

CURRICULUM VITAE

Anastasia Kondos

29 Laidlaw Parade, East Brisbane QLD 4169

Phone: 0407 174 489

Email: anastasiakondos@icloud.com

Education

2007-2018	Somerville House	Grade 1 -12 (current)
2006	New Farm State School	Preschool

Leadership Positions

2018	School Prefect
2018	House Captain Franklin
2018	School Captain Elect
2017	Student Ambassador
2016	Student Representative Council
2015	Middle School House Captain (Franklin)
2014	Student Representative Council
2012	Junior School House Captain (Franklin)

Awards

2016-2018	Academic Achievement Awards
2014-2015	Academic Excellence Awards

Extra Curricular Activities

2009-2016	QGSSSA Swimming
2005-2016	Club Swimming
2012-2018	Club Water polo
2013-2018	State Trial Water polo Competition
2009-2017	Andrews Cup and QGSSSA Netball
2009-2016	Club Netball
2009-2018	School Cross Country Team
2014-2017	QDU and BDGA Debating
2018	Lead in "Strictly Ballroom" musical

2017	Lead in "Peter Pan" Churchie Play
2014-2016	Chorus of annual school musical (Grease, King and I)
2009-2015	Various String Ensembles (Cello)
2009-2017	Various Choirs
2009-2011	Artistic Gymnastics
2009-2010	Chess

Community Service

2017-2018	Helping Hands feed the homeless Ipswich
2013-2018	Volunteer BUPA Nursing Home New Farm
2013-2018	Zonta Birthing Kit preparation PNG
2014-2016	Connect-to-veterans
2016	Antipodean Tour to Borneo

Employment

2016-2018	Casual babysitting
-----------	--------------------

Hobbies/Interests

Snow Skiing
Food appreciation
Travel
Running
Yoga

Principal

Senior School Report

Semester 1

The information contained in this report is a summary of your daughter's academic progress for each subject. Feedback provided focusses on her key strengths and areas requiring consolidation; learning behaviours; and recommendations for improvement (with the exception of Christian Education). Importantly, co-curricular involvement and social development are also included in this report.

A written report, however, cannot give a complete picture of a student's progress. Parents are welcome to discuss matters concerning their daughter's progress and welfare directly with the teacher concerned at mutually convenient times. In the Senior School, each student is considered to be an individual who will develop according to her abilities and opportunities. A student who has worked to the best of her ability should be congratulated regardless of the levels achieved.

Teaching and assessment programs in the Senior School are informed by the requirements of the Queensland Curriculum and Assessment Authority and the Australian Curriculum and Reporting Authority. More detailed Subject Outlines and information on types of assessment can be found via the following link: <https://my.somerville.qld.edu.au/Curriculum/Subjects/Pages/default.aspx>.

Summary of Reportable Outcomes

Key Strengths	lists the concepts and skills taught that your daughter has demonstrated as an area of proficiency
Areas for Consolidation	lists the key concepts and skills taught that your daughter could develop to achieve greater proficiency
Recommendations	provides actions and strategies that may support your daughter's future learning
Learning Behaviours	indicates the consistency with which your daughter has demonstrated selected Learning Behaviours

Learning Behaviours relate to your daughter's academic application. These encompass mindsets and intellectual habits that nurture effective learning. Subjects report on those most relevant to units studied. Feedback indicates the consistency with which an individual student demonstrates selected Learning Behaviours. A list of Learning Behaviours is available in MySomerville/Academic/Curriculum.

Demonstrated Learning Behaviours

Always	The student demonstrates highly developed, positive learning behaviours that support her learning at all times.
Usually	The student usually demonstrates positive learning behaviours that support her learning.
Sometimes	The student sometimes demonstrates positive learning behaviours that support her learning.
Rarely	The student needs to develop, and demonstrate more frequently, learning behaviours that support her learning.

Criteria and Standards

Senior subjects apply standards and criteria derived from QCAA syllabuses for Years 11-12 and Year 10 Academic Course Outlines. In each subject, a standard of attainment is awarded for each criterion on a fifteen point scale (E- to A+). Criteria assessed and Standards attained are included in Year 11 and 12 subject reports. Year 10 reports include an overall Level of Achievement only due to the transition to QCAA's new assessment processes in Queensland.

Levels of Achievement

The standards of attainment for subject criteria are then used to determine a student's Level of Achievement. Students receive a Level of Achievement each semester for each subject, with the exception of Core Physical Education. The table below provides information for a student's Level of Achievement in each subject.

Level of Achievement Codes

- A** The student demonstrates consistently a very high level of knowledge, skills and understandings and is able to apply them independently to a wide range of contexts.
- B** The student demonstrates a high level of knowledge, skills and understandings and is able to apply them independently to most contexts.
- C** The student demonstrates a sound level of knowledge, skills and understandings and is able to apply them, with guidance, to some contexts.
- D** The student demonstrates limited knowledge, skills and understandings and is able to apply them, with support, to some contexts.
- E** The student requires extensive support to demonstrate some knowledge, skills and understandings.
- NA** Insufficient evidence to make a judgment.

(+) High () Medium (-) Low

Distribution of Levels of Achievement

The report shows your daughter's achievement in subjects studied in comparison to that of other students in her Year level. This information is displayed as a graph, showing the number of students in each Level of Achievement. The graph will not be displayed for subjects studied by small cohorts.

English

Students completed a unit on dystopian fiction, writing a feature article and delivering a seminar presentation based on the novel, '1984'. The semester culminated in a study of 'The Great Gatsby' and the dramatic monologue.

Key Strengths

- demonstrating an understanding of subject matter and of the critical concepts underpinning the course
- creating a well-structured and evocative narrative
- writing convincingly in role as a journalist

Areas for Consolidation

- expressing ideas with clarity, accuracy and sophistication
- marshalling detailed evidence to support assertions
- displaying an appreciation of textual nuance

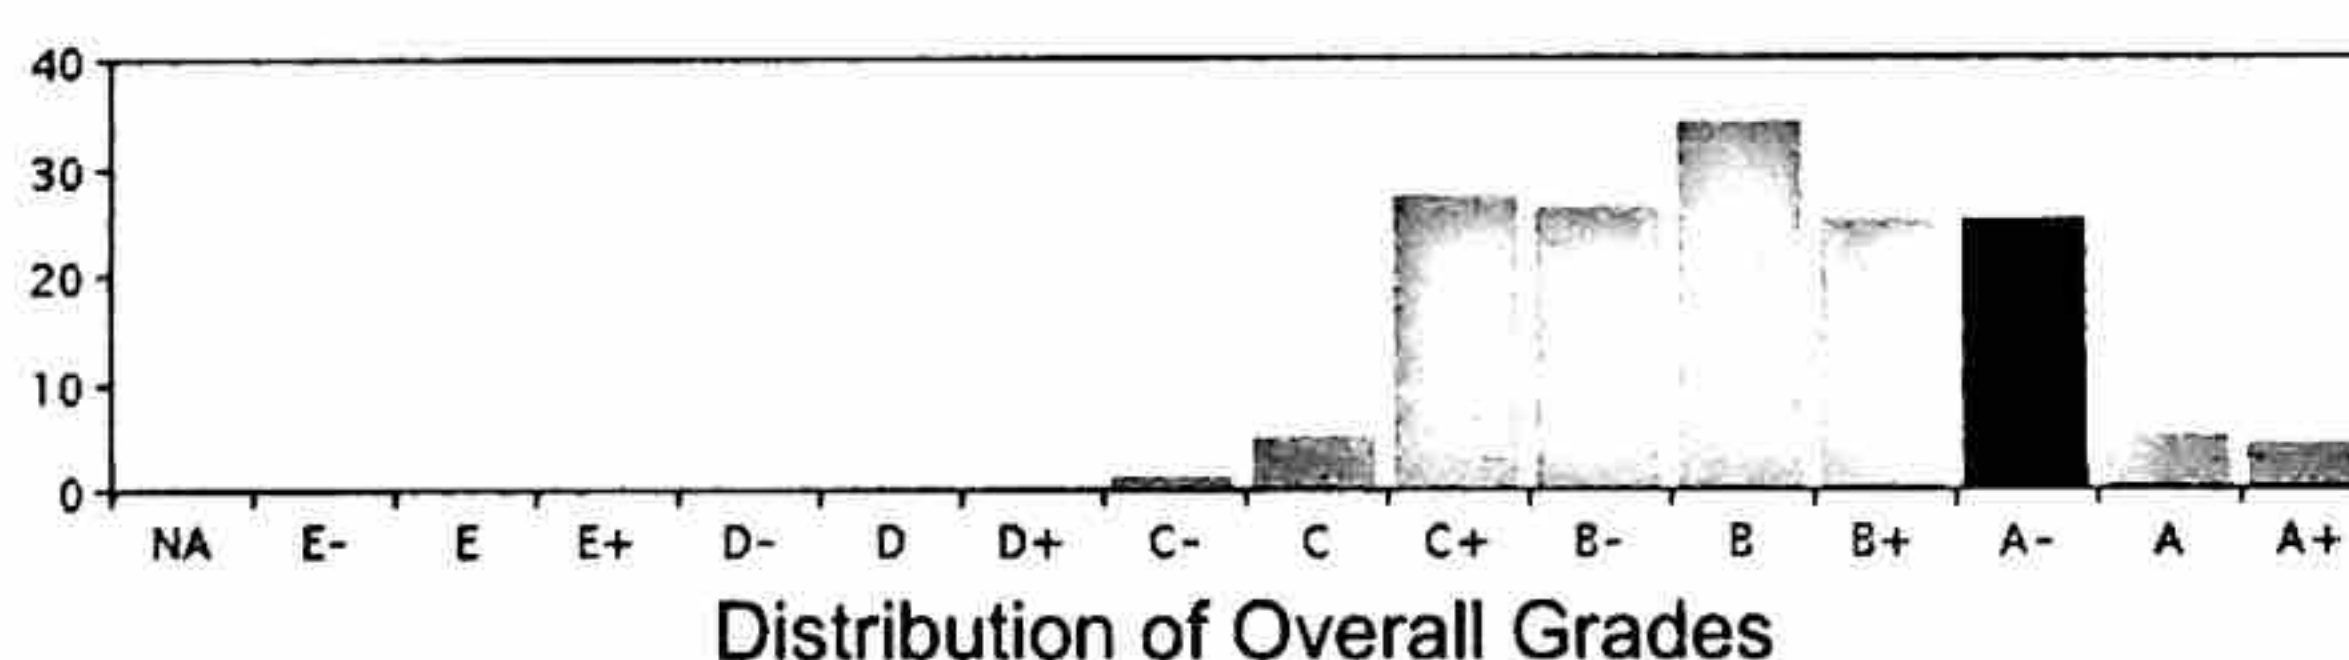

Recommendations

Anastasia should continue to build upon her considerable repertoire of skills in English. Efforts to broaden her vocabulary and her intellectual frame of reference would benefit her.

Positive engagement with learning	Rarely	Sometimes	Usually	Always
Participates Actively in Learning Activities				✓
Approaches Problems Independently			✓	
Seeks to Understand				✓
Takes Intellectual Risks			✓	

Effective self-regulation of learning	Rarely	Sometimes	Usually	Always
Maintains Focus				✓

Reflects on Learning				✓
Seeks and Applies Feedback Appropriately				✓

Subject Results	NA	E-	E	E+	D-	D	D+	C-	C	C+	B-	B	B+	A-	A	A+
Speaking														✓		
Writing														✓		
Level of Achievement														✓		

Mathematics B

This semester, the focus was on the study of periodic, exponential and logarithmic functions, and the development of calculus techniques in a range of contexts. Practical applications included financial mathematics and the use of integration and approximation techniques to find area.

**Key Strengths**

- recalling, selecting and applying mathematical procedures to routine problems and contexts
- choosing and implementing appropriate strategies to analyse and solve problems
- identifying suitable assumptions and explaining the effects of the assumptions
- communicating using appropriate mathematical terms and representations

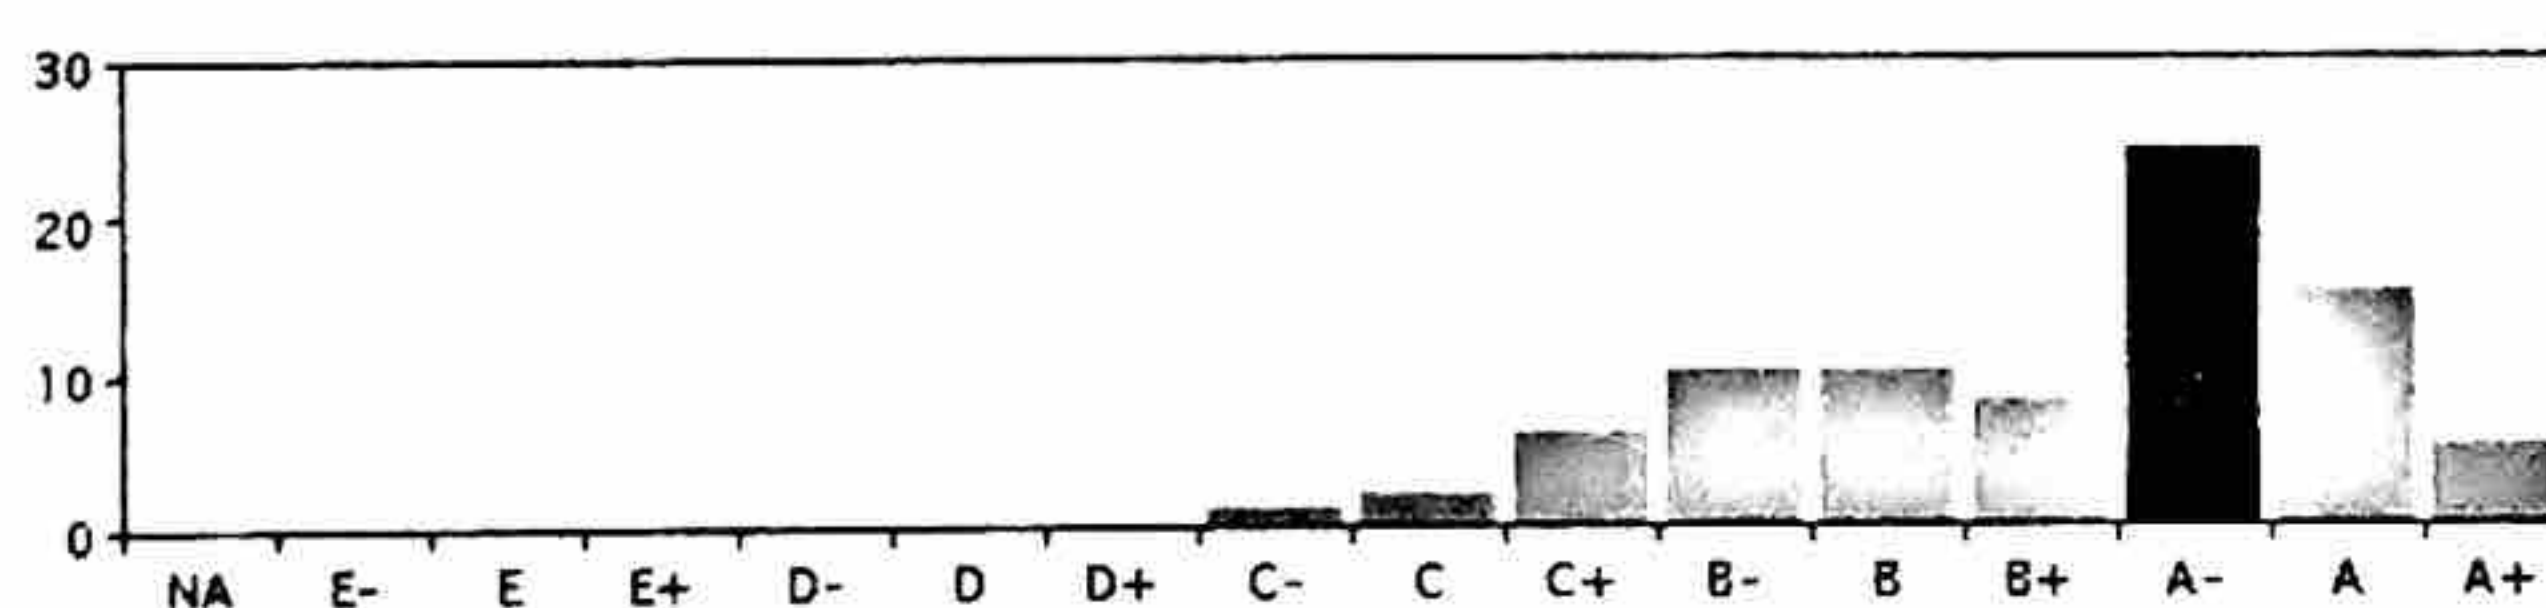

Areas for Consolidation

- checking work to improve accuracy
- organising and presenting information in a variety of forms

Recommendations

Anastasia has worked well this semester and is encouraged to maintain this effort next semester. Continued good use of class time, regular personal revision and careful attention to new concepts should help her gain higher standards across the mathematical topics studied. Anastasia is encouraged to seek feedback on the solutions that are generated for problems.

Positive engagement with learning					Rarely	Sometimes	Usually	Always												
Is an Enthusiastic and Positive Learner								✓												
Approaches Problems Independently								✓												
Open to New Ideas, Approaches, Challenges								✓												
Seeks to Understand								✓

Knowledge & Procedures																			✓	
Modelling & Problem Solving																		✓		
Communication & Justification																		✓		
Level of Achievement																		✓		

Distribution of Overall Grades

Mathematics C

This semester, the focus was on applications of matrices and vectors, complex numbers, integral calculus and numerical methods, and differential equations. Skills developed included solving problems in various contexts, and building and analysing mathematical models.

