

Achievements

- Admittance into the 'Selected Entry Accelerated Learning' program in Balwyn High School - 2013
- Admittance into the ALPHA program in East Doncaster Secondary College – 2013
- 3rd place state t-ball -2013
- Victorian schools state soccer-2013
- 3rd place Victorian state mountain biking orientation -2015
- Numerous high distinctions in ICAS English and Science
- Bursary in Science Talent search for photography
- High distinction in Australian History competition -2015
- Black Belt in Karate – 2016
- Sports award Balwyn High school - 2015
- Sport award Balwyn High School - 2017
- Academic award Balwyn High school -2017
- Victorian Schools state soccer 2017
- Victorian schools' regional soccer 2015
- Member of the senior school council in Balwyn high school -2018
- Member of the interact committee at Balwyn high school -2018
- member of Balwyn Highschool debating team 2018-2019

Education

Current: **Balwyn High School year 12**

Studies:

- Completed:
- **Physical education units 3 &4**
- **Physics units 3&4**
- **English units 3&4**
- Ongoing:
 - **Economics units 3&4**
 - **Maths methods units 3&4**
 - **Chemistry units 3&4**
 - **French units 3&4**

Current: completing a **Certificate in Fashion Industry Essentials** from **Parsons School of Design**

Former: Serpell Primary School

Volunteer and work experience

- Volunteering as a Sensei (teacher) at Shubi Chikara Karate to help teach self-defence to 5-12 year old's- 2015-2018
- Work experience at Jackson Clements burrows architects- 2018
- Employment at Coles supermarkets since 2018

Referees:

Ms Doreen Longo- teacher at Balwyn High School

email:Doreen.Longo@balwynhs.vic.edu.au

Ms Margot McDonald – teacher at Balwyn High School

email:Margot.Mcdonald@balwynhs.vic.edu.au

**Balwyn High School
Student Report
2017 - Semester One**

Maryam AL-QURESHI (ALQ0001), 11A

Semester 1, 2017

This report contains a summary of your son/daughter's results and work habits/behaviour during this semester. Comments on three CATs (Years 7 - 10) and on SACs/SATs (VCE) have been provided through Compass Learning Tasks during the semester. Please ensure you save a copy of this report for your records.

Attendance Data for Semester 1, 2017 can be found on the Compass.

Class Attendance The number of classes attended on each individual report sheet could be affected by a student's involvement in the co-curricular program (eg Music, Sport, SRC etc) and/or illness.

Victorian Certificate of Education (VCE - Units 3 & 4) It is the responsibility of the Victorian Curriculum and Assessment Authority to report school assessments to Unit 3 & 4 students in December.

Victorian Curriculum Achievement Standards (for Years 7 - 10 reports) assume that a study is undertaken over a full school year. If a study runs only in one semester, then the recording of Victorian Curriculum ratings may be affected.

Tutorial Reports The Years 7 - 10 Tutorial program is delivered alongside core curriculum and is designed to support students to be the best they can be at school, at home and in their future endeavours. Self-reflection and goal setting are important factors for achieving success and therefore are required to be completed as part of the Tutorial program. Please take the opportunity to discuss the comments added by your son/daughter in the Semester 1 Learning Goals section. If this section is blank, it has not been completed by your son/daughter.

Parent/Student/Teacher Conferences These will be held on Thursday 10 August, 2017. Bookings for these conferences are made through the Compass Parent Portal which will open at 4.00 pm Thursday 20 July, 2017 and close at 5.00 pm Wednesday August 9, 2017. Students should play an integral role in the conferences, receiving valuable feedback on their performance over the semester and providing them with the opportunity to reflect on the progress of their Personal Learning Goals set earlier in the year.

Planning and Support Your son/daughter's Student Planner outlines the School's Homework and Study Policy and other valuable learning aids. Should assistance be required during Semester 2, support is available for your son/daughter from the Year Level Office, the Careers Counsellor - Erin Shale and our Student Well Being Team.

