

Chemistry

Examination Mark	55	Examination Mark Average	61
Semester Mark	63	Semester Mark Average	68
Rank	57	Number	88
Semester Grade	C		

William is a polite and friendly young man and it has been a pleasure teaching him Chemistry over the semester. He has managed to achieve sound results in most of his assessments and should be especially proud of his practical work and investigation. William's result in the examination was lower than expected and has reduced his overall score. His written answers were often lacking in depth and he has struggled with the oxidation and reduction topic in particular. William should focus on improving in these areas and aim to be thoroughly prepared for his in-class assessments during his final semester. William can be confident that with continued effort and application he has the ability to improve and move towards the ATAR Chemistry examination with confidence.

English

Examination Mark	66	Examination Mark Average	61
Semester Mark	71	Semester Mark Average	63
Rank	30	Number	160
Semester Grade	B		

It has been a pleasure to teach William this semester. He is quiet and diligent and brings a thoughtful approach to his work. There have been several highlights for him, as his understanding of concepts and how to apply them has improved. His ability to respond to questions with more clarity means brings greater analytical rigour to his assessments. This is most pleasing and will continue to develop as the year unfolds. I was impressed by William's tutorial on the examination of style in his chosen texts and was pleased with his performance in the Responding section of the examination. Further work in the Composing section will follow this semester. I congratulate William on his solid performance this semester and I look forward to the rest of the year.

Engineering Studies

Examination Mark	88	Examination Mark Average	69
Semester Mark	81	Semester Mark Average	73
Rank	6	Number	23
Semester Grade	A		

William produced a really impressive examination paper which is going to give him an excellent opportunity to excel in the subject. His coursework is also in the 'A' grade category, but William is going to have to be extremely organised and disciplined if he wants to finish off his project in the manner that he would like. It is good to see William continuing this upward trend and really flourishing in Engineering Studies.

French - Second Language

Examination Mark	71	Examination Mark Average	75
Written Mark	67	Written Mark Average	72
Practical Mark	67	Practical Mark Average	75
Semester Mark	67	Semester Mark Average	73
Rank	13	Number	19
Semester Grade	B		

William is a conscientious student and I am pleased to see him obtain a good result that places him in the 'B' grade range. In order to improve his marks he must continue to write out responses to the multiple ATAR French questions and topics he has been given and to hand them in for correction. By then rewriting this corrected material he will find it easier to progress because the vocabulary and grammatical structures will be better retained. I am sure that William will continue to be as diligent in Semester 2 and that he will obtain a satisfying result in the French ATAR examination. William is always most polite and pleasant and I really appreciate his quiet sense of humour. He has my best wishes for the future.

Mathematics Methods

Examination Mark	58	Examination Mark Average	63
Semester Mark	77	Semester Mark Average	70
Rank	35	Number	96
Semester Grade	B		

William is a dependable and hardworking young man who has achieved some pleasing results so far. He was understandably disappointed with his recent examination score which was well below the high standard that he has set for himself. This suggests that more thorough preparation was needed and I would encourage him to make this a priority during Semester 2. It has been enjoyable teaching William and I wish him every success next semester.

Physics

Examination Mark	70	Examination Mark Average	66
Semester Mark	78	Semester Mark Average	71
Rank	18	Number	58
Semester Grade	A		

William's examination result was below expectations. He will need to analyse his revision programme and ensure it covers all topics equally and adequately. William is a determined student who always applies himself well. I am confident we can make minor adjustments to his approach to examinations that will see William achieve at a level commensurate with his ability. He deserves congratulations on a productive semester.

Year 12 Riley

Sports

2nd VI Volleyball

2nd XI Hockey

William is a dedicated student with a clear focus on his goals and desired destination upon leaving Hale School. This clarity has led to an organised approach to his studies and a mature work ethic that is to be commended. It was unfortunate that William achieved a disappointing Mathematics Methods examination result as his work up to that point in the subject had been outstanding. I am confident that he will ensure that this was an outlier and his future assessments will be up to his usual standard. William should be extremely proud of his fantastic Engineering Studies result as this is a true reflection of his ability in the subject.

William has been a visible and enthusiastic presence in Riley House this year. The calm, yet supportive way he interacts with teammates in House sport has been a wonderfully steadying influence on his peers. His dependable and resolute nature are incredibly valuable traits that will benefit him greatly in the future. I am sure William will gain significant enjoyment from the Riley House events upcoming in Term 3.
