SEMESTER  
GRADE

A

Teale has had a very good first semester in Chemistry. She has always approached her studies with interest and enthusiasm. Teale should be very pleased with her examination result which was built on very good assessment results all semester and meticulous preparation. She has proven herself to be an excellent and highly motivated student of Chemistry. I am confident, that despite her added responsibilities, she will continue to be very successful next semester.

70

SEMESTER  
MARK  
AVERAGE 65

67

SEMESTER  
GRADE

B

Teale is an engaged student who, when prompted, will consistently offer sophisticated and interesting ideas towards class discussion. She is a well-liked member of this class who often takes a proactive and positive role in small group work. Recent exam results indicate that Teale should focus her revision on honing her skills in the composing section of this course. I encourage Teale to incorporate more metalanguage and a varied vocabulary into her written analysis. Keep working hard, Teale.

**GEOGRAPHY ATAR UNITS 3 AND 4**  
*Tes Lynch*

EXAM MARK  
AVERAGE 67

74

SEMESTER  
MARK  
AVERAGE 70

76

SEMESTER  
GRADE

A

Teale is continuing to show herself to be a very able geographer. She regularly achieves high marks and demonstrates good understanding. Considering all that she is juggling Teale is doing very well. I believe she is capable of achieving consistently over 80. Some time spent on practising written responses and working to improve her written explanations would help. Teale needs to focus on completing the class work she will miss over the July holiday and she should use the work on One Note and her textbooks to do so. She knows she can email me or Mrs Mendano if she requires help with this. Teale is a delight to have in the class.

## ITALIAN ATAR UNITS 3 AND 4

Teale is progressing well in Italian, performing very well in her class assessments. She has a good overall knowledge of Italian, but needs to focus on the more intricate details in her writing. Teale has developed good oral responses and is a confident speaker; however, she needs to slow down in her delivery as she often "eats her words". This leads to mispronunciation and misunderstanding on the behalf of the listener. Teale is a conscientious student and I look forward to her consolidating next semester. I commend Teale on the active role she takes in class discussions; she is a real delight to have in class! Bravissima, Teale! Keep up the fabulous attitude.

SEMESTER

GRADE

69

78

A

Teale is a pleasure to teach, with her determined and positive approach. She is a capable mathematics student and has achieved well in all assessments this semester, though her examination showed some areas where she needs to consolidate her learning. Teale always gives of her best and has the ability to persevere well with the work she finds difficult to grasp, which has helped her to achieve a good level of understanding of the course material. Teale now needs to continually review and revise and keep up her determined and positive attitude for the remainder of the year.

## PHYSICS ATAR UNITS 3 AND 4

*Rowan Walsh*

EXAM MARK

AVERAGE 70

SEMESTER

MARK

AVERAGE 73

SEMESTER

GRADE

60

65

B

Teale worked hard in Physics. In the early part of the semester, she performed quite well in assessments. However, as she got busier, her marks fell. With determined effort, I believe that Teale was capable of achieving a B grade in Physics, but I understand why she has made the decision to withdraw from the subject and concentrate on her other subjects. I wish Teale well in her future endeavours.

## RELIGIOUS STUDIES

*Polly Durey*

Teale is a delightful student who always engages well during discussions. Her knowledge and understanding of the religious and ethical issues raised were reflected in her good assessment results. Well done.

#### LINK TEACHER'S COMMENT

*Dionn Godinho*

Teale continues to be a gregarious member of our Link, and she has established herself as a kind and capable leader within the wider school community. One of Teale's most striking traits is her good cheer and winning smile, and this ensures that her interactions with staff and students alike are always warm and positive. Next semester will be another busy one for Teale, involving a number of overseas trips, and I hope that she thoroughly enjoys all of these amazing opportunities.

#### PRINCIPAL'S COMMENT

*Mrs Lynne Thomson*

It has been a big year for Teale. She can be immensely proud of the recognition of her considerable talents on a nation-wide basis. Exciting experiences are ahead and I wish her well as she represents Australia overseas. At school, Teale is a positive and enthusiastic member of our community and a very good leader. She has taken on the role of School Prefect in a mature and thoughtful manner. In a busy schedule, Teale has also worked hard and focused on her studies. She has achieved many strong results and is close to achieving even more A grades. This should be one of her goals for Semester 2. Congratulations on all that you have done and achieved, Teale.

#### GRADE DESCRIPTORS:

## REFERENCE

### TEALE LYON

I have known Teale Lyon for six years. She commenced at St Mary's Anglican Girls' School in Perth, Western Australia, in Year 7 (2012). Teale is about to complete her Year 12 studies and graduate from high school.

Teale is a very capable, highly motivated and diligent student who has achieved many excellent grades and marks over her years here at St Mary's. Particularly impressive are her A grades in Chemistry, the rigorous Mathematics course, Mathematics Methods, and in Geography this semester. Teale has also achieved high B grades in Physics and Italian. Her Semester I marks indicate that she is on track for an ATAR of at least 97.

