Statement from the Senior Leadership Team

The coming semester represents a most important stepping stone for your son. Having just made the transition from Year 10 to 11, he must now look to fully explore his potential, and in so doing, maximise his performance prior to ultimately entering Year 12 in January 2019. Semester 2 will be all about arriving at a point where the transition can be made confidently and well. To that end, I encourage your son to continue to explore the abundant opportunities ever-present in all three curricular domains – academic, wellbeing and extracurricular. In conversation with Head of Year Mr Carmichael, I have learnt that a key focus this semester has been on building the capacity of the year group to collaborate effectively in classes, all the while building on the notion of individual responsibility. The great year groups down through the years have practised individual and group responsibility, leading to a shared focus, shared goals, a strong sense of community and a ready acceptance of a wider public purpose. The boys will experience more and more opportunities to explore their collective voice as they assume the mantle of school leaders. In so doing, we would ask that they continually make their reference point the five school values of endeavour, learning, respect, leadership and community.

Many boys will be content with their academic outcomes. No doubt there will be others, for whom their grades are something of a disappointment. Irrespective of your son's grades on this statement, an important part of the process will be to read teachers' comments reflectively, thoroughly and with real intent. In so doing, your son will be practising greater self-awareness and responsibility for his own learning. Such traits are of course, an indicator of the level of independence your son is exhibiting and prepared to display. It is a self-evident truth that the work in all subject disciplines continues to now take on greater depth and sophistication. In order to cope well, your son will be called on to practise resilience and mental agility. Every boy must understand that his academic profile should reflect a combination of consistent diligence complemented by natural ability. It is worth reiterating that assessment in Year 11 is not summative, but does represent a splendid opportunity to lay as good a foundation for learning in Year 12 as possible. Further to this, the accumulation of credit towards his Queensland Certificate of Education (QCE) is dependent on the successful completion of all Year 11 work.

I congratulate the Year 11 cohort on their level of participation in the School's extracurricular program. Such participation has, as always, ranged from simply being involved with one's mates all the way through to entry into "flagship" teams, programs and "signature" events. I warmly encourage the boys to continue in this vein. Participation in this program offers boys balance and an extensive array of opportunities to grow and lead.

At this special time in the School's sesquicentenary year, I also encourage you and your sons to learn more about our great history and to further involve yourselves in ongoing celebrations.

I do hope you have a happy and healthy vacation period with your son.

Mr M I Brusasco

Year 11 Chemistry

Mr F C McClatchy

Knowledge and Conceptual Understanding	A	Current A-	Cumulative A-
Investigative Processes	A-		
Evaluating and Concluding	A-		

Jim, you are a very able and effective independent learner, and you set yourself high standards. You have demonstrated a thorough understanding of the concepts, theories, strategies and principles in both complex and challenging situations. You develop discriminating selection, use and presentation of scientific data and ideas to make meaning and chemistry interrelationships accessible. Well done, your classroom operations reflect a very well developed Gas Buoyancy Practical Investigation and an ability to communicate effectively.

Year 11 Chemistry - Subject Overview

The Senior Chemistry course endeavours to provide a challenging and worthwhile learning experience for all students. Through student engagement, knowledge and conceptual understanding in a range of chemistry concepts, as well as higher thinking processes, are developed.

In Semester 1, students begin with a study of Atomic Structure, linking with their work in Year 10 Science, before working in greater depth on chemical calculations involving moles. The focus for the rest of the semester is on the production, properties and significance of gases, as well as Gas Law calculations. To facilitate the development of the students in these areas, they participate in a variety of learning activities and should be able to construct meaning through active engagement with practical work and simulations, as well as theory. There are 3 supervised Assessment pieces in Semester 1, with one including a practical component. Students are assessed in the areas of Knowledge and Conceptual Understanding (KCU), Investigative Processes (IP) and Evaluating and Concluding (EC). Criteria standards linked to Syllabus Exit Criteria are used in grading responses.

Year Level Grade Distribution

Subject	% of As	% of Bs	% of Cs	% of Ds	% of Es
Chemistry	53%	37%	9%	1%	0%

* Overall achievement and individual assesment criteria are reported on a fifteen point scale from A+ to E- where:
A = Very High Achievement; B = High Achievement; C = Sound Achievement; D = Limited Achievement; E =Very Limited Achievement

Current assessment reflects performance since the last report.

Cumulative assessment reflects achievement in the finally assessable elements of the entire course, thus far.

Year 11 English

Ms B Kachel

LT1 Expository Essay	B	Current B	Cumulative B
LT2 Argumentative Essay	B		
OT1 Persuasive Speech	B		

Jim, you are achieving at a high standard, and overall, I am pleased with your approach to your studies. You generally complete set tasks as instructed, but you would benefit from seeking advice about how to improve your work. Your responses in the essays reflected your knowledge of the texts, but you must ensure that you provide more thorough analysis and evaluation. Your persuasive speech contained effective ideas; however, you must internalise your script and improve your use of eye contact and gestures when presenting.