Yours sincerely

Deborah Harman

Physical Education - Unit 3 & 4

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Paul GEAR

Balwyn High School - 2017 - Semester One

This unit introduces students to an understanding of physical activity and sedentary behaviour from a participatory and physiological perspective. Students apply various methods to assess physical activity and sedentary levels, and analyse the data in relation to adherence to Australia's Physical Activity and Sedentary Behaviour Guidelines. Students study and apply the social-ecological model to identify a range of Australian strategies that are effective in promoting participation in some form of regular activity. Students investigate the contribution of energy systems to performance in physical activity. In particular, they investigate the characteristics of each system and the interplay of the systems during physical activity. Students explore the multi-factorial causes of fatigue and consider different strategies used to delay and manage fatigue and to promote recovery.

Semester Result	Overall Result	S
-----------------	----------------	---

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning					●
Completion of set tasks					●
Demonstration of learning					●

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: The student should be able to analyse individual and population levels of sedentary behaviour and participation in physical activity, and evaluate initiatives and strategies that promote adherence to Australia's Physical Activity and sedentary behaviour Guidelines.	S
Outcome 2: The student should be able to use data collected in practical activities to analyse how the major body and energy systems work together to enable movements to occur, and explain the fatigue mechanisms and recovery strategies.	S

Physics - Unit 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Pramana TEDJOSISWOYO

Balwyn High School - 2017 - Semester One

This unit covers the diverse areas of thermodynamics, electricity, and investigations of particle physics in its application to different epochs of the evolution of the Universe. Students use thermodynamic principles to explain phenomena related to changes in thermal energy. They apply thermal laws when investigating energy transfers within and between systems, and assess the impact of human use of energy on the environment. Students examine the motion of electrons and explain how it can be manipulated and utilised. They explore current scientifically accepted theories that explain how matter and energy have changed since the origins of the Universe.

Semester Result	Overall Result	S
-----------------	----------------	---

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning					●
Completion of set tasks					●
Demonstration of learning				●	

Assessment Tasks	
SAC 1: Thermal Physics Test	B
SAC 2: Electronics Data Analysis	B+
SAC 3: Media Response	A+
Examination	B+

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: How can thermal effects be explained? The student should be able to apply thermodynamic principles to analyse, interpret and explain changes in thermal energy in selected contexts, and describe the environmental impact of human activities with reference to thermal effects and climate science concepts.	S
Outcome 2: How do electric circuits work? The student should be able to investigate and apply a basic DC circuit model to simple battery-operated devices and household electrical systems, apply mathematical models to analyse circuits, and describe the safe and effective use of electricity by individuals and the community.	S
Outcome 3: What is matter and how is it formed? The student should be able explain the origins of atoms, the nature of subatomic particles and how energy can be produced by atoms.	S

Literature - Unit 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Ana WICKHAM

Balwyn High School - 2017 - Semester One

In this unit students focus on the ways in which the interaction between text and reader creates meaning. Students' analyses of the features and conventions of texts help them develop increasingly discriminating responses to a range of literary forms and styles. Students respond critically, creatively and reflectively to the ideas and concerns of texts and gain insights into how texts function as representations of human experience. They develop familiarity with key terms, concepts and practices that equip them for further studies in literature. They develop an awareness of how the views and values that readers hold may influence the reading of a text.

Semester Result	Overall Result	S

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning					●
Completion of set tasks					●
Demonstration of learning					●

Assessment Tasks	
SAC 1: Close Passage Analysis	A
SAC 2: Critical Oral Presentation	A+
SAC 3: Analytical Essay	B+
Examination	A

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: On completion of this unit the student should be able to respond to a range of texts and reflect on influences shaping these responses.	S
Outcome 2: On completion of this unit the student should be able to analyse the ways in which a selected text reflects or comments on the ideas and concerns of individuals and particular groups in society.	S

English - Unit 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Brett HOBBS

Balwyn High School - 2017 - Semester One

The study of English contributes to the development of literate individuals capable of critical and creative thinking, aesthetic appreciation and creativity. This study also develops students' ability to create and analyse texts, moving from interpretation to reflection and critical analysis.

