

BRISBANE BOYS' COLLEGE

SENIOR SCHOOL UNIT 1 & 2 REPORT 2020

Zijie Zhou, Year 11 Birtles

OVERALL INDICATIVE GRADES

Each subject reports student achievement which is represented by a grade ranging from A(highest) to E(lowest). The grades represent the indicative achievement in a subject for Units 1 & 2 and are based on the completed internal assessment items. At the end of this Report is a graph representing the calculated academic achievement of your son for every semester of study based on the grades given for each subject. The calculated academic achievement shown in this graph is based on:

- (a) The year level your son is in. The A to E grades given for subjects have different numerical values which are determined by the year level your son was in for each semester. This is to reflect the progressively increasing academic challenges your son encounters from one year to the next.
- (b) The number of contact periods each subject occupies in the weekly academic programme. For example, a subject like Mathematics, taught for nine periods per cycle, contributes more to the calculated academic achievement than a subject taught for less periods.

Subject Application Rating

Application refers to a student's approach to learning and the level of application demonstrated in the subject. The rating of a student's application in a subject is based on the quality and consistency of his application. These subject application ratings are then averaged to produce a single number, the Overall Subject Application Rating (OSAR). The OSAR serves a similar function to the Grade Point Average (GPA). Comparisons should be made between a student's GPA and OSAR when considering strategies to improve GPA outcomes. The following provides a guideline for interpreting the SAR.

+

Excellent

(5)

The student demonstrates both an exemplary behaviour and approach to his learning and the learning of others. All work is completed to the best of his ability in the pursuit of academic excellence. His preparation for exams and assessment tasks is thorough.

+

Good

(4)

The student demonstrates both a positive behaviour and approach to his learning and the learning of others. There is a consistent commitment to completing tasks on time and with care for their quality and presentation. His preparation for exams and assessment tasks is good.

+

Satisfactory

(3)

The student demonstrates a satisfactory level of behaviour and approach to his learning and the learning of others. Work is usually submitted on time and the standard of work demonstrates that the student is aiming to achieve course outcomes and follow teacher directions. His preparation for exams and assessment tasks is sound.

+

Cause for Concern

(2)

The student demonstrates some inconsistent behaviour and/or approach to his learning. Work may be late, incomplete or of a poor standard. He may at times interfere with the learning of others. His preparation for exams and assessment tasks needs more effort.

+

Intervention Required

(1)

The student demonstrates poor behaviour and/or approach to his learning. Work is often late, incomplete or of a poor standard. The student may interfere with the learning of others. He has not attempted to prepare adequately for exams and assessment tasks. Intervention is required in this course to remedy the situation.

WELLBEING LEARNING DOMAINS

The BBC ASPIRE Positive Education and Wellbeing framework is of paramount importance to the development of Collegestudents as resourceful young men who have an optimistic predisposition towards life. Our framework develops each boy's ability to engage effectively with his character strengths in order to build positive relationships, manage emotions, prioritise both mental and physical health, develop an altruistic outlook, excel intellectually and lead a purposeful life.

Jack's top three character strengths are:

Character Strength 1: **Forgiveness**

Character Strength 2: **Teamwork**

Character Strength 3: **Kindness**

Positive Relationships:	The student demonstrates respect, responsiveness, trust and open mindedness towards his peers	Always
Positive Engagement:	The student is actively engaged in the ASPIRE program	Always
Positive Citizenship:	The student demonstrates a sense of belonging and connectedness to College life.	Always

Mentor Teacher: Mrs M Cameron

CO-CURRICULAR

Brisbane Boys' College provides an environment in which students have the opportunity to develop into well-rounded gentlemen. All students are strongly encouraged to participate in at least one sport, one cultural activity and one giving and service activity each year.

Following is a list of the activities that Jack has participated in this semester.

Activity	Participation
Competitive Activities	Tennis (Year 11 C)
Creative Arts	Music - Big Band, Music - Symphonic Band

YEAR TEAM LEADER COMMENTS

Jack is a diligent student who has received a commendable and consistent set of results throughout the course of this year. The comments from his teachers indicate that he has been a committed learner who is working diligently toward maximising his true academic potential in his Senior Year. I have been impressed with his continued support for the ethos of the College and the respectful way that he presents himself and engages with his peers. Jack's ability to acknowledge and develop his character and maturity has improved his empathy toward his peers and his eagerness to learn which will be of benefit in his final year. As we have now commenced Unit 3, I look forward to seeing Jack reflect on the information in this report and set discernable goals for his future. I wish him continued academic and personal success in his Senior Year.