Year 11 English - Subject Overview

The Year 11 English program is designed to provide students with formative experiences in preparation for Year 12. In the ways that we expect students to respond critically and creatively to both literary and non literary texts, they have opportunities to practise expressing their ideas with clarity, precision and coherence. Understanding their role as a writer or speaker and how their selection of language may influence their audience is fundamental to each task.

In Year 11, students study English for four periods per week. During this semester, they write an analytical expository essay (LT1) under supervised conditions in response to a seen question about a Greek tragedy. A second essay (LT2) provides opportunities to apply feedback but also experience the challenge of an unseen question. Students also create and deliver a persuasive speech (OT1) about the merits of a literary text.

Students receive a global result for each task. When assigning current levels of achievement, teachers take into account the conditions under which the assessment tasks were completed, the various genres, the modes of communication, and the pattern of a student's performance over time.

Year Level Grade Distribution

Subject	% of As	% of Bs	% of Cs	% of Ds	% of Es
English	16%	54%	29%	1%	0%

* Overall achievement and individual assessment criteria are reported on a fifteen point scale from A+ to E- where:

Tutor Group: 1109

Year 11 Japanese

Ms A O'Rourke

Listening	A-	Current A	Cumulative A
Reading	A		
Speaking	A+		
Writing	A		

Jim, you have attended conscientiously to learning key vocabulary and structures, and this is clearly reflected in your results. In Listening and Reading, you show convincing evidence of detailed analysis and evaluation. You speak and write well on prescribed topics, using a wide range of vocabulary and grammar with few errors. Your speech is fluent and accurate, and you are commended on your pronunciation. Make sure that you check your written work carefully for careless errors in spelling, and ensure that your particles are accurate.

Year 11 Japanese - Subject Overview

Students learn Japanese for four periods per week as part of a two-year course of study. This semester, students study the units: "Self Introductions", "Communication", "Rules", "Embarrassing Events", and "Holidays in Japan and Australia". Content taught in the junior Japanese course is consolidated, and students further develop their understanding of language features and language elements.

Students' understanding is assessed through four tests, each weighted 25%. Students complete a Reading Test, Listening Test, Speaking Test and a Writing Test. Two broad criteria, Knowing and Understanding and Reasoning and Responding, are used to assess students' comprehension of language in Listening and Reading Tests. Students' ability to produce language in Speaking and Writing Tests is assessed using the criteria Knowing and Using Language Features and Creating and Responding.

All Year 11 work is treated as formative. All Year 12 work assessed is regarded as summative for exit level determination. Year 11 grades can be used to help benchmark academic achievement on the rare occasions where insufficient data is available.

Year Level Grade Distribution

Subject	% of As	% of Bs	% of Cs	% of Ds	% of Es
Japanese	42%	47%	5%	5%	0%

* Overall achievement and individual assessment criteria are reported on a fifteen point scale from A+ to E- where:
A = Very High Achievement; B = High Achievement; C = Sound Achievement; D = Limited Achievement; E = Very Limited Achievement

Current assessment reflects performance since the last report.

Cumulative assessment reflects achievement in the finally assessable elements of the entire course, thus far.

Year 11 Mathematics B

Mr P A Johansen

Knowledge & Procedures	A-	Current A	Cumulative A
Communication & Justification	A		
Modelling & Problem Solving	A		

Jim, you are to be congratulated on the strong work ethic you have displayed this semester and on the excellent results you have attained. You show interest in the work and this is evidenced by the intelligent questions you ask. Each lesson you have applied yourself well so that each new concept is properly added to your mathematics knowledge. Your assignment this semester was well researched and clearly presented. Continue with your conscientious and industrious approach to this subject next semester.

Year 11 Mathematics B - Subject Overview

Grades for Year 11 Mathematics A, B and C reports are based on the categories of general objectives of each of these courses. These are detailed in the relevant syllabus documents (2014 amendment). These categories of objectives are: Knowledge and Procedures, Modelling and Problem Solving, and Communication and Justification.

Knowledge and Procedures involves students demonstrating the recall and use of results and mathematical procedures. Modelling and Problem Solving involves the uses of mathematics in which students model mathematical situations, solve problems and undertake mathematical investigations. Communication and Justification involves the presentation, communication, logical argument, interpretation, justification of mathematics and checking the reasonableness of answers or results.

Evidence of student progress is gathered from a summative test at the end of each term, and an Extended Modelling and Problem Solving Task each semester. All assessment items assess all three criteria. The current report grade comes from an equal contribution of each criterion. Each criterion is given an individual grade from A+ to E. The cumulative grade is the same as the current grade.