Semester Result	Overall Result	S
-----------------	----------------	---

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning					●
Completion of set tasks					●

Assessment Tasks	
SAC 1: 'The Old Man and the Sea' text response essay	A+
SAC 2: Creative Response	A+
SAC 3: Written Language Analysis	A+
Examination	A

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: On completion of this unit the student should be able to produce analytical and creative responses to texts.	S
Outcome 2: On completion of this unit the student should be able to analyse how argument and persuasive language can be used to position audiences, and create their own texts intended to position audiences.	S

Mathematical Methods CAS - Unit 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Rosemary WARD

Balwyn High School - 2017 - Semester One

This unit covers the topics of Relations, Functions and Transformations, Matrices, Rates of Change and an introduction to Differentiation. Students in this unit have developed the techniques, routines and processes involving algebraic manipulation, equation solving, graph sketching, differentiation and integration both with and without the use of technology.

Semester Result	Overall Result	S
-----------------	----------------	---

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning					●
Completion of set tasks					●
Demonstration of learning				●	

Assessment Tasks	
SAC 1: Linear and Quadratic Equations and Inequations Test	C+
SAC 2: Functions and Relations Problem Solving Task	B+
Examination	A

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: The student should be able to define and explain key concepts as specified in the content from the areas of study, and apply a range of related mathematical routines and procedures.	S
Outcome 2: The student should be able to apply mathematical processes in non-routine contexts, including situations requiring problem-solving, modelling or investigative techniques or approaches, and analyse and discuss these applications of mathematics.	S
Outcome 3: The student should be able to use numerical, graphical, symbolic and statistical functionalities of technology to develop mathematical ideas, produce results and carry out analysis in situations requiring problem-solving, modelling or investigative techniques or approaches.	S

Year 10: French

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Urszula HORBACZ

Balwyn High School - 2017 - Semester One

French aims to enable learners to communicate effectively in the French language. Students practise the skills of listening, speaking, reading and writing through the study of selected topics. In Year 10 these include holidays, the world of work, global issues, health and fitness. By studying another culture, students develop their own sense of identity and their intercultural understanding. By learning an additional language, students also improve their metalinguistic skills and their understanding of their first language.

**Balwyn High School
Student Report
2017 - Semester Two**

Maryam AL-QURESHI (ALQ0001), 11A

Semester 2, 2017

This report contains a summary of your both your son/daughter's results and approaches to learning during this semester. Comments on three CATs (Years 7 - 10) and on SACs (VCE) have been provided through Compass Learning Tasks during the semester.

Attendance Data for Semester 2, 2017 can be found on the Compass Parent Portal.

Absence/Class Attendance The number of classes attended on Compass could be affected by a student's involvement in the co-curricular program (eg Music, Sport, SRC etc) and/or illness.

Victorian Certificate of Education (VCE Unit 4) It is the responsibility of the Victorian Curriculum and Assessment Authority to report School Assessments to Units 3 & 4 students in December.

Victorian Curriculum Achievement Standards Levels of Performance (for Years 7 - 10 reports) assume that a study is undertaken over a full school year. If a study runs only in one semester, then the recording of Victorian Curriculum ratings may be affected.

Tutorial Reports The Years 7 - 10 Tutorial program is delivered alongside core curriculum and is designed to support students to be the best they can be at school, at home and in their future endeavours. Self-reflection and goal setting are important factors for achieving success and therefore are required to be completed as part of the Tutorial program. Please take the opportunity to discuss the comments added by your son/daughter in the Semester 2 Learning Goals section. If this section is blank, it has not been completed by your son/daughter.

Being Prepared for 2018 In preparing for next year, the 2018 Years 11 and 12 students have completed a week of Unit 1 and Unit 3 classes respectively in late November and early December. Over the holidays Year 11 students are required to complete three hours homework in each of their Unit 1 subjects and Year 12 students are required to complete four hours homework for each Unit 3 subject. It is vital that students complete all prescribed homework prior to their first lesson in 2018. Students are able to access their Ignition Program homework through the school's Student SharePoint website. All students are aware that the work completed in class in late November/early December will not be repeated at the beginning of 2018.

Support Your son/daughter's Student Planner outlines the school's Homework and Study Policy and other valuable learning aids. There are many types of assistance available to students in the New Year including subject teachers, tutorial teachers, Student Learning and Wellbeing Managers at each year level, the Careers Counsellor and the Student Wellbeing Team. Seeking assistance from staff in a timely manner is essential in achieving successful educational outcomes.