Mr L Coleman

Year 11 Team Leader

Mr K Stanley

Assistant Year 11 Team Leader

ACADEMIC

English Students created a short story in response to the representation of Australian culture in a poem written by a poet on the English Prescribed Text List. This is a summary of grades for all assessment items from Unit 1 and Unit 2.	
Criteria and Grades Overall Grade B	Year Group Performance Overall Grade n = 210
Indicative Mark 72 out of 100 Subject Application Rating Excellent (5)	Comments: Jack has performed satisfactorily in English, demonstrating a suitable understanding of the required knowledge and skills. He has demonstrated a satisfactory application of knowledge of the relationships between text, context, audience and purpose through analysis and creativity. Jack has used a range of genres during the course and has selected, synthesised and organised subject matter for specific purposes. He has also shown that he can use grammatically accurate/appropriate language structures and language choices. Pleasingly, Jack displays a thorough and organised approach to reading prescribed texts in preparation for learning. It is important that Jack varies vocabulary to enhance impact and use more analytical verbs. To better prepare for the external exam, Jack is encouraged to write more practice essays under timed conditions. Teacher: Ms E Ward

Mathematical Methods (Year 11) Students have studied the following topics: sequences and series, functions and graphs, counting and probability, exponential functions, logarithmic functions, trigonometric functions, differential calculus and discrete random variables. This is a summary of grades for all assessment items from Unit 1 and Unit 2.	
Criteria and Grades Overall Grade B	Year Group Performance Overall Grade n = 113
Indicative Mark 80 out of 100 Subject Application Rating Excellent (5)	Comments: Jack has completed Units 1 and 2 with an overall result of 80/100. He has demonstrated mastery of all of the procedures covered in class. Jack is now working on applying his knowledge in unfamiliar context and should seek out every opportunity to hone his problem solving skills. The first summative assessment will be an assignment in Term 4. Jack should carefully review the feedback for the Year 11 work so that he can improve on his earlier score of 14/20. Teacher: Mr B Ramsay

**Specialist
Mathematics (Year 11)**

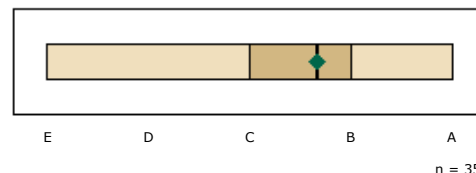

Students have studied the following topics: combinatorics, vectors, introduction to proof, complex numbers, trigonometry and matrices. This is a summary of grades for all assessment items from Unit 1 and Unit 2.

Criteria and Grades

Overall Grade
B

Year Group Performance

Overall Grade

**Indicative Mark**

63 out of 100

Subject Application Rating

Good (4)

Comments:

Jack has worked well this year and has produced some very good results. He has understood the basic concepts and can apply his knowledge to most simple and complex questions. Next year, Jack must continue to refine his problem-solving strategies and revise systematically on a regular basis.

Teacher: Mr C Maksoud**Chemistry (Year 11)**

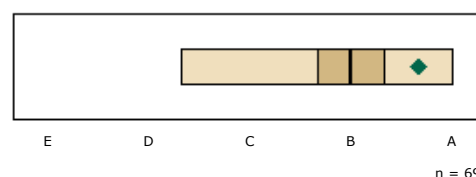

Students studied electron configuration, periodicity, chemical bonding, kinetic theory and gas laws. This is a summary of grades for all assessment items from Unit 1 and Unit 2.

Criteria and Grades

Overall Grade
A

Year Group Performance

Overall Grade

**Indicative Mark**

85 out of 100

Subject Application Rating

Excellent (5)

Comments:

Jack has shown consistent application of effort and focus towards Chemistry in Units 1 and 2. He achieved 17/20 for his Student Experiment, which had only minor faults. Jack must remember to use the ISMG criteria as a final check of his work before submission. He achieved 39/45 in exam paper 1 and this showed an impressive ability to remember all of the concepts taught. Jack achieved 31/40 in exam paper 2, illustrating his ability to structure and sequence the answer to most of longer, more involved questions.

Teacher: Mr D Fisher

Physics

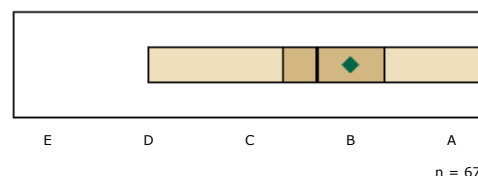

During Units 1 and 2 students have studied the topics of thermodynamics, electric circuits, nuclear reactions, linear motion and forces.
This is a summary of grades for all assessment items from Unit 1 and Unit 2.

Criteria and Grades**Overall Grade**

B

Year Group Performance

Overall Grade

**Indicative Mark**

76 out of 100

Subject Application Rating

Excellent (5)

Comments:

Jack has produced good results this year, achieving an overall total of 77/100 for both units. His student experiment was performed and analysed to an extremely high standard and a pleasure to read. Jack demonstrated a good recall of knowledge from both Unit 1 and 2 on the final exam. He has worked consistently well in throughout the year, his enthusiasm and commitment should be commended.

Teacher: Mr C Smith**Chinese (Year 11)**

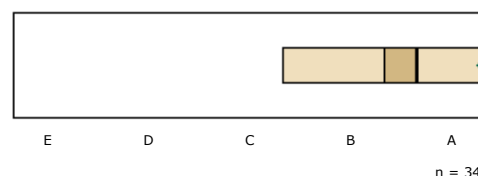

Students explored the different lifestyle and education between China and Australia. Additionally, they learned topics related to Travel, Technology and media and The contribution of Chinese culture to the world. This is a summary of grades for all assessment items from Unit 1 and Unit 2.