Year Level Grade Distribution

Subject	% of As	% of Bs	% of Cs	% of Ds	% of Es
Mathematics B	36%	37%	22%	5%	0%

* Overall achievement and individual assessment criteria are reported on a fifteen point scale from A+ to E- where:
A = Very High Achievement; B = High Achievement; C = Sound Achievement; D = Limited Achievement; E = Very Limited Achievement

Current assessment reflects performance since the last report.

Cumulative assessment reflects achievement in the finally assessable elements of the entire course, thus far.

Form Tutor's Comments

Jim, you continue to be a welcome source of humour and good-natured camaraderie in Tutor Group. You have adjusted well to the expectations of Year 11, and have appeared more confident and organised as the semester has progressed. I also commend you for the continued wide range of extra-curricular involvements across Music, Sport and Public Purpose. Stay focused and embrace the challenges of next semester.

Mr Robertson

Head of Year's Comments

Jim, you have made an excellent start to your senior studies. A judicious selection of subjects combined with a positive work ethic have you well placed for on-going success. You have maintained your high standards across your chosen subjects and have every right to be well pleased with the outcomes. Your continued contribution to and involvement in the extracurricular life of the school is to be commended.

Mr Carmichael

Year 11 Physics

Ms N Chan

Knowledge and Conceptual Understanding	A	Current A	Cumulative A
Investigative Processes	A		
Evaluating and Concluding	A-		

Jim, you've demonstrated considerable expertise in learning and applying skills to the study of thermal physics. Further, you've shown considerable talent for analysis and solution of all types of problems in electricity. Your Nuclear Report shows skill, enthusiasm, and careful attention to detail. Throughout the course, you've consistently displayed a positive attitude to all aspects of your work and study. You are a very able and effective learner who draws upon a variety of resources. Well done, Jim!

Year 11 Physics - Subject Overview

At the core of all scientific endeavour is the inquiry into the nature of the universe. Scientists recognise that knowledge is not fixed, but is always fallible and open to challenge. As such, scientific endeavour is never conducted in isolation, but builds on and challenges an existing body of knowledge in the pursuit of more reliable knowledge. This collaborative process, whereby new knowledge is gained, is essential to the cooperative advancement of science, technology, health and society in the 21st century.

Physics provides opportunities for students to engage with the classical and modern understandings of the universe. In Semester 1, students engage with the concept of gravitational and electromagnetic fields, and the relevant forces associated with them. Finally, in Semester 2, students study modern physics theories and models that, despite being counterintuitive, are fundamental to our understanding of many common observable phenomena.

Evidence of student progress is gathered from: a research report and an exam in Semester 1; an extended experimental investigation and two exams in Semester 2. Each item will consist of all three criteria as outline in the QCAA Physics Syllabus (2007). Each item contributes equally to a student's overall level of achievement.

Year Level Grade Distribution

Subject	% of As	% of Bs	% of Cs	% of Ds	% of Es
Physics	52%	26%	18%	3%	0%

* Overall achievement and individual assesment criteria are reported on a fifteen point scale from A+ to E- where:

Statement from the Senior Leadership Team

The year group made pleasing progress throughout 2018 and Mr Carmichael reports that the students are in a good position to manage the rigours and responsibilities associated with their senior year in 2019.

An important part of your son's success next year will be his ability to commence the year with a positive attitude and a desire to work hard. The attached report gives you and your son the opportunity to review his progress this semester. When you review this report with your son, please work through his academic profile, identify specific strengths and shortcomings across his subjects, and then set achievable targets for improvement in 2019. Achieving these targets requires a regular schedule of study, revision and reflection.

At the School a key focus is on the development of the whole student. In particular, the development on each boy's social and emotional wellbeing. This year the focus in Year 11 has been on personal growth combined with a focus on the support and success of the whole group. We have been impressed with the growth of the year group during the year and feel that the boys have developed a greater understanding of the importance of unity. This will be important as they work together to lead the School and prepare for the QCST next year. In order to prepare each student for the QCST, the School provides a comprehensive program of preparation and trials and it is vital that your son is an active and engaged participant throughout.

In 2019 each senior student has the opportunity to engage in leading the younger members of the student body. Our philosophy is to develop leaders who are able to firstly lead "self" and as a result, lead others. All senior students are role models and we expect them to mentor younger students. Our desire is for leadership to be viewed as a form of service and selfless in its application. This is an important component of being a senior and I look forward to assisting your son develop good practice in this area. It is also important that boys continue to maintain involvement in the extracurricular program. I encourage your son to participate as well as support the various activities that will be available to him next year.