Yours sincerely

Deborah Harman

Physics - Unit 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Pramana TEDJOSISWOYO

Balwyn High School - 2017 - Semester Two

In this unit students explore the power of experiments in developing models and theories. They investigate a variety of phenomena by making their own observations and generating questions, which in turn lead to experiments. Students make direct observations of physics phenomena and examine the ways in which phenomena that may not be directly observable can be explored through indirect observations.

Assessment Tasks	
SAC 1a: Kinematics Quiz	B
SAC 1b: Dynamics and Statics Test	C
SAC 2: Geometric Optics - Data Analysis	B
SAC 3: Practical Investigation	A
Examination	B

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: Motion - The student should be able to investigate, analyse and mathematically model the motion of particles and bodies in terms of Aristotelian, Galilean and Newtonian theories.	S
Outcome 2: Geometric optics - The student should be able to apply a ray model of light and the concepts of reflection and refraction to explain the operation of optical instruments and the human eye, and describe how human vision can be enhanced.	S
Outcome 3: Practical investigation - The student should be able to design and undertake an investigation of a physics question related to the scientific inquiry processes of data collection and analysis, and draw conclusions based on evidence from collected data.	S

Literature - Unit 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Ana WICKHAM

Balwyn High School - 2017 - Semester Two

In this unit students explore the ways literary texts connect with each other and with the world. They deepen their examination of the ways their own culture and the cultures represented in texts can influence their interpretations and shape different meanings. Drawing on a range of literary texts, students consider the relationships between authors, audiences and contexts. Ideas, language and structures of different texts from past and present eras and/or cultures are compared and contrasted. Students analyse the similarities and differences across texts and establish connections between them. They engage in close reading of texts and create analytical responses that are evidence-based. By experimenting with textual structures and language features, students understand how imaginative texts are informed by close analysis.

Year 11: Chemistry - Units 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Pramana TEDJOSISWOYO

Balwyn High School - 2018 - Semester One

This unit examines how the diversity of materials can be explained. The development and use of materials for specific purposes is an important human endeavour. In this unit students investigate the chemical properties of a range of materials from metals and salts to polymers and nanomaterials. Using their knowledge of elements and atomic structure students explore and explain the relationships between properties, structure and bonding forces within and between particles that vary in size. Students study the modification of metals and investigate a range of non-metallic substances from molecules to polymers and giant lattices and relate their structures to specific applications. Students are introduced to quantitative concepts in chemistry including the mole. They apply their knowledge to determine the relative masses of elements and the composition of substances.

SAC 3: Research investigation on a specific material	B
Examination	A

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: The Periodic Table - The student should be able to relate the position of elements in the periodic table to their properties, investigate the structure and properties of ionic compounds and metals, and calculate mole quantities.	S
Outcome 2: Materials - The student should be able to investigate and explain the properties of carbon lattices and molecular substances with reference to their structures, use systematic nomenclature to name organic compounds, and explain how polymers can be designed for a purpose.	S
Outcome 3: Research Investigation - The student should be able to investigate a question related to the development, use and/or modification of a selected material or chemical and communicate a substantiated response to the question.	S

Year 11: French - Units 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Amy COLLINS

Balwyn High School - 2018 - Semester One

This unit is designed to extend students' knowledge and skills in understanding, speaking and writing French. Students are required to: establish and maintain a spoken or written exchange; listen to, read and obtain information from spoken and written texts; produce a written or spoken response focusing on a real or imaginary experience. Students engage with topics related to everyday life in contemporary France.

Assessment Tasks	
SAC 1: Expression Orale	B
SAC 2: Listening and Responding	A
SAC 3: Reading and Responding	A+
SAC 4: Writing	C+
Examination	B+

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: The student should be able to establish and maintain a spoken exchange related to personal areas of experience.	S
Outcome 2(a): The student should be able to listen to and obtain information from spoken texts.	S
Outcome 2(b): The student should be able to read and obtain information from written texts.	S
Outcome 3: The student should be able to produce a personal written response to a text focusing on a real or imaginary experience.	S

Year 11: Specialist Mathematics - Units 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Margot MCDONALD

Balwyn High School - 2018 - Semester One

This course studied in conjunction with Mathematical Methods Units 1 and 2 provides preparation for Mathematical Methods Units 3 and 4 and Specialist Mathematics Units 3 and 4. The topics studied are Number Systems, Sequences and Series, Geometry in the Plane, Coordinate Geometry and Trigonometric Ratios and their Applications. In all topics students apply Mathematics to analyse, investigate and model in a variety of contexts and solve practical and theoretical problems, with and without the use of technology, in situations that range from well-defined and familiar to unfamiliar and open-ended.

