Trumpet , Music Wind Symphony , Basketball 2nd , Football 3rd

Days Absent: 2

Mr David Giltrap
Head of Senior School

Approaches to Learning

The following describes factors that contribute to a student's approach to their learning.

	Exceeding expectations	Meeting expectations	Working towards expectations	Not meeting expectations
Ready to learn	Shows evidence of planning and preparation.	Comes to lessons focused, prepared and ready to learn.	Is not always organised or ready to learn.	Disorganised and not ready to learn.
Actively engages in learning	Takes initiative. Goes beyond teacher instructions. Connects ideas. Thinks deeply.	Actively engages and thinks about what is being studied. Prepared to ask questions or seek help.	Takes a passive approach to learning tasks, or to an acceptable standard.	Avoids active engagement in learning.
Completes learning tasks	Completes all learning tasks to a very high standard.	Completes all assigned learning tasks to a satisfactory standard.	Does not complete all assigned learning tasks, or to an acceptable standard.	Does not complete learning tasks.
Communicates and collaborates	Works to build and support peers. May display leadership qualities.	Willingness to work with others. Respects and values other perspectives.	Has some difficulty working and communicating with others.	Disruptive. Does not contribute to a productive classroom environment.
Challenges themselves to improve	Seeks and embraces challenge. Reflects, responds and seeks out feedback. Is courageous.	Embraces challenge. Wants to improve. Reflects and responds to feedback. Shows	May avoid challenge and/or opportunities to reflect on feedback.	Shows little or no desire to improve.

Year 12 2021 Semester 1

James Wilson

CHRISTIAN STUDIES

Miss S Speechley

Students wrestled with Australia's contemporary spiritual and cultural climate. They critically explored some of the ideas found in contemporary culture including atheism, secularism, humanism, rationalism and ethical decision making.

Student	Exceeding expectations	Meeting expectations	Working towards expectations	Not meeting expectations
Ready to learn		✓		
Actively engages in learning		✓		
Completes learning tasks		✓		
Communicates and collaborates		✓		
Challenges themselves to improve		✓		
Comment James is a respectful student who has thoughtfully engaged with multiple perspectives demonstrating his own worldview. James' journal entries demonstrated his ability to articulate and justify his own worldview, while respectfully considering other perspectives. James has made positive contributions to class discussions and is encouraged to do so more frequently.				

Year 12 2021 Semester 1

James Wilson

ENGLISH ADVANCED

Mr J Tod-Hill

Students studied George Orwell's 'Nineteen Eighty-Four' in the unit, 'Texts and Human Experiences'. They explored how texts shape and are shaped by varied human experiences throughout time. They chose a related text and wrote an essay that examined how authors responded to human experiences. Then students engaged in a comparative study of Shakespeare's 'King Richard III' and Pacino's 'Looking for Richard'. They examined how form, context, purpose and values shape meaning in different texts.

Comment				
James has adopted an impressive work ethic across Year 12 and he is reaping the rewards of his diligent approach. His willingness to resubmit work to refine shortfalls in his writing has resulted in him developing a confident, fluent and insightful analytical voice. James can still sometimes be a touch verbose in essays and this can cloud his thesis, so I encourage him to keep considering his diction and syntax as he moves forward.				

Semester Mark: 94

Rank in Course: 6 / 209

Year 12 2021 Semester 1

James Wilson

MATHEMATICS ADVANCED

Mr P Rundle

Students applied number patterns to superannuation and loan repayment calculations. They furthered their calculus skills, studying the second derivative, graphing increasingly difficult curves and exploring optimisation problems. Students commenced integral calculus, making the link to differential calculus. They found areas under curves, volumes of unusual solids and approximate areas using trapeziums.

Completes learning tasks	✓			
Communicates and collaborates	✓			
Challenges themselves to improve	✓			
Comment James is a highly capable and intelligent mathematician who clearly enjoys exploring the many connections between concepts in this course. His performance in the last Advanced assessment demonstrated he has an excellent understanding of key concepts, though he should revise maxima/minima problems. With a continuation of his enthusiastic approach and scheduling time each week for consolidation, excellent future results are more than possible.

MATHEMATICS EXTENSION 1

Mr P Rundle

Students extended their study of probability into permutations and combinations. They studied the binomial theorem and rates of change. Students discovered the method of induction proofs which can prove results for an infinite number of cases. They investigated trigonometry as a function, the associated calculus, as well as compound angles and t-results. Students graphed sine waves, rational functions and graphs with oblique asymptotes and observed the symmetry of inverse trigonometric curves.

Communicates and collaborates	✓			
Challenges themselves to improve	✓			
Comment				
James possesses genuine ability and has a superb approach whereby he carefully considers each question and seeks to find its most efficient solution. He may have been a little dissatisfied with his mark in the last Extension 1 task, but he possesses excellent foundational knowledge which will enable him to improve on this result in the future. With his ever-present dedication and insightful mind, I am confident that he will achieve this.

James Wilson

PHYSICS

Mr D Johnston

Students have engaged in the study of electromagnetism. They have examined the movement of charged particles in fields and the motor effect. The concepts were then extended to include induction and how ideal transformers work. Finally, all the theory was applied to real world electrical motors and generators.

Comment James is thriving in Physics. He successfully combines an eager interest with a mature, conscientious approach to the academic requirements of the subject, the result of which is a strong performance in both formative and formal assessments. James' strategy of anticipating assessment questions, and seeking feedback on his attempts at these, is an indication of the calibre of student that he is. To consolidate his excellent performance thus far, he should simply maintain the status quo.

SCIENCE EXTENSION

Dr K Terrett

Students collected data and conducted experiments for their individual research projects. Their statistical analysis skills were further developed in class and applied to their own projects. Literature review and report writing skills were a class focus this term to prepare students for the submission of their research report in the last week of Term 2.

Communicates and collaborates	✓			
Challenges themselves to improve	✓			
Comment James is a talented and intuitive scientist who has embarked on a challenging project investigating the allicin content in garlic. He has worked with focus to develop his experiment and has adjusted his plans according to preliminary results. I commend James on his commitment to understanding the complex chemical processes involved in his research. His ability to communicate this effectively during his poster presentation was particularly impressive.

MODERN HISTORY

Miss M Dooley

The course started with an investigation of the rise of dictators in the 1920s in Europe and Asia, with a particular focus on the dictatorship in Germany under the Nazis. Students then turned to the National Study on Russia in which they investigated the challenges of the interwar years such as Stalin's program of radical economic transformation. Students also worked on writing skills and completed practice essays in class.

Comment James is an exceptional student. He is dedicated, thoughtful, collaborative, and open to learning. I have been impressed with his insightful contributions to class discussions and ability to structure his ideas and evidence in an effective and sophisticated manner. I congratulate James on his outstanding effort and results.
