

Pymble Ladies' College

Semester 2 Report 2023

Alice Windybank

Year 12

Compass Comment - Mrs A Thorne

Alice is a young lady who demonstrates a great care and concern for others. She is attentive, patient and an active listener who deals with issues with a calm resolve. Her report is most pleasing in the way that she has approached her learning across the senior years in such a positive and determined way. It is important that in the coming weeks before the HSC examinations, Alice refines her skills and deepens her understanding of the concepts by completing practice papers to reinforce her learning. I would like to take this opportunity to wish Alice every success for the coming HSC and her future after her time here at Pymble.

Days Absent: 1

Mrs N Wyse
Head of Senior School

Common Grade Scale

A	Excellent	The student has extensive knowledge and understanding of the content and can readily apply this knowledge. In addition, the student has achieved a very high level of competence in the processes and skills and can apply these skills to new situations.
B	High	The student has a thorough knowledge and understanding of the content and a high level of competence in the processes and skills. In addition, the student is able to apply this knowledge and skills to most situations.
C	Sound	The student has a sound knowledge and understanding of the main areas of content and has achieved an adequate level of competence in the process and skills.
D	Basic	The student has a basic knowledge and understanding of the content and has achieved a limited level of competence in the processes and skills.
E	Elementary	The student has an elementary knowledge and understanding in few areas of the content and has achieved very limited competence in some of the processes and skills.

Course Outline

The English program develops skills in speaking, listening, reading, writing, viewing and representing through responding to and composing texts in varied contexts. These skills are addressed through the critical study of core texts, the consideration of how contexts create shifts in emphasis and meaning, and close examination of form and features. Students analyse and evaluate a range of texts that includes modern poetry and engages in independent investigation.

Learning Outcomes	E	D	C	B	A
Analyses and synthesises information and ideas about the form, conventions, context, particular features of texts				✓	
Analyses and synthesises the complex relationship between texts				✓	
Makes informed choices about language to develop sophisticated expression and structure in critical responses to texts				✓	
Responds to texts creatively and critically to create an imaginative composition				✓	

Assessment	Mark	Out of	Weighting (%)
Task 2: Module A	16	20	25
Task 3: Module C	17	20	20
Trial Examination Paper 1	30	40	13
Trial Examination Paper 2	40	60	18

Learning Profile	Rarely	Sometimes	Usually	Consistently
Takes responsibility for her own learning				✓
Works effectively with teachers and peers				✓
Completes set work appropriately				✓

Teacher's Comment

Alice has been motivated to improve her skills in English Advanced. Her responses in the HSC trial examination were substantial, but she should be consistent in her textual analysis to support her ideas. Alice would also benefit from practising engaging with each essay question closely and should find that planning her responses before writing to be beneficial in this regard.

Alice Windybank**Mathematics Extension 1**

Year 12

Ms P Lau

Course Outline

The Mathematics Extension 1 Course develops the ability of students to use concepts and skills and apply complex techniques to the solutions of problems and modelling in the areas of trigonometry, functions, calculus, proof, vectors and statistical analysis.

Learning Outcomes	E	D	C	B	A
Models and solves problems about financial situations using mathematical reasoning and techniques					✓
Applies the concepts and techniques of arithmetic and geometric sequences and series					✓
Applies the concepts and techniques of indefinite and definite integrals				✓	
Solves problems using appropriate statistical processes					✓
Applies techniques involving proof or calculus to model and solve problems					✓
Applies concepts and techniques involving vectors and projectiles				✓	

Assessment	Mark	Out of	Weighting (%)
Extension 1 Task 2	22	34	20
Advanced Task 3	30	35	25
Extension 1 Task 3	24	35	25
Advanced Task 4 Trial Examination	90	100	30
Extension 1 Task 4 Trial Examination	62	70	30

Learning Profile	Rarely	Sometimes	Usually	Consistently
Takes responsibility for her own learning				✓
Works effectively with teachers and peers				✓
Completes set work appropriately				✓

Teacher's Comment

I have very much appreciated having Alice in the class. She is a dependable student who works productively to achieve her best. Alice prepared thoroughly for her HSC trial examinations, as demonstrated by all her assessments. Her commendable effort is reflected in her impressive results. Continued practice of past HSC papers should allow Alice to consolidate her knowledge and boost her confidence in undertaking the final examinations.

