

SHELFORD GIRLS' GRAMMAR

SENIOR SCHOOL REPORT

YEAR 12 SEMESTER 1 2019

NAME: *Yining Li*

VSN: 152911319

The vision of Shelford Girls' Grammar is to be a model for excellence in girls' education. Shelford students are encouraged to seek opportunities to create exciting futures for themselves through learning experiences that promote excellence, leadership and personal growth and understanding.

To achieve our vision we must work in partnership with parents to assist our students to develop into capable women of the 21st century. Women, who will think clearly, act with integrity and courage, be sensitive to the needs of others and strong in their service to the community.

The keystone of our educational philosophy is a commitment to catering for the individual needs of each student within the mainstream curriculum. Students should experience success, should constantly 'raise the bar' and approach life with optimism.

Please read these reports and discuss the information and advice with your daughter.

POLLY FLANAGAN

Principal

SHELFORD GIRLS' GRAMMAR

YEAR 12 SEMESTER 1 2019

NAME: *Yining Li*

VSN: 152911319

Shelford understands and recognises that the individual's total development must be viewed as the sum of many parts: physical, social, emotional, academic and spiritual. Shelford promotes a holistic approach to education; emphasising the importance of maintaining ones' health, developing self-image and self-confidence and cultivating personal and interpersonal skills. The Elevate Program run at the start of the school year, supports the girls in their preparation for their final year of study through the establishment of learning tools and strategies as well as organisational skills and work related competencies. The Shelford careers program provides ongoing advice and support to the students about future pathways, information sessions and opportunities to explore tertiary alternatives.

DAYS ABSENT: 3

DAYS LATE: 26

SHELFORD GIRLS' GRAMMAR

YEAR 12

SEMESTER 1 2019

ENGLISH UNIT 3

Teacher: Ms D Ouzecky

NAME: *Yining Li*

VSN: 152911319

YEAR LEVEL CO-ORDINATOR: Mrs Sarah King

UNIT RESULT: Satisfactory

OVERVIEW:

In this unit students read and respond to texts analytically and creatively. They analyse arguments and the use of persuasive language in texts.

ASSESSMENT:

Outcome 1:	On completion of this unit the student should be able to produce analytical and creative responses to texts.	Satisfactory
Outcome 2:	On completion of this unit the students should be able to analyse how arguments and persuasive language can be used to position audiences and create their own texts intended to persuade.	Satisfactory
Classwork:		Medium

COMMENT:

Yining has been an attentive student who has approached her studies of English with a willingness to improve by seeking clarification. She made some contributions to class discussion when called upon and actively listened to the offerings of her class members. She has handed in most homework tasks and has endeavored to adhere to constructive criticism. Her text response essays reflect a good understanding of the text and her strategy for dealing with the topic is sound but her expression is not always cogent. Her essays on how language and argument reflected her considered approach to the task and a willingness to extend herself and present a more complex response. In order to improve in English Sherry needs to continue to add to her bank of vocabulary, phrases and paragraphs that will facilitate a more sophisticated response.

SHELFORD GIRLS' GRAMMAR

YEAR 12

SEMESTER 1 2019

CHEMISTRY UNIT 3

Teacher: Mr A Boylett

NAME: *Yining Li*

VSN: 152911319

YEAR LEVEL CO-ORDINATOR: Mrs Sarah King

UNIT RESULT: Satisfactory

OVERVIEW:

Students explore energy options and the chemical production of materials with reference to efficiencies, renewability and the minimisation of their impact on the environment. Students compare and evaluate different chemical energy resources, including fossil fuels, biofuels, galvanic cells and fuel cells. They investigate the combustion of fuels, including the energy transformations involved, the use of stoichiometry to calculate the amounts of reactants and products involved in the reactions, and calculations of the amounts of energy released and their representations. Students consider the purpose, design and operating principles of galvanic cells, fuel cells and electrolytic cells. In this context they use the electrochemical series to predict and write half and overall redox equations, and apply Faraday's laws to calculate quantities in electrolytic reactions. They investigate and apply the equilibrium law and Le Chatelier's principle to different reaction systems, including to predict and explain the conditions that will improve the efficiency and percentage yield of chemical processes.