Criteria and Grades**Overall Grade**

A

Year Group Performance

Overall Grade

**Indicative Mark**

97 out of 100

Subject Application Rating

Excellent (5)

Comments:

Jack is a thoroughly reliable and conscientious student. He has maintained an excellent standard in all four skills in the study of Unit 1 and Unit 2. Jack has displayed a discerning analysis and evaluation of relevant information and ideas in the stimulus texts. He has also shown a perceptive identification of tone, purpose, context and audience to draw valid and justifiable interpretation of inferences about meaning, values and attitudes in proficient and complex Chinese. I look forward to continued fine work in the future. Well done!

Teacher: Ms Y Manford

Life and Belief Issues

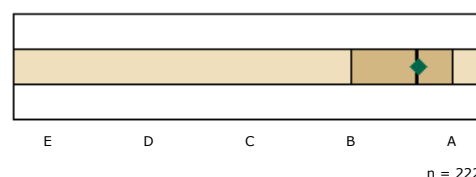

The Life and Belief course has covered themes which have included the formation of the conscience, the existence of God, God and suffering as well as topics relating to ethical decision making through a biblical framework. Students have examined how to express a personal worldview and how this impacts our decision making.

Criteria and Grades**Overall Grade**

A

Year Group Performance

Overall Grade

**Indicative Mark**

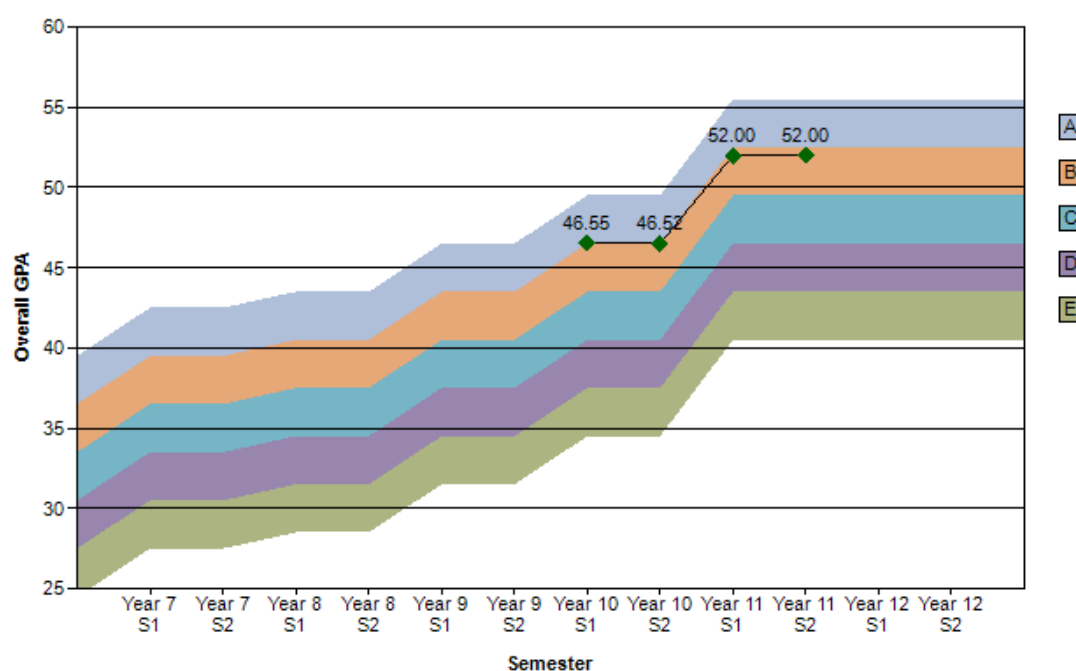

86 out of 100

Subject Application Rating

Excellent (5)

Comments:

Jack has made a positive contribution in the class throughout the year as we have discussed several key life issues. He submitted a well written expression of his personal world view as the key assessment task for the subject and was able to articulate in some detail how his personal beliefs impact his everyday decision making. Jack is a maturing student who has worked to a high standard in this subject this year.