A critical part of Year 12 is making plans about the future. All senior students have the opportunity to meet with a School Counsellor to discuss their options for 2020. In addition, families are provided with regular information via MyGrammar and newsletter. Parents will be invited to a parent evening where information about the OP system and tertiary entrance will be provided. Student Services also maintains open social media feeds for parents to follow under the banner of Beyond Grammar available on Facebook at <https://www.facebook.com/bgsstudentservices/> and on Twitter @BeyondGrammar. I think it is important you take advantage of these resources as it will inform your conversations with your son.

Throughout the year the School has had much delight in celebrating our 150th anniversary since foundation in 1868. This milestone year provided us with the opportunity to not only share our rich history, but also connect with countless members of our extended community. As we look towards 2019, we will be ending our BGS150 celebrations with a special event commemorating the day the School's doors opened in February 1869. We are also looking forward to launching the official School History book written by esteemed historian Helen Penrose. To pre-order a copy please go to the BGS150 website and click on memorabilia.

I wish you and your son(s) all the very best for the holiday break.

Form Tutor's Comments

Jim, well done on your wide range of involvements and awards this semester. Your commitment to do your best academically is clear and commendable. However, you must ensure that you find more consistent balance between study commitments and your well being; specifically, you must ensure that you have regular and sustainable sleep patterns which will benefit your ability to study more effectively. Congratulations on your appointment as Form Senior and I wish you every success for Year 12.

Mr Robertson

Head of Year's Comments

Jim, well done on another impressive academic report. You have approached all aspects of school life in your usual quietly confident fashion and you should feel very pleased with your resultant success. Congratulations on your well-deserved appointment as a Form Senior and for your Certificate of Merit plus other awards. I am sure you will take every opportunity you can to enjoy a positive and memorable final year.

Mr Carmichael

Year 11 Chemistry

Mr F C McClatchy

Knowledge and Conceptual Understanding	A	Current A+	Cumulative A
Investigative Processes	A+		
Evaluating and Concluding	A+		

Jim, you are a very able and effective independent learner, and you set yourself high standards. You have demonstrated a thorough understanding of the concepts, theories, strategies and principles in both complex and challenging situations. You analyse and evaluate complex scientific interrelationships well over a variety of contexts. You have demonstrated a highly developed ability to evaluate and conclude in the context of writing Extended Experimental Investigations.

Year 11 Chemistry - Subject Overview

The Senior Chemistry course endeavours to provide a challenging and worthwhile learning experience for all students. Through student engagement, knowledge and conceptual understanding in a range of chemistry concepts as well as higher thinking processes are developed.

In Semester 2 Students will have studied Energetics, Rates of Reaction, Periodicity and Chemical Bonding. To facilitate the development of the pupils in these areas they participate in a variety of learning activities and should be able to construct meaning through active engagement.

The assessment pieces used in Semester 2 are both Supervised Assessment and the Extended Experimental Investigation. These pieces are assessed in the areas of Knowledge and Conceptual Understanding (KCU), Investigative Processes (IP) and Evaluating and Concluding (EC) and Criteria Standards, linked to Exit Criteria, are used to grade the pupils work.

Year 11 English

Ms B Kachel

WT1 Short Story	B	Current B+	Cumulative B
WT2 Documentary Review	B+		
OT2 Panel Discussion	B+		

Jim, you approach your English studies with unfailing enthusiasm and diligence. Your results this semester reveal subtle signs of improvement, and you are capable of further improvement if you continue to persevere in Year 12. In order to develop the quality of your written and spoken work, you must refine the clarity and accuracy of your expression, and you must be more judicious in your selection of content. While your panel discussion was confidently presented, you must internalise scripts for oral tasks next year.

Year 11 English - Subject Overview

The Year 11 English program is designed to provide students with formative experiences in preparation for Year 12. Students respond critically and creatively to both literary and non-literary texts, aiming to express their ideas with clarity, precision and coherence. Understanding their role as a writer or speaker and how their selection of language may influence their audience is fundamental to each task. In Semester 2, we expect students to demonstrate greater independence in their thinking and preparation for each task.

In Year 11, students study English for four periods per week. This semester, they craft their own short story (WT1), using a poem as stimulus, and they produce a documentary review (WT2) as part of an elective unit. Their novel study culminates in a panel discussion (OT2), which allows students to demonstrate a critical appreciation of literature.

Students receive a global result for each task. When assigning current and cumulative levels of achievement, teachers take into account the conditions under which the assessment tasks were completed, the various genres, the modes of communication, and the pattern of a student's performance over the course.

Year Level Grade Distribution

Speaking	A+		
Writing	A		

Jim, this has been another excellent semester of consistent work and high achievement in each of the macro skills. In Writing, you effectively convey information, ideas and meaning using a wide range of vocabulary and structures with few errors. Your speech is fluent and accurate, enabling you to converse effectively using familiar and complex language. Your listening and reading comprehension are consistently impressive and reflect your outstanding grasp of vocabulary and grammar. Congratulations on an impressive semester's work.