ASSESSMENT:

Outcome 1:	Compare fuels quantitatively with reference to combustion products and energy outputs, apply knowledge of the electrochemical series to design, construct and test galvanic cells, and evaluate energy resources based on energy efficiency, renewability and environmental impact.	Satisfactory
Outcome 2:	Apply rate and equilibrium principles to predict how the rate and extent of reactions can be optimised, and explain how electrolysis is involved in the production of chemicals and in the recharging of batteries.	Satisfactory
Classwork:		Medium

COMMENT:

Yining has made strong efforts to understand the chemical principles of energy output and reaction efficiency. She displayed continual improvement under assessment conditions as the semester progressed. She is encouraged to continue asking clarifying questions as well as review relevant Edrolo tasks and assessments to obtain further experience in the application of challenging ideas. Pre-reading material to ensure more time can be dedicated to the application process should also improve Yining's confidence when approaching future examination style questions. She has developed sound practical skills to model scientific phenomena. She is also advised to continue annotating her work and critically review all previous experiments with annotated diagrams to reinforce her logic.

SHELFORD GIRLS' GRAMMAR

YEAR 12

SEMESTER 1 2019

PHYSICS UNIT 3

Teacher: Mr D Belluz

NAME: *Yining Li*

VSN: 152911319

YEAR LEVEL CO-ORDINATOR: Mrs Sarah King

UNIT RESULT: Satisfactory

OVERVIEW:

In this unit students examine the similarities and differences between three fields: gravitational, electric and magnetic. They investigate how concepts related to field models can be applied to construct motors, maintain satellite orbits and to accelerate particles. The production, distribution and use of electricity has had a major impact on human lifestyles. In this area of study students use empirical evidence and models of electric, magnetic and electromagnetic effects to explain how electricity is produced and delivered to homes. Students use Newton's laws of motion to analyse relative motion, circular motion and projectile motion. Students compare Newton's and Einstein's theory of Special Relativity and evaluate the circumstances in which they can be applied.

ASSESSMENT:

Outcome 1:	Analyse gravitational, electric and magnetic fields, and use these to explain the operation of motors and particle accelerators and the orbits of satellites.	Satisfactory
Outcome 2:	Analyse and evaluate an electricity generation and distribution system.	Satisfactory
Outcome 3:	Investigate motion and related energy transformations experimentally, analyse motion using Newton's laws of motion in one and two dimensions, and explain the motion of objects moving at very large speeds using Einstein's theory of Special Relativity.	Satisfactory
Classwork:		Very High

COMMENT:

Sherry has demonstrated an excellent understanding of the concepts studied thus far. She consistently performs at the top of the class but has also made a number of careless errors which Sherry should focus on while preparing for the examination. Sherry has very high expectations regarding her performance in Physics, and while this can be a great motivator, it can also have a detrimental effect. Sherry has identified time management and ensuring that she understands the underlying theory better as areas to focus on in Semester 2.

SHELFORD GIRLS' GRAMMAR

YEAR 12

SEMESTER 1 2019

SPECIALIST MATHEMATICS UNIT 3

Teacher: Ms N Seigel

NAME: *Yining Li*

VSN: 152911319

YEAR LEVEL CO-ORDINATOR: Mrs Sarah King

UNIT RESULT: Satisfactory

OVERVIEW:

This unit involves the study of: 'Functions, relations and graphs', 'Algebra – Complex Numbers', 'Vectors' and 'Calculus' areas of study. Students practise mathematical algorithms, routines and techniques. They should be able to apply mathematical processes in non-routine contexts which require investigative, modelling or problem-solving approaches. The appropriate use of computer algebra systems technology (CAS) is incorporated throughout the course.

ASSESSMENT:

Outcome 1:	Define and explain key concepts as specified in the content, and apply a range of related mathematical routines and procedures.	Satisfactory
Outcome 2:	Apply mathematical processes in non-routine contexts, and analyse and discuss these applications of mathematics.	Satisfactory
Outcome 3:	On completion of each unit the student should be able to select and appropriately use numerical, graphical, symbolic and statistical functionalities of technology to develop mathematical ideas, produce results and carry out analysis in situations requiring problem-solving, modelling or investigative techniques or approaches.	Satisfactory
Classwork:		Very High

COMMENT:

Yining has worked extremely well throughout the semester and has shown competence in all the areas of work covered. She has achieved very good and consistent results on her practice tests. Yining has always made good use of class time and frequently contributed to class discussions. She is a conscientious and reliable student and should be congratulated on her work ethic. Yining clearly enjoys this subject and has tackled each exercise with great enthusiasm and commitment. She is able to work independently and takes pride in work done well. Yining is a friendly and cheerful member of the class.