Key Strengths

- applying strategies that are routinely practised in class
- selecting and implementing appropriate strategies to analyse and solve problems
- investigating alternative methods to solving mathematical problems

Areas for Consolidation

- identifying suitable assumptions and explaining the effects of the assumptions
- answering questions efficiently and effectively
- conferencing with the teacher regularly to seek opportunities to extend their understanding of problem-solving techniques

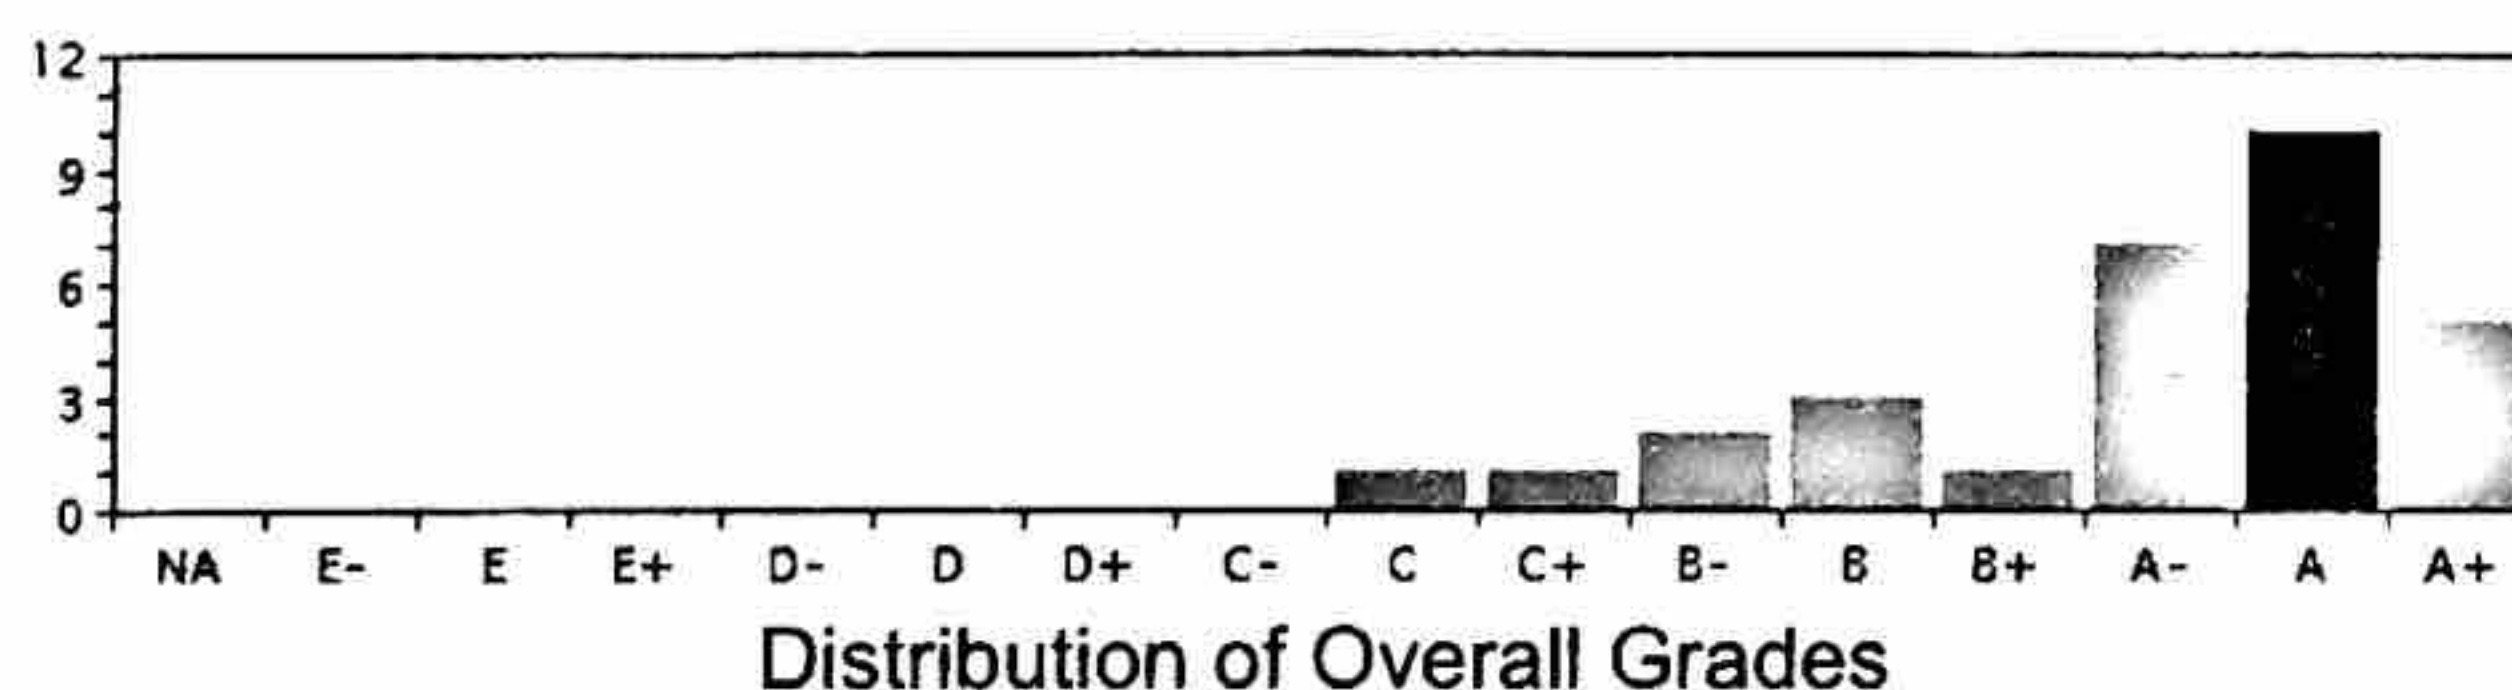

Recommendations

Anastasia has worked steadily to achieve a pleasing result and is encouraged to continue in the same manner next semester. She should try to incorporate feedback provided in class to develop more sophisticated solutions to problems. Further consolidation of modelling and problem-solving questions should enhance Anastasia's performance.

Positive engagement with learning	Rarely	Sometimes	Usually	Always
Approaches Problems Independently				✓
Is an Enthusiastic and Positive Learner				✓
Open to New Ideas, Approaches, Challenges				✓
Seeks to Understand				✓

Effective self-regulation of learning	Rarely	Sometimes	Usually	Always
Maintains Focus				✓
Contributes to Collaborative Tasks				✓
Completes Set Tasks				✓
Plans and Prepares Appropriately				✓

Subject Results	NA	E-	E	E+	D-	D	D+	C-	C	C+	B-	B	B+	A-	A	A+
Knowledge & Procedures															✓	
Modelling & Problem Solving														✓		
Communication & Justification															✓	
Level of Achievement															✓	

Accounting

This semester, the focus was on preparing end-of-year financial reports and assessing a business's profitability, financial stability and management effectiveness using financial ratios. In addition, students undertook a study of personal finance and investment to construct a magazine article.

Key Strengths

- describing and explaining accounting terminology and concepts
- applying accrual accounting concepts to create balance day adjustments
- substantiating decisions when advising stakeholders concerning investing options
- organising ideas logically when formulating structured arguments

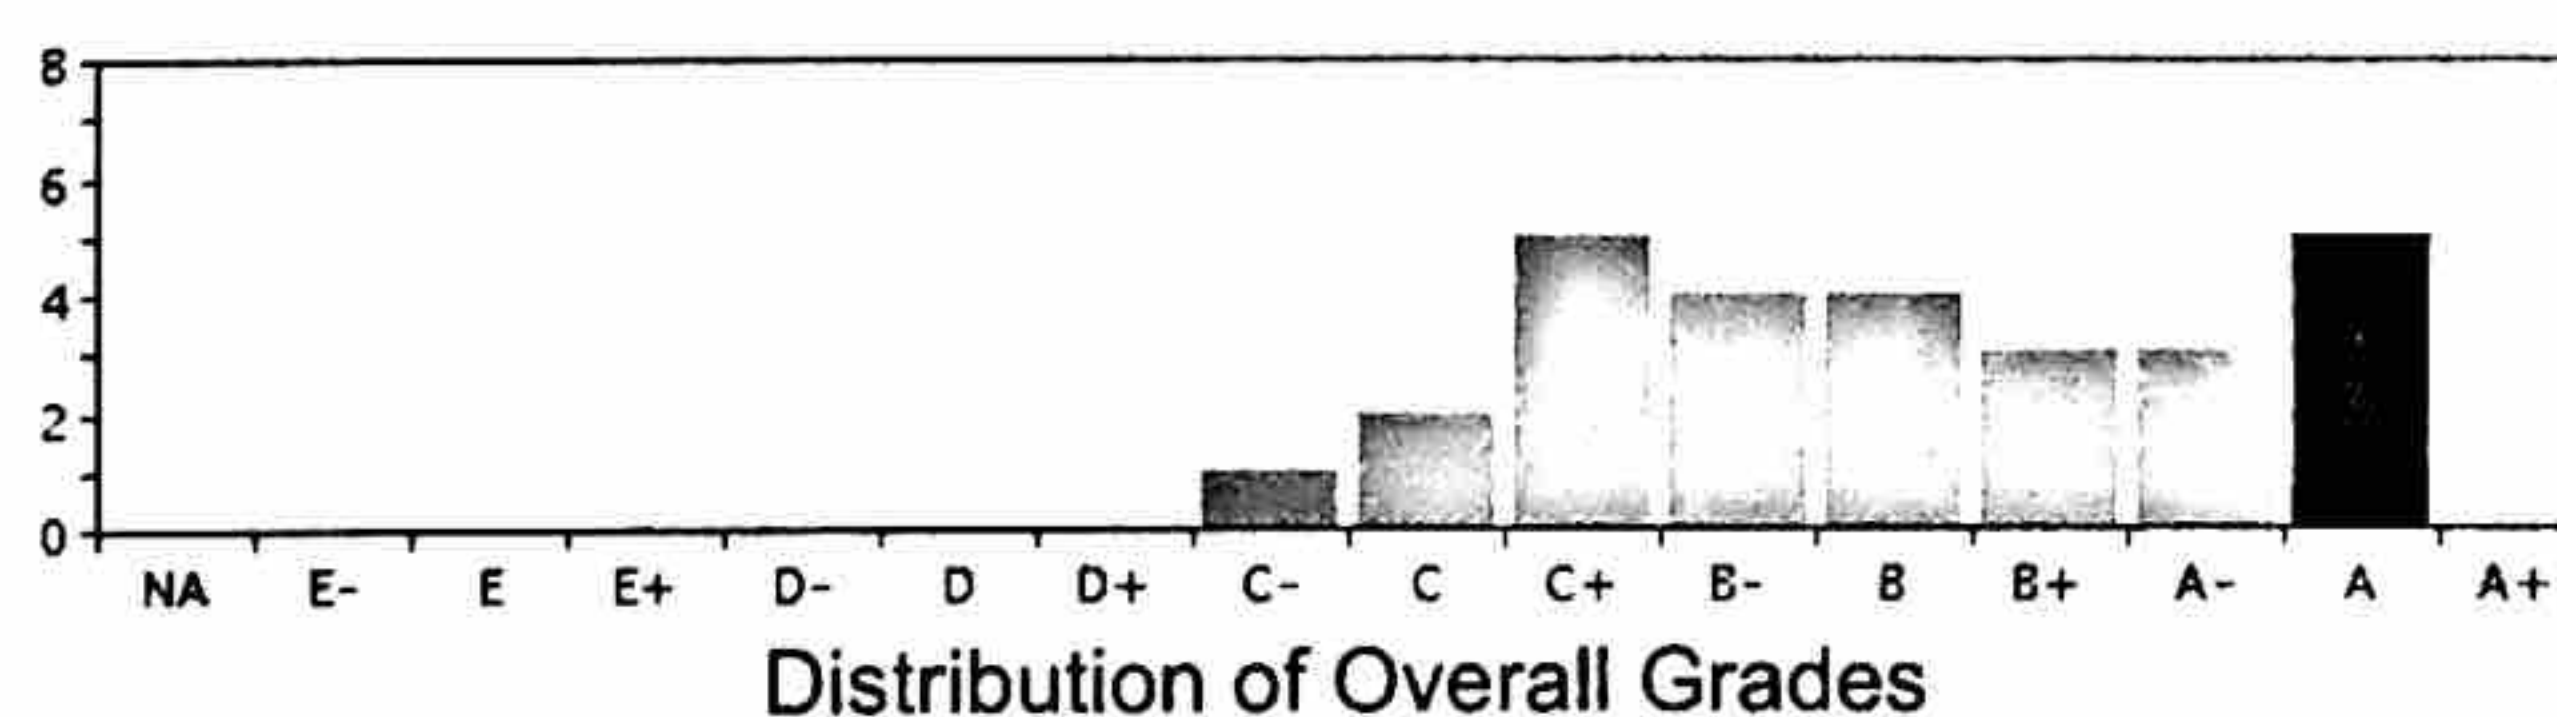

Areas for Consolidation

- selecting and organising relevant accounting data and information when preparing financial reports
- using relevant accounting data and information to analyse and interpret a firm's performance

Recommendations

Anastasia is to be commended for her excellent results in this subject; however, she should implement the following advice. Completing all analytical and decision-making activities and asking the teacher for guidance should help her develop reasoning process skills. Anastasia should continue to ask relevant questions and contribute to discussions.

Positive engagement with learning		Rarely	Sometimes	Usually	Always												
Is an Enthusiastic and Positive Learner				✓													
Approaches Problems Independently			✓														
Persists with Learning Challenges				✓													
Effective self-regulation of learning		Rarely	Sometimes	Usually	Always												
Maintains Focus					✓												
Completes Set Tasks					✓												
Actively Listens and Responds					✓												
Strives for Accuracy and Precision					✓												
Subject Results		NA	E-	E	E+	D-	D	D+	C-	C	C+	B-	B	B+	A-	A	A+
Knowledge and Procedural Practices																	✓
Interpretation & Evaluation															✓		
Applied Practical Processes																✓	
Level of Achievement																✓	

Chemistry

This semester allowed students to investigate the chemical relationships between electrodes, electrolytes and voltages of galvanic cells in series in an Extended Experimental Investigation. Polymer chemistry of plastics and fibres was studied to gain a comprehensive understanding of both structure and function.

Key Strengths

- planning and managing a safe and valid Extended Experimental Investigation
- identifying relationships and patterns in primary experimental data
- reproducing valid chemistry facts, formulae, procedures and concepts
- evaluating simple chemical relationships evident in supervised assessment given information

Areas for Consolidation

- justifying decisions, outcomes and recommendations based on secondary data and given information
- evaluating complex chemical relationships evident in supervised assessment given information

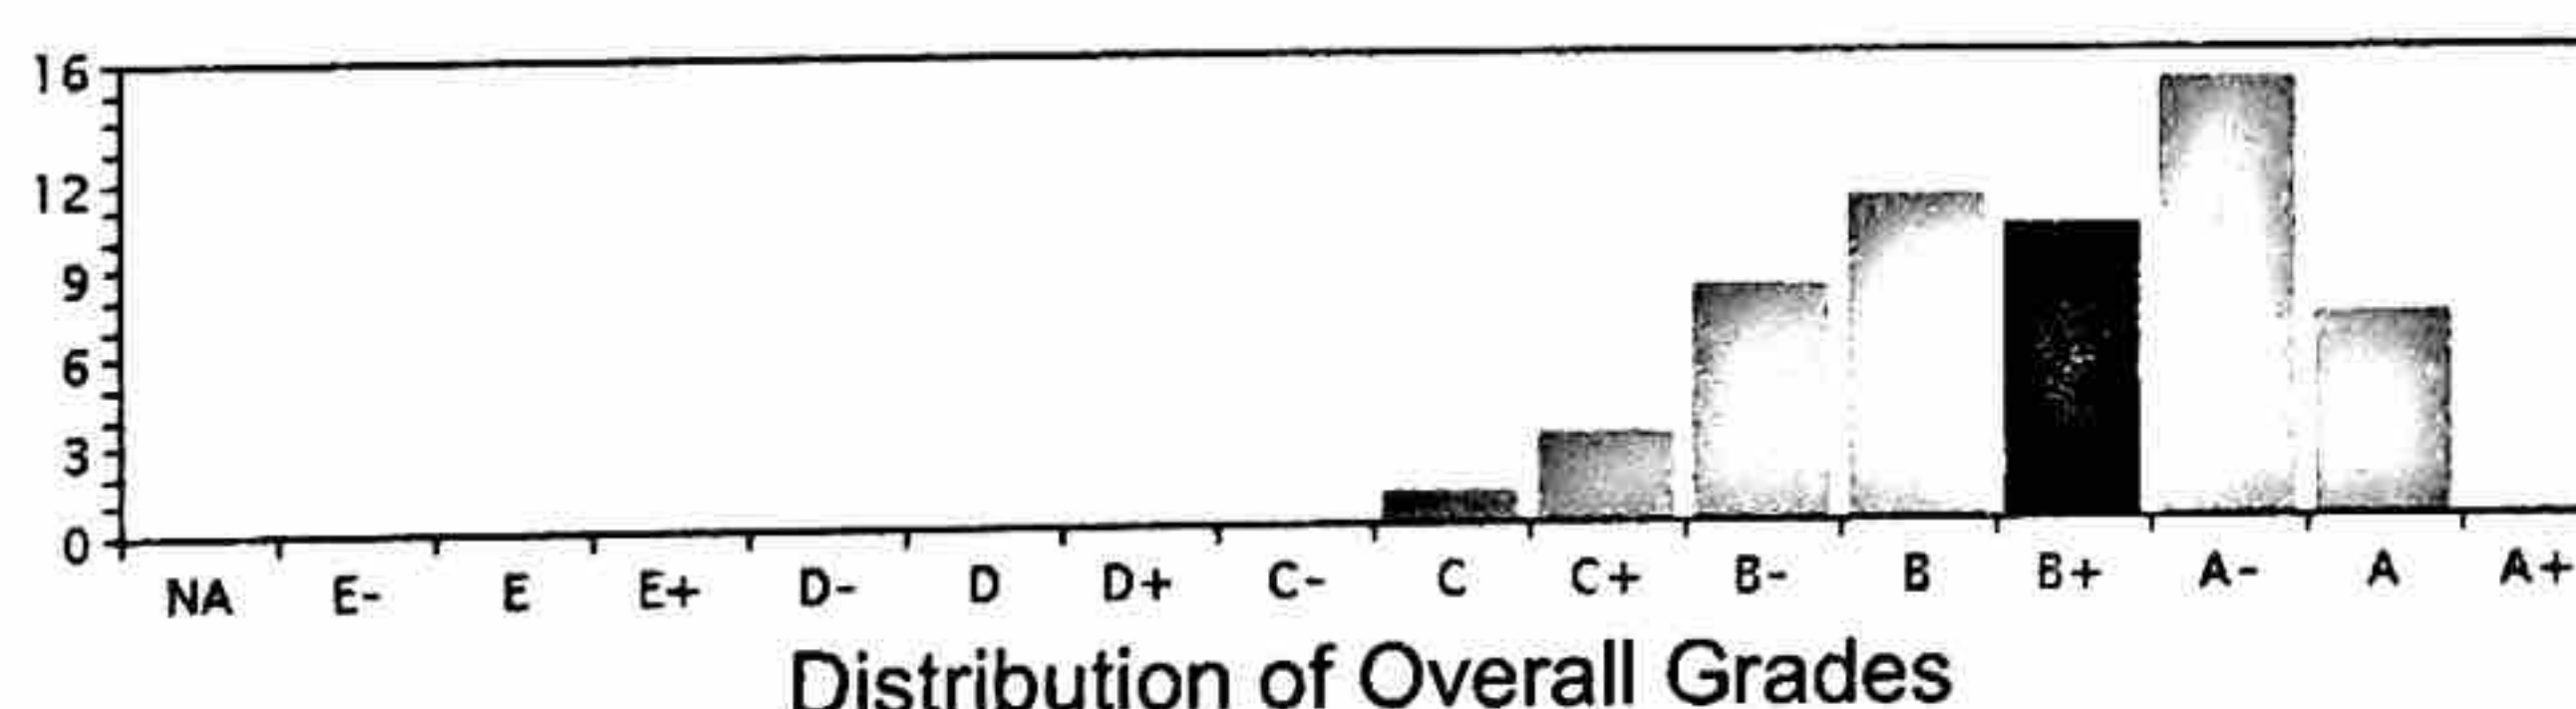

Recommendations

Anastasia is encouraged to make the best possible use of class time and practical tasks. It is recommended that she review her class theory and practical notes each night and check her understanding. Completing suggested or prescribed review questions and homework tasks should help to improve her learning outcomes.

Positive engagement with learning	Rarely	Sometimes	Usually	Always
Participates Actively in Learning Activities				✓
Approaches Problems Independently			✓	
Open to New Ideas, Approaches, Challenges			✓	
Strives for Improvement				✓

Effective self-regulation of learning	Rarely	Sometimes	Usually	Always
Maintains Focus			✓	
Plans and Prepares Appropriately				✓
Reflects on Learning			✓	
Seeks and Applies Feedback Appropriately				✓

Knowledge & Conceptual Understanding													✓			
Investigative Processes														✓		
Evaluating & Concluding													✓			
Level of Achievement													✓			

Physics

This semester, the focus was on investigating complex electronic circuits, magnetism, motors, generators, electromagnetic induction, alternating current and transformers. Students completed their independent Extended Experimental Investigation on electronics and completed two written examinations.