Assessment Tasks	
SAC 1: Number Systems and Sequences and Series Test	E
SAC 2: Trigonometric Ratios and Coordinate Geometry Test	C+
Examination	C

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: The student should be able to define and explain key concepts in relation to the topics from the selected areas of study, and apply a range of related mathematical routines and procedures.	S
Outcome 2: The student should be able to apply mathematical processes in non-routine contexts, and analyse and discuss these applications of mathematics in at least three areas of study.	S
Outcome 3: The student should be able to use technology to produce results and carry out analysis in situations requiring problem-solving, modelling or investigative techniques or approaches in at least three areas of study.	S

Year 12: English - Unit 3 & 4

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Doreen LONGO

Balwyn High School - 2018 - Semester One

In Unit Three English, students read and respond to texts analytically and creatively. They also analyse arguments and the use of persuasive language in texts.

Semester Result

Victorian Certificate of Education (VCE) Outcomes

Outcome 1: On completion of this unit the student should be able to produce an analytical interpretation of a selected text, and a creative response to a different selected text.

S

Outcome 2: On completion of this unit the student should be able to analyse and compare the use of argument and persuasive language in texts that present a point of view on an issue currently debated in the media.

S

Year 12: Physics - Unit 3 & 4

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Melissa CO

Balwyn High School - 2018 - Semester One

In this unit students explore the importance of energy in explaining and describing the physical world. They examine the production of electricity and its delivery to homes and consider the field model as a construct that has enabled an understanding of why objects move when they are not in contact with other objects. Applications of concepts include the transmission of electricity over large distances and the design and operation of particle accelerators. They explore the interactions, effects and applications of gravitational, electric and magnetic fields. Students use Newton's laws to investigate motion in one and two dimensions, and are introduced to Einstein's theories of relativity.

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning					●
Completion of set tasks					●
Demonstration of learning				●	

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: How do things move without contact? Students examine the similarities and differences between three fields: gravitational, electric and magnetic. Field models are used to explain the motion of objects when there is no apparent contact. Students explore how positions in fields determine the potential energy of an object and the force on an object. They investigate how concepts related to field models can be applied to construct motors, maintain satellite orbits and to accelerate particles.	S
Outcome 2: How are fields used to move electrical energy? Students use empirical evidence and models of electric, magnetic and electromagnetic effects to explain how electricity is produced and delivered to homes. They explore magnetic fields and the transformer as critical to the performance of electrical distribution systems.	S
Outcome 3: How fast can things go? Students use Newton's laws of motion to analyse relative motion, circular motion and projectile motion. Newton's laws of motion give important insights into a range of motion both on Earth and beyond. At very high speeds, however, these laws are insufficient to model motion and Einstein's theory of special relativity provides a better model.	S

**Balwyn High School
Student Report
2018 - Semester Two**

Maryam AL-QURESHI (ALQ0001), 11A

Semester 2, 2018

This report contains a summary of your both your son/daughter's results and approaches to learning during this semester. Comments on three CATs (Years 7 - 10) and on SACs (VCE) have been provided through Compass Learning Tasks during the semester.

Attendance Data for Semester 2, 2018 can be found on the Compass Parent Portal.

Absence/Class Attendance The number of classes attended on Compass could be affected by a student's involvement in the co-curricular program (eg Music, Sport, SRC etc) and/or illness.

Victorian Certificate of Education (VCE Unit 4) It is the responsibility of the Victorian Curriculum and Assessment Authority to report School Assessments to Units 3 & 4 students in December.

Victorian Curriculum Achievement Standards Levels of Performance (for Years 7 - 10 reports) assume that a study is undertaken over a full school year. If a study runs only in one semester, then the recording of Victorian Curriculum ratings may be affected.