Teacher: Mr S Phillpotts**COMMON SCALE GRADE POINT AVERAGE RECORD**

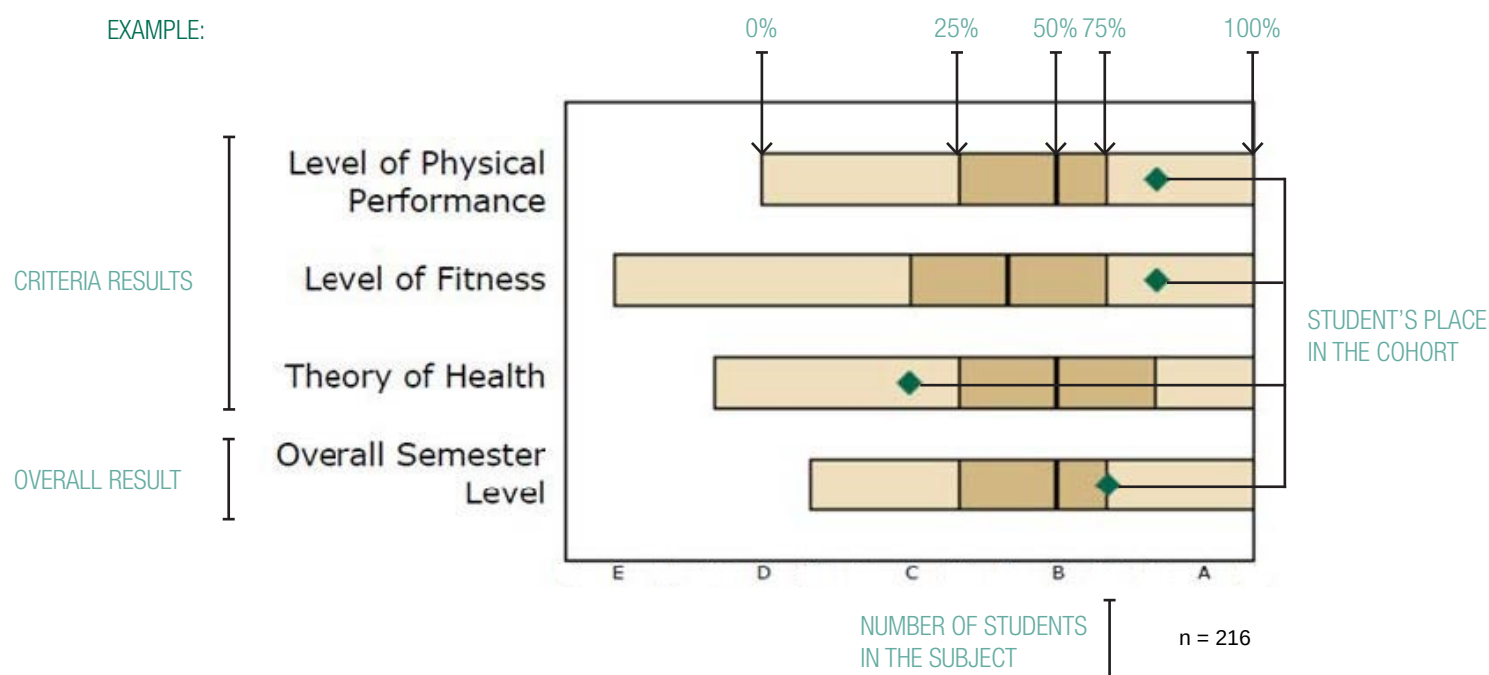

REPORT

SUBJECT RESULTS

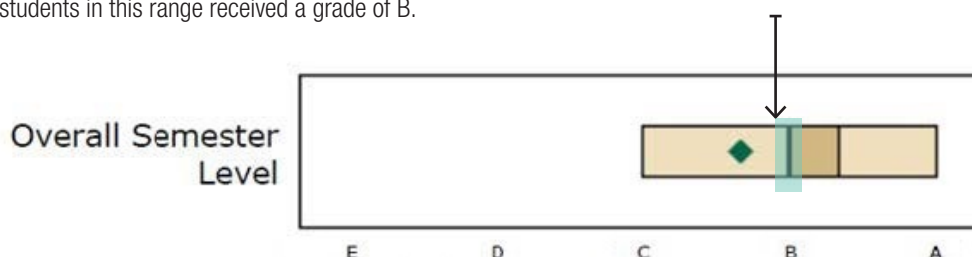

+ DESCRIPTION AND ANALYSIS

Subject results will now be illustrated using a box and whisker plot. These graphs identify five main points in a distribution of your son's cohort – the lowest point or 0%, the 25% point, the 50% point (or median), the 75% point and the highest point or 100%. The areas between each of these points are called quartiles, because they represent one quarter of the results. Your son's individual position has also been plotted on the distribution using a green diamond.

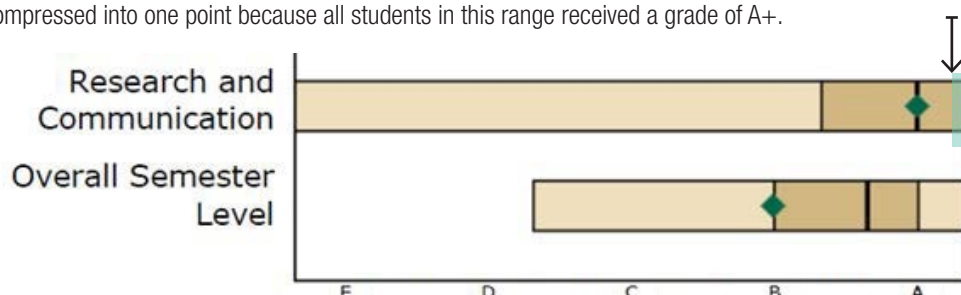

EXAMPLE:

In some subjects, it may look like one of the quartiles is missing – this just means a large number of students received the same grade. For example, in the graph below, the quartile from 25% to 50% (the median, indicated by a bold line) has been compressed into one point because all students in this range received a grade of B.