Key Strengths

- reproducing and interpreting complex or challenging concepts, theories and principles
- linking and applying algorithms, concepts, principles and theories to find solutions in complex or challenging situations
- explaining scenarios and possible outcomes with discussion of conclusions and recommendations
- formulating justified hypotheses which inform effective design, refinement and management of investigations
- analysing primary and secondary data to identify relationships between patterns, trends, errors and anomalies

Areas for Consolidation

- comparing and explaining complex concepts, processes and phenomena in Physics
- analysing complex inter-relationships that exist between Physics principles
- concluding and evaluating physical situations in a supervised assessment

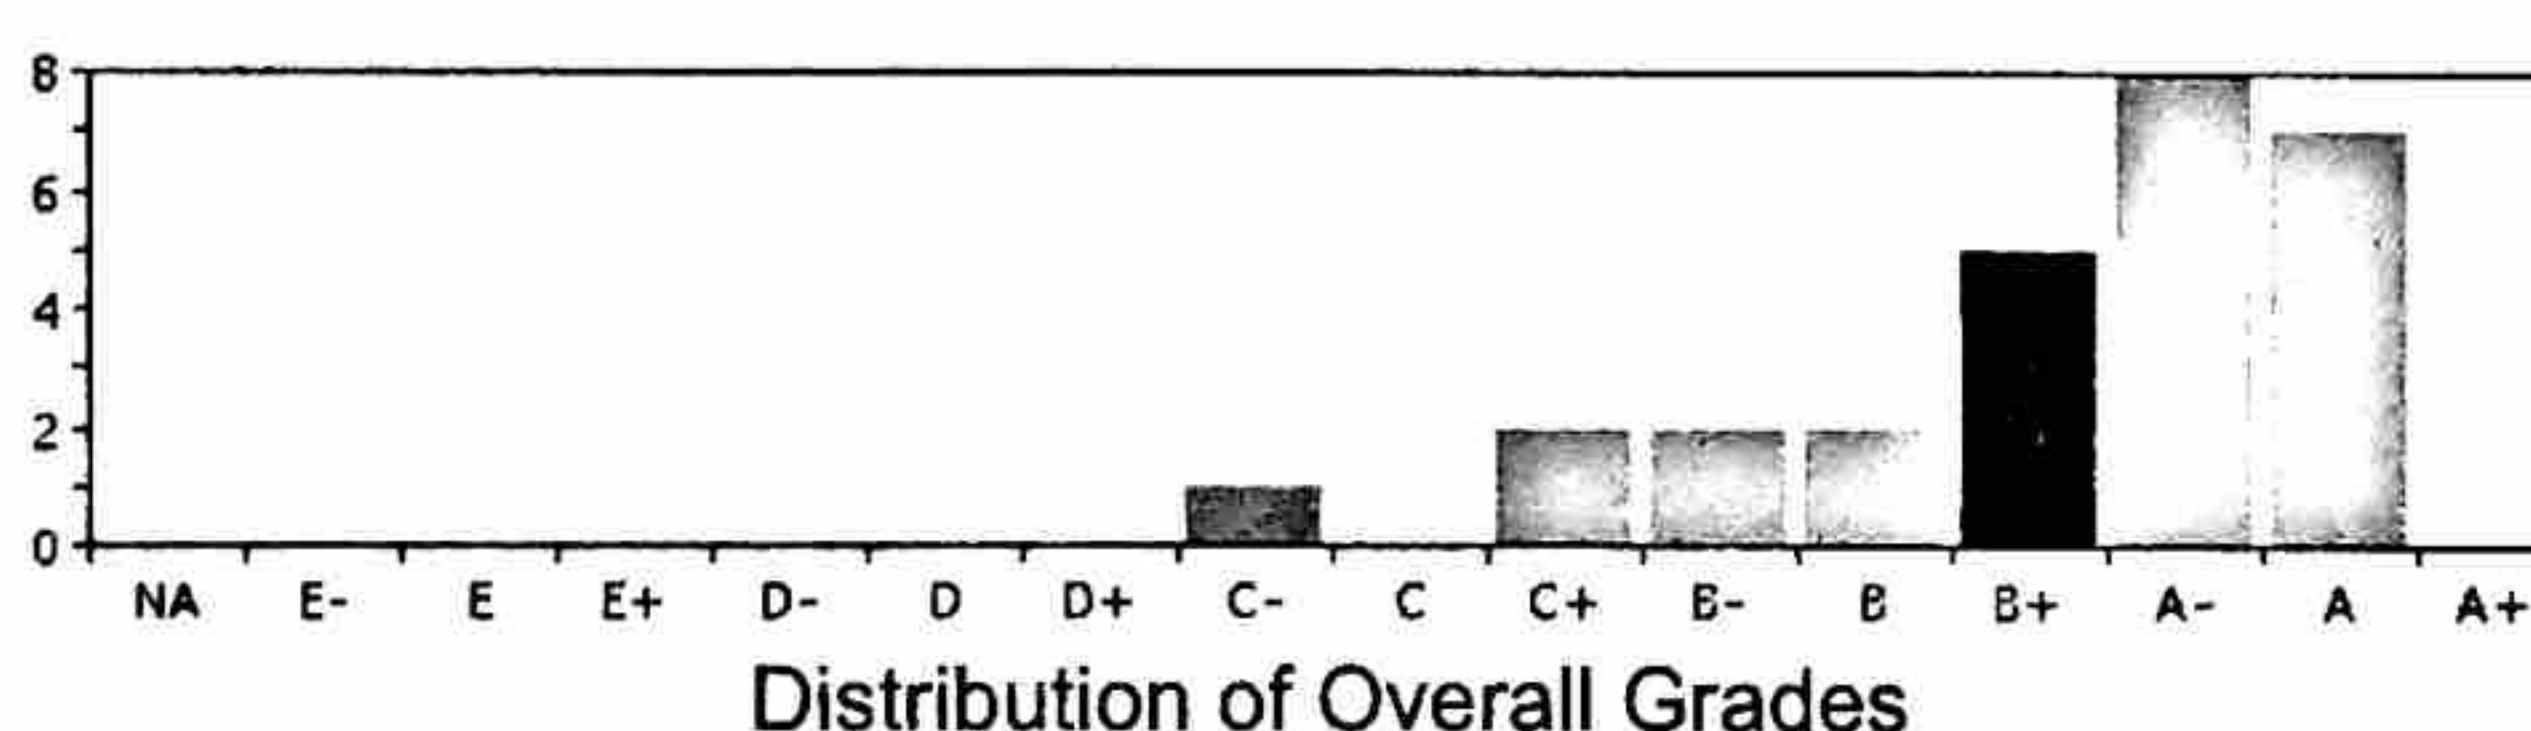

Recommendations

Anastasia is encouraged to continue reviewing class work regularly. She should continue to be organised and prepared for all lessons. It is recommended that Anastasia challenge herself by seeking out complex and unrehearsed problems.

Positive engagement with learning	Rarely	Sometimes	Usually	Always
Participates Actively in Learning Activities				✓
Approaches Problems Independently				✓
Open to New Ideas, Approaches, Challenges				✓
Strives for Improvement				✓

Effective self-regulation of learning	Rarely	Sometimes	Usually	Always
Maintains Focus				✓
Plans and Prepares Appropriately			✓	
Reflects on Learning				✓
Seeks and Applies Feedback Appropriately				✓

Subject Results	NA	E-	E	E+	D-	D	D+	C-	C	C+	B-	B	B+	A-	A	A+
Knowledge & Conceptual Understanding												✓				
Investigative Processes														✓		
Evaluating & Concluding												✓				
Level of Achievement													✓			

Christian Education

This semester the focus was on exemplary Christian role models, the Biblical teaching on self-sacrifice and the role of the Christian faith in motivating a life of service. Through evaluating various worldviews and reflecting on the teachings of the book of Ecclesiastes, students developed a personal statement of belief.

Key Strengths

- presenting a multimodal or oral task to an audience in an engaging manner
- analysing information from a variety of sources when researching a topic
- contributing regularly to class discussion with confidence and clarity

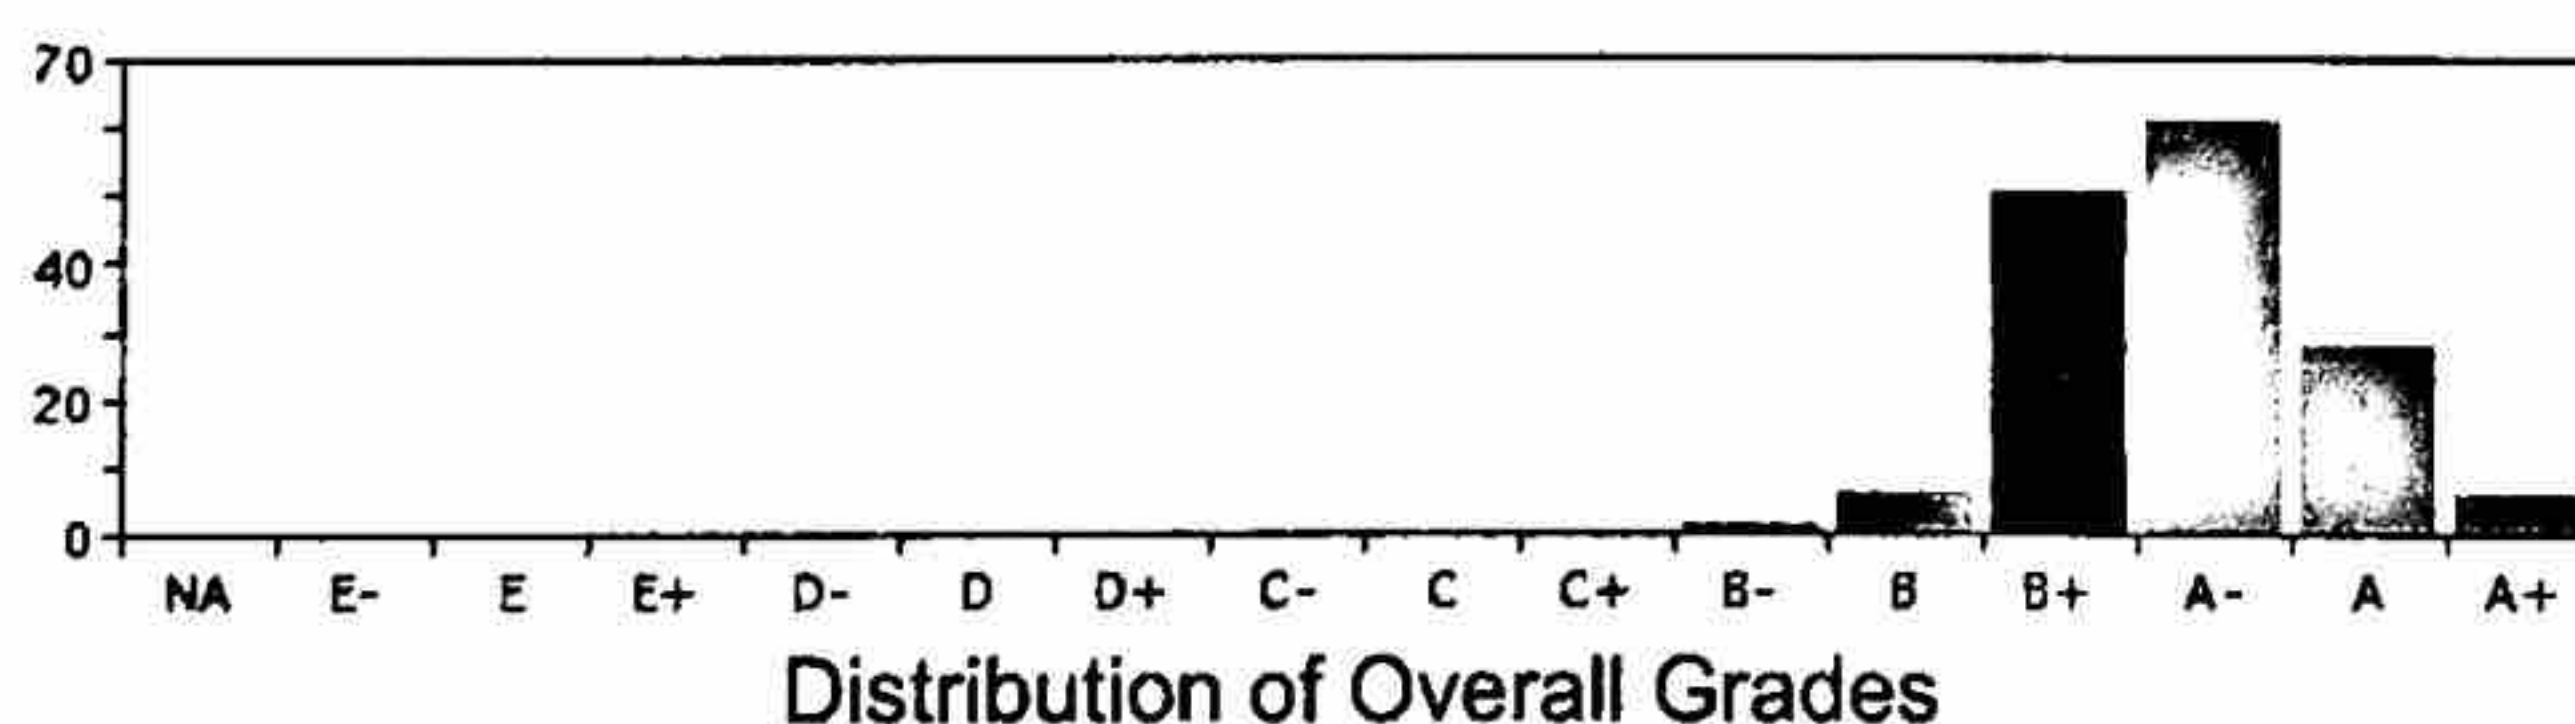

Areas for Consolidation

- analysing complex information at a sophisticated level
- using powerful examples as evidence for arguments
- consolidating knowledge from classroom activities

Positive engagement with learning	Rarely	Sometimes	Usually	Always
Participates Actively in Learning Activities			✓	
Seeks to Understand				✓

Effective self-regulation of learning	Rarely	Sometimes	Usually	Always
Contributes to Collaborative Tasks				✓
Plans and Prepares Appropriately			✓

Knowledge & Research													✓			
Participation & Group Work														✓		
Understanding & Reflection													✓			
Communication & Creativity													✓			
Level of Achievement													✓			

Anastasia Marea Kondos

Miss K Bullion

Core Physical Education

This semester, students participated in a variety of ball games and general fitness activities. Basic skills in these areas were implemented in modified environments.

Positive engagement with learning	Rarely	Sometimes	Usually	Always
Participates Actively in Learning Activities				✓
Is an Enthusiastic and Positive Learner				✓
Approaches Problems Independently				✓

Effective self-regulation of learning	Rarely	Sometimes	Usually	Always
Contributes to Collaborative Tasks				✓
Plans and Prepares Appropriately				✓
Supports the Learning of Others				✓

Pastoral Care

Somerville House takes a positive approach to pastoral care with a focus on relationships, emotions, thinking, engagement, self-esteem, achievement, academic resilience and purpose. Strategies vary according to the age and maturity of the students and aim to improve general wellbeing, an attitude of service and gratitude, and the development of leadership, goal setting, time management and study skills.

Interactions	Rarely	Sometimes	Usually	Always
Shows respect and consideration for others				✓
Supports her peers				✓
Organisation	Rarely	Sometimes	Usually	Always
Takes care of personal belongings and other property				✓
Exhibits reliability				✓
Demonstrates punctuality			✓	
Behaviour	Rarely	Sometimes	Usually	Always
Displays appropriate behaviour				✓
Shows initiative				✓
Supports service activities				✓
Expresses ideas and participates positively				✓
Personal Presentation	Rarely	Sometimes	Usually	Always
Takes pride in her personal appearance				✓
Wears her School uniform correctly				✓

Senior School Report

Semester 2

The information contained in this report is a summary of your daughter's academic progress for each subject. Feedback provided focusses on her key strengths and areas requiring consolidation; recommendations for improvement; and learning behaviours. Importantly, co-curricular involvement and social development are also included in this report.

A written report, however, cannot give a complete picture of a student's progress. Parents are welcome to discuss matters concerning their daughter's progress and welfare at designated parent-teacher-student meetings, and/or directly with the teacher concerned at mutually convenient times. In the Senior School, each student is considered to be an individual who will develop according to her abilities and opportunities. A student who has worked to the best of her ability should be congratulated regardless of the levels achieved.

Teaching and assessment programs in the Senior School are informed by the requirements of the Queensland Curriculum and Assessment Authority and the Australian Curriculum and Reporting Authority. More detailed Subject Outlines and information on types of assessment can be found via the following link: <https://my.somerville.qld.edu.au/Curriculum/Subjects/Pages/default.aspx>.

Summary of Reportable Outcomes

Key Strengths	lists the concepts and skills taught that your daughter has demonstrated as an area of proficiency
Areas for Consolidation	lists the key concepts and skills taught that your daughter could develop to achieve greater proficiency
Recommendations	provides actions and strategies that may support your daughter's future learning
Learning Behaviours	indicates the consistency with which your daughter has demonstrated selected Learning Behaviours

Learning Behaviours relate to your daughter's academic application. These encompass mindsets and intellectual habits that nurture effective learning. Each subject reports on those most relevant to units studied during the semester. Feedback indicates the consistency with which an individual student demonstrates selected Learning Behaviours. A full list of Learning Behaviours is available in MySomerville/Academic/Curriculum.

Demonstrated Learning Behaviours

Always	The student demonstrates highly developed, positive learning behaviours that support her learning at all times.
Usually	The student usually demonstrates positive learning behaviours that support her learning.
Sometimes	The student sometimes demonstrates positive learning behaviours that support her learning.
Rarely	The student needs to develop, and demonstrate more frequently, learning behaviours that support her learning.

Criteria and Standards

Senior subjects apply standards and criteria derived from QCAA's syllabuses for Years 11-12 and the Somerville House Year 10 Academic Course Outlines. A standard of attainment is awarded for each criterion in each subject and is presented on a fifteen point scale (E- to A+). Criteria assessed and Standards attained are included in each subject report.

Levels of Achievement

The standards of attainment for subject criteria are then used to determine a student's Level of Achievement. Students receive a Level of Achievement each semester for each subject, with the exception of Core Physical Education. The table below provides information for a student's Level of Achievement in each subject, as well as the standards of attainment for the specific criteria embedded in each subject.

Level of Achievement Codes

- A** The student demonstrates consistently a very high level of knowledge, skills and understandings and is able to apply them independently to a wide range of contexts.
- B** The student demonstrates a high level of knowledge, skills and understandings and is able to apply them independently to most contexts.
- C** The student demonstrates a sound level of knowledge, skills and understandings and is able to apply them, with guidance, to some contexts.
- D** The student demonstrates limited knowledge, skills and understandings and is able to apply them, with support, to some contexts.
- E** The student requires extensive support to demonstrate some knowledge, skills and understandings.
- NA** Insufficient evidence to make a judgment.

(+) High () Medium (-) Low

Distribution of Levels of Achievement

The report shows your daughter's achievement in subjects studied in comparison to that of other students in her Year level at Somerville House. This information is displayed as a graph, showing the number of students in each Level of Achievement.

English

This semester, students studied textual representation, narrative conventions and poetry in units on Victorian and Edwardian literature. They demonstrated their ability to create and evaluate meaning in texts by presenting a monologue in role, writing an analytical essay and creating a newspaper column.

