Thomas HOSKING

Year 12 - Hawkes House

Assessment 2 , 2021

Sports and Activities:

Mentor Report

Thomas has performed admirably in Semester 1. His engagement in Hawkes House activities has been pleasing, along with his leadership and encouragement of his peers to follow his example. Thomas' commitment and performance to his studies has been exceptional. I am pleased to see that Thomas is making the most of his opportunities in class and is producing some outstanding results. Thomas is an active member of our Mentor. He leads his peers in a respectful manner and is always supportive of them. Thomas' care for others has been acknowledged by his peers. His engagement with our co-curricular programs has been unconditional, irrespective of his injury recovery. Thomas' contributions in all aspects of school life are appreciated.

Mr David de Lacy

Ms Hayley Patton
Head of House

Mr Tim Browning
Headmaster

Chemistry 12

Learning Outcomes

At the end of this course students should be able to:

- manipulate apparatus and record observations in chemical experiments;
- design investigations to test chemical hypotheses;
- obtain information about Chemistry from a variety of sources;
- demonstrate knowledge and understanding of chemical concepts;
- analyse and draw conclusions from chemical data;
- develop solutions from chemical data;
- develop solutions to chemical problems;
- use knowledge of Chemistry to make informed personal, social and environmental decisions;
- communicate ideas and reasoning, using chemical terms and conventions.

Achievement of Learning Outcomes

Assessment 1 Coursework Grade **A+**

Assessment 2 Coursework Grade **A+**

Assessment Criteria

<i>Achievement</i>	<i>Very Limited</i>	<i>Limited</i>	<i>Satisfactory</i>	<i>High</i>	<i>Outstanding</i>
Problem-Solving Ability					✓
Communication of Chemistry Information					✓
Practical Skills					✓

Teacher's Comment

Thomas is a conscientious student who has demonstrated a solid grasp of the concepts in analytical chemistry, environmental chemistry, rates of reaction, and equilibrium. His manipulative skills in the volumetric analysis practical were excellent, and his report was of a very high standard. He used feedback to his advantage, and he demonstrated the ability to critically analyse and evaluate procedures and their effects on data. Thomas' performance in both topic tests was excellent.

Mrs Marie Daziani

English 12

Learning Outcomes

At the end of this course students should be able to:

- analyse the relationship between purpose, context, and audience in a range of texts;
- evaluate how language and stylistic features and conventions are used to represent ideas, perspectives, and aspects of culture in texts;
- analyse how perspectives in their own and others' texts shape responses and interpretations;
- create and evaluate oral, written, and multimodal texts in a range of modes and styles;
- analyse the similarities and differences when comparing texts;
- apply clear and accurate communication skills.

Achievement of Learning Outcomes

Assessment 1 Coursework Grade	A
Assessment 2 Coursework Grade	A

Assessment Criteria

<i>Achievement</i>	<i>Very Limited</i>	<i>Limited</i>	<i>Satisfactory</i>	<i>High</i>	<i>Outstanding</i>
Understanding & Analysis				✓	
Application				✓	
Communication				✓	

Teacher's Comment

Thomas has performed consistently in English this year. He is a capable writer who states his views clearly. His 'The Revenant' response was of a high standard, reflecting a sound understanding of the film techniques used throughout. He could strive to improve the sophistication of his analysis at times. Thomas should now turn his attention to the current Poetry task and the external Comparative Essay as this is worth 30% of his overall grade. I wish Thomas all the best for the remainder of the year.

Ms Margaret Reid

Mathematical Methods 12

Learning Outcomes

At the end of this course students should be able to:

- understand mathematical concepts, demonstrate mathematical skills, and apply mathematical techniques;
- investigate and analyse mathematical information in a variety of contexts;
- think mathematically by posing questions, solving problems, applying models, and making, testing and proving conjectures;
- interpret results, draw conclusions, and determine the reasonableness of solutions in context;
- make discerning use of electronic technology to solve problems and to refine and extend mathematical knowledge;
- communicate mathematically and present mathematical information in a variety of ways.

Achievement of Learning Outcomes

Assessment 1 Coursework Grade	A+
Assessment 2 Coursework Grade	A+

Assessment Criteria

<i>Achievement</i>	<i>Very Limited</i>	<i>Limited</i>	<i>Satisfactory</i>	<i>High</i>	<i>Outstanding</i>
Knowledge, Skills & Application					✓
Modelling & Problem-solving				✓	
Communication of Information				✓	

Teacher's Comment

Thomas is an enthusiastic student and a positive role model for others in the class. He is a self-disciplined and a confident learner with a comprehensive range of mathematical abilities. In particular, he can approach major mathematical topics with disciplined insight and in-depth knowledge. Thomas' performance on assessment tasks to date has been extremely pleasing.

Mr Goffredo Tinagli

Specialist Mathematics 12

Learning Outcomes

At the end of this course students should be able to:

- practise mathematics by analysing data and other information;
- understand fundamental concepts, demonstrate mathematical skills, and apply mathematical procedures in routine and non-routine contexts;
- think mathematically through enquiry, evaluation, and proof;
- make informed use of technology to provide numerical results and graphical representations, and to refine and extend knowledge;
- communicate and present mathematical information in a variety of ways;
- work both individually and cooperatively in carrying out activities.

Achievement of Learning Outcomes

Assessment 1 Coursework Grade **A+**

Assessment 2 Coursework Grade **A+**

Assessment Criteria

<i>Achievement</i>	<i>Very Limited</i>	<i>Limited</i>	<i>Satisfactory</i>	<i>High</i>	<i>Outstanding</i>
Knowledge, Skills & Application					✓
Modelling & Problem-solving					✓
Communication of Information					✓

Teacher's Comment

Thomas is a conscientious student who continues to gain in confidence. He has coped well with the increased workload and has shown great maturity towards his studies as his responsibilities have grown. Thomas' results have been excellent thus far, but he must continue to work hard to maintain the level of consistency than he has achieved so far. He has developed a good balance between making a determined effort to solving challenging problems and seeking assistance when appropriate. Thomas is making every effort to do well, and I look forward to his continued progress.

Mr Lino Vari

Physics 12

Learning Outcomes

At the end of this course students should be able to:

- undertake practical activities;
- design investigations;
- obtain information about Physics from a variety of sources;
- critically analyse and evaluate information and procedures in Physics;
- demonstrate knowledge and understanding of Physics;
- solve a variety of problems of Physics;
- relate knowledge of Physics to selected phenomena and applications;
- communicate the ideas of Physics effectively in written, graphical, and oral forms;
- use the terminology and notation of Physics correctly.

Achievement of Learning Outcomes

Assessment 1 Coursework Grade **A+**
Assessment 2 Coursework Grade **A+**

Assessment Criteria

<i>Achievement</i>	<i>Very Limited</i>	<i>Limited</i>	<i>Satisfactory</i>	<i>High</i>	<i>Outstanding</i>
Problem-Solving Ability					✓
Practical Skills					✓
Communication of Information					✓

Teacher's Comment

Thomas has excelled in Physics this semester. He has worked diligently to complete all set work and was actively engaged in class discussions. Thomas' practical reports have been detailed and produced to a high standard. His responses in the tests demonstrate a sound understanding of the syllabus.

Mr Steven Perry
