts investigations to collect, analyse and evaluate primary and secondary data and information to communicate scientific understanding using suitable language and terminology for a specific audience	- HIGH
Demonstrates knowledge and understanding of the content, concepts and skills covered in the four modules studied	- HIGH
Demonstrates the practical skills required to safely carry out first-hand investigations related to the syllabus	- HIGH

Mark	88	out of	100	The mark is derived from combination of assessment and examination marks.
Median	71			
Grade	A			

Comment Grace has demonstrated an extensive understanding of the key concepts in Physics this year, particularly in the Depth Study and Year 11 Examination. She works diligently and applies herself to all classwork but does not often contribute to class discussions. Grace should continue to practise examination style questions in order to further refine her technique.

Glossary

Outcomes

·describe what a student is expected to know, understand and be able to do as a result of learning in each course

Mark

·a number which takes into account class work, projects, assignments, assessment tasks and/or examinations

Median

·the mark scored by the student in the middle of the group

Grade

Grades have been applied to the marks of students in each of their courses

Grade

Common Grade Scale for Preliminary Courses

A	The student demonstrates extensive knowledge of content and understanding of course concepts, and applies highly developed skills and processes in a wide variety of contexts. In addition the student demonstrates creative and critical thinking skills using perceptive analysis and evaluation. The student effectively communicates complex ideas and information.
B	The student demonstrates thorough knowledge of content and understanding of course concepts, and applies well-developed skills and processes in a variety of contexts. In addition the student the student demonstrates creative and critical thinking skills using analysis and evaluation. The student clearly communicates complex ideas and information.
C	The student demonstrates sound knowledge of content and understanding of course concepts, and applies skills and processes in a range of familiar contexts. In addition the student demonstrates skills in selecting and intergrating information and communicates relevent ideas in an appropriate manner.
D	The student demonstrates a basic knowledge of content and understanding of course concepts, and applies skills and processes in some familiar contexts. In addition the student demonstrates skills in selecting and using information and communicates ideas in a descriptive manner.
E	The student demonstrates a basic knowledge of content and understanding of course concepts, and applies some skills and processes with guidance. In addition the student demonstrates elementary skills in recounting information and communicating ideas.

GRACE SMITH

Year 11

The study of Mathematics aims to develop students' abilities to observe, represent and investigate patterns and relationships, communicating this knowledge in a supportive environment that encourages risk-taking and challenge.

COURSE OUTLINE Mathematics

Students have completed the Preliminary Course and have studied the following HSC topics: Coordinate Methods in Geometry, Applications of Geometrical Properties, Geometrical Applications of Differentiation and Integration. They have learnt to use mathematical techniques to solve a wide range of practical problems.

ACHIEVEMENT OF OUTCOMES

Displays understanding of the following topics studied in the Preliminary Course: Basic Arithmetic and Algebra, Real Functions, Trigonometric Ratios, The Quadratic Polynomial and The Parabola as a Locus	- OUTSTANDING
Applies coordinate methods in geometry to solve problems involving the linear function	- OUTSTANDING
Constructs arguments to prove and justify results in geometry	- HIGH
Uses the derivative to determine features of the graph of a function and uses the features of a graph to deduce information about the derivative; applies appropriate techniques from the study of differential calculus to solve problems	- OUTSTANDING
Uses techniques of integration to calculate areas and volumes	- OUTSTANDING
Evaluates mathematical solutions to problems and communicates her solutions using appropriate notation and logical argument	- OUTSTANDING

Mark	91 out of 100	The mark is derived from combination of assessment and examination marks.
Median	78	
Comment	Grace displays a high level of understanding of the course. She grasps new concepts easily and is able to make links between different topics when solving unfamiliar problems. Grace completes all classwork, homework and assignments diligently and her work ethic is reflected in these excellent results. Grace is encouraged to continue her efforts and to spend time working through past HSC Examinations, ensuring that she can answer the standard questions efficiently and accurately before applying her knowledge to the challenging and unfamiliar problems in the papers.	
Teachers	Ms Julie Walker	

Academic Report

Guidelines for interpreting this Report

Glossary

Outcomes

·describe what a student is expected to know, understand and be able to do as a result of learning in each course

Mark

·a number which takes into account class work, projects, assignments, assessment tasks and/or examinations

Median

·the mark scored by the student in the middle of the group

Standards for Student Achievement

Not applicable

·has not been assessed for this outcome due to a special focus on an individual program, the student's particular needs or late enrolment.

Outstanding

·demonstrates exceptional competence, high quality standards and superior skills, and a sophisticated understanding of the concepts associated with this outcome
·completes all tasks accurately and effectively
·meets this outcome with initiative, creativity and independent inquiry

High

·demonstrates thorough competence in the processes and skills, and a good understanding of the broad concepts associated with this outcome
·completes set tasks regularly and applies learned skills to new situations
·displays initiative and independent learning skills to new situations

Substantial

·understands the broad concepts and demonstrates competence in the processes and skills associated with this outcome
·completes most set tasks without assistance and generally applies learning to new situations
·displays initiative and independent learning skills in a range of activities

Satisfactory

·demonstrates an acceptable level of development in this outcome
·with some guidance, completes most set tasks, gains basic competence in processes and skills and displays some initiative
·sometimes applies learning to new situations

Elementary

·displays limited competence in the processes and skills for this outcome
·needs routine support and guidance to display achievement
·displays limited competence in the processes and skills associated with this outcome
·completes some of the set tasks

Not achieved

·is unable to meet the outcome at this stage even though appropriate opportunities for learning and assessment have been provided
·has not completed set tasks or gained relevant skills to achieve at elementary level at this stage

Academic Report

GRACE SMITH

Year 11

REPORTING PERIOD **Terms 1 and 2 2018**

Subject	Cumulative Rank	Percentage of Assessment Completed
English Advanced		0
Mathematics Preliminary Extension 1		0
Italian Continuers		0
Mathematics	=2/65	40

* The Cumulative Rank is the rank achieved by the student in assesment tasks to date.

* The Percentage of Assessment completed is the weighting of assesment tasks to date.

* The marks achieved on the report are marks in progress only and not a prediction of the student's final mark.