Key Strengths

- demonstrating an understanding of subject matter and of the critical concepts underpinning the course
- producing organised and cohesive responses to texts
- using presentation skills to position and engage an audience

Areas for Consolidation

- developing increasingly complex arguments in response to texts
- expressing ideas with clarity, accuracy and sophistication
- demonstrating an appreciation of how aesthetic features shape meaning in texts

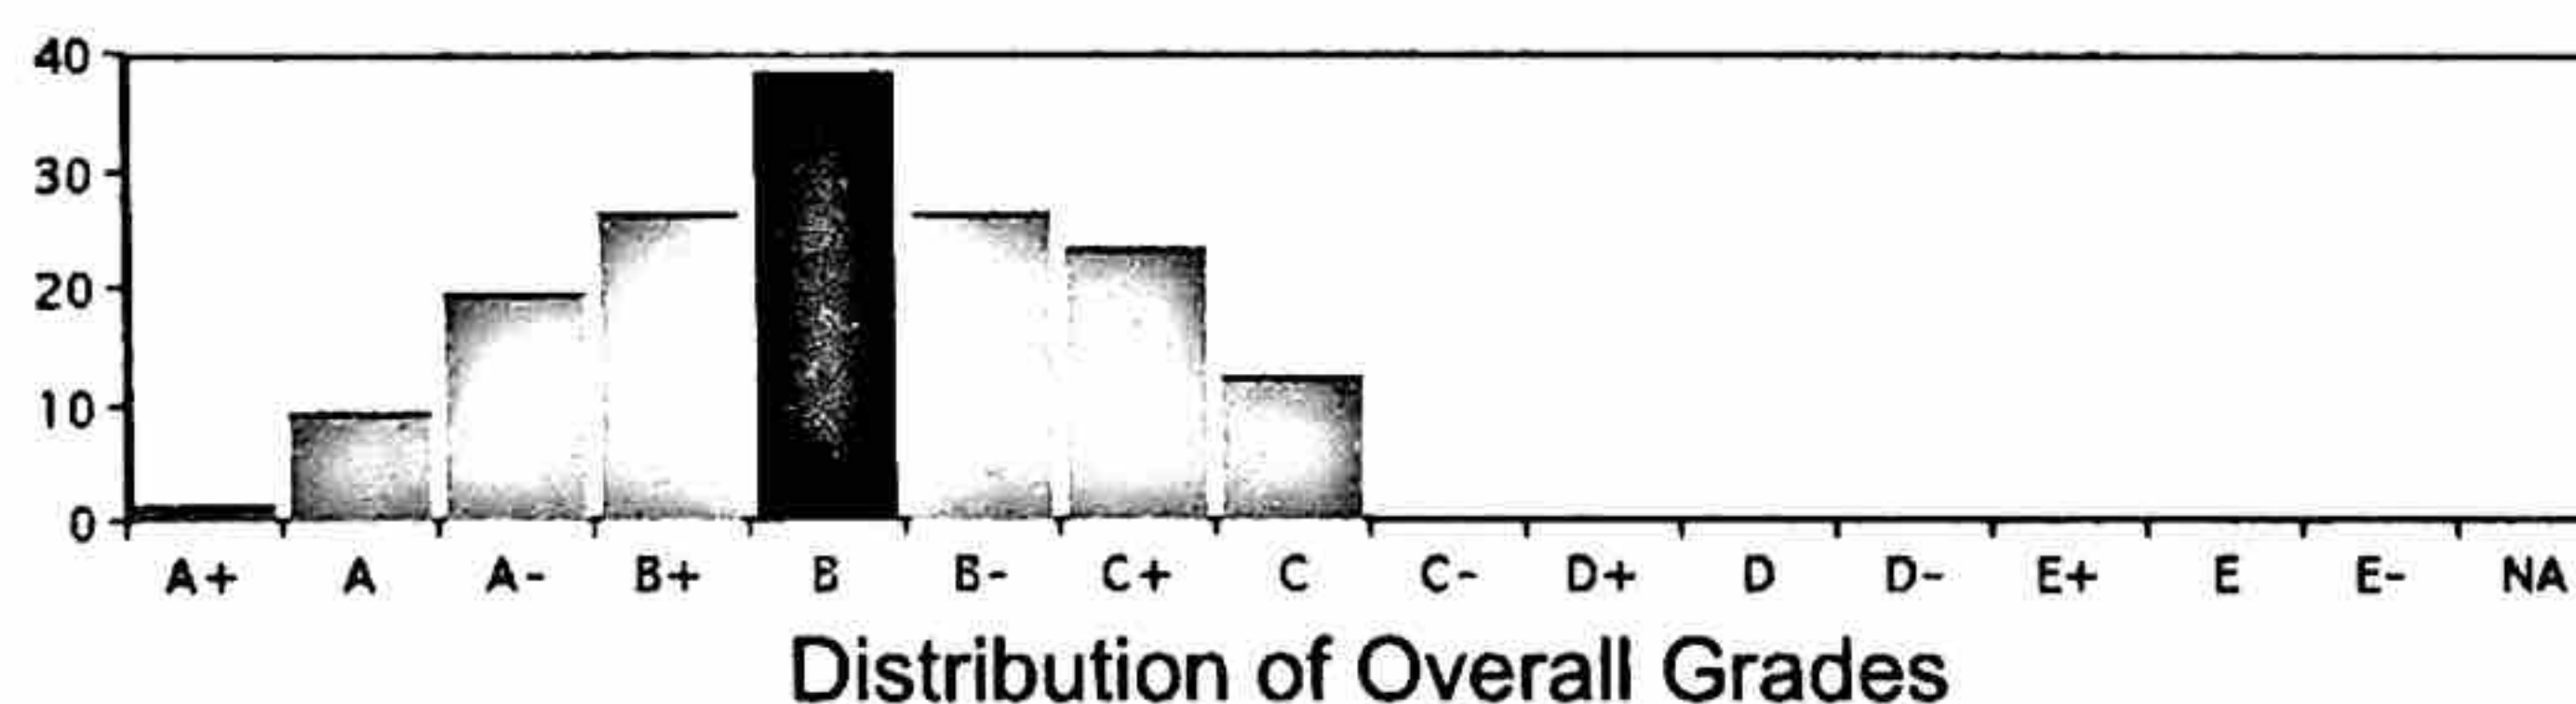

Recommendations

Anastasia is encouraged to use the extension resources on the Intranet in order to deepen her understanding of language and literature. Regular revision, which includes annotating the set text and compiling chapter summaries, would be of benefit. Writing practice essays and submitting drafts for feedback, when task conditions permit, should assist Anastasia to improve her textual analysis.

Positive engagement with learning	Rarely	Sometimes	Usually	Always
Participates Actively in Learning Activities				✓

Level of Achievement Semesters 1 & 2												✓				
Speaking												✓				
Writing													✓			
Level of Achievement												✓				

Mathematics B

This semester, students continued their study of exponential functions, generating models and using these models to solve problems. They developed tools to evaluate the rate of change at a point and the area under a curve. Students used models for binomial experiments to predict probabilities.

Key Strengths

- accurately recalling factual knowledge and concepts
- communicating and justifying procedures, decisions and results
- applying mathematical procedures in unfamiliar situations

Areas for Consolidation

- identifying suitable assumptions and explaining the effects of the assumptions
- justifying the limitations of a model

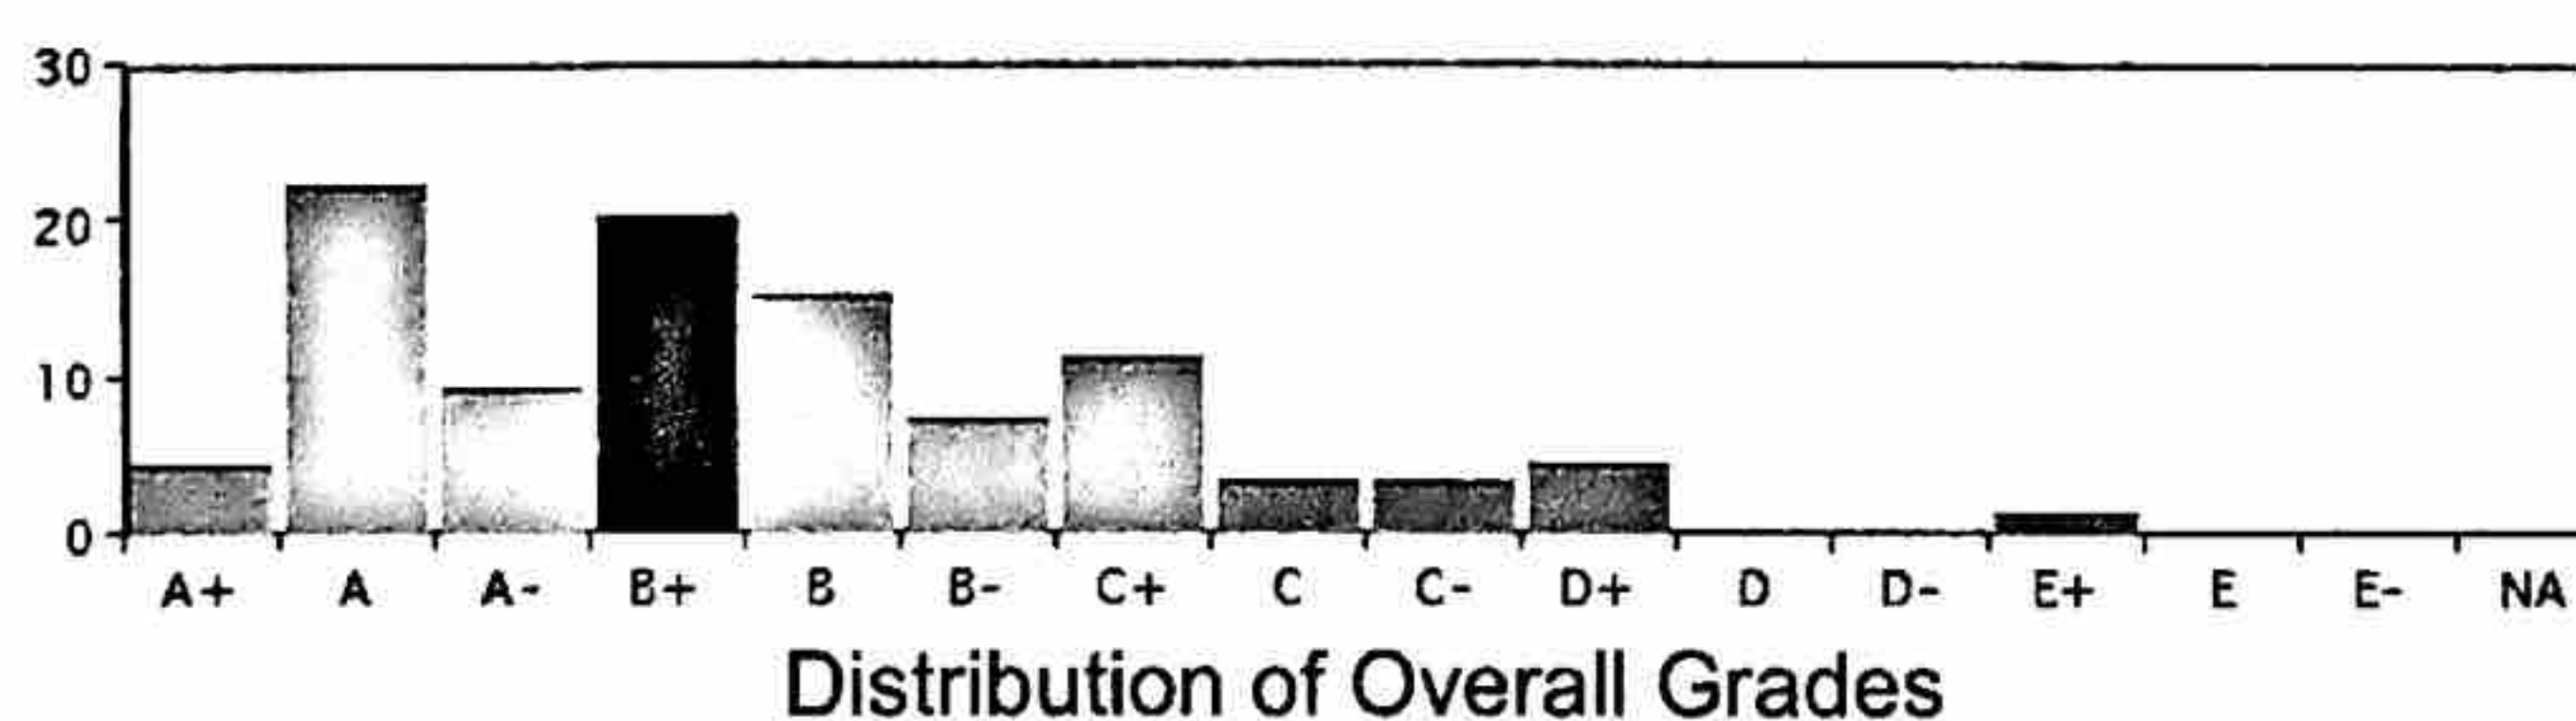

Recommendations

Anastasia is encouraged to maintain her effort next year. She needs to display greater confidence and determination in her attempts to solve more complex problems. More care is needed with communication and justification if Anastasia is to improve her overall results.

Positive engagement with learning	Rarely	Sometimes	Usually	Always

Knowledge & Procedures															✓	
Modelling & Problem Solving													✓			
Communication & Justification													✓			
Level of Achievement													✓			

Mathematics C

This semester, the focus of study was on the introduction of vectors, followed by 'Structures and Patterns', a unit focussing on combinations and permutations. Students continued the study of matrices, dynamics and their applications, enabling further understanding and development of modelling real-life contexts.

Key Strengths

- selecting appropriate strategies to solve unfamiliar problems
- communicating using appropriate mathematical terms and representations
- using technology accurately

Areas for Consolidation

- using permutations and combinations to solve a variety of problems
- checking work to improve accuracy
- justifying the reasonableness of results obtained

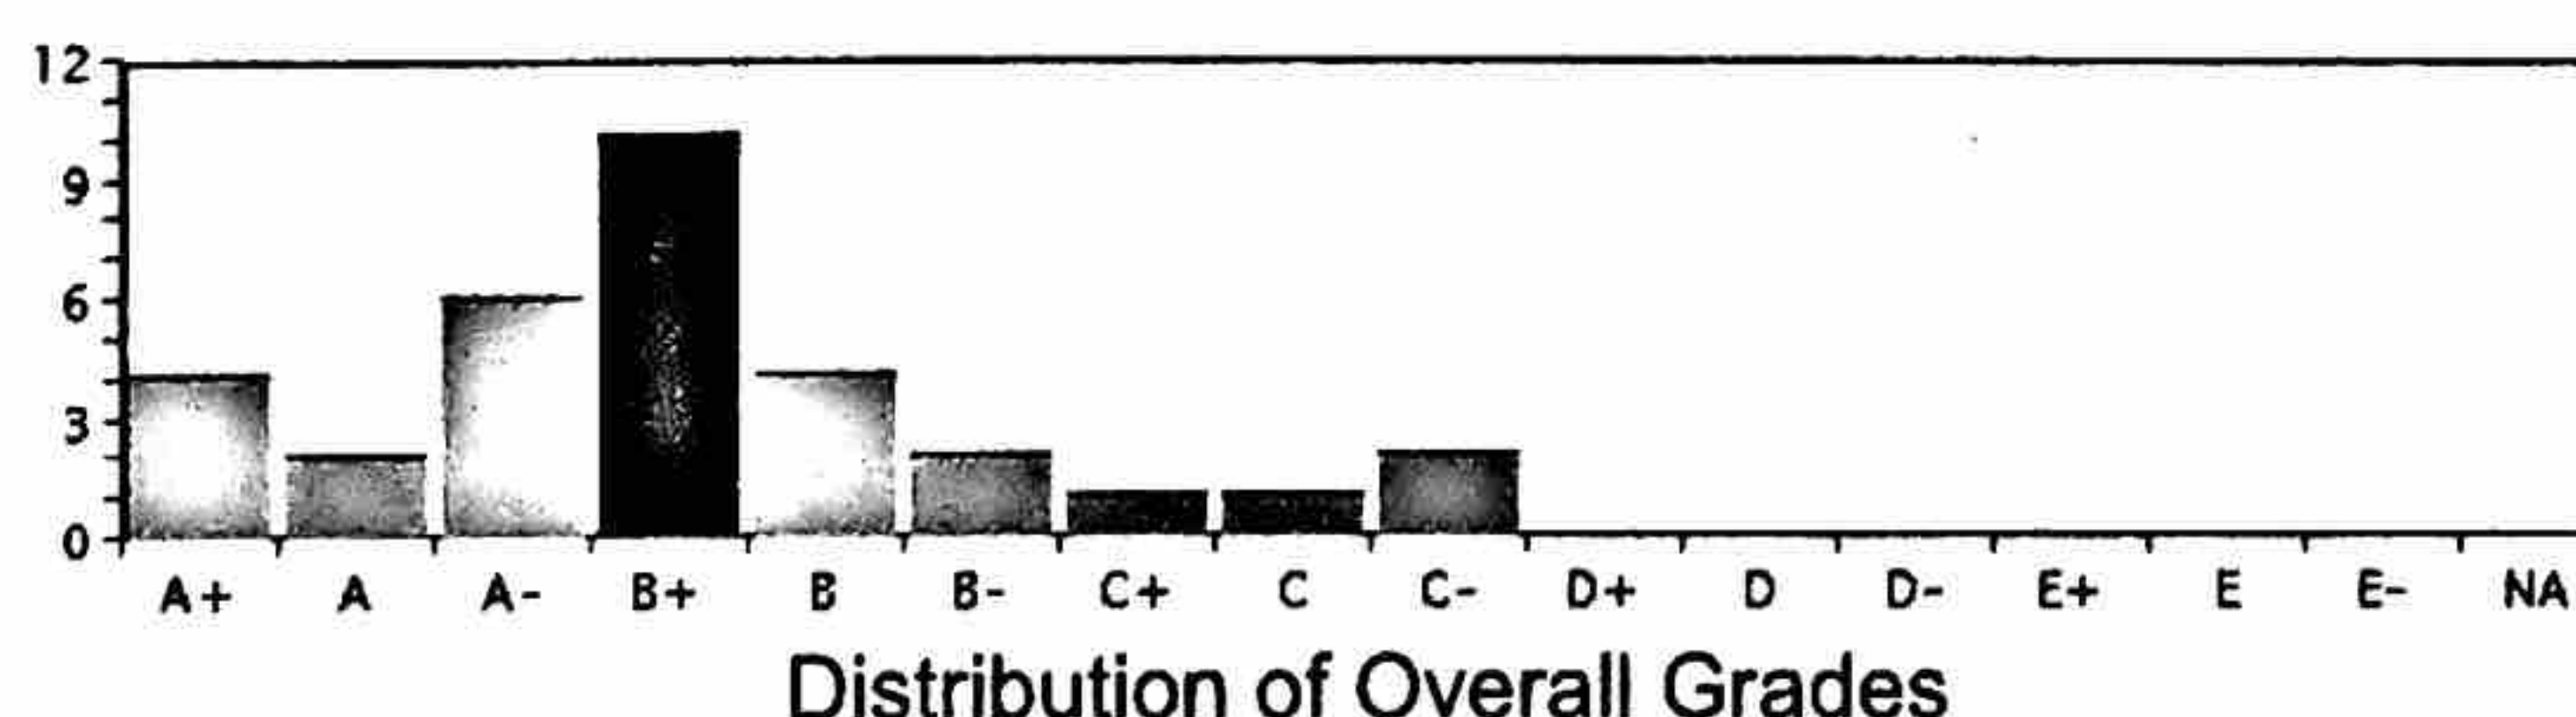

Recommendations

Anastasia is encouraged to continue her efforts in class, and to seek help whenever necessary. She should ensure she regularly practises questions, particularly with applying knowledge in a problem-solving framework. Continued efficient use of class time, regular revision and careful attention to justifications should help Anastasia gain higher standards in the subject.