Tutorial Reports The Years 7 - 10 Tutorial program is delivered alongside core curriculum and is designed to support students to be the best they can be at school, at home and in their future endeavours. Self-reflection and goal setting are important factors for achieving success and therefore are required to be completed as part of the Tutorial program. Please take the opportunity to discuss the comments added by your son/daughter in the Semester 2 Learning Goals section. If this section is blank, it has not been completed by your son/daughter.

Being Prepared for 2019 In preparing for next year, the 2018 Years 11 and 12 students have completed a week of Unit 1 and Unit 3 classes respectively in late November and early December. Over the holidays Year 11 students are required to complete three hours homework in each of their Unit 1 subjects and Year 12 students are required to complete four hours homework for each Unit 3 subject. It is vital that students complete all prescribed homework prior to their first lesson in 2019. Students are able to access their Ignition Program homework through the school's Student SharePoint website. All students are aware that the work completed in class in late November/early December will not be repeated at the beginning of 2019.

Support Your son/daughter's Student Planner outlines the school's Homework and Study Policy and other valuable learning aids. There are many types of assistance available to students in the New Year including subject teachers, tutorial teachers, Student Learning and Wellbeing Managers at each year level, the Careers Counsellor and the Student Wellbeing Team. Seeking assistance from staff in a timely manner is essential in achieving successful educational outcomes.

Yours sincerely

Deborah Harman
Principal

Andrew Smith
Director of Middle School

Ungraded (UG)	Late submission of work, or Not Satisfactory work has been redeemed, and is now of a satisfactory standard
Not Satisfactory (NS)	Below 40
NS is also used for unsatisfactory examination results	

Year 11: Chemistry - Units 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Pramana TEDJOSISWOYO

Balwyn High School - 2018 - Semester Two

In this unit students explore the physical and chemical properties of water, the reactions that occur in water and various methods of water analysis. Students investigate solubility, concentration and pH. Students are introduced to stoichiometry and analytical techniques and to instrumental procedures, and apply these to determine the concentrations of different species in water samples. They use chemistry terminology including symbols, units, formulas and equations to represent and explain observations and data from experiments, and to discuss chemical phenomena. A practical investigation into an aspect of water quality is undertaken.

Assessment Tasks	
SAC 1: How do substances interact with water?	E
SAC 2: Practical Investigation	B+
SAC 3: Acid-base reactions and analysis of substances in water.	D
Examination	C

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: Water - The student should be able to relate the properties of water to its structure and bonding, and explain the importance of the properties and reactions of water in selected contexts.	S
Outcome 2: The student should be able to measure amounts of dissolved substances in water and analyse water samples for salts, organic compounds and acids and bases.	S
Outcome 3: The student should be able to design and undertake a quantitative investigation related to water quality, and draw conclusions based on evidence from collected data.	S

Year 11: Economics - Units 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Denise CHAN

Balwyn High School - 2018 - Semester Two

The first focus of this unit is the study of the Australian government's policies and goals regarding population and employment. Students will examine a range of current economic employment factors and their impact on the achievement of government goals and living standards. Students also focus on some of the consequences of pursuing growth including the impact on the environment. The second area of study focuses on issues which exist between Australia and other economies that have an impact on living standards and economic stability. Students explore Australia's international economic relationships through the examination of trade liberalisation and its impact on Australia's trade balance. Examples include current bilateral and multilateral free trade agreements and the removal of trade barriers such as tariffs and subsidies. Students also examine the stages and processes of economic development in low income economies and demonstrate an understanding of the measurements used such as GDP per capita income, the Human Development Index and the Millennium Development Goals.

Assessment Tasks	
SAC 1: Economic growth, long-term economic prosperity and environmental sustainability	A
SAC 2: Equity in the distribution of income	A+
SAC 3: Global economic issues	A
Examination	A

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: Economic growth, long-term economic prosperity and environmental sustainability - the student should be able to explain the factors and policies that may influence economic growth and environmental sustainability, and analyse the potential trade-off.	S
Outcome 2: Economic efficiency and equity - the student should be able to explain the factors and policies that may influence equity in the distribution of income and efficiency of resource allocation, and analyse the potential trade-off.	S
Outcome 3: Global economic issues - the student should be able to explain the factors that may influence a global economic issue/s and evaluate potential consequences associated with actions to address the issue/s.	S

Year 11: French - Units 1 & 2

Maryam AL-QURESHI (ALQ0001), 11A

Teacher: Amy COLLINS

Balwyn High School - 2018 - Semester Two

This unit is designed to extend students' knowledge and skills in understanding, speaking and writing French. Students are required to: participate in a spoken exchange focusing on making an arrangement; listen to, read and obtain information from spoken and written texts; produce a written response focusing on a real or imaginary experience. Students engage with topics related to everyday life in contemporary France.

