Please note the following points:

- Marks for classes will not be available immediately after an assessment or simultaneously for each class in the course. Teachers are juggling a range of different responsibilities and their marking is completed at different times. Please be patient - the guideline for teachers is that marking is done within a week of the assessment, but this is not always possible.
- The mark achieved by your son will be displayed, along with the course average for each assessment. Grades will not be displayed but will be included in reports each term.
- Tasks are generally listed in the order in which they will be completed by students. In some cases, particularly Physical Education, tasks may be completed in a different order due to the nature of the subject.
- We suggest that you will find it helpful to check this portal once a fortnight or so, with your son, to monitor his progress. If you have concerns about assessment results and what they indicate about your son's progress, we suggest that you:
 - discuss the mark with your son - a calm approach is likely to be the most effective
 - consider with him the feedback provided by his teacher on the assessment and
 - agree on how he will work to rectify his errors and improve his achievement.

Ongoing, serious concerns should be addressed initially with your son's tutor and then, if necessary, with the subject teacher.

Pastoral Comment

Mr P W Loudon and Mr D M Gibson

James continues to thrive academically, with excellent results in Physics, Chemistry, French and both Mathematics subjects. While he may be disappointed with his current standing in Literature, we would encourage him to seek and use regular feedback from his teacher as a mechanism for improvement. James has, despite his challenging academic load, been an outstanding contributor to his House, as a House Prefect, through House Duty, House Swimming, and organising public speaking for Queenslea in the House Arts Competition. James has also maintained his strong connections with the School's musical community despite the many aspects of School life that compete for his time. We are delighted to note the warm and positive comments offered by his subject teachers and we feel sure that he is well placed to finish this year on a very positive note. We wish him strength and good fortune in his remaining time at Christ Church.

Dr C Molinari

James is an outstanding student with a quiet and thorough approach to his studies. He has an excellent grasp of the fundamental concepts of Chemistry and is able to apply them appropriately to a range of contexts. He has excelled in each assessment throughout the year and produced a very pleasing examination result. I have been particularly impressed by his positive attitude and willingness to seek feedback and act on it. Continuing to extend himself through regular revision and consolidation using a range of resources will ensure that James is well positioned to achieve success in Semester 2.

Mrs L Curlewis

James has flourished in French this year. Nothing seems to disconcert him, whether it be testing questions in his oral, or a harder than usual listening comprehension. Self-assured but not over-confident, he seeks new challenges and exceeds expectations with the quality of his work. James uses a wide range of vocabulary and interesting expressions in his written responses, as well as demonstrating an extensive knowledge of grammar. He was at his best in his mid-year oral examination, where he inspired the examiner with a fluent interview full of enthusiasm and excellent depth of understanding. James has already achieved the standard necessary to command a top WACE result in French.

Mr K Ly

James continues his cheerful and studious work ethic in the Year 12 Mathematics Methods class. He is a talented mathematics student who has achieved a high level of understanding of the concepts that were covered. His effort has been consistent throughout the semester and this has been demonstrated by his pleasing results in most assessments. I commend him for his contribution to class discussions and for assisting his peers when they are in need of his help. James is capable of continuing his success, but he needs to ensure he takes every opportunity to do so. I wish him all the best for the remainder of the year as he continues to grow and strive for excellence.

Subject Comment

Dr H Rose

James is a capable student who is attentive in lessons and always keen to do his best. Pleasingly, he has been proactive in seeking assistance to clarify his understanding and in obtaining feedback on his work. James's result in the mid-year examination was excellent and his efforts in the comprehension section particularly strong. This indicates that James is thinking carefully about what is being asked in questions so that he may demonstrate thorough reasoning in his answers. In the lead up to the WACE, James must ensure that he remains steadfast in his efforts. As the concepts covered will become more abstract in nature, it will be imperative that he continues to be forthright in making the most of all learning opportunities.

Pastoral Comment

Mr P W Loudon and Mr D M Gibson

James is to be commended for his outstanding efforts this semester. His level of personal organisation is exemplary and he is a cheerful and reliable member of our tutorial group. Academically, James continues to achieve at an extremely high level and, while he narrowly missed out on an Academic Merit Prize, there is ample evidence to suggest he has thrived on the challenges presented by Year 11 studies. The work practices noted here indicate that he is a very effective learner and it is therefore disappointing to note that James continues to elicit comments about distracting himself and others during class. Beyond the academic domain, James has continued to be involved in an extraordinary range of activities and there is no doubt that he makes a significant contribution to the cultural and artistic life of the School. He has been major contributor to House activities, participating in House Duty and House Swimming, as a public speaker in the House Arts Competition and as an effective Peer Support leader. We would encourage James to draw satisfaction from the many activities in which he involves himself during his final year at Christ Church. We are sure he will be successful.