In the same way, the quartile from 75% to 100% on the graph below (normally represented by the light brown band at the right of the graph) has been compressed into one point because all students in this range received a grade of A+.

BRISBANE BOYS' COLLEGE

SENIOR SCHOOL UNIT 3 & 4 REPORT 2021

Zijie Zhou 27588 Year 12

Subject Application Rating

Application refers to a student's approach to learning and the level of application demonstrated in the subject. The rating of a student's application in a subject is based on the quality and consistency of his application. These subject application ratings are then averaged to produce a single number, the Overall Subject Application Rating (OSAR). The OSAR serves a similar function to the Grade Point Average (GPA). Comparisons should be made between a student's GPA and OSAR when considering strategies to improve GPA outcomes.

The following provides a guideline for interpreting the SAR.

5 EXCELLENT

The student demonstrates both an exemplary behaviour and approach to his learning and the learning of others. All work is completed to the best of his ability in the pursuit of academic excellence. His preparation for exams and assessment tasks is thorough.

4 GOOD

The student demonstrates both a positive behaviour and approach to his learning and the learning of others. There is a consistent commitment to completing tasks on time and with care for their quality and presentation. His preparation for exams and assessment tasks is good.

3 SATISFACTORY

The student demonstrates a satisfactory level of behaviour and approach to his learning and the learning of others. Work is usually submitted on time and the standard of work demonstrates that the student is aiming to achieve course outcomes and follow teacher directions. His preparation for exams and assessment tasks is sound.

2 CAUSE FOR CONCERN

The student demonstrates some inconsistent behaviour and/or approach to his learning. Work may be late, incomplete or of a poor standard. He may at times interfere with the learning of others. His preparation for exams and assessment tasks needs more effort.

1 INTERVENTION REQUIRED

The student demonstrates poor behaviour and/or approach to his learning. Work is often late, incomplete or of a poor standard. The student may interfere with the learning of others. He has not attempted to prepare adequately for exams and assessment tasks. Intervention is required in this course to remedy the situation.

Wellbeing Learning Domains

The BBC ASPIRE Positive Education and Wellbeing framework is of paramount importance to the development of College students as resourceful young men who have an optimistic predisposition towards life. Our framework develops each boy's ability to engage effectively with his character strengths in order to build positive relationships, manage emotions, prioritise both mental and physical health, develop an altruistic outlook, excel intellectually and lead a purposeful life.

Zijie's top three character strengths are:

Strength 1: Gratitude

Strength 2: Perseverance

Strength 3: Hope

Co-Curricular

Brisbane Boys' College provides an environment in which students have the opportunity to develop into well-rounded gentlemen. All students are strongly encouraged to participate in at least one sport, one cultural activity and one giving and service activity each year.

Following is a list of the activities that were participated in this semester:

Activity:

Academic

Competitive Activities

Creative Arts

Participation:

Academic - OSAR Excellence (Year 12)

Tennis (Year 12)

Music - Big Band, Music - Symphonic Band (Year 12), Music (Year 12)

Academic

Each subject reports student achievement which is represented by a grade ranging from A (highest) to E (lowest). The grades represent the indicative achievement in a subject for Units 3 & 4 and are based on the completed internal assessment items.

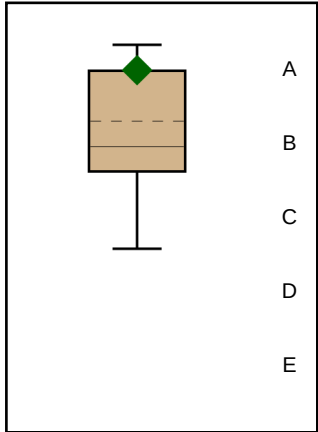

NOTE: The results of the Trial Examinations do not contribute towards the final ATAR scores

They are not the actual final grade for the Units 3 & 4 as the grades do not include External Examination results.

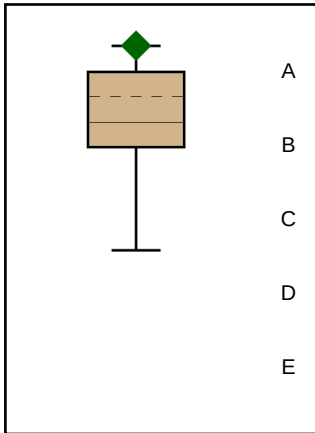

The final year 12 results will be accessible via the Senior Education Profile, which you can access via your learning account in the QCAA Student Portal. It contains a Senior Statement, which lists the subjects and courses in your learning account and the results you have achieved. You will also receive a QCE, if you've met the requirements.