Semester Result	Overall Result	S

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: On completion of this unit the student should be able to participate in a spoken or written exchange related to making arrangements and completing transactions.	S
Outcome 2a: On completion of this unit the student should be able to listen to, extract and use information and ideas from spoken texts.	S
Outcome 2b: On completion of this unit the student should be able to read, extract and use information and ideas from written texts.	S
Outcome 3: On completion of this unit the student should be able to give expression to real or imaginary experience in spoken or written form.	S

**Balwyn High School
Student Report
2019 - Semester One**

Maryam AL-QURESHI (ALQ0001), 12A

Semester 1, 2019

This report contains a summary of your son/daughter's results and work habits/behaviour during this semester. Comments on three CATs (Years 7 - 10) and on SACs/SATs (VCE) have been provided through Compass Learning Tasks during the semester. Please ensure you save a copy of this report for your records.

Attendance Data for Semester 1, 2019 can be found on the Compass.

Class Attendance The number of classes attended on each individual report sheet could be affected by a student's involvement in the co-curricular program (eg Music, Sport, SRC etc) and/or illness.

Victorian Certificate of Education (VCE - Units 3 & 4) It is the responsibility of the Victorian Curriculum and Assessment Authority to report school assessments to Unit 3 & 4 students in December.

Victorian Curriculum Achievement Standards (for Years 7 - 10 reports) assume that a study is undertaken over a full school year. If a study runs only in one semester, then the recording of Victorian Curriculum ratings may be affected.

Tutorial Reports The Years 7 - 10 Tutorial program is delivered alongside core curriculum and is designed to support students to be the best they can be at school, at home and in their future endeavours. Self-reflection and goal setting are important factors for achieving success and therefore are required to be completed as part of the Tutorial program. Please take the opportunity to discuss the comments added by your son/daughter in the Semester 1 Learning Goals section. If this section is blank, it has not been completed by your son/daughter.

Parent/Student/Teacher Conferences These will be held on Wednesday 7 August, 2019. Bookings for these conferences are made through the Compass Parent Portal which will open at 5.00 pm Tuesday 23 July, 2019 and close at 5.00 pm Tuesday August 6, 2019. Students should play an integral role in the conferences, receiving valuable feedback on their performance over the semester and providing them with the opportunity to reflect on the progress of their Personal Learning Goals set earlier in the year.

Planning and Support Your son/daughter's Student Planner outlines the School's Homework and Study Policy and other valuable learning aids. Should assistance be required during Semester 2, support is available for your son/daughter from the Year Level Office, the Careers Counsellor - Erin Shale and our Student Well Being Team.

Yours sincerely

Deborah Harman

Year 12: Chemistry - Unit 3 & 4

Maryam AL-QURESHI (ALQ0001), 12A

Teacher: Hernan ALONSO
Balwyn High School - 2019 - Semester One

This unit examines the global demand for energy and materials increasing with world population growth. Students explore energy options and the chemical production of materials with reference to efficiencies, renewability and the minimisation of their impact on the environment. They compare and evaluate different chemical energy resources and investigate the combustion of fuels. They consider the purpose, design and operating principles of galvanic cells, fuel cells and electrolytic cells and calculate quantities in electrolytic reactions. Students analyse manufacturing processes with reference to factors that influence their reaction rates and extent. They apply the equilibrium law and Le Chatelier's principle to predict and explain the conditions that will improve the efficiency and percentage yield of chemical processes.