Year 11 Japanese - Subject Overview

Students learn Japanese for four periods per week as part of a two-year course of study. Subject matter, learning experiences and assessment increase in complexity with each unit, and students develop greater independence as learners. This semester, students study the units: "Hobbies", "Sports and Health", "Entertainment", "Protecting the Environment", "Saving Water" and "Bullying". Content taught in the junior Japanese course is consolidated, and students further develop their understanding of language features and language elements.

Students' understanding is assessed through four tests, each weighted 25%. Students complete a Reading Test, Listening Test, Speaking Test and a Writing Test. Two broad criteria, Knowing and Understanding and Reasoning and Responding, are used to assess students' comprehension of language in Listening and Reading Tests. Students' ability to produce language in Speaking and Writing Tests is assessed using the criteria Knowing and Using Language Features and Creating and Responding. However, certain standards in each macroskill apply for the awarding of the cumulative result.

Year 11 Mathematics B

Mr P A Johansen

Knowledge & Procedures	A	Current A-	Cumulative A
Communication & Justification	A-		
Modelling & Problem Solving	A-		

Jim, you are a mature learner who has a commendable work ethic. I have seen you work in different contexts and develop complex models, using your comprehensive knowledge to solve a wide range of challenging questions. You can comfortably use appropriate technology to interpret and evaluate problems. Be sure any assumptions you make, and their effects, are relevant to the models. This will strengthen the justification of procedures, decisions, and results. I appreciate your remarkable work ethic which makes you an excellent student.

Year 11 Mathematics B - Subject Overview

Grades for Year 11 Mathematics A, B and C reports are based on the categories of general objectives of each of these courses. These are detailed in the relevant syllabus documents (2014 amendment). These categories of objectives are: Knowledge and Procedures, Modelling and Problem Solving, and Communication and Justification.

Knowledge and Procedures involves students demonstrating the recall and use of results and mathematical procedures. Modelling and Problem Solving involves the uses of mathematics in which students model mathematical situations, solve problems and undertake mathematical investigations. Communication and Justification involves the presentation, communication, logical argument, interpretation, justification of mathematics and checking the reasonableness of answers or results.

Evidence of student progress is gathered from a summative test at the end of each term, and an Extended Modelling and Problem Solving Task each semester. All assessment items assess all three criteria. The current report grade comes from an equal contribution of each criterion. Each criterion is given an individual grade from A+ to E. The cumulative grade is a combination of semester 1 and 2 current grades.

Year Level Grade Distribution

Year 11 Physics

Ms N Chan

Knowledge and Conceptual Understanding	A-	Current A	Cumulative A
Investigative Processes	A		
Evaluating and Concluding	A		

Jim, you have worked at your best to maintain high standards in knowledge acquisition and skill application. Your application in the Extended Experimental Inquiry Task is to be commended and you have demonstrated exceptional skill in designing experiments and analysing data. In the exams, you have outstanding ability to analyse and evaluate complex scientific relationships. You have shown excellent concentration and application in lessons and you're reaping the benefits. Well done and keep up the good work for next year, Jim!

Year 11 Physics - Subject Overview

Physics provides opportunities for students to engage with the classical and modern understandings of the universe. Students study Physics for four periods per week. In Semester 1, students learn about the fundamental concepts of thermodynamics, electricity and nuclear processes. In Semester 2, students learn about the concepts and theories that predict and describe the linear motion of objects. Further, they will explore how scientists explain some phenomena using an understanding of waves.

Evidence of student progress is gathered from: a student research report and an exam in Semester 1; a student extended experimental investigation and two exams in Semester 2. Each item will consist of all three criteria as outline in the QCAA Physics Syllabus (2007) – Knowledge and Conceptual Understanding; Investigative Processes; and, Evaluating and Concluding. Each item contributes equally to a student's overall level of achievement in Physics.

Year Level Grade Distribution

Subject	% of As	% of Bs	% of Cs	% of Ds	% of Es
Physics	58%	32%	10%	0%	0%

* Overall achievement and individual assesment criteria are reported on a fifteen point scale from A+ to E- where:
A = Very High Achievement; B = High Achievement; C = Sound Achievement; D = Limited Achievement; E =Very Limited Achievement

Current assessment reflects performance since the last report.

Cumulative assessment reflects achievement in the finally assessable elements of the entire course, thus far.