OVERALL SUBJECT APPLICATION RATING (OSAR)

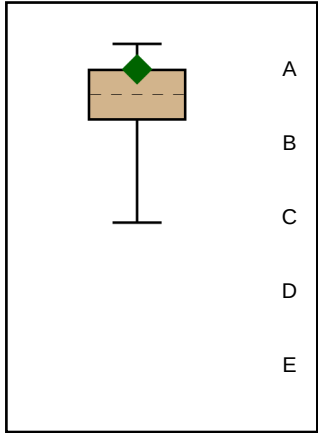

5.0

English	
Criteria and Grades	Year Group Performance
Indicative Grade A	
Internal Assessment: 88 out of 100	
Trial Exam: 33 out of 45	

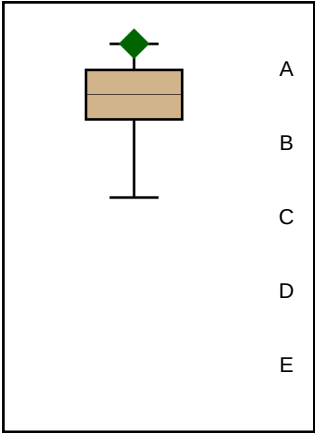

Subject Application Rating	
Excellent (5)	
Comment: Jack has performed well in English, demonstrating a strong understanding of the required knowledge and skills. He has demonstrated discerning application of knowledge of the relationships between text, context, audience and purpose through analysis and creativity. Jack has capably used a range of genres during the course and has selected, synthesised and organised subject matter for specific purposes. He has also shown that he can use grammatically accurate/appropriate language structures and language choices in a commanding and controlled manner. Pleasingly, Jack's performance on his Trial Examination was logical and relevant. He displayed a considered analysis of the prescribed text. It is important that Jack ensures he explicitly answers the essay question and keeps his analysis focused. Jack actively seeks clarification when unsure of concepts. Teacher: Elizabeth Ward	

Mathematical Methods (Year 12)	
Criteria and Grades	Year Group Performance 
Indicative Grade A	
Internal Assessment: 94 out of 100	
Trial Exam: 38 out of 50	

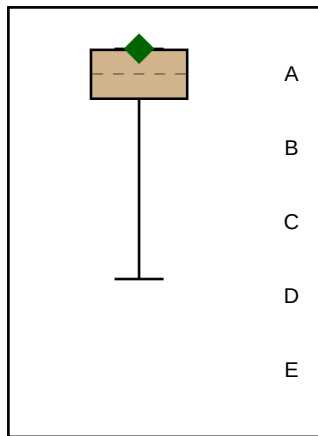

Subject Application Rating	
Excellent (5)	
Comment:	
Jack has now completed the Internal Assessments of Mathematical Methods. He has a cumulative score of 47/50. Jack has also completed his Trial Examination where he scored 74%. He demonstrated his understanding of Unit Four and, with additional revision Jack should regain his mastery of Unit Three. Jack can also spend some time familiarising himself with the QCAA style marking guide so that he can collect every possible mark.	
Teacher: Brendan Ramsay	

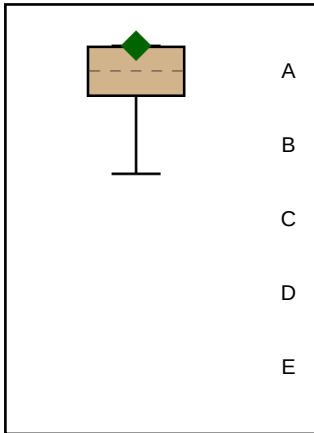

Specialist Mathematics	
Criteria and Grades	Year Group Performance
Indicative Grade A	
Internal Assessment: 90 out of 100	
Trial Exam: 27 out of 50	

Subject Application Rating	
Excellent (5)	
Comment: Jack has now completed all Internal Assessment for the Senior Specialist Mathematics Course. On the three Internal Assessments Jack scored 45 out of a possible 50 marks. This score will be combined with his External Examination, also out of 50 to give a total out of 100. At the end of Term Three Jack completed a Trial Examination and scored 27 out of 50 which is a disappointing result. He has more ability than the results indicate, Jack will need to re-familiarise himself with the content of Unit Three to be better prepared for the External Examination. To improve on the External Examination, it is important that Jack compares his Trial Examination with the marking guide so that he can see the level of communication required. There will be some opportunities for Jack to go through additional exam-style questions at school, but he will need to make use of the September holidays and to work very hard in the first three weeks of Term Four and to seek assistance when necessary. Teacher: Chicri Maksoud	

