

Year 12 – Semester 1

Each subject has reported against SACE Performance Standards for the subject using the A+ to E- scale.

In many cases, work completed to date is only formative, but the current grade provides a good indication of progress against the required standard.

In summative tasks, the percentage weighting has been included.

The examination result and average have also been included for appropriate subjects.

ENGLISH LITERARY STUDIES

Mr P Barnard

English Literary Studies focuses on the skills and strategies of critical thinking needed to interpret a range of different texts. Through a shared and individual focus, students encounter different opinions about texts, exchange and develop ideas orally and in writing, find evidence to support a personal view, and consider a range of critical interpretations. They also explore the ways literary texts represent culture and identity, as well as the dynamic relationship between authors, texts, audiences, and contexts. Students create their own texts by showing an understanding of different perspectives and the creativity and craft of the authors. Texts studied include 'Hamlet', 'The Secret River', the film 'The Third Man' and a range of poetry, as well as shorter texts for Critical Reading.

Assessment Components	Weight	Grade A+ to E-
Responding to Texts A Comparative Essay on 'Hamlet' and 'The Third Man'.	12.5%	A
Creating Texts After considering a range of examples of a particular text type in class, students produce their own text and a Writer's Statement. Text types may include micro-fiction or response to visual stimulus.	10%	A
Formative Work Students undertake practice Critical Readings, Oral Presentations and other formative tasks.		B

Examination Average	68%	Examination	73%
---------------------	-----	-------------	-----

Teacher Comment

Niesha has had a very successful first semester. Both her creative writing and her text responses have been excellent. She has worked hard to polish these, taking great pains over her expression and using the drafting process effectively. Her knowledge and understanding of the texts covered so far, which is the majority, is very detailed. If she can keep this up her coursework will be completed to the highest standard. Her critical readings need work, particularly on evaluating techniques, and she will need to focus on this more closely in preparation for the final examination.

MATHEMATICAL METHODS

Mr G Whiffen

Mathematical Methods at Stage 2 develops an increasingly complex and sophisticated understanding of Calculus and Statistics. By using functions and their derivatives and integrals, and by mathematically modelling physical processes, students develop a deeper understanding of the physical world through an improved understanding of models and their rates of change. Students use statistics to describe and analyse phenomena that involve uncertainty. Students have completed Differential Calculus and Applications of Differential Calculus.

Assessment Components	Weight	Grade A* to E
Formative Tests These were tests designed to give the students practice at working at an appropriate level under timed conditions.		A
Skills and Applications In these tests students found solutions to routine, analytical and interpretive problems. These assessments were undertaken as the mini examination.	17%	A

Teacher Comment

Niesha continues to work diligently in Mathematical Methods and is performing at an excellent standard. She is cooperative and engaged in class, completing all set work to a high standard. Niesha's results in the summative tests for Calculus and Applications of Calculus showed improvement relative to the practice tests; she clearly prepared well.

Pembroke School

June 2018, Semester 1 Report

Niesha Baker, Year 12

PHYSICS

Mrs J Wedding

Physics seeks to explain natural phenomena, from the subatomic world to the macrocosmos, and to make predictions about them. The physics covered in this report includes the topics Motion and Relativity, and Electric Fields. These topics have built on the students' knowledge from Stage 1. Students have also been focused on further developing the skills required to be successful in this course, such as communication skills, inquiry skills and ICT skills, along with problem-solving strategies and applying their knowledge to everyday examples.

Assessment Components	Weight	Grade A* to E
Investigations Folio Students carried out collaboratively an investigation into Motion and Relativity. They individually reported on the results obtained and analysed them to reach a conclusion.	6%	B+
Skills and Applications Students' knowledge and understanding, ability to apply it and their communication skills were assessed in a mini examination, which covered the topics Motion and Relativity, and Electric Fields.	10%	B

Teacher Comment

Niesha continues to work diligently in Physics, which has allowed her to continue to stay abreast of the new content taught this term when her health has not been optimal. All aspects of her assessment have been of a good standard, but I am sure she will be motivated to improve on these grades further in the future. She should concentrate on checking her answers in tests and proofing her reports carefully in order to pick up on small errors or inconsistencies in order to do this. Niesha is a conscientious student, who asks pertinent questions and seeks help when required.

Pembroke School

June 2018, Semester 1 Report

Niesha Baker, Year 12

SPECIALIST MATHEMATICS

Ms A Allan

Specialist Mathematics at Stage 2 draws on and deepens students' mathematical knowledge, skills and understanding, and provides opportunities for students to develop their skills in using rigorous mathematical arguments and proofs, and using mathematical models. Students have completed Mathematical Induction, Real Polynomials, Complex Numbers and Functions.