Level of Achievement												✓				

Accounting

This semester focussed on recording and processing transactions relating to cash, inventories and non-current assets. In addition, the internal controls of businesses were examined in relation to the detection and prevention of errors and fraud.

Key Strengths

- applying core terms, concepts and principles to challenging practical tasks
- describing and explaining accounting concepts and procedures
- recording and processing routine transactions when accounting for inventories
- communicating clearly using correct language conventions, including punctuation, spelling and sentence structure

Areas for Consolidation

- recommending valid practices to ensure adequate controls over business resources
- interpreting data and information when responding to written tasks
- analysing data and information in relation to the internal controls of a business

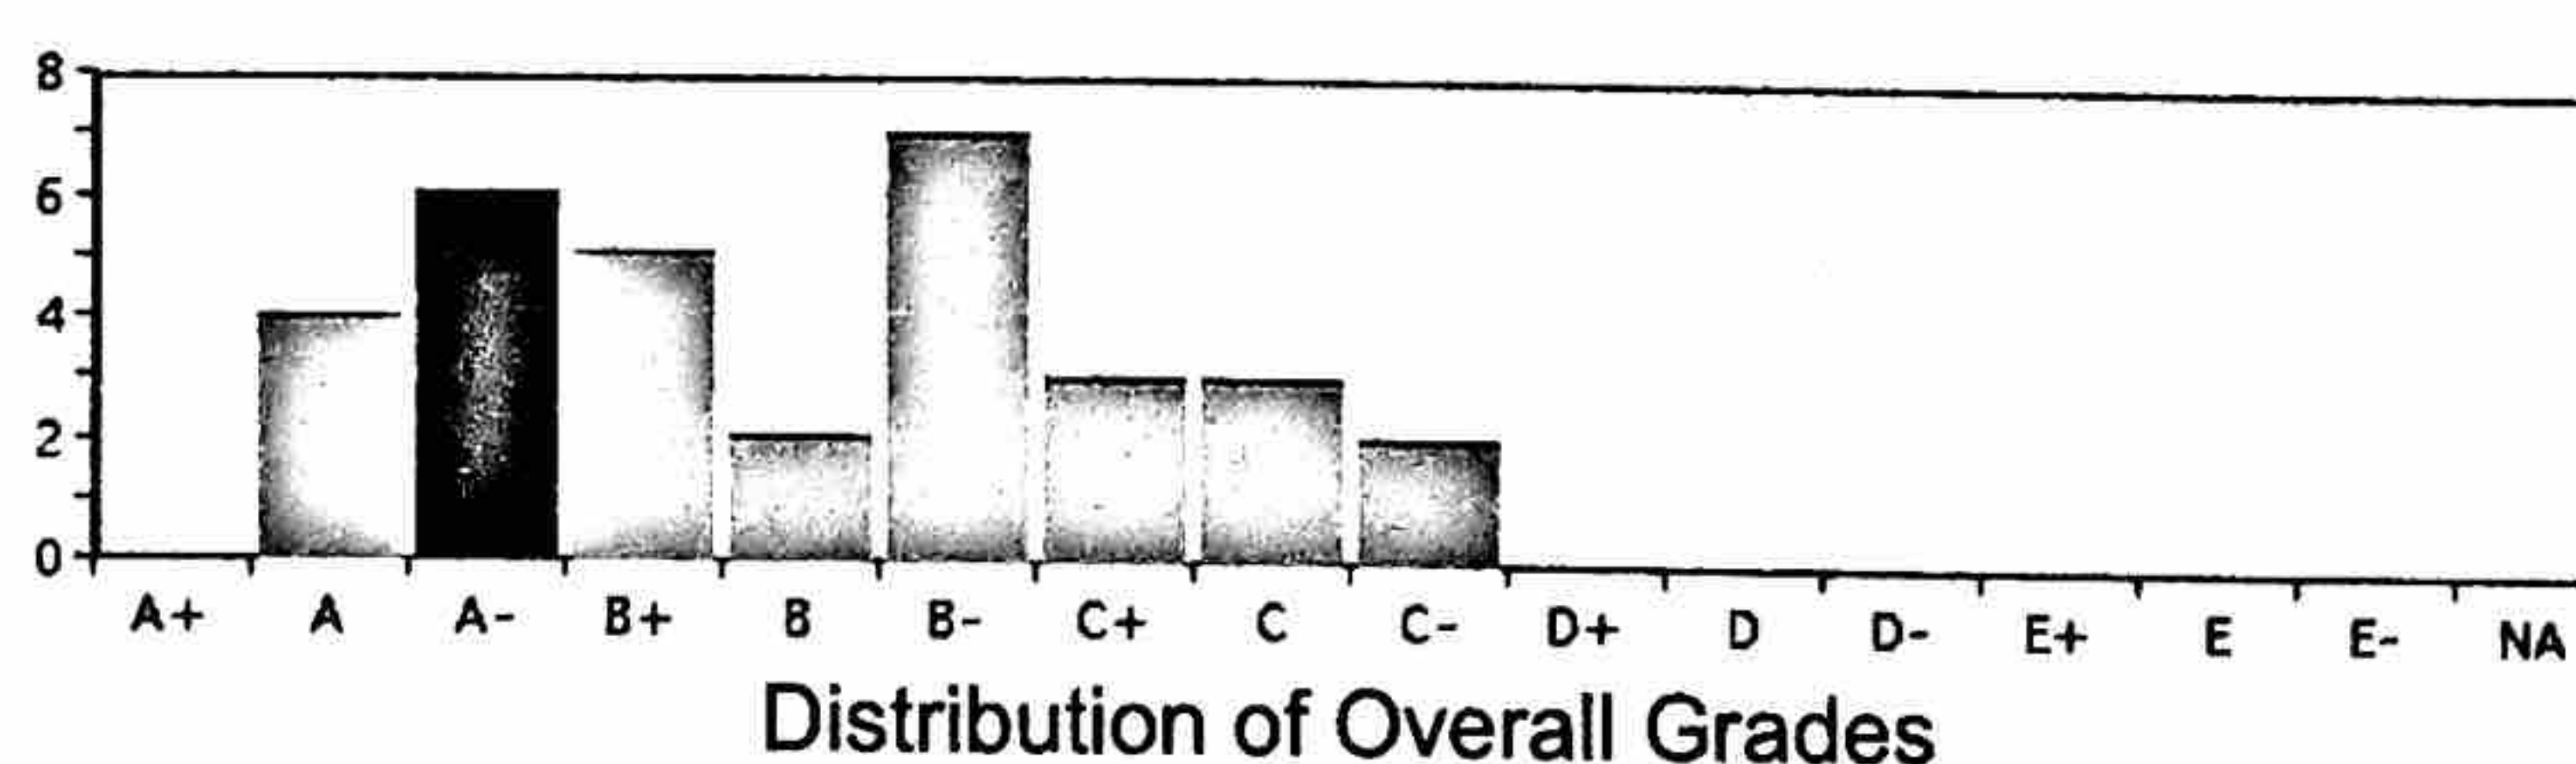

Recommendations

Anastasia is to be commended for her excellent application in this subject. She should extend her understanding and application of Accounting processes and practices by regularly revising work covered in class and by completing all practical extension tasks placed on MySubjects. Anastasia should continue to ask relevant questions and contribute to discussions.

Level of Achievement														✓		

Chemistry

This semester introduced students to the time and task management skills and techniques needed for an extended experimental investigation on fuels and calorimetry. Gas law chemistry was then examined using SCUBA and underwater exploration contexts.

Key Strengths

- analysing and extrapolating from primary experimental data
- analysing secondary data from given novel or challenging information
- reflecting logically on an extended practical task to make decisions based on experimental procedures
- evaluating simple chemical relationships evident in supervised assessment

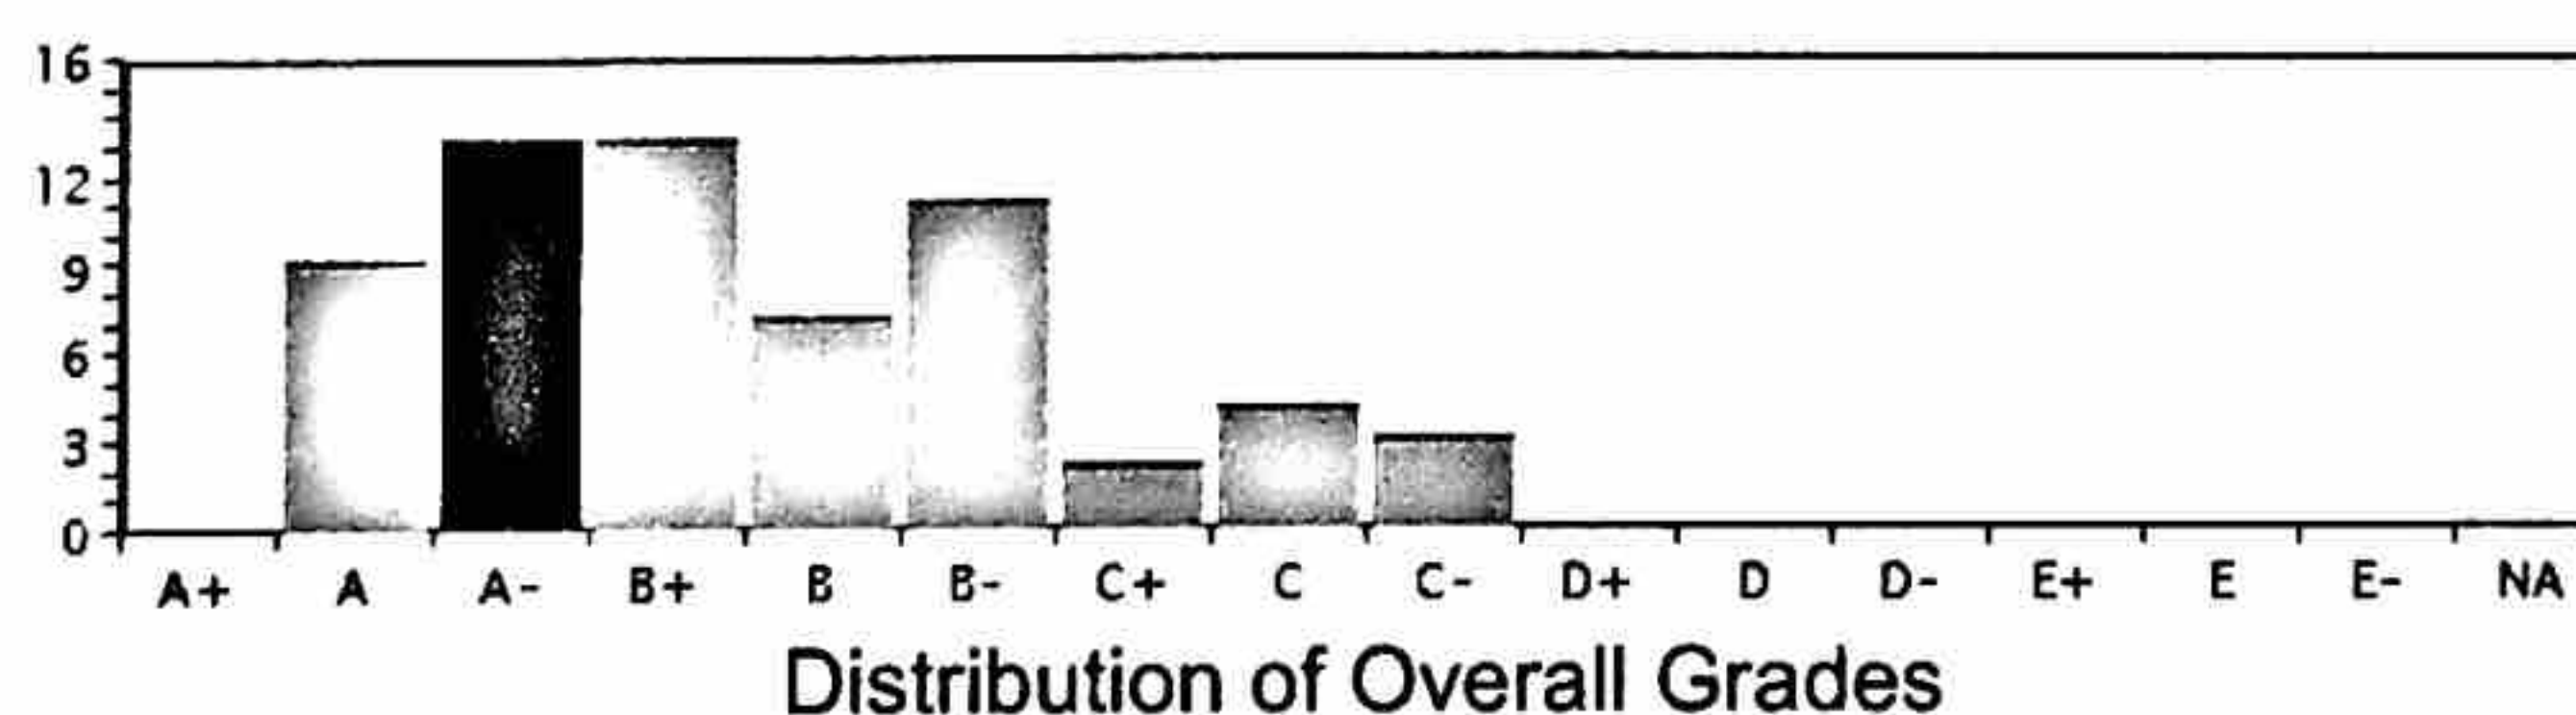

Areas for Consolidation

- evaluating complex chemical relationships evident in experimental data
- justifying decisions, outcomes and recommendations based on secondary data and given information
- communicating information in a well-structured and logical experimental report using acceptable language and format

Recommendations

Anastasia is encouraged to continue her positive and productive use of resources and review material. Continued regular attendance at chemistry tutorial sessions is recommended when encountering problems and difficulties. Checking her representations of data collected to ensure accuracy will improve her results.

Knowledge & Conceptual Understanding														✓		
Investigative Processes														✓		
Evaluating & Concluding													✓			
Level of Achievement														✓		

Physics

This semester, the focus was on analysing data in Physics using the contexts of electrical circuitry and power, as well as the gravitation and motion components of space physics. Students had the opportunity to use remote data sensors on a Dreamworld excursion and present a report on the theme park rides.

Key Strengths

- demonstrating consistent and accurate recall of the subject matter taught
- assessing risks, safely selecting equipment, and appropriately applying technology to gather and record data
- analysing primary and secondary data to identify patterns, trends, errors and anomalies
- demonstrating care in the management of the Extended Research Task relating to Theme Park Physics

Areas for Consolidation

- applying knowledge in interpreting complex and challenging concepts, principles and theories
- recognising complex inter-relationships that exist between Physics principles
- showing proficiency in establishing links which enable her to select and adapt procedures to find solutions to problems

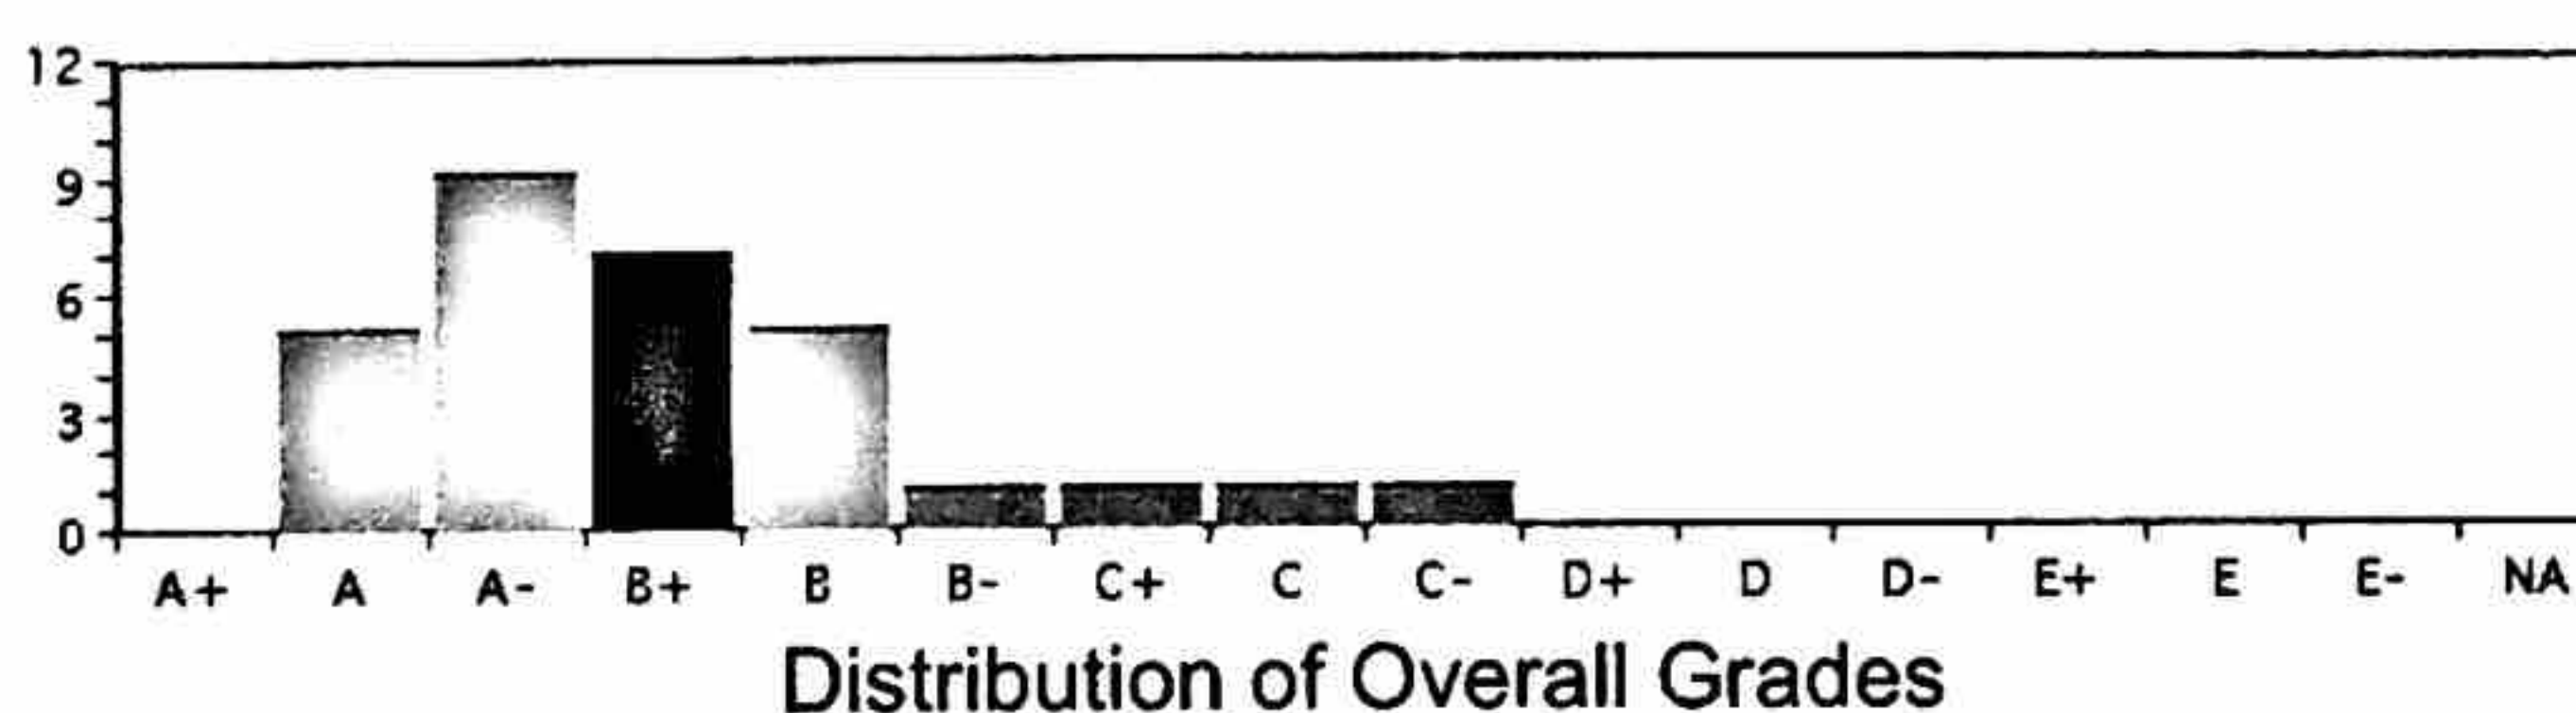

Recommendations

Anastasia should continue to ask relevant questions and contribute to discussions. Focus and attention to detail is required to compile a valid and justified conclusion based on evidence. Anastasia is encouraged to challenge herself by seeking out complex and unrehearsed problems.