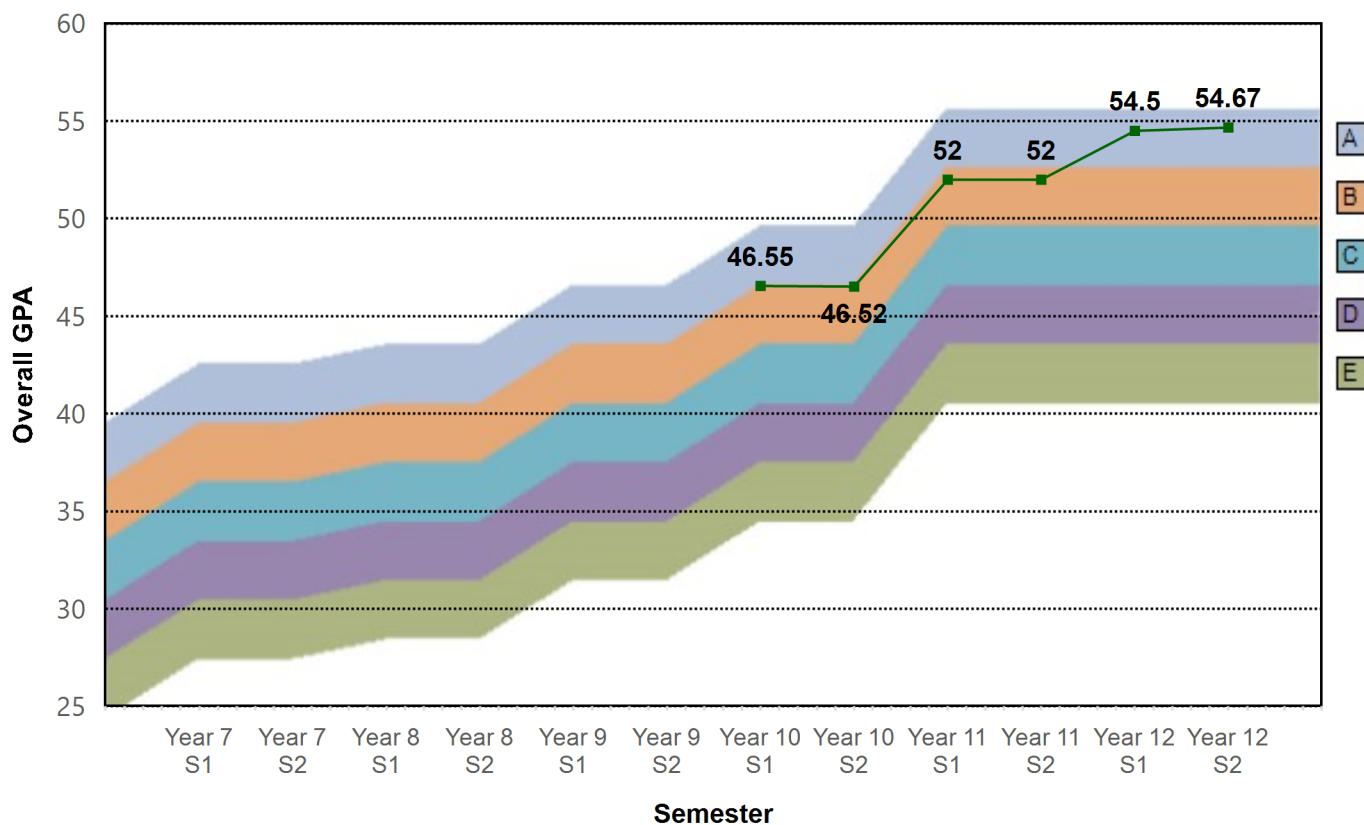

Chemistry	
Criteria and Grades	Year Group Performance
Indicative Grade A	
Internal Assessment: 94 out of 100	
Trial Exam: 64 out of 124	

Subject Application Rating	
Excellent (5)	
Comment: Jack has worked with determination during the last term and it looks likely this will continue up until the External Examination. He took the lockdown and associated disruptions in his stride. He has completed his Internal Assessment and achieved 9/10 for IA1, 19/20 for IA2 and 19/20 for IA3. Jack's Trial Examination was disappointing with a scaled mark of 26/50. The exams were difficult, but Jack must be able to both remember and apply chemical concepts across a range of question types. Jack has the potential to achieve at the highest level, and it was pleasing to see how hard he worked during the assessment for learning and revision sessions during the last week of term. Jack must now work steadily through the Unit Three and Four material, using his textbook, mind-map booklet and Education Perfect resources to revise. I will be available for revision tutoring leading up to the External Exam. Teacher: David Fisher	

Physics		
Criteria and Grades	Year Group Performance 	
Indicative Grade		A
Internal Assessment:		96 out of 100
Trial Exam:		35 out of 50
----- Subject Application Rating Excellent (5)		
Comment: Jack has worked to an exceptionally high standard across Units 3 and 4 of Physics. His excellent results on his Internal assessment items have laid a solid foundation for a good final result. Jack's results on the recent Trial Examination show has a good understanding of the concepts covered in Units 3 & 4. Individualised feedback has been provided to Jack based on his performance in each syllabus sub-topic on the Trial Examination. To improve his results on the External Examination, Jack should ensure that he uses this feedback to focus his revision efforts using the resources provided. Teacher: Cameron Smith		