Alice Windybank

Year 12

Chemistry

Ms B Greener

Course Outline

Chemistry explores the structure, composition and reactions of and between all elements, compounds and mixtures that exist in the universe. The discovery and synthesis of new compounds, the monitoring of elements and compounds in the environment, and an understanding of industrial processes and their applications to life processes are central to human progress and our ability to develop future industries and sustainability. In Semester 2, students develop knowledge and understanding of the applications of chemistry. They analyse the structure of, and predict reactions involving carbon compounds. They describe and evaluate chemical systems used to design and analyse chemical processes.

Learning Outcomes	E	D	C	B	A
Processes and analyses data					✓
Assesses experimental data to draw valid conclusions					✓
Demonstrates a coherent and logical understanding of Chemistry concepts				✓	
Solves scientific problems through mathematical analysis					✓

Assessment	Mark	Out of	Weighting (%)
Task 2	41	45	25
Task 3	53	58	30
Task 4 Trial Examination	87	100	30

Learning Profile	Rarely	Sometimes	Usually	Consistently
Takes responsibility for her own learning				✓
Works effectively with teachers and peers				✓
Completes set work appropriately				✓

Teacher's Comment

Alice is a valued member of our class due to her optimism, generosity of time and support towards her peers. She is a disciplined and ambitious student who has attained impressive results throughout the Chemistry course. Alice's pleasing HSC trial examination results reflected the diligent effort she invested leading up to the task. However, it also revealed a need to focus on applying mathematical analysis to solve scientific problems. In these final weeks, Alice should continue with her strong work ethic and complete any outstanding assignments and practise past examination questions.

Alice Windybank

Year 12

Physics

Dr G McCarthy

Course Outline

Physics involves the study of radiation and matter by considering the concepts of energy and force. This semester students explore how experimental evidence leads to the development of new scientific theories. They study a variety of theories of light including Einstein's Theory of Special Relativity and the Quantum Model of Light. Then they delve into the structure of the atom, from the electron to the quark, analysing a number of key discoveries and the experiments behind them. This leads them into gaining an understanding of our current model of the universe and the evidence we have to support it.

Learning Outcomes	E	D	C	B	A
Analyses and evaluates data to construct evidence-based conclusions					✓
Communicates coherently and logically, demonstrating a deep understanding of physical concepts					✓
Solves scientific problems through mathematical analysis and critical thinking					✓

Assessment	Mark	Out of	Weighting (%)
Task 2	39	50	25
Task 3	42	50	25
Task 4 Trial Examination	81	100	30

Learning Profile	Rarely	Sometimes	Usually	Consistently
Takes responsibility for her own learning				✓
Works effectively with teachers and peers				✓
Completes set work appropriately				✓

Teacher's Comment

Alice is a thoughtful and diligent student who seeks clarification in class to help her understand key concepts. Her exceptional HSC trial examination result reflected her effective revision practices. Alice is a valued team member during collaborative tasks as she forms clear links between experimental observations and theory and she readily assists the learning of others.

Alice Windybank

Year 12

Geography

Mr L Hume

Course Outline

The focus of the course is on geographical investigation. Students examine the functioning of ecosystems at risk, their management and protection, as well as investigating world cities, megacities and urban dynamics of large cities. They also investigate economic activity on a local and global scale.

Learning Outcomes	E	D	C	B	A
Formulates and implements geographic research relating to ecosystems at risk and a local economic enterprise					✓
Applies maps, graphs, photographs and statistics to analyse and integrate data on ecosystems at risk, urban places and economic activity					✓
Explains the changing nature, spatial patterns and interactions of ecosystems at risk					✓

Assessment	Mark	Out of	Weighting (%)
Task 2	25	25	25
Task 3	33	35	25
Task 4 Trial Examination	91	100	30

Learning Profile	Rarely	Sometimes	Usually	Consistently
Takes responsibility for her own learning				✓
Works effectively with teachers and peers				✓
Completes set work appropriately				✓

Teacher's Comment

Alice is a highly skilled Geography student, who should be proud of her assessment results throughout the semester. She is always engaged in class and approaches her studies with a mature and focused attitude. In preparation for her HSC examination, I encourage Alice to practise geographical skills and short answer questions, which require the application of syllabus knowledge to unseen sources.