Assessment Components	Weight	Grade A* to E
Formative Tests These were tests designed to give the students practice at working at an appropriate level under timed conditions.		A
Skills and Applications In these tests students found solutions to routine, analytical and interpretive problems. The two tests were undertaken in the mini examination.	25%	B

Teacher Comment

Niesha is a highly motivated and very capable mathematician who is genuinely interested in the topics being studied. She works productively at home and during lessons, listening attentively during times of instruction. Niesha is committed to working as autonomously as possible, but she would benefit from being more involved in discussions and more proactive in seeking assistance. She has been disappointed by a couple of recent results, but I suspect that there are small modifications to her test technique that will help her to better reproduce what she knows under time constraints.

Pembroke School

June 2018, Semester 1 Report

Niesha Baker, Year 12

VISUAL ARTS

Mr M Ferrier

Visual Arts aims to develop critical understanding of historical and contemporary visual arts and the role of visual art and artists in the community. Students have been working towards developing three components within Visual Art: the Visual Study (a practical and theoretical investigation into a theme of their own choice); Practical Works of their own creation and a Folio of support material documenting their visual thinking in relation to their practical works.

Assessment Components	Weight	Grade A* to E
Visual Study (Formative) A visual and written investigation of an art related topic.		A

Teacher Comment

Earnest and hard-working, Niesha completed a thorough and well-researched Visual Study, paying great attention to detail when analysing relevant artworks. She applied this knowledge when creating her own drawings and paintings, and was able to articulate her thoughts with clarity. Niesha has made a concerted effort in getting started on her Practical work and Folio and I have been impressed by her willingness to take risks with her work and explore materials and techniques which are foreign to her. I look forward to following her creative journey this year.

Pembroke School

June 2018, Semester 1 Report

Niesha Baker, Year 12

Co-curricular Activities School: Soccer, Water Polo			Tutor Dr C Quinn / Ms A Rayson Niesha is a dedicated student and her report conveys the fruits of her efforts. Her teachers have also provided constructive suggestions to potentially help Niesha further improve on current results. Niesha is often working during tutorial time, such is her dedication to her studies, but pleasingly she does engage in group discussions and some game activities. These activities are designed to break up formalities, provide whimsical fun, and provide shared emotional support. We encourage all students to embrace these opportunities when possible. We are so happy for Niesha that she attended the Women in Mathematics Workshop at The University of Adelaide; an experience she clearly found informative and inspiring. We wish Niesha well and offer our support for the coming months of study.		
			Head of Senior School Mrs A Piggott This is a very good report and Niesha should be very pleased with her efforts. She has some real highlights in her Mathematical studies and should be congratulated on her consistency, however, seeking help in Physics can assist her to make those incremental improvements to lift her grade. I am sure she enjoyed the Adelaide University "Women in Mathematics" workshop.		
			Principal Mr L Thomson Niesha is working very hard and this shows in her results. Well done and keep up the good work.

PEMBROKE SCHOOL AIMS

To offer our students the means to develop a broad and deep knowledge base thus enabling them to act effectively as well-informed citizens.

To create a dynamic learning community which encourages self-management, curiosity, intellectual rigour, enjoyment, innovation and the realisation of each individual's potential.

To facilitate the social, physical and emotional development of each student emphasising personal growth, integrity, respect for differences in people, resilience, an appreciation of the environment, a sense of social responsibility and care for others.

To encourage the exploration of students' spiritual values and their power to make ethical decisions.

To promote thoughtful, respectful and informed participation in the community locally, nationally and internationally with an emphasis on seeking justice for all.

ACHIEVEMENT SCALE

Teachers have reported student assessment against key criteria which reflect learning emphases as determined for the semester.

Grades are reported on a scale of A⁺ - E⁻ and these grades refer to specific performance standards within each subject.

In addition, we have continued to report the semester examination and average as an indicator of student performance under timed conditions. These skills are considered valuable preparation for some Stage 2 subjects.

ENGLISH LITERATURE

Mrs R Ramsey

In Stage 1 English students are encouraged to read, consider and appreciate a wide range of texts in various forms and media to develop their confidence and competence in using the English language, and in understanding how texts are constructed for particular purposes and audiences. In Semester 2, students complete a poetry study, a novel and a Shakespearean play. Students develop their understanding of the conventions of these different text types. In an Intertextual Study, students make connections between two poems, comparing the similarities and differences in their form and features.