James should be very pleased with this report that reflects a very positive approach to all aspects of school life. I am confident his continued best efforts through Year 12 will see him conclude his time at Christ Church superbly. It has been a real pleasure for me to see James grow and develop over the years. I wish him every success for 2016 and beyond.

Subject Comment

Mr D Marshall

James is a highly motivated, student with the capacity to achieve excellence in Chemistry if he works hard. His skills and conceptual understanding have steadily improved over the course of the year and as a consequence his assessments are now at a very good standard. While his examination mark is good, the paper exposed areas that James needs to work on, particularly his written answers. He should make this a focus of his study in Year 12 and to continuously familiarise himself with the types of questions that are asked in examinations and to understand the depth of knowledge required. He will do well next year if he maintains his positive attitude.

Mrs L Curlewis

Subject Comment

James has all the attributes necessary to become a successful linguist. He is strongly motivated for high achievement; he shows a competitive spirit and a thirst to learn. He has again excelled in the Alliance Française examinations, placing himself amongst the top students in the State for French. James's strongest areas remain his writing and reading skills. In his written work, James conveys relevant information, expressing ideas and opinions across a range of topics. He does the same in his oral interviews, engaging the audience and responding in depth with his opinions. It has been a pleasure having a student of James's calibre in the class.

Mr S Hunn

James is an enthusiastic student of Literature who has produced some sound assessment work throughout the course of the year. He is a frequent contributor to class discussion and debate and is developing good analytical skills. James will have been a little disappointed with his examination performance. He can build on this next year by ensuring that he practises answering past examination questions against the clock, as the end point of his revision program.

Subject Comment

Mr K Ly

James is a conscientious and diligent student who has achieved a high level of understanding of many of the concepts covered in Year 11 Mathematics. His efforts have been consistent all semester by demonstrating excellent results in all assessments. However, he must ensure he takes extra care and check his solutions to avoid making careless mistakes. Furthermore, James needs to be reminded to concentrate on his work and resist the urge of distracting his peers and playing with his iPad. James is capable of improving on his success in Year 12 Mathematics Methods if he heeds this advice. He is commended for achieving a High Distinction in the Australian Mathematics Competition, which is a testament to his mathematical ability.

Confident learner

Demonstrates perseverance	Usually
Makes a positive contribution to class activities	Always

Independent learner

Completes all work to the best of ability	Always
Displays initiative	Usually
Seeks and uses feedback constructively	Always

Collaborative learner

Is considerate of others' right to learn	Always
Listens actively	Usually

Ready to learn

Brings completed homework to class	Always
Is ready to learn	Always
Uses class time efficiently	Usually

Mathematics Specialist ATAR Year 11

Learns from mistakes by making corrections	Usually
Sets out work appropriately	Usually
Uses calculator effectively	Always

Subject Comment

Mr K Lim

James has displayed a keen interest in the subject. He has shown great ability towards understanding new concepts and solving challenging problems. The High Distinction he received in the Australian Mathematics Competition is further testament to his mathematical ability. On the other hand, he has been overconfident at times and let himself down by a lack of attentiveness in class through inappropriate use of his iPad. James should guard against complacency and be more focused in class if he wishes to achieve excellent results that are commensurate with his capability.

Confident learner

Demonstrates perseverance	Always
Makes a positive contribution to class activities	Always

Independent learner

Completes all work to the best of ability	Always
Displays initiative	Usually
Seeks and uses feedback constructively	Always

Collaborative learner

Is considerate of others' right to learn	Usually
Listens actively	Usually

Ready to learn

Brings completed homework to class	Usually
Is ready to learn	Always
Uses class time efficiently	Usually

Physics ATAR Year 11

Communicates ideas effectively in written form	Always
Completes practical work and analyses results appropriately	Always
Sets out working in calculations clearly and logically	Always

Subject Comment

Mr J Marai

James has considerable natural ability in Physics which, when combined with his diligent approach to his studies, allowed him to excel in the subject. He has demonstrated an excellent mastery of the Physics principles covered but most importantly has been able to articulate his ideas clearly and thoroughly and apply them correctly in more complex scenarios. His practical reports were always of a high standard and he clearly took pride in his work. James has created the best possible foundation for developing his understanding of Physics further.
