

Novita Carolina

House: De Grey

Year 12

Semester 1 Report, 2017

Tutor's Report

Novita is a polite and quiet member of the Tutor Group. Academically, she has attained excellent results this semester. Novita is encouraged to reflect on suggestions made by her teachers to support further improvement. She is to be commended for her participation in a variety of cocurricular activities. Novita can be proud of her contributions to the School and should be very pleased with her achievements. I wish her all the best for Semester 2 and her future endeavours.

Mr T. Davies

School Values

Respect:

We value sensitivity and concern for the wellbeing of others. This means being caring, compassionate and honest. We learn in a safe and supportive environment, while respecting our natural environment and cultural heritage.

Excellence:

We encourage the pursuit of personal best in all areas and respect the achievements of others. We have a lifelong commitment to the quest for knowledge.

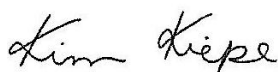

Inclusion:

We acknowledge that we are a diverse community and must have regard for the feelings, wishes and rights of others in everything we do. We value diversity of cultural expression.

Justice:

We are committed to participation and citizenship. We promote democratic processes and social justice. We believe in fairness and equity for the achievement of a just, responsible society.

Percentage attendance: 82

Principal: Mrs Kim Kiepe

Activities

Interhouse Cross Country
Interhouse Swimming
International Committee
Languages Club
Photoshop Club
Sacristan

Grading Criteria

The following grading criteria is being used:

- A Excellent achievement
 - B High achievement
 - C Satisfactory achievement
 - D Limited achievement
 - E Inadequate achievement
 - NA Not applicable
-

Please note:

Achievement strands reflect the assessments covered during Semester 1. These results may alter based on the number and complexity of tasks in each category that will be completed in Semester 2.

Interim grades and progress marks indicate achievement to date and are based on a sample of the whole course. Final grades at the end of the year may differ because different and/or more complex aspects of the course may be assessed during Semester 2 and/or because the weighting of Semester 2 work may be greater than that of Semester 1 work.

English ATAR

Teacher: Ms M. White

Students have considered the representation of Australian Cultural Identity in a range of texts, explored the notion of Cultural Otherness in Documentary film and Docudrama and developed an understanding of the concept of genre by looking at a selection of dystopian texts. Students have had the opportunity to further develop their analytical, creative, critical thinking and communication skills by completing a range of assessment tasks which have included essay and short answer responses, creative composition and oral presentation.

Achievement

Demonstrates organisational skills	✓			
Uses class time effectively	✓			
Works collaboratively	✓			
Works independently when required	✓			
Works to the best of her ability	✓			

Comment

Novita is a hardworking and talented student of English. She has an excellent writing style and her responses to questions are well argued and lucid. I encourage Novita to continue practising writing under timed conditions on a regular basis and to work through past exam papers. This should enable Novita to build upon her examination mark and levels of achievement next semester.

Grade Distribution	A = 32	B = 36	C = 32	D = 1	E = 0

Japanese as a Second Language ATAR

Teacher: Dr S. Ainsworth

Working within the themes of the individual, the Japanese speaking communities and the changing world, students acquired the skills necessary to talk in depth about themselves as young travellers overseas and in Japan. Through the focus topics of travel and part time jobs, students explored issues and described travel preparations including; what to take, booking accommodation, transport options, local attractions, tales of travel and described part time work. Students gained deeper cultural understandings through comparing and contrasting life in Japan and Australia, both traditional and modern. They also examined typical problems impacting the success of a trip, such as lost property and staying healthy. Students also had the opportunity to improve their oral skills by participating in weekly oral sessions with language assistant staff.

Uses class time effectively	✓			
Works collaboratively	✓			
Works independently when required	✓			
Works to the best of her ability	✓			

Comment

Novita continues to work hard and her listening and writing sections of the examination were very good. She is encouraged to work regularly on homework writing tasks to enrich her range of expression and receive appropriate feedback. Novita's oral skills are strengthening. This was evident in her oral assessment where she demonstrated very good accuracy levels and conversational skills. Novita achieved sound results in the reading comprehension section of the exam. She is encouraged to read questions carefully and ensure her responses are sufficiently detailed to achieve the full possible range of marks. Novita's enthusiasm for the language and high level of commitment make her a delight to teach.