Positive engagement with learning	Rarely	Sometimes	Usually	Always

Level of Achievement													✓			

Christian Education

This semester, the focus has been on the evidence for and against the existence of God. Students compared and contrasted beliefs and practices of Christian denominations and minority religious groups. Pastoral issues associated with death and dying, and strategies for managing grief and loss, were considered.

Key Strengths

- demonstrating the capacity to reflect on topics covered
- asking relevant and insightful questions
- providing appropriate evidence for arguments
- identifying related themes, assumptions and ideas

Areas for Consolidation

- interpreting the meaning of Bible passages accurately and with insight
- analysing complex information at a sophisticated level

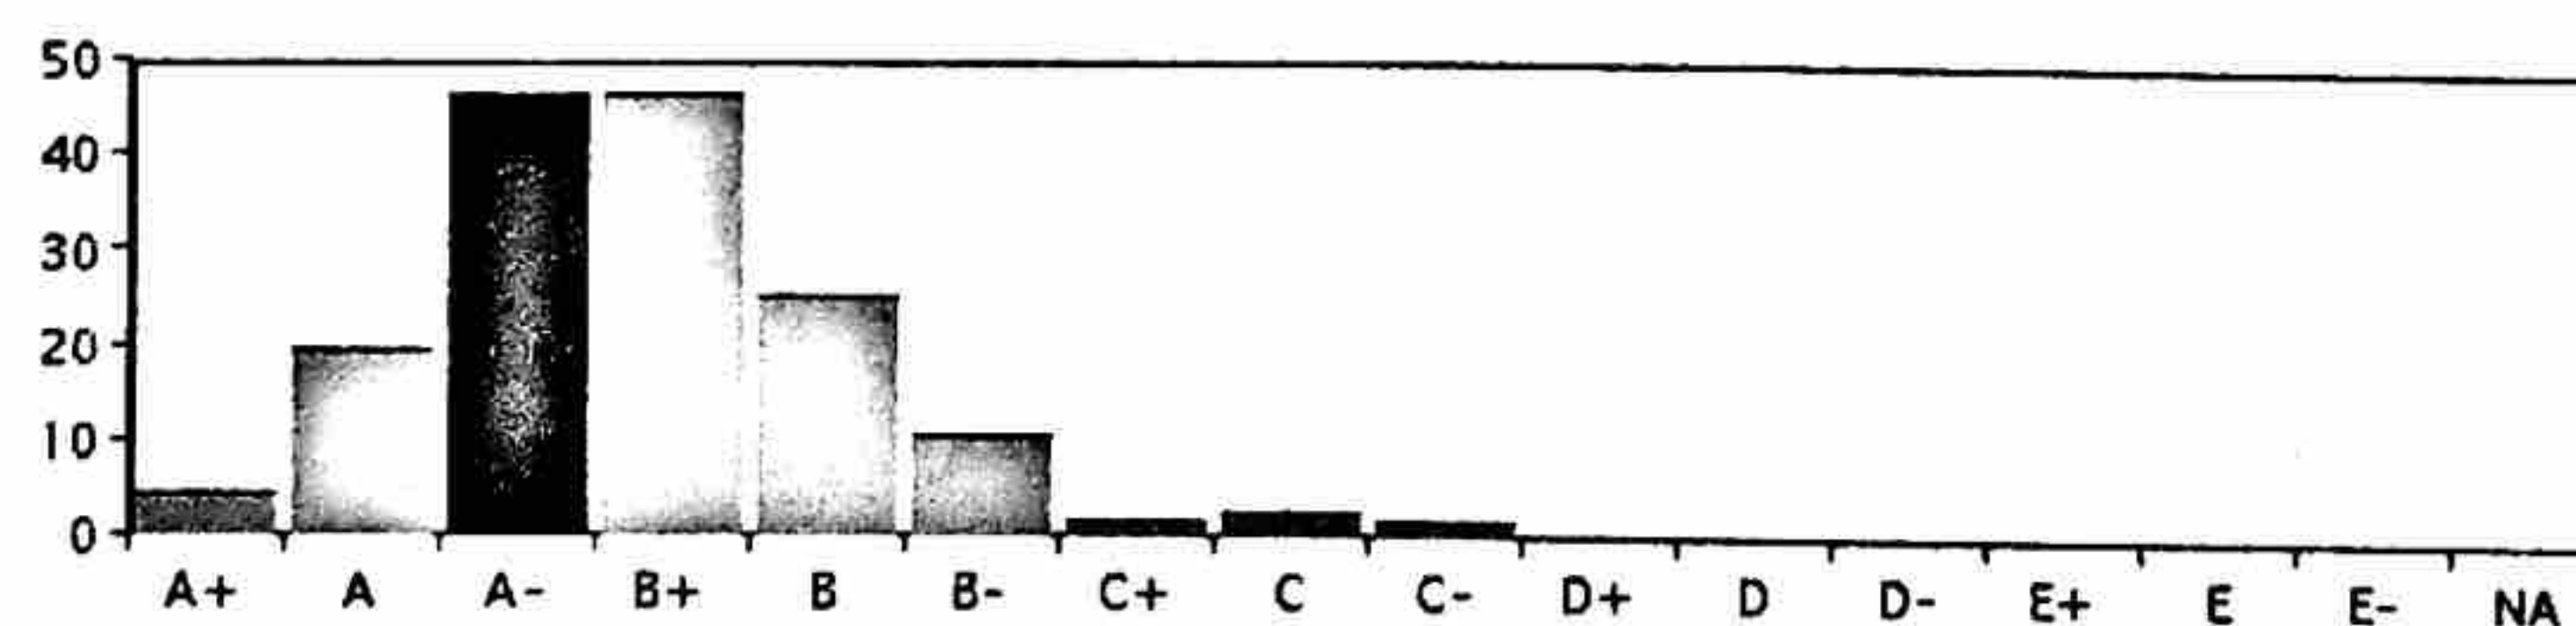

Recommendations

Anastasia is encouraged to maintain her positive and enthusiastic attitude to all learning activities and assessment tasks in order to experience continued success in this subject, and assist in creating a positive classroom environment for other students.

Mrs S Feely

Pastoral Care

Somerville House takes a positive approach to pastoral care with a focus on relationships, emotions, thinking, engagement, self-esteem, achievement, academic resilience and purpose. Strategies vary according to the age and maturity of the students and aim to improve general wellbeing, an attitude of service and gratitude, and the development of leadership, goal-setting, time management and study skills.

Year: 11

House: Franklin

Ms G E Harris
Head of Senior School

Mrs F A Kearney
Principal

Senior School Report Semester 1 2017

The information contained in this report is a summary of your daughter's academic progress for each subject, which includes her key strengths and areas requiring consolidation; recommendations for improvement; and learning behaviours. Importantly, co-curricular involvement and social development are also included in this report. Assessment is based on a range of techniques such as observations, anecdotal records, checklists and work samples, as well as formal assessment which includes oral presentations, assignments, projects and examinations.

A written report, however, cannot give a complete picture of a student's progress. Parents are welcome to discuss matters concerning their daughter's progress and welfare at designated parent-teacher-student meetings, and/or directly with the teacher concerned at mutually convenient times. In the Senior School, each student is considered to be an individual who will develop according to her abilities and opportunities. A student who has worked to the best of her ability should be congratulated regardless of the levels achieved.

Teaching and assessment programs in the Senior School are informed by the requirements of the Queensland Curriculum and Assessment Authority and the Australian Curriculum and Reporting Authority. More detailed Subject Outlines can be found via the following link: <https://my.somerville.qld.edu.au/Curriculum/Subjects/Pages/default.aspx>

Summary of Reportable Outcomes

Key Strengths	lists the concepts and skills taught that your daughter has demonstrated as an area of proficiency
Areas for Consolidation	lists the key concepts and skills taught that your daughter could benefit from greater proficiency
Recommendations for Progress	provides actions and strategies that may support your daughter's future learning
Learning Behaviours	indicates the consistency with which your daughter has demonstrated selected Learning Behaviours

Learning Behaviours are attitudes and dispositions pertaining to academic application and mindsets that nurture effective learning. Each subject reports on those most relevant to units studied during the semester. Feedback indicates the consistency with which an individual student demonstrates selected Learning Behaviours. A list of Learning Behaviours is available in here <https://my.somerville.qld.edu.au/Curriculum/Pages/default.aspx>

Demonstrated Learning Behaviours			
RARELY	SOMETIMES	USUALLY	ALWAYS
The student needs to develop, and demonstrate more frequently, learning behaviours that support her learning	The student has sometimes demonstrated positive learning behaviours that support her learning	The student usually demonstrated positive learning behaviours that support her learning	The student has demonstrated highly developed, positive learning behaviours that support her learning at all times

Criteria and Standards

Senior subjects apply standards and criteria derived from QCAA's syllabuses for Years 11-12 and the Somerville House Year 10 Academic Course Outlines. A standard of attainment is awarded for each criterion in each subject and is presented on a fifteen point scale (E- to A+). Criteria and Standards attained are included in each subject report.

Levels of Achievement

The standards of attainment for subject criteria are then used to determine a student's Level of Achievement. Students receive a Level of Achievement each semester for each subject, with the exception of Core Physical Education. The table below provides information for a student's Level of Achievement in each subject, as well as the standards of attainment for the specific criteria embedded in each subject.

Level of Achievement Codes

- A** The student demonstrates consistently a very high level of knowledge, skills and understandings and is able to apply them independently to a wide range of contexts.
- B** The student demonstrates a high level of knowledge, skills and understandings and is able to apply them independently to most contexts.
- C** The student demonstrates a sound level of knowledge, skills and understandings and is able to apply them, with guidance, to some contexts.
- D** The student demonstrates limited knowledge, skills and understandings and is able to apply them, with support, to some contexts.
- E** The student requires extensive support to demonstrate some knowledge, skills and understandings.
- NA** Insufficient evidence to make a judgment.

(+) High () Medium (-) Low

Distribution of Levels of Achievement

The report shows your daughter's achievement in subjects studied in comparison to that of other students in her Year level at Somerville House. This information is displayed as a graph, showing the number of students in each Level of Achievement.

English

Students studied Australian cultural narratives and textual representation in historical documents and the novel, 'The Secret River'. They produced a seminar presentation and a written reflection in role. The semester culminated in a study of 'The Crucible' and, for assessment, a short story based on the play.

Key Strengths

- producing organised and cohesive responses to texts
- substantiating claims with evidence and example
- using presentation skills to position and engage an audience

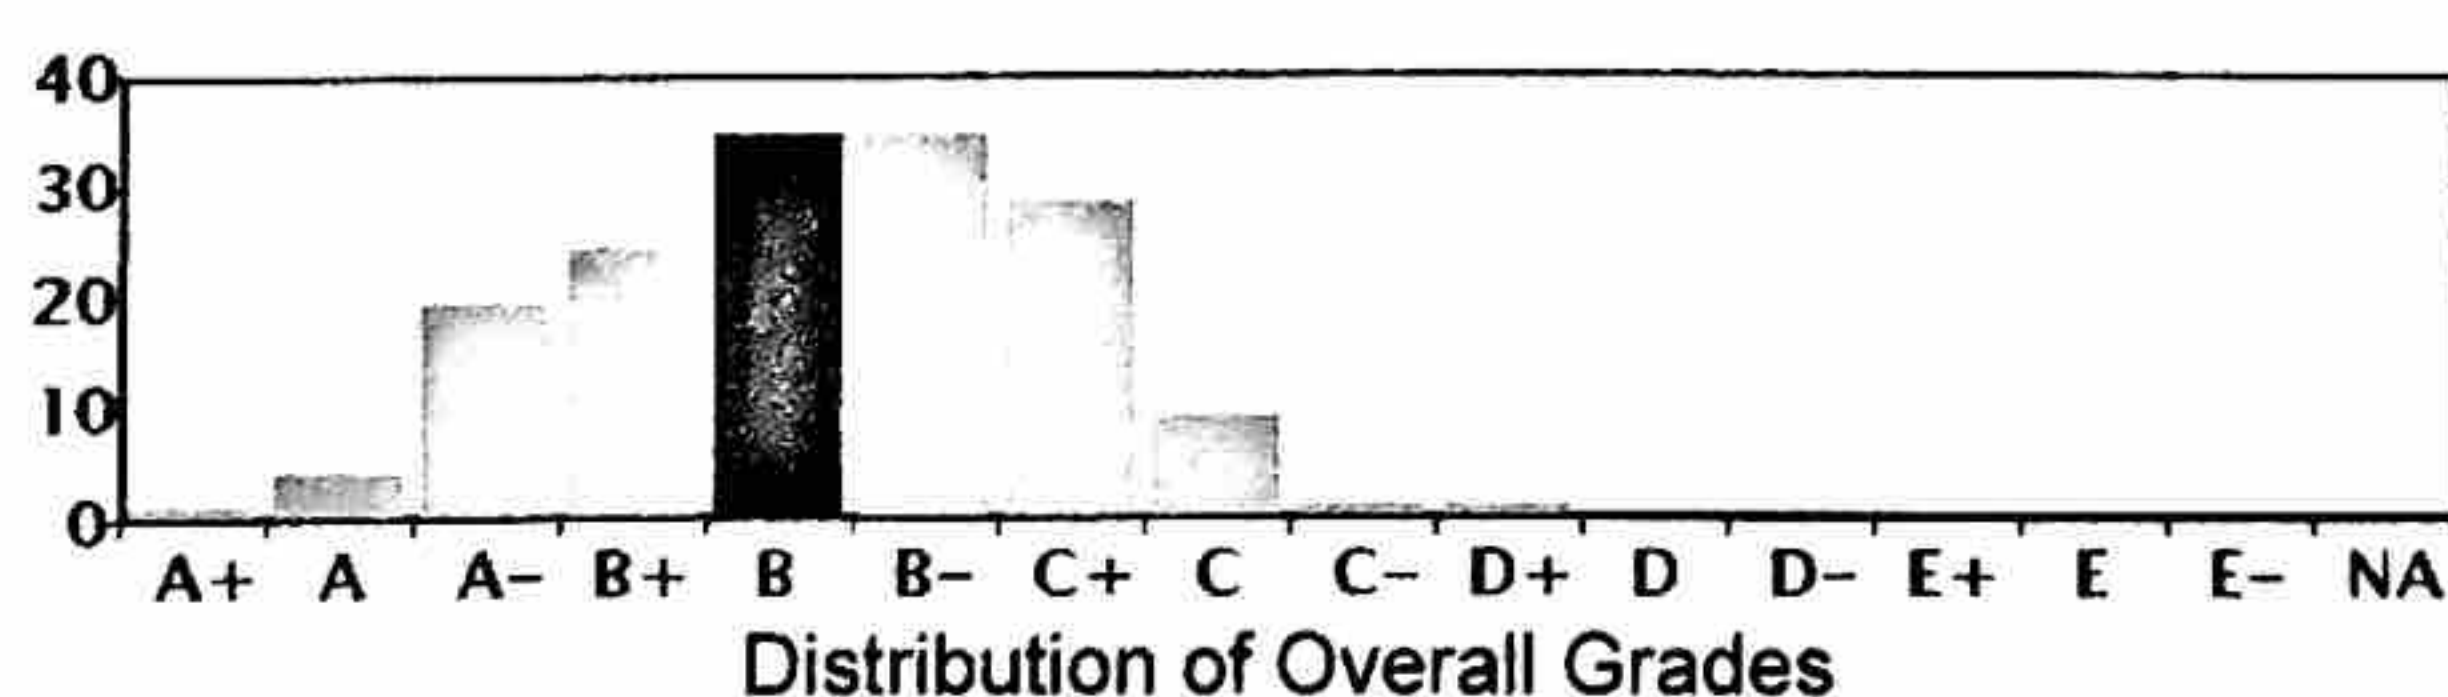

Areas for Consolidation

- demonstrating insight and understanding in the analysis and interpretation of texts
- expressing ideas with clarity, accuracy and sophistication
- using aesthetic features to achieve purposes in narrative writing

Recommendations

Anastasia is encouraged to research and read beyond the set text. She should continue to extend her vocabulary and her intellectual frame of reference in English. Anastasia is encouraged to reflect upon her learning both prior to and following assessment.

Positive engagement with learning	Rarely	Sometimes	Usually	Always

Level of Achievement												✓				

Mathematics B

This semester, the focus was on Applied Statistical Analysis, specifically focussing on analysis of data, followed by the Introduction to Functions. A study of Rates of Change and Periodic Functions and Applications enabled further understanding and development of the modelling of real-life contexts.