Teale has the patience and ability to work through problems to come to solutions, indicated by her involvement over the years in the extension Mathematics classes, and being involved in challenging competitions such as the Australian Mathematics Competition, (Distinctions), the Mathematical Olympiad, Mathematics Challenge for Young Australians and the Have Sum Fun competition. In Year 7, Teale was in the top four students in the State in the Australian National Chemistry competition, and received an award in the National History Challenge in the State category. From Year 9 to Year 12, Teale has achieved extremely well in the Australian Geography Competition, resulting in representing the State in Year 11 at Geography's Big Week Out on North Stradbroke Island, and then being chosen to represent Australia at the 2017 International Olympiad (iGeo) in Belgrade, Serbia. Teale is also a self-starter who can work well both independently and as part of a group. She can be proud of her academic achievement and the positive and well-organised manner in which she approaches her studies.

Teale's ability in problem solving, as an entrepreneur and leader came to the fore in Year 10 in her Creating Apps elective subject. She worked with three peers as part of a group they named Vocabulary Voyager. As a group, they identified a community problem and they chose literacy testing for NAPLAN in the primary years. They researched, planned and designed the code for their app and pitched their idea to experts. Teale was most definitely the group motivator, giving confidence to all that they could complete the tasks by the deadline, even when it seemed impossible. She assisted with initial ideas for the app and the prototype sketch. Teale created the pitch video and PowerPoint and submitted them by the deadline. Her group went on to win the WA 2015 "Search for the Next Tech Girl Superheroes" competition. This in turn led to the group being invited to Sydney to launch the following year's competition as ambassadors, and being mentored by executives from the Avanade organisation, as well as a number of other awards:

- Top 1% in Global Technovation Competition - 2016
- 2017 Trailblazers in Technology awarded by Engineers Australia at STARwards event.
- Best presentation at 2016 Global Game Changers Awards

CRICOS Number 00454C ABN 40 685 613 219

- 2<sup>nd</sup> Place in Young ICT Explorers Competition 2016
- Volunteering and presenting at Dad/Daughters Superhero Daughter Day - 2017
- Coderdojo Ambassadors – 2016-2017
- Presenting at Scitech at Student-Led TeachMeet - 2016
- Discussed Importance of Women in Technology to over 100 Bankwest Employees – 2016
- Presented the App in Sydney to large technology Industries such as Google, Vodaphone, Avande, Apple and HP – 2017
- Sponsorship to visit San Francisco in August 2017 to present Vocabulary Voyagers App on a Global Scale.

In the life of the school, Teale has demonstrated initiative and commitment. She has been involved in interschool sporting teams in a range of sports, including athletics, netball, volleyball, water polo, basketball and football. She fulfilled the role of her house sports captain in Year 8 and in Year 11. In recognition of her involvement across a range of activities, Teale was awarded the Principal's Prize for All Round Contribution to the School in 2016, and was made a School Prefect this year. She was also involved in the Technology Committee last year, which assisted other students with solving technology problems when the School introduced a one-to-one laptop programme. The Technology Committee also ran classes for residents in a local aged care facility to improve their technology skills. In addition, in 2017, Teale has assisted at the coding club created by another team member, teaching younger students to code and hopefully spark innovation in them. This year she is a member of the Almerita (school magazine) Committee.

All students are required to complete a minimum of 20 hours of community service in Years 10 and 11, and Teale has completed close to 30.

Her bubbly and can-do attitude sets a fine example for other students. She is highly personable, cheerful and thoughtful, with a ready smile and excellent social skills. She has shown herself to be caring, thoughtful and compassionate.

I have every confidence that Teale will be successful in her university studies and a committed professional young woman in whichever field she follows. Indeed, her talents, initiative and ability across a number of areas give her a skill set that would make her a highly valued contributor in any area requiring creative thinking, innovation and intellect. I have no hesitation in recommending Teale.

TO WHOM IT MAY CONCERN

**Applicant:** Teale Lyon

Teale has been a student at St Mary's Anglican Girls' School since she began in Year 7 in 2012. During her time at St Mary's she has been an outstanding role model for her peers; she has approached her learning in a mature way and has proven herself to be a self-motivated student who embraces opportunities.