Grade Distribution	A = 4	B = 0	C = 2	D = 0	E = 0
---------------------------	-------	-------	-------	-------	-------

Mathematics Methods ATAR

Teacher: Mr C. Croft

Students have continued their study of calculus by establishing the derivatives of exponential and trigonometric functions and their applications, as well as some basic differentiation techniques and the concept of a second derivative, its meaning and applications. Students can employ integration, both as a process that reverses differentiation and as a way of calculating areas, and can use the fundamental theorem of calculus as a link between differentiation and integration. Students have been introduced to discrete random variables and can model random processes involving chance and variation, with a purpose to develop a framework for statistical inference.

Uses class time effectively	✓			
Works collaboratively	✓			
Works independently when required	✓			
Works to the best of her ability	✓			

Comment

Novita has worked quietly and conscientiously throughout the semester. Her results have been very pleasing and her examination result, while not quite as high as I had hoped to see, showed a clear understanding of the vast majority of the work. It is important that she now follow up on any areas of difficulty. Novita's marks in the Calculator Assumed Section were noticeably lower and I encourage her to address this issue in the coming semester. With continued effort I would expect her to maintain her current standard of an A grade.

Grade Distribution	A = 19	B = 22	C = 19	D = 1	E = 0
---------------------------	--------	--------	--------	-------	-------

Mathematics Specialist ATAR

Teacher: Mr D. Ramsay

This course provides opportunities, beyond those presented in the Mathematics Methods ATAR course, to develop rigorous mathematical arguments and proofs, and to use mathematical models more extensively. Mathematics Specialist Unit 3 contains topics in complex numbers, functions, vectors in both two and three dimensions, vector calculus and systems of linear equations with an emphasis on the use of these concepts in applied problems.

Works independently when required	✓			
Works to the best of her ability	✓			

Comment

Novita is a friendly and committed student who has continued to build upon her results throughout the year. When she encounters difficulties she always seeks clarification and works hard to strengthen her understanding. I encourage Novita to review the polynomial quotient functions section of the examination. She is to be commended on her progress this semester.

Grade Distribution	A = 6	B = 3	C = 2	D = 0	E = 0
---------------------------	-------	-------	-------	-------	-------

Physics ATAR

Teacher: Mr T. Davies

This semester, students have developed a deeper understanding of motion and its causes by using Newton's Laws of Motion and the gravitational field model to analyse motion on inclined planes, the motion of projectiles, and satellite motion. They have also developed an understanding of electromagnetic interactions and applied this knowledge to the operation of direct current motors.

Students have developed this understanding through contexts and investigations of motion and electromagnetic phenomena. They continue to develop skills in planning, conducting and interpreting the results of primary and secondary investigations.

Comment

Novita is a capable student who has achieved very pleasing results. Her Electromagnetism Test 1 was particularly impressive and demonstrated a high level of understanding. Novita is a polite, attentive and cooperative student who applies herself well. She may improve further on these results by paying greater attention to the detail in her work and practising test questions for assessments. Novita's examination mark was encouraging and indicated good preparation.

Grade Distribution	A = 17	B = 7	C = 2	D = 0	E = 0

Religious and Philosophical Studies

Teacher: Rev L. Spargo

Students investigated case studies which highlight the unequal distribution of global wealth and the various religious responses to world poverty. They then explored modern attitudes to Marriage and Marriage Equality, Sexism, Racism, Multiculturalism and Diversity in Australia, Justice and Punishment and Reform in light of a Christian understanding.

Sport

Teacher: Miss S. Radonic

Students participated in one of the following activities on a weekly basis: water aerobics or fit boxing. They also completed athletics trials.
