Secondary School Semester 1 Report - 2021

Student: **Adam Binns**

ID: **58720** Class: **12C**

Demonstration of Commitment to College Values and Student Ethics

Mutual Respect	Consistently	Improvement needed
Integrity	Consistently	Improvement needed
Compassion	Consistently	Improvement needed
Excellence	Consistently	Improvement needed

Mr Sidney Daniels , Academic Welfare Co-ordinator

**Chemistry 12****Course Topics and Themes**

Chemistry is the study of materials and their properties and structure.

Unit 1: Chemical fundamentals - structure, properties and reactions

Unit 2: Molecular interactions and reactions

Unit 3: Equilibrium, acids and redox reactions

Unit 4: Structure, synthesis and design

Overall Academic Progress Indicator**93%**

Teacher Comment

Adam analyses evidence systematically and effectively by identifying the essential elements, features or components of qualitative data, as demonstrated through her IA1 Data Test. He uses relevant mathematical processes to appropriately identify trends, patterns, relationships, limitations and uncertainty in quantitative data. Adam interprets evidence insightfully by using his knowledge and understanding to draw justified conclusions based on his thorough analysis as evidenced on his IA2 Student Experiment report. Whilst he should be congratulated for demonstrating high levels of application to his studies, he needs to work closely with his teacher to sustain this grade. Adam is also encouraged to actively seek extension work to further his enhance understanding of the subject matter.

Mr Arvind Singh

Economics 12

Course Topics and Themes

Economics encourages students to think deeply about the global challenges facing individuals, business and government, including how to allocate and distribute scarce resources to maximise well-being.

- Unit 1: Markets and models
- Unit 2: Modified markets
- Unit 3: International economics
- Unit 4: Contemporary macroeconomics

Teacher Comment

Adam demonstrates accurate comprehension of economic concepts, principles and models, using sophisticated economic terminology. He selects a discerning variety of economic data and information, with an accurate and systematic acknowledgment of sources. Adam's analysis of economic issues is comprehensive, as he supports this analysis with knowledgeable use of data. He evaluates demonstrating insightful synthesis, and perceptive conclusions supported with critical economic reasoning. Adam has a sophisticated control of language and genre, concise expression and accomplished use of diagrammatic and statistical forms. In preparation for his external exam, Adam is encouraged to submit work for feedback regularly to help maintain his excellent standard.

Mrs Julie-Anne Angell

Literature 12

Course Topics and Themes

Literature focuses on the study of literary texts, developing students as independent, innovative and creative learners and thinkers who appreciate the aesthetic use of language, analyse perspectives and evidence, and challenge ideas and interpretations through the analysis and creation of varied literary texts.

Unit 1: Introduction to literary studies

Unit 2: Texts and culture

Unit 3: Literature and identity

Unit 4: Independent explorations

Overall Academic Progress Indicator

83%

Teacher Comment

Adam applies knowledge of how to create perspectives and representations in an effective manner, and his analysis in this area is discerning. He effectively analyses and makes use of the ways cultural assumptions, attitudes, values and beliefs underpin texts, as well as aesthetic features and stylistic devices, to invite audiences to take up positions. Adam demonstrates effective organisation and development of texts, along with use of genre, to achieve control over relationships with audiences in a variety of contexts, and his use of the analytical genre is discerning. He selects, synthesises and sequences effective subject matter to support perspectives. For the most part, Adam effectively combines grammatically accurate language structures, language choices and mode-appropriate features in his creation of texts. To improve, he should continue to work on his use of complex and accurate punctuation and sentence structures in analytical responses.

Ms Jessica Dutton

**Mathematical Methods 12****Course Topics and Themes**

Mathematical Methods is designed for students to see the connections between mathematics and other areas of the curriculum and apply their mathematical skills to real-world problems, becoming critical thinkers, innovators and problem-solvers.

Unit 1: Algebra, statistics and functions

Unit 2: Calculus and other functions

Unit 3: Further calculus

Unit 4: Further functions and statistics

Overall Academic Progress Indicator**94%**

Teacher Comment

Adam demonstrates a comprehensive knowledge and understanding of the subject matter in Unit Three. He recognises, recalls and uses facts, rules, definitions and procedures. Adam comprehends and applies mathematical concepts and techniques to solve problems in simple familiar, complex familiar and complex unfamiliar situations. He explains mathematical reasoning to justify procedures and decisions and evaluates the reasonableness of solutions. Adam communicates effectively using mathematical and everyday language and conventions. He assesses strengths, implications and limitations of solutions, models with and without technology, and uses this to consider if alternative methods or refinements are required. Adam should continue to seek out abstract and difficult problems to develop more creative problem-solving techniques.

Ms Belinda Guerra

**Physics 12****Course Topics and Themes**

Physics provides opportunities for students to engage with classical and modern understandings of the universe.

Unit 1: Thermal, nuclear and electrical physics

Unit 2: Linear motion and waves

Unit 3: Gravity and electromagnetism

Unit 4: Revolutions in modern physics

Overall Academic Progress Indicator**93%**

Teacher Comment

Adam accurately describes and explains concepts, theories and their limitations. He accurately uses representations of scientific relationships and data to determine a variety of unknown scientific quantities. Adam uses relevant mathematical processes to appropriately identify trends, patterns and relationships. He interprets evidence insightfully by using his knowledge and understanding to draw justified conclusions based on his thorough analysis of evidence, as shown in his recent IA2 assessment. Adam investigates phenomena by carrying out effective experiments. He efficiently collects and process relevant evidence. Adam critically evaluates processes, by insightfully extrapolating credible findings, and discussing the reliability and validity of experiments. He should actively seek extension work to consolidate his learning and thus further enhance understanding of the subject matter.

Mr Mike Egan

Specialist Mathematics 12

Course Topics and Themes

Specialist Mathematics is designed for students to develop confidence in their mathematical knowledge and ability, and gain a positive view of themselves as mathematics learners.

Unit 1: Combinatorics, vectors and proof

Unit 2: Complex numbers, trigonometry, functions and matrices

Unit 3: Mathematical induction, and further vectors, matrices and complex numbers

Unit 4: Further calculus and statistical inference

Overall Academic Progress Indicator

Teacher Comment

Adam demonstrates a comprehensive knowledge and understanding of the subject matter in Unit Three. He recognises, recalls, and uses facts, rules, definitions, and procedures. Adam comprehends the mathematical concepts and techniques to solve problems drawn from these topics in simple familiar, complex familiar and unfamiliar situations. He evaluates the reasonableness of solutions and communicates using mathematical and everyday language and conventions. Furthermore, Adam makes decisions about the choice of technology to solve problems in various situations. He should continue to seek out abstract and difficult problems to develop more creative problem-solving techniques.

Miss Tina Chen