#### **Academic**

Teale is a determined student who approaches her studies with enthusiasm and interest. In her final year of schooling she selected to study a range of academically rigorous subjects including Chemistry ATAR Units 3 and 4, English ATAR Units 3 and 4, Geography ATAR Units 3 and 4, Italian ATAR Units 3 and 4, and Maths: Methods Units 3 and 4. Teale has performed consistently at a high standard at school and she continues to focus on improving her results further. Academically, her talents have been recognised at both a state and national level. In 2016, Teale was also awarded a Silver placement at the Australian Computational and Linguistics Olympiad. This competition requires students to develop strong problem-solving skills and their critical thinking. Teale has further shown her strengths in this area with her extensive achievements as a tech entrepreneur. Through her innovation and continued development of an app to assist younger Australians in developing their literacy skills, Teale has received many awards and ongoing opportunities. This includes winning the National Search for the Next Tech Superhero Competition and impressively being placed in the top 1% of competitors in the Global Technovation Competition in 2016. Her involvement in these competitions, as well as many others, has allowed Teale to further hone her skills relating to inquiry, as well as her public speaking ability. Teale has presented her app to industry leaders from large technology industries such as Google, Vodafone and Apple, which is an experience that is not often afforded to individuals of her age. In addition to these impressive achievements, this year Teale was selected to represent Australia at the International Geography Olympiad in Serbia. Teale is a student of many academic talents and one who truly reflects the 21<sup>st</sup> century skills that will ensure her continued success in the future.

#### **Leadership**

In her final year of school Teale was elected by her peers and the staff at St Mary's to the leadership role of School Prefect. This role requires Teale to carry out a range of different responsibilities, with a primary responsibility of initiating and engaging in community-building activities with younger year groups and assisting with the organisation and supervision of various activities. Teale has proven herself to be an inspiring and innovative leader who is an exemplary role model. She has shown a genuine interest in the students in the younger years and has been a key to developing a range of new initiatives. For example, Teale initiated a time capsule activity to allow students in Years 7 and 8 to reflect on their time at St Mary's. She approached various staff for approval, spoke to each year group about the task, prepared the necessary resources and oversaw the collection of the materials.

The activity itself was fully embraced by her younger peers and is now set to become an ongoing tradition at the School. It is clear that Teale has great leadership potential and she will no doubt continue to shine as she progresses through her tertiary studies.

#### **Extracurricular**

Teale has enthusiastically given her all to her extracurricular commitments and has participated fully in all the opportunities presented to her. In her time at St Mary's, Teale has engaged herself in a wide range of extracurricular activities. In particular, in her final years at School she involved herself in interschool cross country, netball, football, volleyball and water polo. Additionally, she is been awarded Duke of Edinburgh's Bronze Award, been involved in the St Mary's Surf Team and also regularly participates in our annual Creative And Performing Arts Festival. In acknowledgement of her strong commitment to the School, it is not surprising to learn that she was awarded the Principal's Prize for All Round Contribution to the School in 2016. This prize is awarded in acknowledgement of a student's commitment to the School and their involvement in school and extracurricular activities.

#### **Personal**

Teale is a confident and impressive young lady who has demonstrated strong organisation skills and determination. She is highly driven to succeed and has demonstrated the ability to overcome challenges presented to her. I have no doubt she will achieve great success in future years and that she will leave her mark.

I would highly recommend Teale and I would be happy to speak further about her, should you have any questions or require comment or clarification.

Yours sincerely

Rebecca Watts

## These WA school kids are taking their bright idea to Silicon Valley

**Bethany Hiatt**

Monday, 24 October 2016 3:20AM

St Mary's pupils Delaney Eastabrook, Teale Lyon and Kira Molloy are on their way to San Francisco. They have not even finished school yet, but these Year 11 students are off to Silicon Valley to pitch an app they created.

The St Mary's Anglican Girls' School students designed the app "vocabulary voyagers" to help primary school students improve their literacy skills by playing games that focus on vocabulary and spelling.

Teale Lyon, Kira Molloy and Delaney Eastabrook said they were inspired to produce the app after national NAPLAN results showed little improvement in reading scores.

The girls' app design won the secondary school category of the Search for Next Tech Girl Superhero competition run by the not-for-profit Tech Girls Movement. The students will spend a week visiting technology companies in the US next year and will pitch their app at the University of San Francisco.

St Mary's head of technology and enterprise Michelle Fitzpatrick, who coached the girls, said the free app had already had more than 3000 downloads.

"They had no app development experience 14 months ago," she said. Computer coding is a compulsory subject at St Mary's from kindergarten to Year 10.

# Serbia-bound Karrinyup geography student knows lay of the land

March 7th, 2017, 01:00AM Written by Kate Leaver [Stirling Times](#)  
**NEWS**

A St Mary's Anglican Girls' School student with a passion for geography will represent Australia at the 2017 International Geography Olympiad in Serbia this August.

Teale Lyon (17) who was named the top female geography student in WA in the Australian Geography Competition in December, will travel to the International Olympiad for the best 16 to 19-year-old geography students from all over the world.

The competition consists of three parts; a written test, a multimedia test, and fieldwork with geographical analysis.

Teale said she was looking forward to the "once in a lifetime experience".

"I am honoured to be representing Australia in Serbia, I cannot wait to learn and experience another part of the world," she said.

"...I am looking forward to Serbia and meeting other geo-minded students from the other 44 different countries."

The 14th International Geography Olympiad will run from August 2-8.