Key Strengths

- accurately recalling factual knowledge and concepts
- applying mathematical rules and procedures
- using technology appropriately

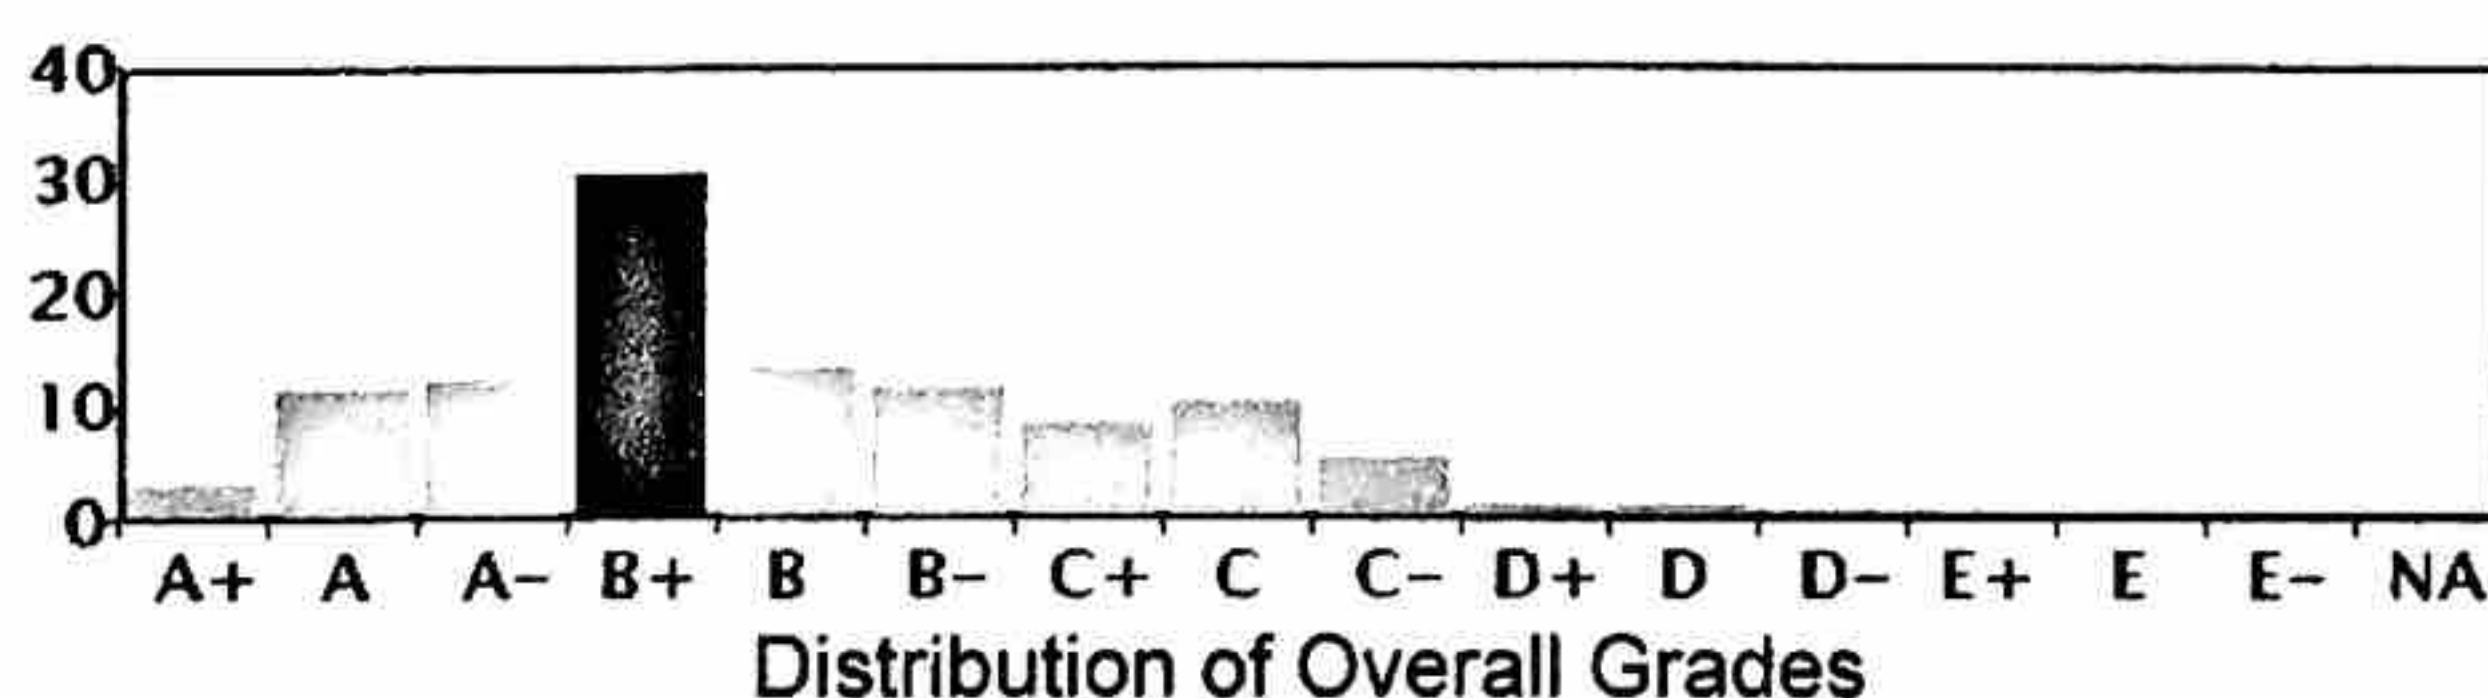

Areas for Consolidation

- verifying the reasonableness of results
- identifying assumptions and limitations for mathematical models
- selecting and applying appropriate strategies to model and solve real-life problems

Recommendations

Anastasia is encouraged to make use of problem-solving strategies to generate solutions to problems. Following examples modelled in class will enhance her understanding of concepts and procedures. Anastasia is encouraged to maintain her effort next semester.

Positive engagement with learning	Rarely	Sometimes	Usually	Always												
Is an Enthusiastic and Positive Learner				✓												
Approaches Problems Independently				✓

Modelling & Problem Solving												✓				
Communication & Justification													✓			
Level of Achievement													✓			

Mathematics C

This semester, the focus was on introducing new areas of Mathematics, including Real and Complex Number Systems and an introduction to Groups. A study of Matrices and Applications, and Sequences and Series enabled the development of abstract mathematics and the modelling of real-life contexts.

Key Strengths

- accurately applying mathematical rules and procedures
- applying problem-solving strategies to generate a conclusion
- identifying suitable assumptions

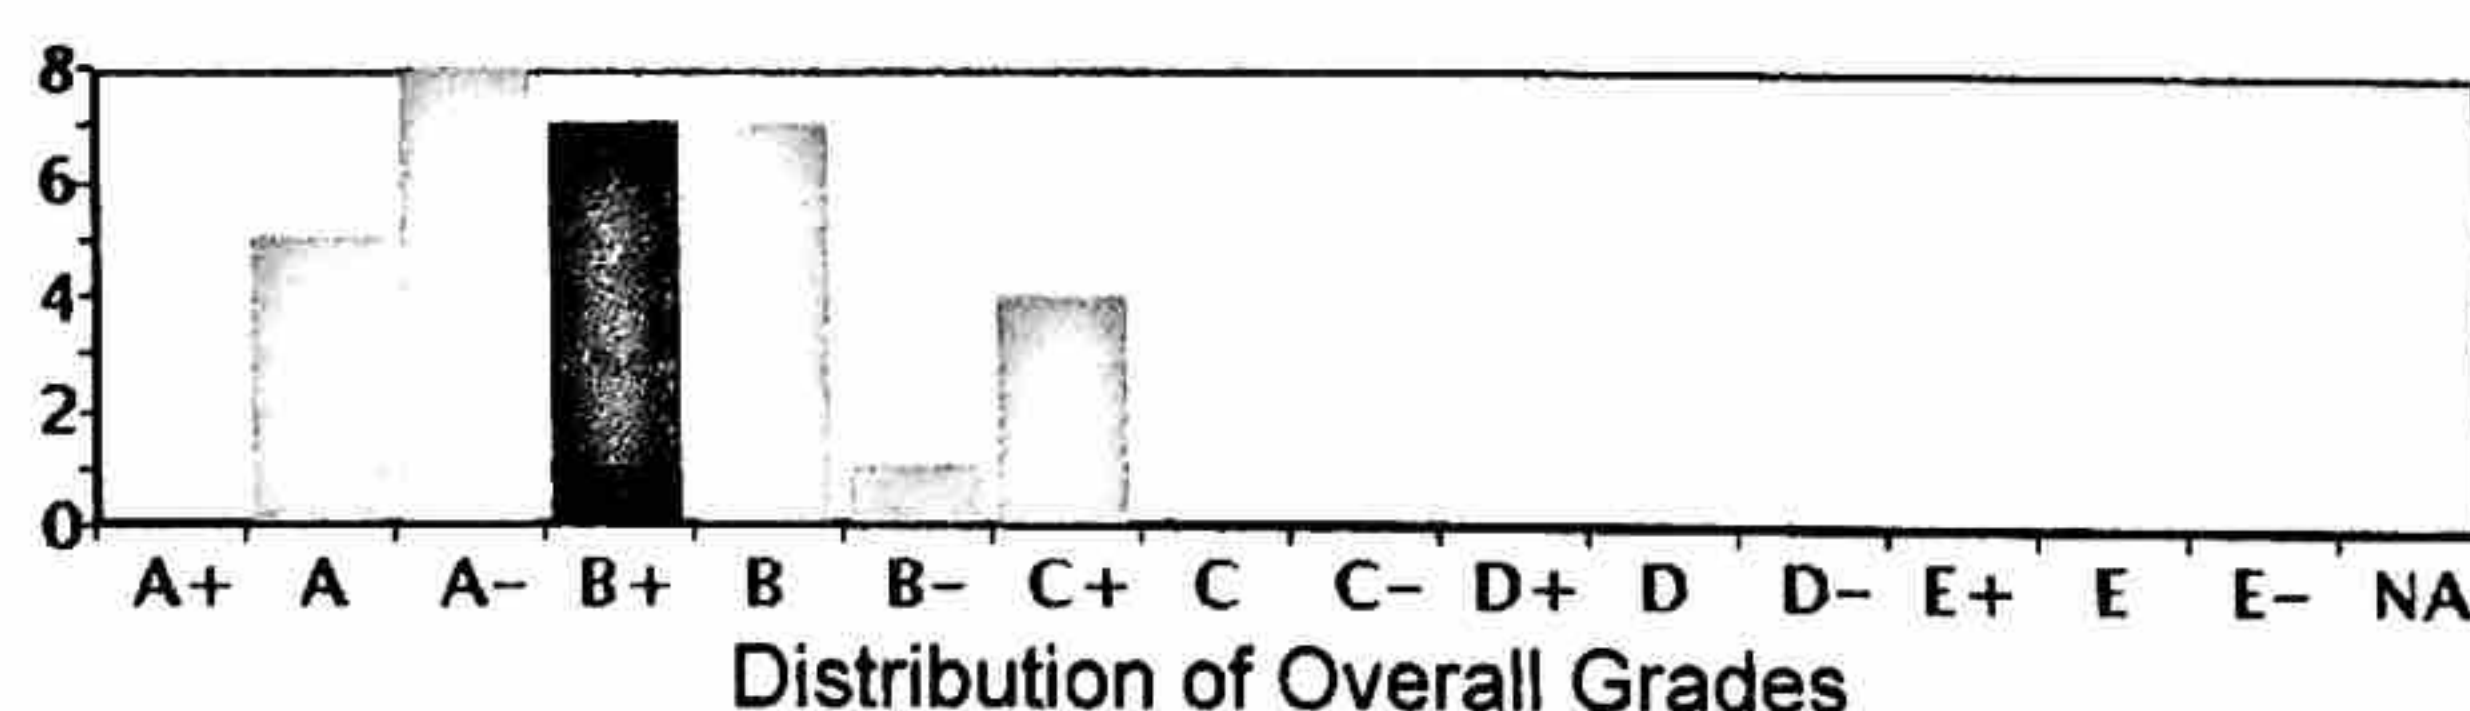

Areas for Consolidation

- discussing and justifying the reasonableness of conclusions
- evaluating conclusions in terms of the question that was asked
- investigating alternative solutions to problems

Recommendations

Anastasia is encouraged to reflect on how concepts developed in class link to previous understanding. She should seek assistance more often to develop a deeper understanding of key concepts. Anastasia needs to display greater confidence and determination in her attempts to solve more complex problems.

Knowledge & Procedures															✓	
Modelling & Problem Solving											✓					
Communication & Justification													✓			
Level of Achievement													✓			

Accounting

This semester the focus was on introductory accounting concepts including the double-entry system of bookkeeping used to process transactions and prepare financial reports. In addition, ratios and reports were analysed to evaluate performance and facilitate decision-making processes of businesses.

Key Strengths

- applying the accounting equation when analysing transactions
- posting journal entries to a ledger and constructing a trial balance
- applying the matching principle when accounting for accrual and prepayment balance day adjustments
- synthesising information using the appropriate genre when responding to written tasks

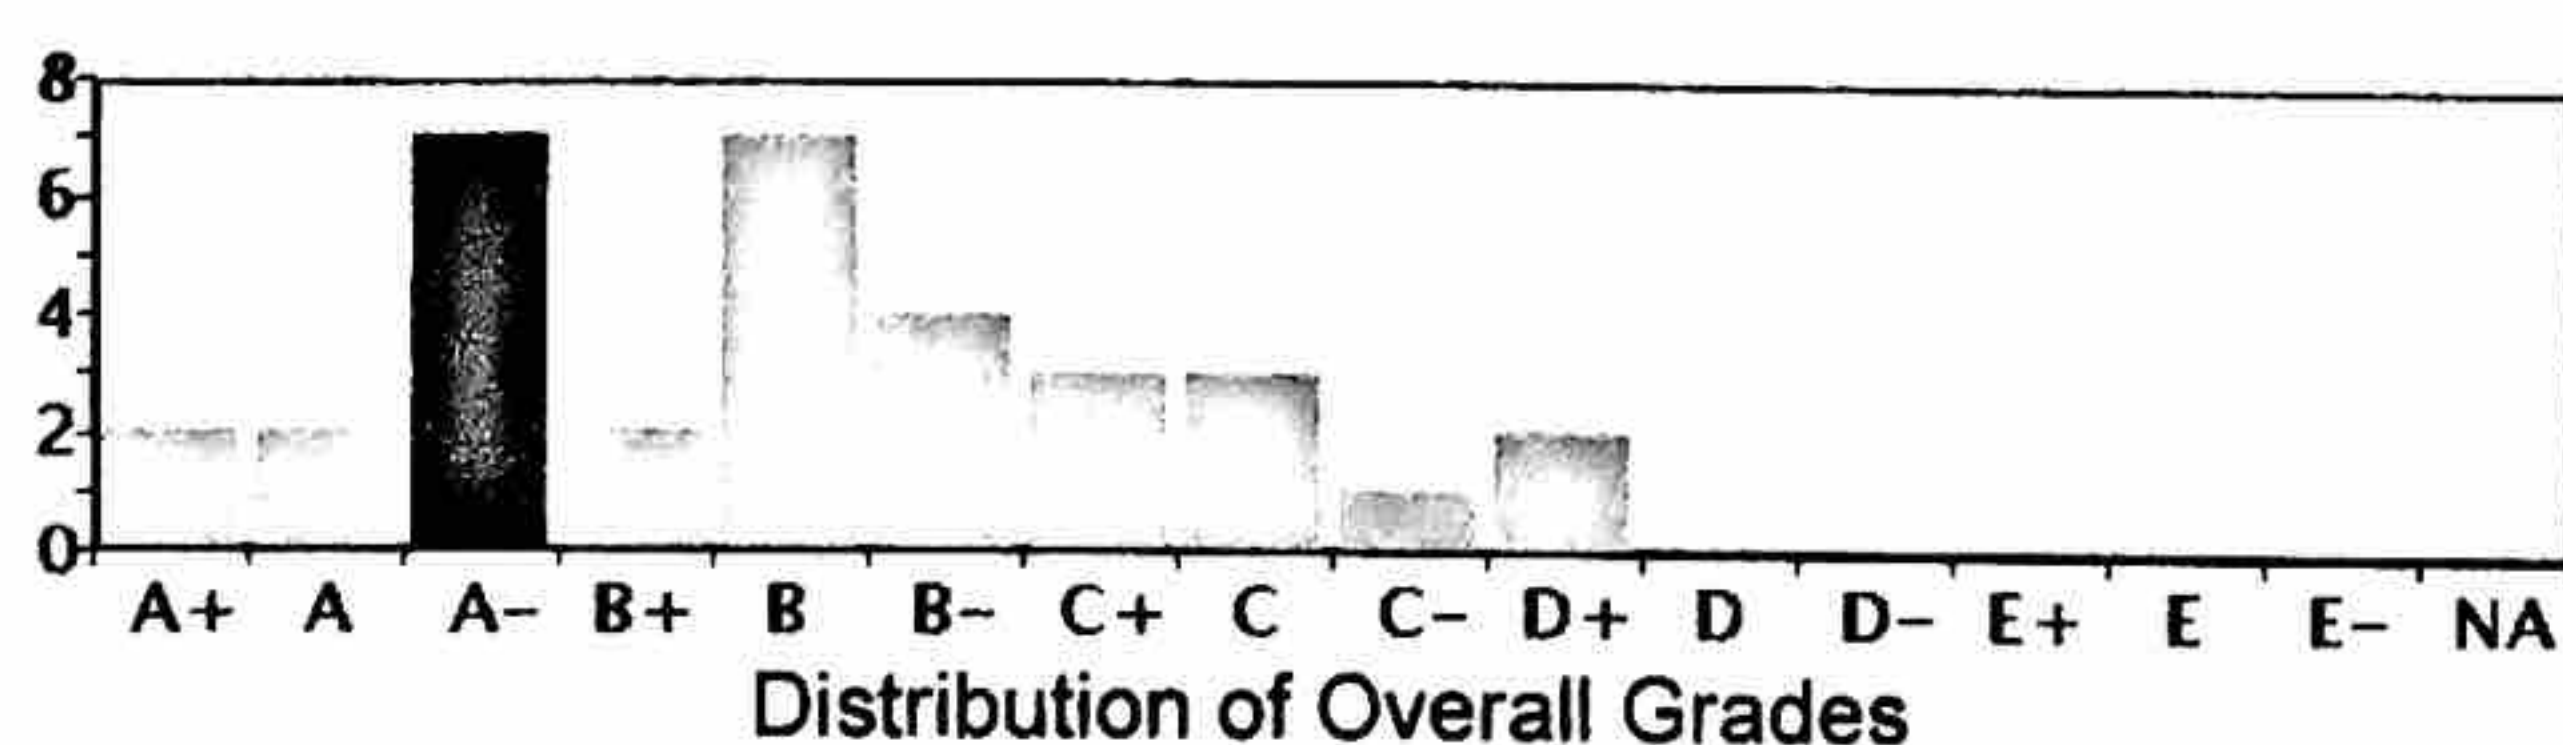

Areas for Consolidation

- selecting and organising relevant accounting data and information when preparing financial reports
- applying knowledge and understanding of accounting concepts, principles and processes to unfamiliar situations

Recommendations

Anastasia is to be commended for her excellent application in this subject; however, she should implement the following advice. Concepts and theory could be reinforced through consistently revising work covered in class and summarising relevant textbook pages. In addition, Anastasia is encouraged to continue to ask relevant questions and attend tutoring sessions when required.

Positive engagement with learning	Rarely	Sometimes	Usually	Always												
Is an Enthusiastic and Positive Learner				✓												
Approaches Problems Independently				✓												
Persists with Learning Challenges				✓												
Effective self-regulation of learning	Rarely	Sometimes	Usually	Always

Knowledge and Procedural Practices														✓		
Interpretation & Evaluation													✓			
Applied Practical Processes														✓		
Level of Achievement														✓		

Chemistry

This semester introduced basic concepts in Chemistry including the periodic table, the mole concept, bonding and formula writing. Students focussed on skills in instrumental and wet analytical techniques to gather data, in order to compare against Water Quality Guidelines and relate to biogeochemical cycles.