Semester Result	Overall Result	S
-----------------	----------------	---

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning				●	
Attitude to learning				●	
Completion of set tasks					●
Demonstration of learning			●		

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: What are the options for energy production? Students should be able to compare fuels quantitatively with reference to combustion products and energy outputs, apply knowledge of the electrochemical series to design, construct and test galvanic cells, and evaluate energy resources based on energy efficiency, renewability and environmental impact.	S
Outcome 2: How can the yield of a chemical product be optimised? Students should be able to apply rate and equilibrium principles to predict how the rate and extent of reactions can be optimised, and explain how electrolysis is involved in the production of chemicals and in the recharging of batteries.	S

Year 12: Economics - Unit 3 & 4

Maryam AL-QURESHI (ALQ0001), 12A

Teacher: Elizabeth ZACHARIAH
Balwyn High School - 2019 - Semester One

In this unit students develop an understanding of the macroeconomy. They investigate the factors that influence the level of aggregate demand and supply and use models and theories to explain how changes might influence the achievement of the Australian Government's domestic macroeconomic goals and affect living standards. They investigate the importance of international economic relationships and analyse how international transactions are recorded, predict how economic events might affect the value of the exchange rate and evaluate the effect of trade liberalisation.

Semester Result	Overall Result	S
-----------------	----------------	---

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning					●
Completion of set tasks					●
Demonstration of learning					●

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: An introduction to microeconomics - the market system, resource allocation, and government intervention - the student should be able to explain how markets operate to allocate resources, and discuss the effect of government intervention on market outcomes.	S
Outcome 2: Domestic Macroeconomic Goals - the student should be able to analyse key contemporary factors that may have influenced the Australian Government's domestic macroeconomic goals over the past two years and discuss how achievement of these goals may affect living standards.	S
Outcome 3: Australia and the world economy - the student should be able to explain the factors that may influence Australia's international transactions and evaluate how international transactions and trade liberalisation may influence the current account balance, the Australian Government's domestic macroeconomic goals and living standards in Australia.	S

Year 12: French - Unit 3 & 4

Maryam AL-QURESHI (ALQ0001), 12A

Teacher: Julien ESCURAT

Balwyn High School - 2019 - Semester One

This unit is designed to extend students' knowledge and skills in understanding, speaking and writing French. Students are required to: express ideas through the production of original texts; analyse and use information from spoken texts; exchange information, opinions and experiences. Students engage with topics related to everyday life in contemporary France.

Semester Result	Overall Result	S
-----------------	----------------	---

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning					●
Completion of set tasks					●
Demonstration of learning			●		

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: The student should be able to express ideas through the production of a personal or imaginative written piece.	S
Outcome 2: The student should be able to analyse and use information from spoken texts in a response to specific questions, messages or instructions, extracting and using information requested.	S
Outcome 3: The student should be able to exchange information, opinions and experiences in a three-to four-minute role-play focusing on the resolution of an issue.	S

Year 12: Mathematical Methods- Unit 3 & 4

Maryam AL-QURESHI (ALQ0001), 12A

Teacher: Dale WELCH

Balwyn High School - 2019 - Semester One

This course provides students with the appropriate mathematical background for further study in science, humanities, economics or medicine. Upon completing this unit students can apply mathematical knowledge to analyse, investigate, model and solve problems in a variety of situations, ranging from well-defined and familiar situations to unfamiliar and open-ended situations. Students can also use technology as an effective support for mathematical activity. During this unit students have studied Functions and Graphs, Algebra and Calculus.

Semester Result	Overall Result	S
------------------------	-----------------------	----------

Approaches To Learning					
	Needs Attention	Acceptable	Good	Very Good	Excellent
Readiness for learning					●
Attitude to learning				●	
Completion of set tasks					●
Demonstration of learning				●	

Victorian Certificate of Education (VCE) Outcomes	
Outcome 1: The student should be able to define and explain key concepts as specified in the content from the areas of study, and apply a range of related mathematical routines and procedures.	S
Outcome 2: The student should be able to apply mathematical processes in non-routine contexts, including situations requiring problem-solving, modelling or investigative techniques or approaches, and analyse and discuss these applications of mathematics.	S
Outcome 3: The student should be able to select and appropriately use numerical, graphical, symbolic and statistical functionalities of technology to develop mathematical ideas, produce results and carry out analysis in situations requiring problem-solving, modelling or investigative techniques or approaches.	S