	Knowledge and Conceptual Understanding							Investigative Processes							Evaluating and Concluding						
	A	B	C	D	E	F	L	A	B	C	D	E	F	L	A	B	C	D	E	F	L
Test 4 Water on the Rocks	A-								B+							B+					
Prac Test SA 2 acids and bases	A+							A								B+					
EEl Water equilibrium analysis		B+						A							A						
Test 5 Redox	A							A							A-						
Test 6 Organic chemistry																					

The Senior Chemistry course endeavours to provide a challenging and worthwhile learning experience for all students. Through student engagement, knowledge and conceptual understanding in a range of chemistry concepts as well as higher thinking processes are developed.

In Semester 1 students study Chemical Equilibrium, including Solubility and Acid-Base contexts. To facilitate the development of the students in these areas, they participate in a variety of learning activities and should be able to construct meaning through active engagement with practical work and simulations as well as theory.

The assessment pieces used in Semester 1 are two Supervised Assessments, with one including a practical component. Note that while the Extended Experimental Investigation is completed late in Semester 1, the results of this do not contribute to the current Semester Report. Students are assessed in the areas of Knowledge and Conceptual Understanding (KCU), Investigative Processes (IP) and Evaluating and Concluding (EC). Criteria standards linked to Syllabus Exit Criteria are used in grading responses.

Report Comments		Jim, you are a mature learner who has a commendable work ethic. I have seen you work in different contexts and develop complex models, using your comprehensive knowledge to solve a wide range of challenging questions. You can comfortably use appropriate technology to interpret and evaluate problems. Be sure any assumptions you make, and their effects, are relevant to the models. This will strengthen the justification of procedures, decisions, and results. I appreciate your remarkable work ethic which makes you an excellent student.

Reference for Shao-Jun (Jim) Xiao

Jim Xiao has been a student at Brisbane Grammar School for the past 6.5 years. In that time, he has rightly earned a reputation for being a committed scholar, an impressive member of the School community and a school leader of unwavering loyalty and commitment. During his final two years of schooling, I was Jim's senior physics teacher.

Jim's academic record at the School reflects his extraordinary capacity for hard work and his intellectual talent. He is a scholar of undoubted substance, not simply because of what he knows, but because he pursues knowledge with relentless rigour, insatiable curiosity and a desire to continually challenge himself. As a learner, Jim is meticulous, methodical and measured. He always plans his work with attention to detail and with a strong awareness of purpose. One of the things I admire about Jim is his willingness to read more widely and deeply to seek answers for himself. Jim's academic achievements to date are a product of his unfailing commitment to excellence.

Jim's sincerity and concern for the wellbeing of others are impressive characteristics. He sets a very fine example for younger students and is always very polite and approachable, especially in his role as a Year 6 Form Senior. Jim undertook his duties with maturity and integrity, helping ensure his charges were guided with empathy and understanding. Jim's classroom interactions are characterised by his willingness to assist others and witty humour which has earned him the respect of his peers.

Jim is a mature, determined and unfailingly polite young man who impresses all who meet him. I'm confident that he will continue to demonstrate the same diligence, perseverance, and optimism that he showed myself and his peers. I highly recommend Jim for the Engineering and Information Technologies Leadership Scholarship at the University of Sydney.

Ms. Noël Chan

Head of Physics

Brisbane Grammar School

noel.chan@brisbanegrammar.com

29th September 2019

BRISBANE GRAMMAR SCHOOL

12 August 2019

To whom it may concern,

Jim Xiao has been a student at Brisbane Grammar School for the past seven years, where he has developed a strong reputation for academic achievement and as a positive contributor to school life and as a leader. In my role as Jim's Head of Year, I have had the pleasure of watching him develop into the capable young man he is today.

In all endeavours, Jim strives conscientiously to attain his best. Academically, he has proven himself to be a highly intelligent and capable student. He can articulate ideas and opinions effectively and is a proficient speaker and listener. He is punctual and reliable and has demonstrated a well-developed capacity for independent learning and critical and innovative thought. Jim achieved a Certificate of Merit award in Year 11, which places him at the upper end of his cohort.

The breadth of Jim's co-curricular involvement at Brisbane Grammar School has been significant. A reflection of the extent of his talent and commitment is evident through his participation in volleyball, basketball, tennis and fencing.

Jim has been an active and committed member of the Service Committee and his cultural involvement has covered numerous music bands, ensembles and orchestras. His leadership capacities have been recognised throughout his time at Brisbane Grammar School. His Form Tutors have regularly commented on his sense of responsibility and confident dealings with both staff and students.

Jim's leadership qualities were recognised this year with his appointment as a Year 6 Form Senior, a role in which he has excelled while diligently carrying out his responsibilities.

Jim is a well-balanced and thoughtful person. He has a positive approach to life, which combines well with his determined attitude. I highly recommend Jim as being worthy of favourable consideration. If required, I am happy to be contacted to speak further on Jim's behalf.