Key Strengths

- interpreting concepts, theories and principles
- linking and applying chemical algorithms and schema in practised applications
- working collegially and co-operatively in a group during in field studies or practical tasks
- describing the interrelationships between water quality parameters

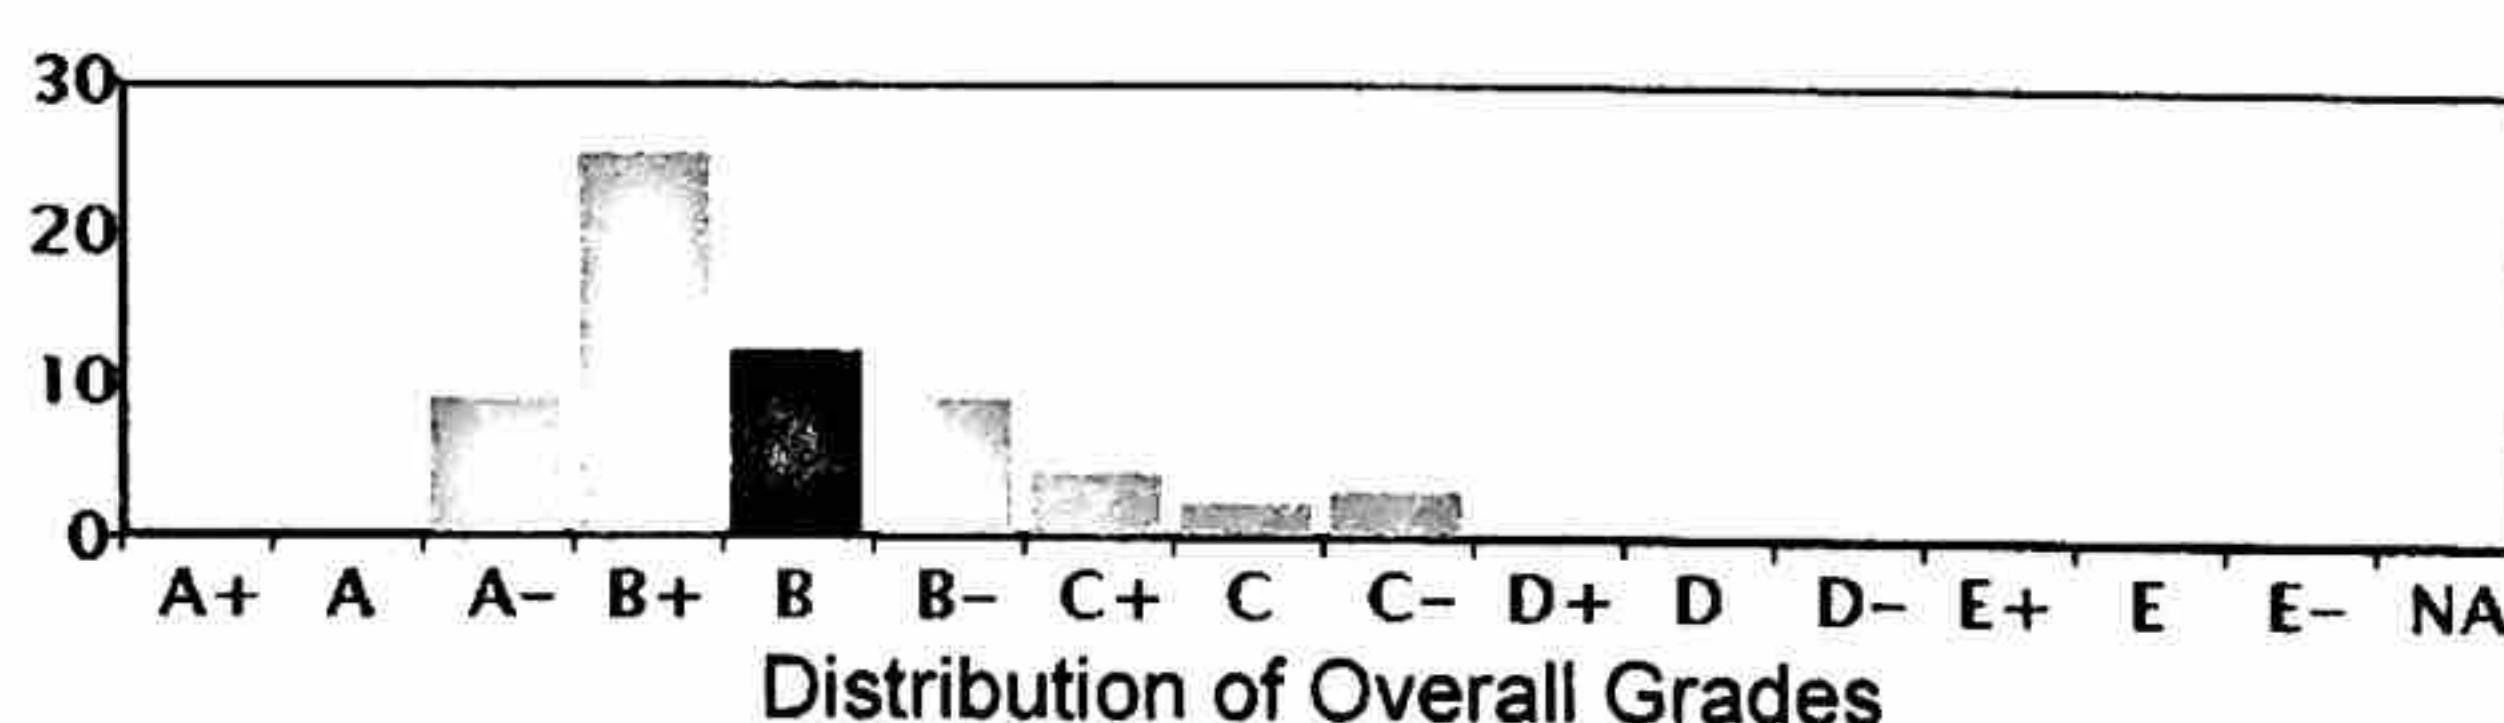

Areas for Consolidation

- linking and applying chemical algorithms and schema to find complicated solutions
- selecting and presenting of water quality data with discrimination and logic

Recommendations

Anastasia is encouraged to engage more actively in class discussions. Continued regular revision of key concepts and content should help improve her understanding. Completing extension activities provided will allow development of scientific thinking ability.

Positive engagement with learning	Rarely	Sometimes	Usually	Always												
Participates Actively in Learning Activities			✓													
Approaches Problems Independently			✓

Reflects on Learning			✓													
Seeks and Applies Feedback Appropriately			✓													
Subject Results	NA	E-	E	E+	D-	D	D+	C-	C	C+	B-	B	B+	A-	A	A+
Knowledge & Conceptual Understanding												✓				
Investigative Processes													✓			
Evaluating & Concluding												✓				
Level of Achievement												✓				

Physics

This semester, the focus was on analysing data in Physics using graphical, vectorial and mathematical methods. Students described the kinematic and mechanical relationships between velocity, displacement, acceleration and force; and completed their Extended Experimental Investigation on car safety.

Key Strengths

- consistently demonstrating accurate recall of the subject matter taught
- reproducing and interpreting complex and challenging concepts, theories and principles
- demonstrating care in the planning and management of the Extended Experimental Investigation relating to car safety
- communicating information in a selective and appropriate manner

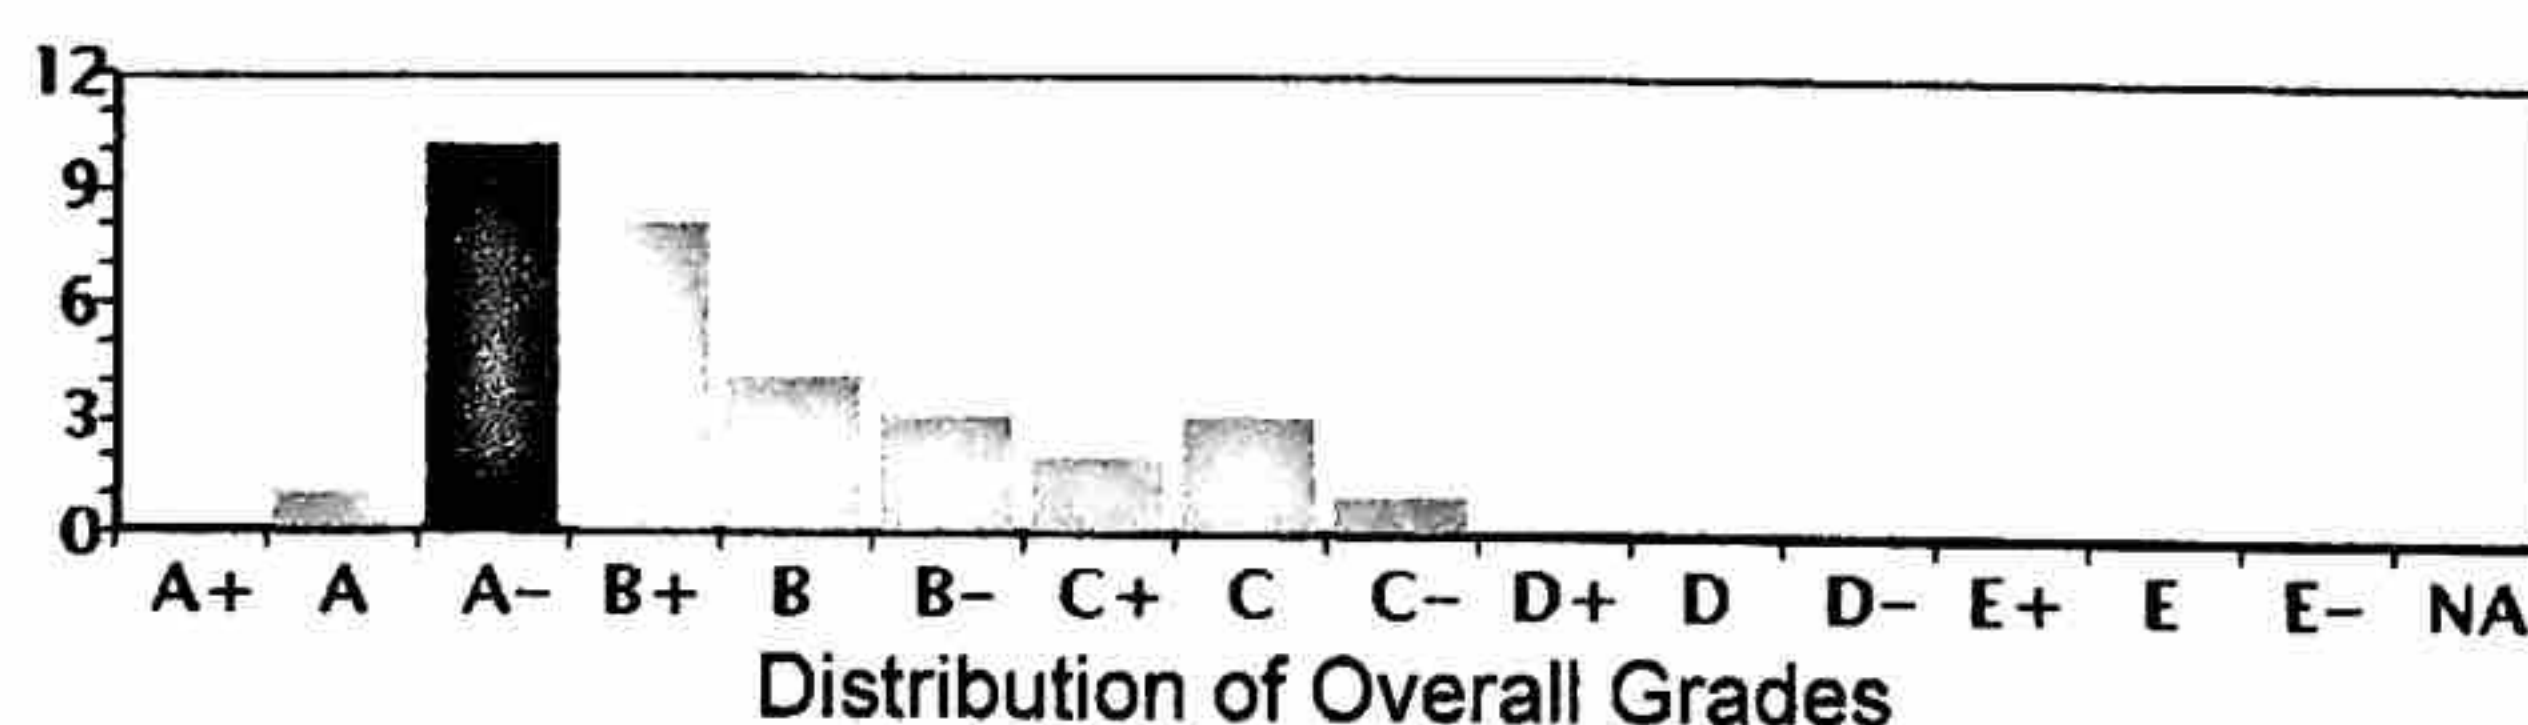

Areas for Consolidation

- analysing complex inter-relationships that exist between Physics principles
- exploring scenarios and possible outcomes with justification of conclusions and recommendations
- linking and applying concepts, principles and theories to find solutions in complex and challenging situations

Recommendations

Anastasia is encouraged to challenge herself by seeking out complex and unrehearsed problems, and to engage more actively in class discussions. Focus and attention to detail are required to compile a valid and justified conclusion based on evidence. Anastasia should continue reviewing class work regularly.

Positive engagement with learning	Rarely	Sometimes	Usually	Always												
Participates Actively in Learning Activities				✓												
Approaches Problems Independently				✓												
Open to New Ideas, Approaches, Challenges				✓												
Strives for Improvement				✓												
Effective self-regulation of learning	Rarely	Sometimes	Usually	Always

Evaluating & Concluding														✓		
Level of Achievement														✓		

Christian Education

This semester the focus has been on practical Christian living from the book of James, with emphasis on the questions raised by suffering as exemplified in the Jewish Holocaust. Beliefs and practices of Islam were compared with those of Christianity. Issues and strategies around the management of stressful feelings and situations were considered.

Key Strengths

- demonstrating the capacity to reflect on topics covered
- revising in a thorough and productive manner
- understanding the issues being considered
- generating questions relevant to the topics covered
- contributing regularly to class discussion with confidence and clarity

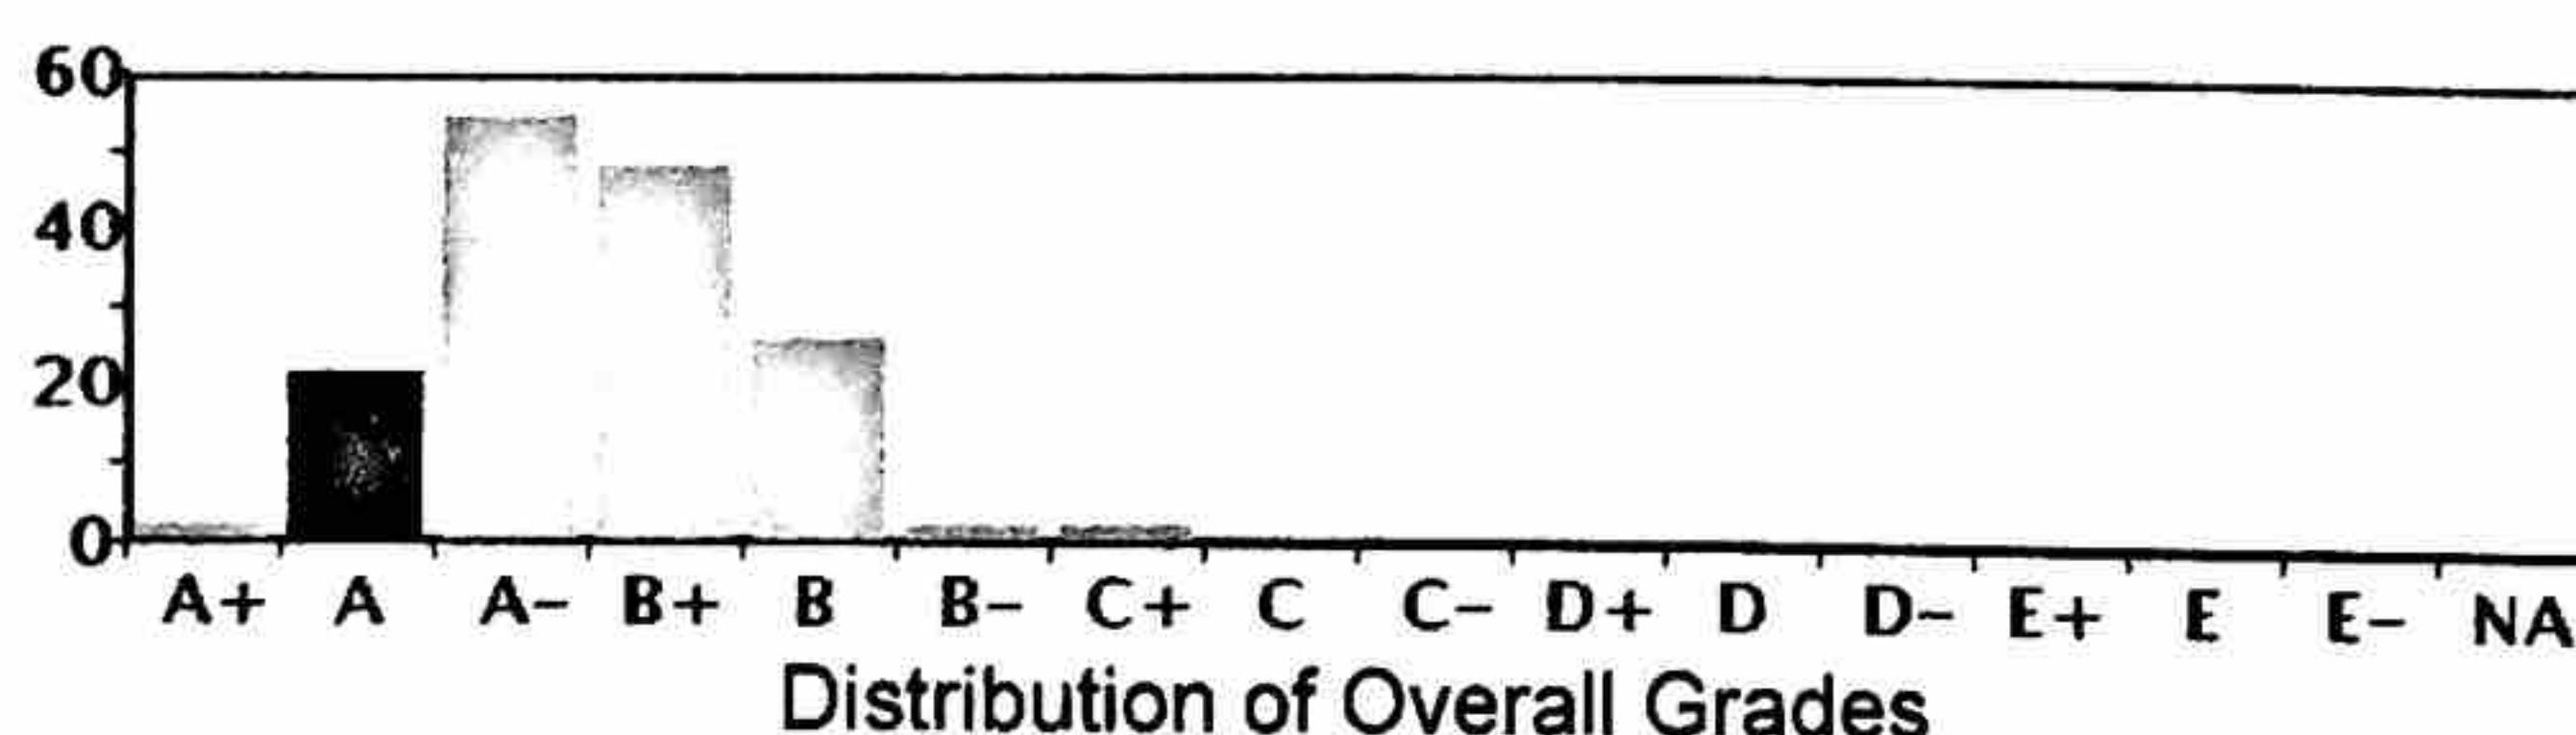

Areas for Consolidation

- analysing complex information at a sophisticated level

Recommendations

Anastasia is encouraged to maintain her positive and enthusiastic attitude to all learning activities and assessment tasks in order to experience continued success in this subject, and assist in creating a positive classroom environment for other students.
