Year 12, Term 3 Report Card

James Jude Hurst

Tutor Group PG Year 12

This report is based upon the information collected in each subject by the end of Term 3. It should be noted that in some subjects, this information may reflect only a sample of the criteria and/or a small portion of the semester's topics. This result is used to give an indication to parents and the student of how the student appears to be performing at this time.

Result is reported across the following levels:

A+	A	A-
Well above average		

B+	B	B-
Above average		

C+	C	C-

July 2019

Dear Parents of Year 12 students

This term all students will receive a report for each subject indicating a Term 2 result, Semester criteria results and a Semester one cumulative result. Year Twelve students also receive a report showing their placement within the subject – the 'Bubble report'.

The placement on a student's Bubble graph is a reflection of all summative results (results directly counting towards an OP or Ranking score).

Next term, all Year 12 students will receive updated estimated OP scores based on the recent information on this Bubble report. This will be communicated via your son's academic mentor during a scheduled interview time.

Yours sincerely

Mr Mason Hellyer
Dean of Studies

James Jude Hurst

English

Mrs A Caune

Texts studied: poetry, short story, Shakespearean drama. Genres taught: short story, eulogy, analytical essay. Assessment instruments require students to demonstrate understanding and skill in both the receptive and productive modes of language usage.

Teacher's Comment

James displays a discerning ability to write for a variety of purposes and an ability to exploit a range of structures and conventions to achieve task specific purposes. He has produced interpretations of the stated and implied meanings in literary texts. James has supported and explained these interpretations by linking obvious textual devices to their effects on audiences. He is a sophisticated speaker who is able to exploit a range of spoken genre patterns and conventions. James's oral presentation was very well researched and presented. He is an interested and involved student who contributes actively to class discussion.

Tutor's Comment

James is a wonderful young man who is a highly valued member of our tutor group. James has always taken the time to mix with all members of our group. He is an extremely diligent student producing outstanding results. James takes a keen interest in college life and it is most pleasing to see him appointed as a College Vice Captain in 2019. He has been an amazing role model for all students in the tutor group. I wish him every success in his final year at the College.

Term Four Result	This result is a measure of an overall level of performance based on Term Four assessment tasks.	A+
Knowledge and Conceptual Understanding	Recall and interpret concepts, theories and principles of Physics. Describe and explain processes and phenomena of Physics. Link and apply algorithms, concepts, theories and schema of Physics.	A+
Investigative Processes	Conduct and appraise Physics research; operate scientific equipment and technology; use primary and secondary data.	A
Evaluating and Concluding	Determine, analyse and evaluate the interrelationships involved in applications of Physics. Predict outcomes and justify conclusions and recommendations. Communicate information in a variety of ways.	A
Semester Two Result	This result is a measure of an overall level of performance based on Term Three and Term Four assessment tasks.	A
Annual Global Result	This is a measure of an overall annual level of performance	A

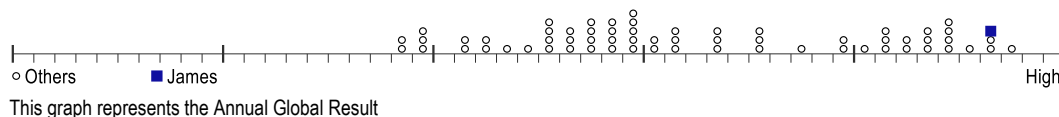

Teacher's comments

James has demonstrated an excellent ability to link, compare and explain concepts to find solutions in both familiar and abstract contexts. He can efficiently design and refine an experimental method, systematically analyse patterns, and explain errors and anomalies in experimental data. His evaluation of complex scientific information is perceptive and he is able to explore scenarios and make justified recommendations based on physics principles.