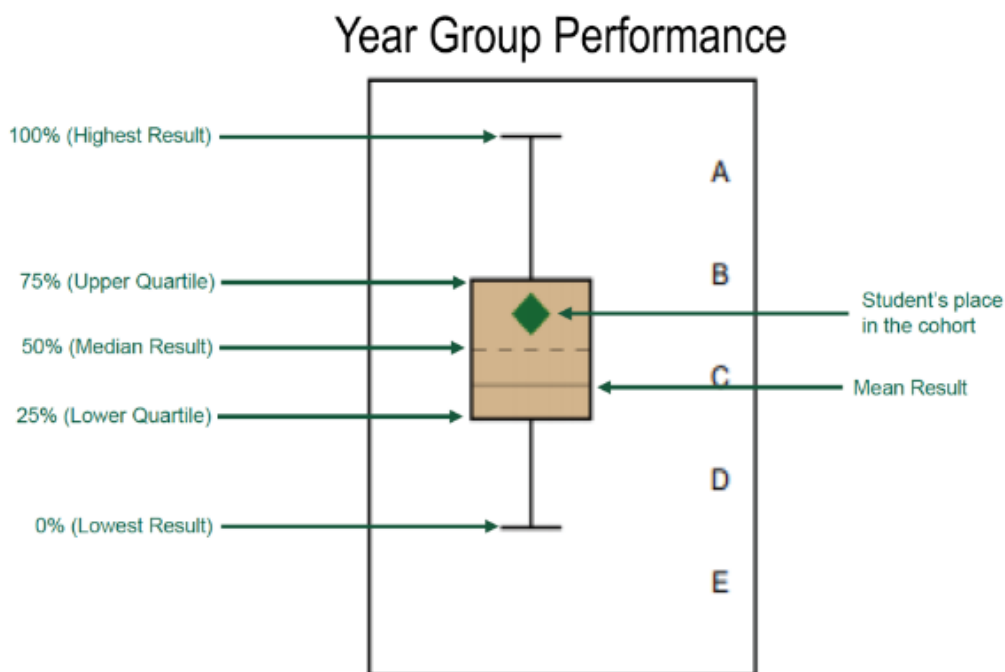

Chinese (Year 12)	
Criteria and Grades	Year Group Performance 
Indicative Grade A	
Internal Assessment: 99 out of 100 Trial Exam: 53 out of 55 ----- Subject Application Rating Excellent (5)	
Comment: Jack is a thoroughly reliable and conscientious student. He has maintained an excellent standard in all four skills in the study of Unit Three and Unit Four. Jack has displayed a discerning analysis and evaluation of relevant information and ideas in the stimulus texts. He has also shown a perceptive identification of tone, purpose, context and audience to draw valid and justifiable interpretation of inferences about meaning, values and attitudes in proficient and complex Chinese. I look forward to continued success in the External Examination next term. Teacher: Yulan Manford	

Common Scale Grade Point Average Record

Interpreting the Year Group Performance Graph

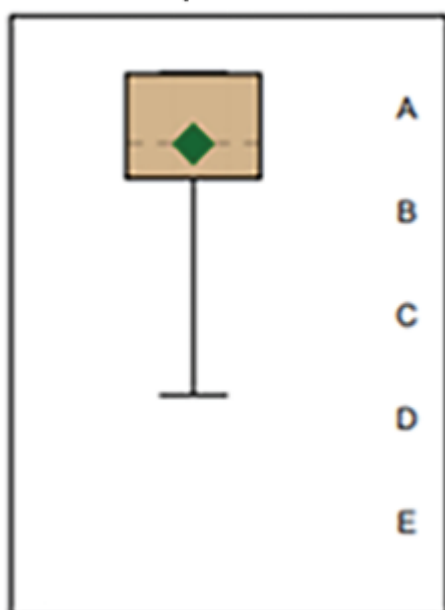

Subject results are illustrated using a box and whisker plot. These graphs identify six main points in a distribution of your son's cohort – the lowest result or 0%, the 25% point (lower quartile), 50% point (the median result), the mean result, the 75% point (upper quartile) and the highest result or 100%. The areas between each of these points are called quartiles because they represent one quarter of the results. Your son's individual position has also been plotted on the distribution using a green diamond.

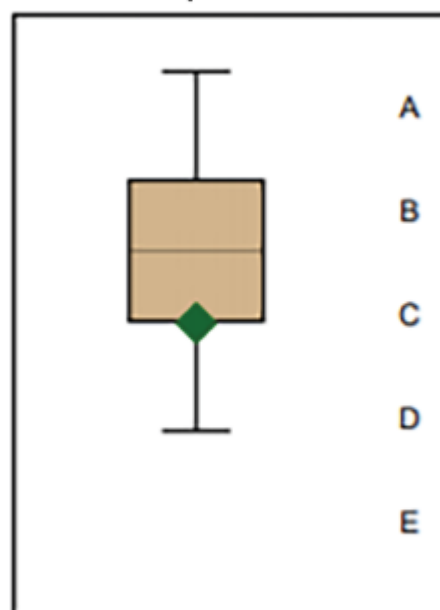

In some subjects, it may look like one of the quartiles is missing – this just means a large number of students received the same grade. The quartile from 75% to 100% on the graph has been compressed into one point because all the students in this range received the highest result.

In some subjects the median result is the same as the mean result, which is why the dotted line is not visible, as shown in the graph below.

Year Group Performance

Year Group Performance

27588

	Polyrank		TEA %	TEA	ATAR
	92.29	97	468.99		99.00
	Grade Type	Raw	Scaled	Used