Assessment Components	Weight	Grade A ⁺ to E ⁻
Responding to Texts Both written and oral analytical tasks are completed as well as critical reading, timed essay tests, examinations etc.	50%	A+
Creating Texts Students compose one piece of creative writing based on a genre/style studied this semester, and complete a Statement of Intent.	20%	A
Intertextual Study In the Intertextual Study, students compare and contrast two poems in a literary essay response, or another analytical style of their choosing.	30%	A-
Semester Grade This grade represents all work that has been completed in the semester including SACE Summative Tasks, examinations, other assessed pieces, and a range of formative work.		A

Examination Average	77%	Semester Examination	78%
SACE Grade	This is based on the application of Subject-specific Performance Standards for selected assessment types: Responding to Texts (50%) Creating Texts (20%) and Intertextual Study (30%). For SACE Stage 1, final grades are only presented in A - E bands.		A

Teacher Comment

Niesha is an outstanding English student in all respects as her natural intelligence is complimented by a dedicated and extremely thorough approach to all tasks. Perceptive and insightful in her understanding of our complex texts, her written responses are detailed and show clear planning and control. Naturally quiet in class, it has been encouraging to see Niesha emerge into a more confident participant in discussions. Her oral presentation on a passage from 'Othello' was exemplary. Her work ethic, enthusiasm for the subject and diligent approach cannot be faulted.

Pembroke School

Semester 2 Report 2017

Niesha Baker Year 11

MATHEMATICAL METHODS

Dr E Hunt

Mathematical Methods provides the necessary background for students planning to take Stage 2 Mathematical Methods. Taken together with Stage 1 Specialist Mathematics, it also provides the necessary background for Stage 2 Specialist Mathematics. In this semester, students studied Counting, Statistics, Exponential and Logarithmic Functions, and Differential Calculus and its applications. The investigation was on Optimisation of Volume in the context of a gift box.

Assessment Components	Weight	Grade A ⁺ to E ⁻
Skills and Applications These are tests that assess the performance standards: Concepts and Techniques, and Reasoning and Communication.	50%	A+
Mathematical Investigation Students investigate an area of mathematics and write a report. The above performance standards are also used to assess the investigations.	20%	A+
Examination The semester examination is included as part of the Pembroke semester grade with a weighting of 30%.	30%	A
Semester Grade		A+

Examination Average	79%	Semester Examination	94%
SACE Grade	This is based on the application of Subject-specific Performance Standards for selected assessment types: Skills and Applications Tasks (75%) Investigation (25%). For SACE Stage 1, final grades are only presented in A - E bands.		A

Teacher Comment

Niesha is a talented mathematician who has consolidated her progress this semester. She has amassed an outstanding set of test results, with an average of 94%, indicating her mastery of the concepts introduced. Niesha also produced an outstanding investigation into the optimal design of gift boxes. Her final examination score of 94% was pleasing but not at all unexpected! I have enjoyed working with Niesha this semester and wish her all the very best for her Year 12 studies in 2018.

Pembroke School

Semester 2 Report 2017

Niesha Baker Year 11

PHYSICS

Mrs C Carey

The study of Physics is constructed around using qualitative and quantitative models, laws and theories to better understand matter, forces, energy, and the interaction among them. Physics seeks to explain natural phenomena, from the subatomic world to the macro cosmos, and to make predictions about them. Students have developed their knowledge and understanding of physics in the areas of forces, light, momentum and energy, and nuclear models and radioactivity. They have also acquired new knowledge and science inquiry skills through their practical work and research.

Assessment Components	Weight	Grade A ⁺ to E ⁻
Investigations Folio Consists of one Practical Investigation and a Science as a Human Endeavour Investigation. These tasks assess students' practical, research and communication skills.	50%	A+
Skills & Applications Tasks Consist of topic tests, under supervision, which assess students' knowledge and understanding, their ability to apply it, and their communication skills.	50%	A-
Semester Grade The combines the SACE tasks described above (80%) with the semester examination result (20%).		A

Examination Average	73%	Semester Examination	86%
SACE Grade	This is based on the application of Subject-specific Performance Standards for selected assessment types: Investigations Folio (50%) and Skills and Applications Tasks (50%). For SACE Stage 1, final grades are only presented in A - E bands.		A

Teacher Comment

Niesha is to be commended on her fine results this semester. She has developed an excellent understanding of the skills and concepts taught and this has been reflected in all aspects of her assessment. Niesha has approached her work conscientiously, making effective use of lessons to complete class work thoroughly and accurately. She has been able to grasp new concepts readily and apply her understanding to solve a wide variety of related problems. Niesha's examination result was very pleasing.

Pembroke School

Semester 2 Report 2017

Niesha Baker Year 11

RESEARCH PROJECT B

Ms N Somerford

The Research Project is a compulsory semester subject at Stage 2 required for SACE completion. The Research Project gives students the opportunity to study an area of their own personal interest in-depth. It allows students to use creativity and initiative, while also developing the research and presentation skills they will need for further study or work. The three main assessment components: Folio, Research Outcome and Evaluation allow students to develop a wide range of skills, including time management, critical analysis and communication.