Yours sincerely,

Larry Carmichael

Form Tutor's Comments

Jim, you are a friendly and polite member of the class community. You display a very positive attitude in the classroom and you usually interact appropriately with your peers. You are considerate of others and you are always willing to lend a hand; however, you need to make sure that it does not come at the detriment of your own work. Your willingness to serve others is exemplified in your involvement with the Service Committee and I congratulate you on your efforts here. During the three-way conferences, I challenged you to concentrate on participating more regularly in class as a means of limiting the times where you become distracted by those around you. I congratulate you on the efforts that you have made here, although I would encourage you to strive for an even greater level of participation next semester. Your organisational skills are progressing nicely. Your Record Book is being utilised effectively to ensure most of your homework is being completed and your locker is generally neat and tidy. You have made a valuable contribution to the School's Extracurricular Program. Jim, you have been a pleasure to teach and I look forward to working with you next semester.

Mr Tier

Head of Year's Comments

Jim, overall you should be pleased with your first semester at the School. You have achieved well in your subjects. From your teachers' comments, you have worked consistently throughout the semester and pleasingly, you have been making steady improvement across your subjects. Academic success will come from persistence, application and more active engagement in class discussion. If you can work with continued determination throughout next semester, I would expect to read about further achievements in your studies at the end of the year. Jim, you have contributed positively to the extracurricular life of the Middle School and this balanced involvement will complement your work in the classroom. I hope you have enjoyed the start of your Brisbane Grammar School journey.

Mr Timms

Head of Middle School's Comments

Jim, your report reflects your varied and enthusiastic involvement in school life. There is much to be pleased with in terms of your academic progress but there are also areas where you can make further progress. I encourage you to heed your teachers' advice to help you improve. Overall, well done.

Library Monitor

Form Tutor's Comments

Jim, you have made many valuable contributions to the School community and your efforts as a Library Monitor have been greatly appreciated. You are a very enthusiastic young man who readily engages in the learning process through the involvements that you make. There are times, however, where you have become a distraction to both yourself and to others. It is essential that you apply yourself during a task and maintain concentration for more extended periods of time. Unfortunately, this semester you have had to have your Record Book monitored. It is essential that next year you learn to use your Record Book more independently. This will become even more important as the workload becomes more demanding. I congratulate you on involving yourself in a range of different extracurricular activities and applaud you on receiving a number of credit awards in the external ICAS competitions. It has been a pleasure to teach you, Jim. I wish you all the best for next year and beyond at the School.

Mr Tier

Head of Year's Comments

Jim, generally, this is a good report, indicating pleasing work habits. It is evident you are continuing to learn the importance of establishing the necessary skills needed for the academic challenges of Year 7. However, read your report carefully as your teachers offer you some suggestions for continued improvement. I am pleased you are exploring a wide and diverse range of extracurricular pursuits; your participation in these certainly complements your studies. As the year progressed, you have developed greater resilience in situations but you still need to approach each day with energy and enthusiasm. Keep striving to improve, Jim!

Mr Timms

Head of Middle School's Comments

Jim, your positive approach to school life is most praiseworthy. Your results are commendable and I look forward to you heeding your teachers' advice so that you can make further progress. Overall, you have had a great first year at the School

Form Tutor's Comments

Jim, as the semester has progressed, you have become more familiar with the expectations and routines of Year 7. You have continued to develop some positive interactions with your peers during the semester. However, on occasions you can become caught up in these social interactions at the wrong time, distracting you from the task at hand. While this is not a major concern, it should be something to take on board for Semester 2. Also, at times, your unbridled enthusiasm sees you rushing through work without paying due care and attention to detail. You will do your best work when you take your time to ensure the final product is the best possible work of which you are capable. Organisationally, you are meeting the expectations of a Year 7 student; your locker is generally kept tidy and you use your Record Book effectively; however, I would like to see regular signing next semester. Congratulations on your participation in the Extracurricular Program at Brisbane Grammar School; this is a measure of your commitment to become involved in the range of opportunities available. Jim, I have enjoyed your company this semester and look forward to seeing you continue to develop during Semester 2.

Mr C Smith

Head of Year's Comments

Well done, Jim. This is a satisfactory report showing a willingness on your part to participate constructively in all areas of school life. While your academic performance has been reasonably impressive, areas for improvement exist, particularly in relation to the effective use of class time and attention to detail. You are a capable young man and it is important that you seek to extend yourself in all areas next semester.

Mr Carmichael

Headmaster's Comments

Jim, you have generated a strong academic profile, but there are still subjects that require greater emphasis. Please read your teachers' comments closely and identify areas that need your attention.