Assessment Components	Weight	Grade A* to E
Folio Students select and present evidence of their learning from different stages of the Folio: the Proposal, Research Development and the Discussion.	30%	A+
Research Outcome Students identify or demonstrate their key findings, which they substantiate with evidence and examples from their research.	40%	A+

SACE Grade	This is the final school grade for the 70% School Assessment component in this subject.	A+
-------------------	---	----

Teacher Comment

Niesha investigated Taekwondo and the impact that exposure and training in this sport has on an adolescent's response to an unexpected physical conflict situation. She examined the psychological and physiological implications training can have on individual responses to conflict situations in the absence of weapons. Organised, methodical and able to plan and initiate appropriate research procedures, she was a resourceful researcher. Niesha interviewed experienced martial arts instructors and psychologists and read widely prior to creating a well substantiated magazine article.

Pembroke School

Semester 2 Report 2017

Niesha Baker Year 11

SPECIALIST MATHEMATICS

Dr C Quinn

Specialist Mathematics, taken together with Mathematical Methods, provides the necessary background for students who wish to take Stage 2 Specialist Mathematics. In this semester, students studied Trigonometric functions, Matrix algebra, Transformations, Mathematical Induction, and Real and Complex numbers. The investigations involved searching for patterns within the Fibonacci sequence.

Assessment Components	Weight	Grade A* to E
Skills and Applications These are tests that assess the performance standards: Concepts and Techniques, and Reasoning and Communication.	50%	A-
Mathematical Investigation Students investigate an area of mathematics and write a report. The above performance standards are also used to assess the investigation.	20%	A+
Examination The examination is included as part of the Pembroke semester grade with a weighting of 30%.	30%	B+
Semester Grade		A-

Examination Average	84%	Semester Examination	82%
----------------------------	-----	-----------------------------	-----

SACE Grade	This is based on the application of Subject-specific Performance Standards for selected assessment types: Skills and Applications Tasks (75%) Investigation (25%). For SACE Stage 1, final grades are only presented in A - E bands.	A
-------------------	--	---

Teacher Comment

Niesha has worked hard this year, in a comprehensive and organised manner. I am so pleased she has been rewarded for her efforts with excellent achievement grades across every type of assessment. The year's work will lay a solid foundation for Niesha's Year 12 studies in Mathematics, and her work ethic and attention to detail will be assets also.

Pembroke School

Semester 2 Report 2017

Niesha Baker Year 11

VISUAL ARTS IB SL

Mrs P Cowell

This student is studying an IB Diploma Certificate in Higher Level Visual Art, which contributes to their SACE. The aim of this course is to expand on the development of creative and analytical skills in Visual Art begun in the Middle School. Work is assessed formatively at this stage as all summative assessment occurs at the end of Year 12. The Visual Arts course is student-centred and places student exploration at the heart of a holistic learning experience. Students have a free choice to identify, select and explore artists, artworks, cultural contexts, and media for study that interests them and informs their Studio Work.

Assessment Components	Weight	Grade 7 to 1
Process Portfolio Five screens, which evidence sustained experimentation of a variety of art-making activities.	40%	6
Studio Work Two resolved artworks, which are accompanied by a curatorial rationale of 300 words.	40%	6
Comparative Study Three screens, which examine and compare at least three artworks from different contexts.	20%	5
Semester Grade		6

IB Grade	IB subjects are graded on a 7 point scale: 7 = Excellent, 6 = Very good, 5 = Good, 4 = Satisfactory, 3 = Mediocre, 2 = Poor, 1 = Very Poor.	6
-----------------	---	---

Teacher Comment

Niesha has worked steadily over the semester, continuing to improve her painting skills in completing her large acrylic painting of a snow leopard. I was impressed with her tenacity to resolve many technical challenges along the way. She should be proud of her achievements in this work. Niesha has thoroughly researched several sculptural artists and she is in a good position to continue her Art practice next year with SACE. I look forward to seeing Niesha diversify her skills in the work she produces next year.

Semester 2 Report 2017

Niesha Baker Year 11

Tutor**Dr C Quinn / Ms A Rayson**

Niesha should be very proud of all that she has achieved during Year 11. She has invested significant time and effort in her academic study and has produced excellent results, showing her knowledge and understanding across a range of subject disciplines. Niesha has enthusiastically participated in many co-curricular activities, most notably the Ski Trip, which have provided a wonderful balance and enhancement to her learning experiences. We have appreciated Niesha's involvement and respectful leadership skills in tutorial activities. We look forward to working with and supporting Niesha through her Year 12 studies.

Head of Senior School**Ms B Reid**

This is a fine report for Niesha, who has continued to make excellent progress in her studies. She is a very able student and brings a well-developed and self-directed work ethic to her endeavours that will stand her in good stead for next year. I do wish her well for that.

Principal**Mr L Thomson**

It is a matter now for consolidation and attention to detail. As a very capable student, Niesha will want to leave nothing to chance for Year 12. I am sure she will manage the demands of the year very well.