Form Tutor's Comments

Jim, while overall you have had a solid semester of participation and achievement, you should set your sights a little higher in Year 8. On occasions you have the tendency to coast. The key to greater success in Year 8 is to take the responsible risk of putting much more effort into your studies. You have well-developed manners and a fine sense of humour, making you a well-liked and valued member of our class community this year. I commend your motivation to work quickly and efficiently in class, but have noted that you sometimes complete tasks too quickly with an insufficient depth. This has shown much improvement in Semester 2, and I urge you to continue to check your work carefully before submission. During Semester 2, I have also seen an increase in the amount of feedback you have sought, which is a positive step towards completing tasks to the best of your ability. Well done. You often volunteer to help around the classroom and I have appreciated your generosity in this respect. Your academic results are a good base from which to build, but with better work habits in Year 8, I am confident that they will be even higher. Best wishes for Year 8, Jim. I look forward to following your progress in the future.

Mr C Smith

Head of Year's Comments

Jim, this report highlights a solid effort throughout the semester. Your academic results are in the main impressive and comments highlight your positive approach to school life in general. Continued and in some cases improved effort and application will lead to further success. Challenge yourself to avoid distractions that may affect your classroom performance next semester. I look forward to you making further positive contributions as you move forward into Year 8.

Mr Carmichael

Dean of Studies' Comments

Jim, it is very pleasing to note that you have applied yourself genuinely to your studies throughout the semester. I encourage you to heed your teachers' advice and commit yourself to putting it into action from the commencement of Year 8. You are making very good progress.

Form Tutor's Comments

Jim, congratulations on an excellent semester. You confidently set high goals at the beginning of the first term and have consistently worked hard to achieve them. Your recognition as Dux of Japanese demonstrates your outstanding ability and hard work in this subject. It has been pleasing to see your confidence, maturity and enthusiasm grow in all classes, which has allowed you to concentrate and achieve a deeper level of understanding and analysis. You have avoided distractions in class and maintained a better focus, contributing strongly to all class discussions. I also commend your expanded vocabulary and encourage you to continue reading and exploring a range of texts. Socially, you enthusiastically support your peers and your sense of humour and kindness is respected and appreciated. I encourage you to continue concentrating on these skills and to expand your social network through extracurricular activities next year. Jim, I have enjoyed working with you this year and I wish you all the best for continued success in 2016.

Mrs Salmon

Head of Year's Comments

Jim, congratulations on another impressive semester report. The overall consistency of your teachers' comments and your results highlight your positive approach to your studies. Your growing maturity and focus over the past couple of years has allowed you to establish a fine platform for future achievement. Well done! Your ongoing commitment to the School's extracurricular program is noted and appreciated.

Mr Carmichael

Deputy Headmaster's Comments

Jim, you have been a highly productive and respectful member of the Middle School community this year and I commend you on your positive attitude and honest efforts. A continuation of this productive approach will guarantee further success.

Form Tutor's Comments

Jim, you continue to be a quiet and cheerful presence in Tutor Group, and appear to be adjusting well to the expectations of Year 10. Your focus and behaviour have improved, as has your reliance on technology, which should be commended. However, I would encourage you to try to be more involved in activities and discussion during the Student Wellbeing program: your perspective and insight about the topics that are discussed will be of value to your peers.

Mr Robertson

Head of Year's Comments

Jim, you have made a positive start to Year 10 this semester as reflected in some pleasing academic results and comments. You now need to strive for consistency across all subject areas and to address any shortfalls throughout the remainder of the year. While most of your results are at an A/B standard I still believe that you are capable of better. Challenge yourself to improve your outcomes next semester. Keep up your positive involvement in the School's extracurricular program.

Mr Carmichael

Deputy Headmaster's Comments

Well done, Jim; this is a quite solid report overall. A strong work ethic and willingness to respond positively to feedback are important virtues to develop and sustain as a learner. Subject selection for Senior is close so make sure that you avail yourself of the good advice that is on offer and build a course of study that really aligns with your strengths.

Form Tutor's Comments

Jim, while your interactions with your peers are often characterised by your good humour, this belies a deep drive to contribute to and get the most out of your school community. This is most apparent in your involvement in the socially conscious Co-curricular activities of the Public Purpose program and the Homework Club. In addition, your involvement in the QUT Student Research Internship program is something of which you should be proud. In addition, you have taken on the role of Form Senior, and I hope you are getting the most from interacting with and mentoring younger students. Have a restful holiday and I look forward to seeing you take on the challenges of your final semester

Mr Robertson

Head of Year's Comments

Jim, you are to be congratulated for your positive and productive start to Year 12. The affirming nature of your teacher's comments and your impressive results, clearly indicate that you are a diligent and hard-working young man. Academically, I believe avenues for improvement still exist and I would encourage you to strive for even better outcomes throughout the remainder of the year. Thank you for the leadership you have demonstrated as a Year 6 Form Senior. I wish you the very best in your final semester at Brisbane Grammar School.

Mr Carmichael
